

# How to check iPhone battery 'zin' or not 'zin'

With just 2 steps, you can check whether your iPhone battery has zin

When using your iPhone for a while, your battery will start to bottle. And then you will have to replace the battery to continue using your iPhone if there is no need for life.

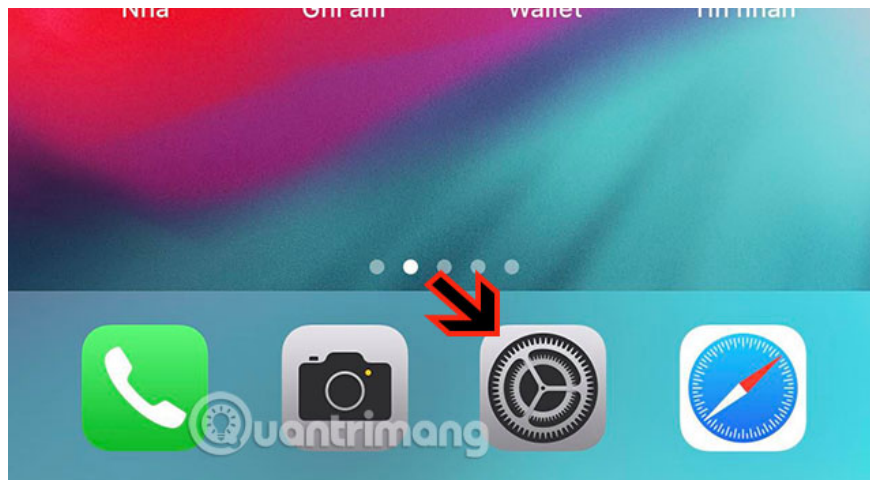

There are many types of iPhone batteries on the market at different prices. And there are many people who do not have any discrimination experience, it is impossible to know which pin is zin and which battery is not "zin".

According to iFixit, Apple now offers a battery warning feature on the iPhone so that you can know whether the battery is genuine or the "battery". However, this feature is only available on new iPhone models, namely iPhone Xs, Xr and Xs Max. Here's how to check zin battery or not zin on iPhone.

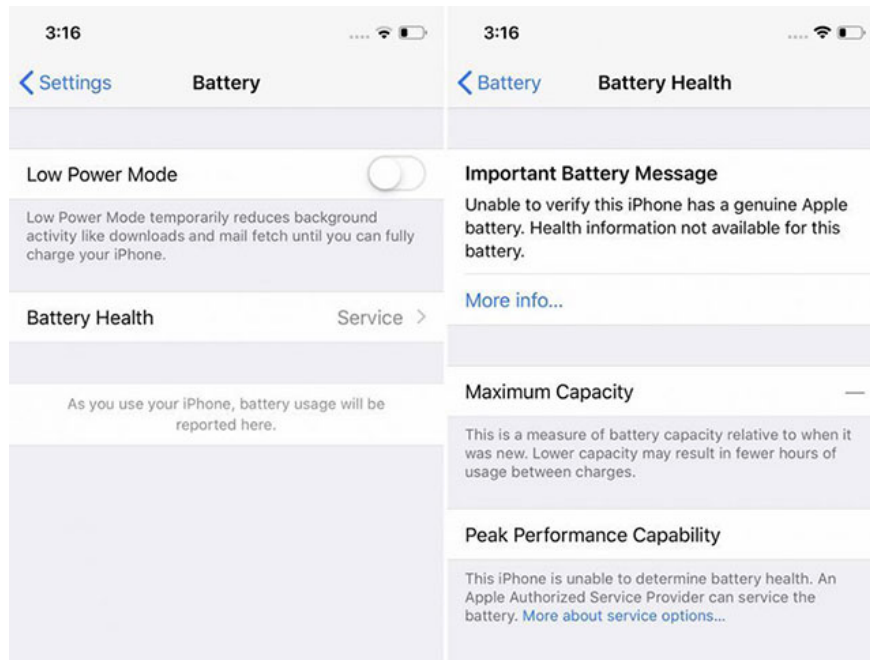

1. Instructions on how to check the iPhone / iPad battery level without jailbreak
2. How to check battery level on Android with Accubattery
3. To use the phone camera to check the remote controller's battery

## Instructions to check the iPhone zin battery or not zin the easiest

To check the iPhone battery status first, click the Settings application.

Then scroll down to select **Pin** > select **Battery Status** > if you see the message Maximum Capacity comes with the battery percentage, this will be the "zin" battery originating from Apple.

If there is a message that **Unable to verify this iPhone has a genuine Apple Battery. Health information is not available for this battery** (Unable to verify this iPhone has genuine Apple battery. Battery status information is not available for this battery), this is not an original Apple battery.

However, it is not a battery that does not have zin notification, it is a "bad" battery, if it is verified and repaired and replaced by reputable components, you can still choose that battery to replace for your iPhone.

To correctly check the battery with this function, your iPhone needs to run from iOS 12.1 or higher. This is one of the simplest ways for you to check the battery quality of old or unknown items.
