

How to choose a safe, convenient suitcase when traveling far

Every long trip will become more complete and more experienced when traveling with you is a convenient pull suitcase, free to bring the necessary clothes and personal items. However, how to choose a suitcase, note what to choose when buying suitcases is a question of many consumers.

Why should be noted in how to choose suitcase?

Imagine, how tired and uncomfortable your trip will be if the suitcase capacity is too small that you cannot carry the things you want or have to drag heavily. Therefore, knowing the factors in choosing a suitcase is necessary to own a smart and quality suitcase during use, contributing to bringing a sense of comfort to you throughout the trip.

Note in how to choose a suitcase to make your trip comfortable and complete.

Factors to consider in choosing a suitcase

Suitcase material

Choosing to buy travel suitcases on the market today there are two common types of materials: One is a hard-sided suitcase made of high-grade plastic, the other is a soft suitcase made of leather or a soft umbrella fabric. Each type has its own advantages and disadvantages during use:

Suitcase pulls with many different materials.

1. **Hard plastic pull suitcase** : Sturdy design, elegant and luxurious appearance, easy storage of luggage in suitcases even when it rains. However, because it is made of hard plastic, the disadvantage of this type is that it is easy to be scratched during transportation before and after the flight.
2. **Suitcase pulls soft leather or parachute fabric**: The suitcase surface is soft, light weight is not significant, easy to expand the suitcase to accommodate more items. Therefore, it should be considered when loosening suitcases as this can lead to overweight, over size in the aircraft storage compartment. The downside of this type is that it is easy to handle external forces when impacted and difficult to clean when wet.

Suitcase size

Determining the size when choosing a suitcase that suits your needs is essential. A suitcase is suitably sized when it has enough luggage you want to carry and the length of your trip is long or short. Priority should be given to the purchase of suitcase sizes that fit your long-term use needs.

Choose the size of suitcase pulls suitable for use needs.

1. **Short trip:** At this time the amount of costumes and personal belongings for the trip is small, you can choose a suitcase size S (20 inch type). This type can be carried on board, containing valuable objects such as laptops, jewelry, papers, phones, .
2. **The trip lasts from 6 to 10 days:** You should choose a medium-sized suitcase, about size M (22 inch, 24 inch, 26 inch, 28 inch type). This type can help you carry enough luggage, not too small and too big. Using a suitcase size M cannot be carried on board, you must check in your luggage .
3. **Long trips, studying abroad, traveling abroad:** At this time the luggage you need to bring will be a lot, a large size suitcase will be reasonable (29 inch and 32 inch type). When using a large size suitcase, you must check in your luggage.

Refer to suitcase size selection: Compare 20, 24, 26, 28 inch suitcase size.

Suitcase wheels

Whether the suitcase is small or big, the wheel part is also important to help you move more smoothly with the luggage you carry. A broken or broken suitcase wheel will make it move heavier and make you uncomfortable. Therefore, carefully reviewing the quality of the suitcase based on the equally important wheel part. Usually manufacturers will offer two options: 2-wheel suitcase and 4-wheel suitcase.

Suitcase wheels work to balance the weight of the suitcase.

1. **2-wheel** suitcase : Suitable for the capacity of portable suitcases used in short trips and lightweight luggage. This type has the advantage of a longer life span and easy to move on rough terrain, gravel.
2. **4-wheel** suitcase : Suitable for large-capacity suitcases when there is a need to carry lots of luggage. Including single 4-wheel suitcase (designed with 1 small wheel each) and dual 4-wheel suitcase (2 double wheels per corner design). Both types help you move easily with large luggage, saving maximum effort when you just need to push gently in the vertical direction instead of pulling the angle of 45 degrees like a 2-wheel suitcase, suitcases easily rotate 360 degrees. Some types have a gear lock to prevent the suitcase from moving when stopped. However, the disadvantage of this type is difficult to move on rough terrain, the wheel is easy to break, but some manufacturers can remove and replace new wheels.

Hand pull suitcase

It is recommended to choose suitcases with adjustable length of handles suitable for the height of the user, easy to pull on the vertical and orient the suitcase when moving. Pull and pull out the handle several times to check the smoothness, the handle is too loose or too expensive will not be qualified. The handle of the suitcase must also be sure to ensure the safety and durability of the product.

Pull handle helps you easily orient the suitcase when moving.

The material of the suitcase handle should be stainless steel or aluminum alloy. When not in use should close the hand pull back to save area and avoid fractures during the move.

Suitcase anti-theft lock

The fact that suitcases get slashed and stolen is increasing more and more makes users feel nervous during each trip, so a suitcase with anti-theft is the best choice for you. In particular, the most popular line of suitcases that collapse and collapses with a code, significantly improves the disadvantages of the previous zipper lock suitcase that was easily locked by crooks. The suitcase lock has a strong inner gear, high safety and anti-unlocking behavior, rated as the best anti-theft suitcase today.

Suitcase colors

Depending on your personal preferences, you can easily choose colors when you buy a suitcase. The dark suitcases like brown, black, gray seem to create a sense of cleanliness and longer lasting. Meanwhile, choosing a bright suitcase (pink, red, yellow, blue, .) will help you avoid confusing luggage with others when taking suitcases on the airport's conveyor belt.

Depending on your preference, choose a suitable suitcase color.

Other utility

In addition to the factors mentioned above, in order to choose a convenient suitcase during each trip, you need to pay attention to the other utilities inside the suitcase such as fixed storage straps to avoid baggage being thrown, the extra compartments compartment in the suitcase, the mesh, lock the area of the suitcase. These utilities will help you to organize your luggage neat, tidy and easy to find when carrying many items.

The price to buy a suitcase

The price of a suitcase depends on its brand, size, material and quality. Should choose to buy suitcases at genuine stores, reputable brands to be more secure about the quality during use and warranty when an error occurs. Do not be cheap because they choose to buy the poor quality suitcase and durability is not durable.

The above article has shared with readers about the need for choosing a suitcase as well as considering the factors to choose a quality suitcase. Hopefully you can easily choose and find yourself a quality suitcase, contributing to each of your journeys more fully.
