

How to Change the Windows 10 Language

If you are a user who prefers one language over another, it may be a good time to change the language on Windows 10. This wikiHow will teach you how to do so. Go to Settings > Time & Language > Region & Language.

Method 1 of 2:

Through Settings

1. Go to Settings > Time & Language > Region & Language.
2. Click on **+ Add a Language**.
3. Choose the language you want to add.
4. Click on the language, and click on **Options**, then click **Download** under **Download Language Pack**.
5. **Wait**. The download usually takes a few seconds, but may take longer based off of internet speed.
6. Click on the language, and click on **Set as default**. This will change the display language.
7. **Restart your computer**. The display language will be noticeable after a restart.

Method 2 of 2:

Through Control Panel (Old Versions)

1. Go to Control Panel > Clock, Language, and Region > Language.
2. Click on **Add a language** at the top.
3. Choose the language you want to add.
4. Click on **Options** by the language you want to add.
5. Click on the button that says **Install display language**.
6. Click on **Make this the primary language**.
7. **Restart your computer**. The display language will be noticeable after a restart.
