

# How to change video speed on Camtasia Studio

To change the video speed or change the voice, we can do it on Camtasia Studio.

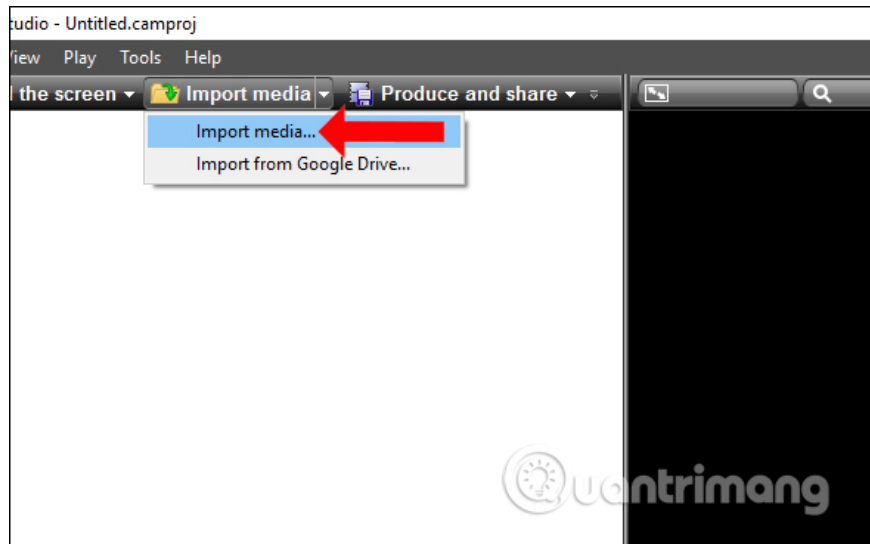

Camtasia Studio is an effective video capture and video editing software. This tool will help you change video content, insert effects, insert 360-degree logos, etc. Users can also change the video playback speed such as fast forward, or slow the video while changing the voice multiplier. objects in video, right on Camtasia. The following article will show you how to change the video speed, as well as change the voice in the video on Camtasia Studio.

1. How to pair 2 videos into 1 using Camtasia Studio
2. How to adjust video audio on Camtasia Studio
3. How to separate audio, split video by Camtasia Studio

## How to change video speed on Camtasia Studio

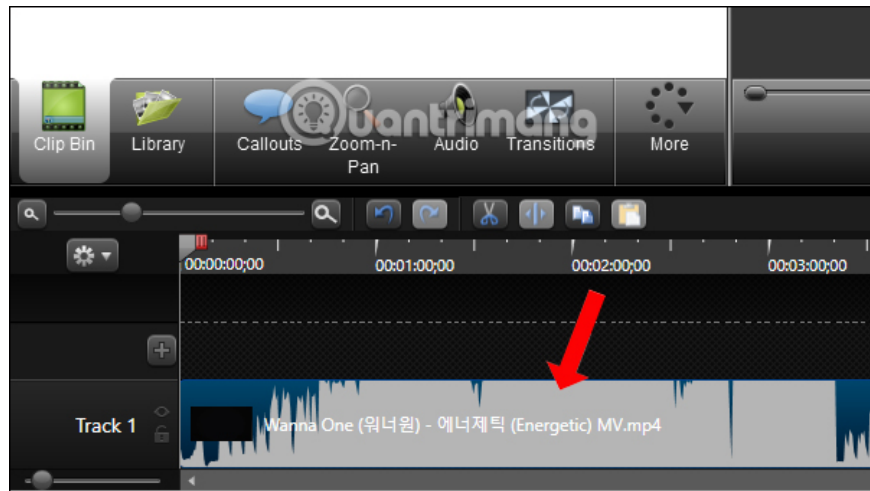

### Step 1:

Users open Camtasia Studio software then click **Import Media** to import videos that need to change playback speed on Camtasia.

