What is ceiling fan?

Ceiling fan or **ceiling fan** is a fan designed to be fixed on the ceiling. This fan can adjust 360 degree rotation by automatic function, thereby making room in the room more airy.

Compared to traditional table fan series, or wall fan, ceiling island fan has quite similar structure.

Thanks to its compact features, wide rotation angle, easy to use, this type of fan becomes a cooling solution that many families and offices choose.

Should a ceiling fan be used?

Advantages of ceiling fan

1. Fan owns a compact design, suitable for many special spaces with ceilings not too high.
2. Low vibration fans provide stability and safety when used.
3. The design of the wide angle of the fan can cool all areas. Especially, the airflow from the top will create a comfortable feeling, more comfortable for users.
4. The product is highly appreciated for its durability as well as smooth operation, without causing unpleasant noise that affects daily life.
5. Ceiling fan is low in electricity consumption, thus it saves energy extremely efficiently.
6. Products can be used for a variety of ceiling types such as: wooden ceiling, plaster ceiling .

Disadvantages of ceiling fan

1. The flow of the fan is not large, so it is only suitable for use with moderate ceiling space not too high or with small rooms.
2. Compared to other fans, ceiling fan has a high price.

Basically, if your family has an area not too large, the ceiling fan with many advantages mentioned above will be quite suitable for use.

Below we will help you to take a few notes when choosing to buy a ceiling island fan for a small room.

Note when selecting ceiling fan for small room

With the characteristics of this type of fan is only suitable for rooms with low ceiling, small area, so when choosing you need to pay attention to the following points:

Fan capacity

Usually these fan models have a capacity not too large. Please base on the actual area of the room to get the most suitable capacity choice. For example, a fan with a capacity of 45-60W will be suitable for a room of about 20m².

Besides, please choose a fan with a variety of wind modes to meet the cooling needs of all family members as well as contribute to saving energy effectively.

Choose style and size

Choosing the fan size and design is also an important step. If the room is small, do not choose big fans and lose harmony and waste.

The size of the fan should be proportional to the size of the room so as to harmonize.

Material of fan

Material is also a very influential factor in determining the life and durability of fans. You should choose winged island fan made of steel, alloy or ABS plastic to ensure durability as well as long-term use.

In addition, the cage and fan body should be made of plastic or alloy coated with electrostatic paint to make cleaning process more convenient.

Fan features

Even if used for a small area, the fan must always ensure the necessary features, supporting long-term users.

Currently some fans are equipped with remote controls, plus features such as mist spray, timer shutdown or power saving. You can base on the need to choose the best fit.

Some models of cheap ceiling fan are worth buying today

Product Specifications

Thailand ceiling fan Fanari HT-C16R1 (with control)

Selling price: 1,190,000 VND

1. Warranty: 36 months
2. Brand: Thailand
3. Size: 458mm x 458mm x 363mm
4. Speed: 1,300 rpm
5. Capacity: 52W
6. Impeller length: 40cm

Ceiling fan Vinawind island QTD400X-DB wingspan 400-?B

Price: 470,000 VND

1. Warranty 12 months
2. Speed: 3 speeds
3. Number of propellers: 3 wings
4. Capacity: 46W
5. Airflow rate: 77.3 m³ / min

Ceiling fan Mitsubishi CY16-GT (White)

Selling price: 1,390,000 VND

1. Warranty 12 months
2. Brand: Japan
3. Wind speed: 3 speeds
4. Capacity: 48W
5. Voltage source: 0.22A
