

How to chat secret groups on Viber

Viber updated the Secret Chat feature to create a secret chat, allowing users to keep the chat after chatting because the message in the conversation can be canceled after the set time.

The self-destruct messaging feature has updated almost all chat apps like Messenger, Zalo and Viber. This will help users to keep secret from personal messages that they do not want others to unknowingly know. And recently, Viber has brought a new completion feature that is Secret Chat, creating a secret conversation.

Basically this feature is similar to the Secret Messenger feature that automatically destroys the message. However, the point here is that the opponent will not be allowed to forward the message to another conversation. Or we will get a notification if someone takes a screenshot of the conversation.

Guide to secret group chat on Viber

Step 1:

To be able to use this feature, you first need to upgrade the new version to the Viber application:

1. Download the Viber app for Android
2. Download Viber for iOS for free

Now open any conversation on Viber. At the conversation interface, click on **the 3 dots icon** on the top right of the screen, then select **Open secret chat** . Soon, we will receive a notification to those who do not update to the latest version of Viber will not be able to participate in the secret conversation. Click **OK** to continue.