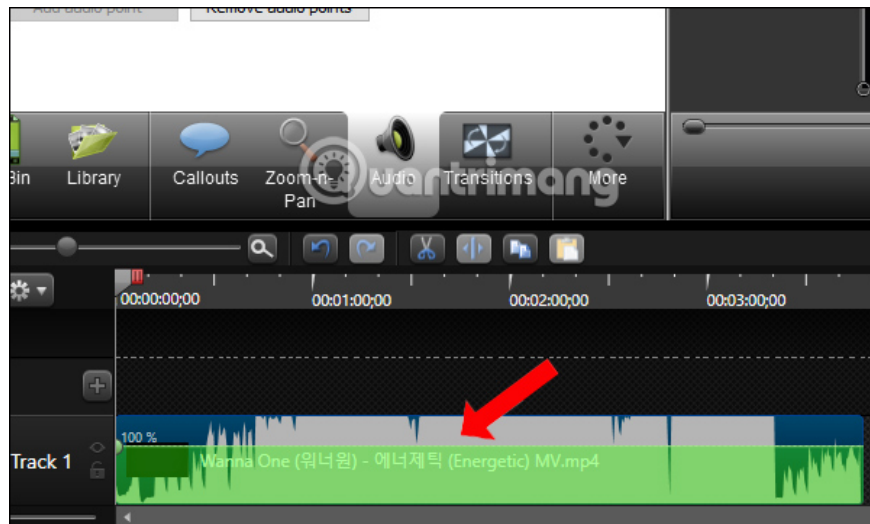

### Step 2:

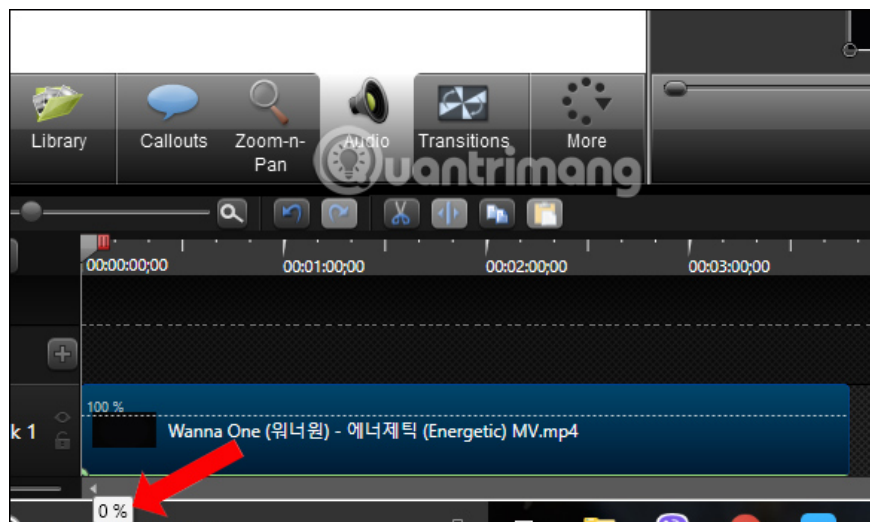

Drag and drop the video file into **Track 1** in the Timeline bar below.

Continue to click on **the Audio section** in the tool group above and will see below Track 1 shows the blue guys with 100% volume.

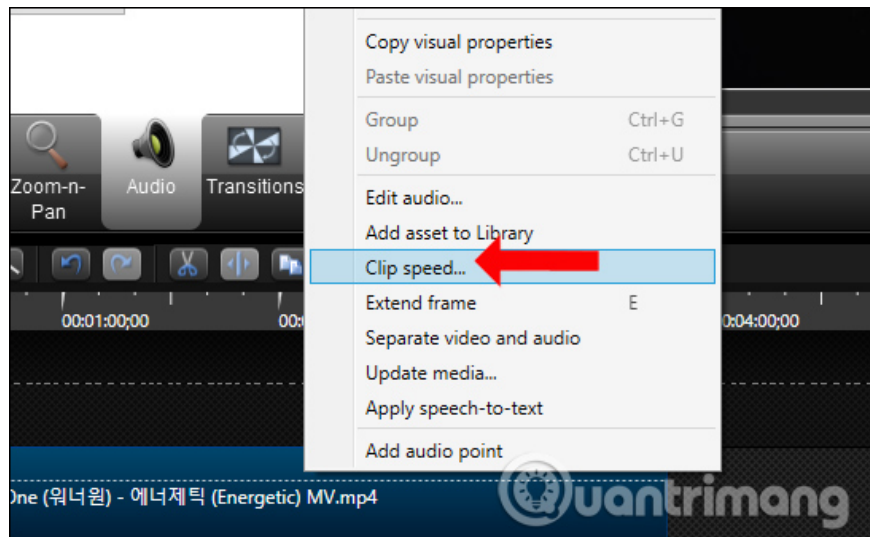

Drag the blue line to the bottom to **0%** to remove all the audio of the video.

