

# How to check the battery level of a Bluetooth device on Windows 10

Since the release of Windows 10 version 1809, you can check your battery level faster using the Settings app. Of course, this is only possible if the Bluetooth device supports this feature.

If you have peripherals, such as a mouse, keyboard, stylus or headset, chances are they are connected by Bluetooth and if you want to check the battery level, you usually have to use software or Battery indicator in peripherals.

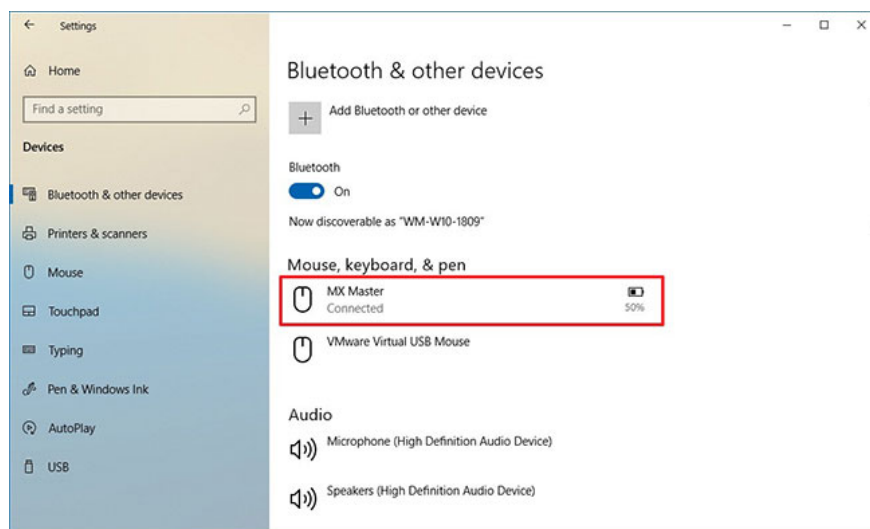

Since the release of Windows 10 version 1809, you can check your battery level faster using the **Settings** app . Of course, this is only possible if the Bluetooth device supports this feature.

In this tutorial, readers will learn the steps to check the battery percentage of mouse, keyboard and other Bluetooth devices on Windows 10.

## How to check the battery life of a Bluetooth device using Settings

To check the battery level of compatible Bluetooth devices, follow these steps:

1. Open **Settings** on Windows 10.
2. Click **Devices**.
3. Click **Bluetooth & other devices** .
4. In the **Mouse, keyboard, & pen section** , you can see a battery percentage indicator on the right.

You can see a battery percentage indicator on the right

On supported devices, the battery level updates every time the device and Bluetooth peripherals are connected.

If you don't see the battery indicator, it is likely that you are not running a supported version of Windows 10 or your Bluetooth device does not support this feature.

Now you can check the battery level of your Bluetooth device easily using the **Settings** app! You can learn more about renaming Bluetooth devices on Windows 10 for easy management.

Hope you are successful.
