

How to choose a computer configuration to play Hyper Light Drifter

Is a Core i3 computer with 4GB RAM a smooth configuration for playing Hyper Light Drifter? That is the question that many gamers are wondering before downloading and installing the game. In the article below, Taimienphi will answer all your questions.

The game Hyper Light Drifter is developed and published by Heart Machine on Windows operating systems. The game tells the story of an anonymous hero's journey to find an antidote with the desire to cure the terrible disease that is ravaging him every day.

Hyper Light Drifter - 2D Action RPG Game on PC

How to choose computer configuration to play Hyper Light Drifter

For some of you, checking the hardware information about the computer you are using is completely simple, but for others it is not. And Taimienphi recommends that you use CPU-Z, a software that gives users exact information about their computer configuration.

- **Download CPU Z** software [here](#).
- Instructions for **checking hardware with CPU Z** [here](#).

Minimum system requirements to play Hyper Light Drifter:

- Operating System (Win): Windows 7 or higher
- CPU (Processor): 1.2 ghz
- RAM (Memory): 4 GB RAM
- VGA (Graphics): 512 Mb Video Memory
- DirectX: Version 10
- Space: 2 GB free space

Hyper Light Drifter is a 2D action role-playing game. Developed in 8-bit and 16-bit graphics in the late 20th century, the game was developed by lead developer Alex Preston as a combination of The Legend of Zelda: A Link to the Past and Diablo. Preston initially launched a Kickstarter for the game, raising approximately \$27,000 to develop it for Microsoft Windows, OS X, and Linux.

Currently, the publisher has only announced the minimum configuration for the **game Hyper Light Drifter** on PC. If your computer fully meets the configuration requirements, you can experience the game well without lag or fps drops.

Recently, the copyright game portal Epic Games Store is releasing a 2D role-playing game for free. Hurry up and **get Hyper Light Drifter for free on Epic Games Store** right before the event ends, the deadline is August 22, 2019.

Road to Eden is also an attractive strategy game on PC. Please see **the Road to Eden PC Game Configuration** here to see if your computer meets the requirements.