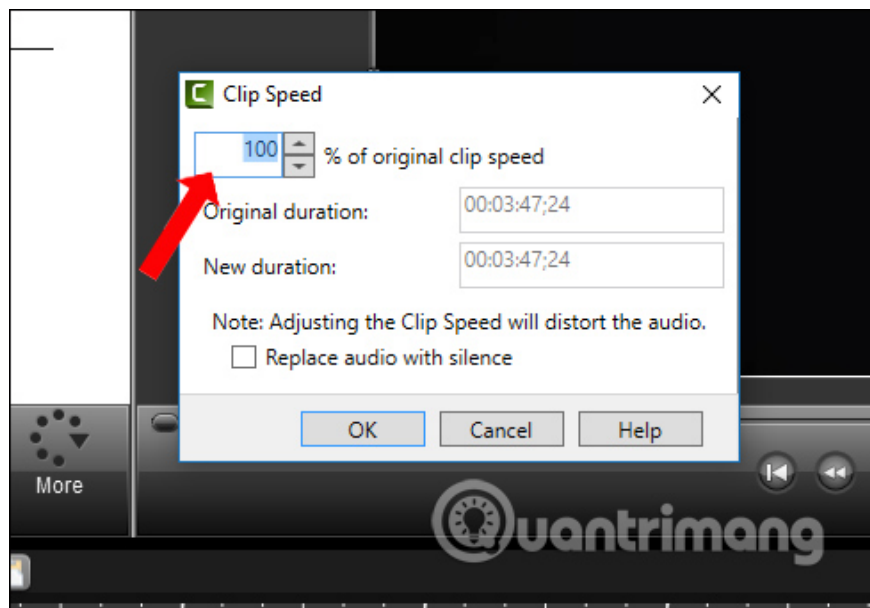

### Step 3:

Continue to right click on the video and select **Clip Speed ??**.

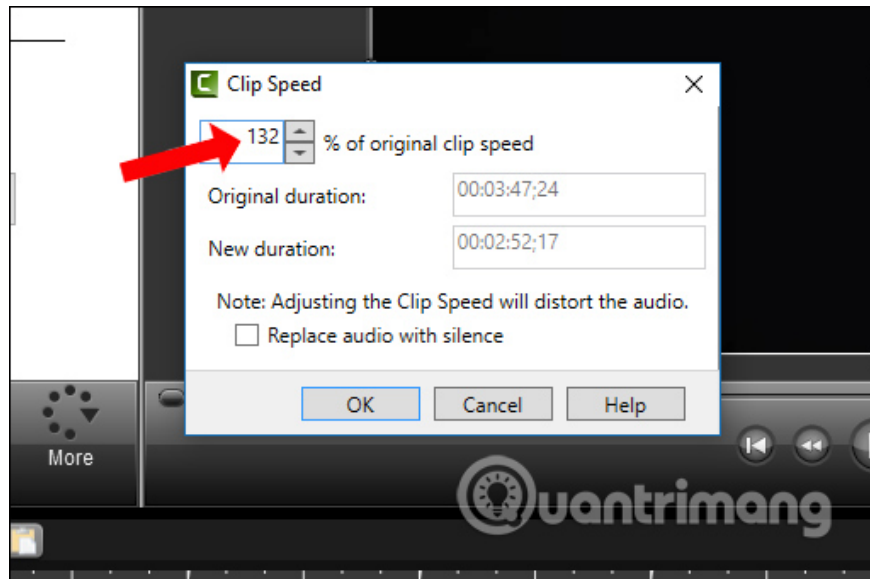

### Step 4:

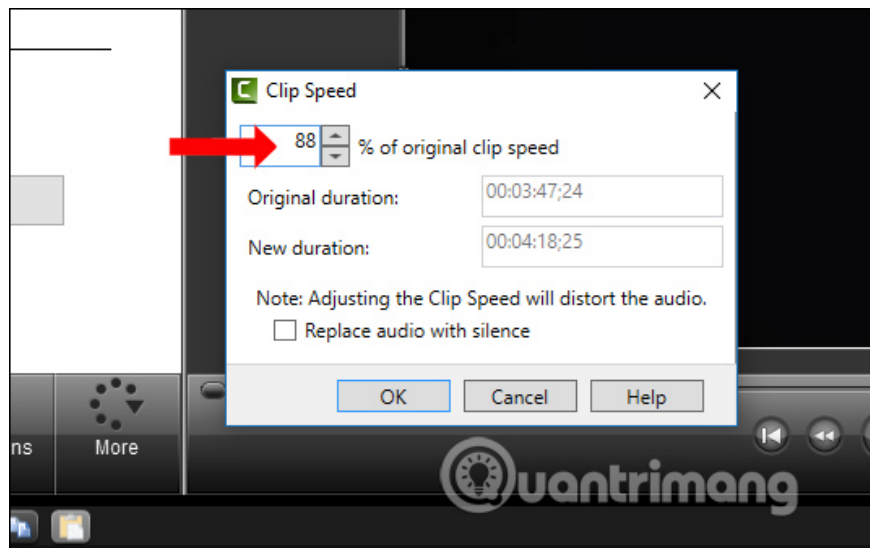

Display the Clip Speed ??dialog box for users to change the speed of the video. The video's default speed is 100% of original clip speed, meaning the audio and video playback speed are normal

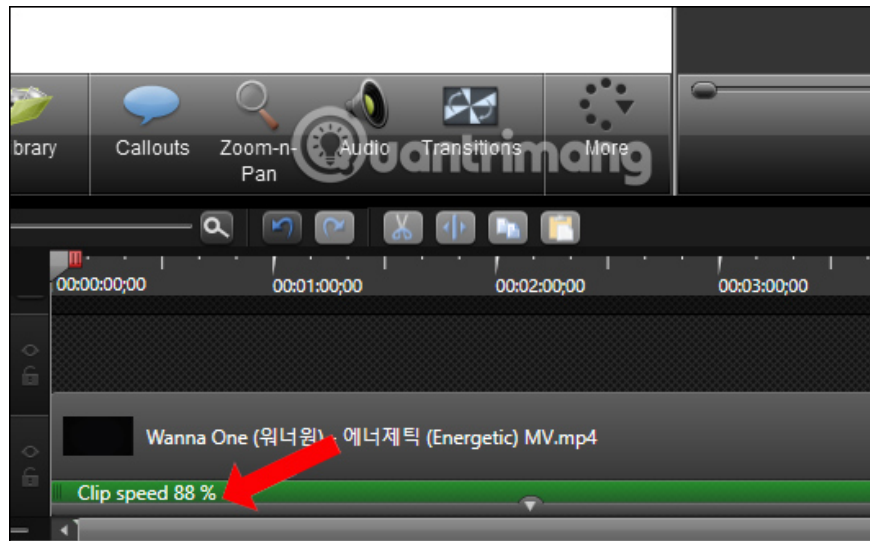

To **fast-forward** video speed you just need to **increase the% parameter** to the level you want. New time to play video (New duration) will decrease compared to the original time of the video (Original duration).

If you want **to slow down the video speed** , **reduce the level to%** . New time of video (New duration) will increase compared to the original time of video (Original duration). Click OK to save the new video speed.

The video in the Track 1 bar below will display the **% increase or decrease in video speed** that the user has applied. You can then watch videos that have increased or decreased in speed and saved as usual.

Changing the video speed on Camtasia Studio is very simple, just change the speed of video playback, increase or decrease compared to the normal 100% level. Changing the video playback speed means that you have changed the character voice in the video.
