Advice on buying and regulating fans according to room size

Choosing to buy a room cooler is a very smart choice. Because if your home area is too small and you buy a cooler for a large area, you will waste electricity and waste your area. Conversely, if a large area but buy a small area cooler will not bring high cooling effect and easily overload when used.

For small rooms

For families with small rooms or boarding students, it is advisable to choose an air conditioner with cooling area of ??10-20 m².

Sumika D35 cooler with a flow of 3500 m³ / h will effectively cool for an area of 10 - 20 m²

For large rooms

With spaces with large areas such as living rooms and offices, it is recommended to choose a cooler with a cooling area of 25 - 50 m².

The operating capacity of these coolers is usually around 90W - 230W which will give better cooling effect.

Air Cooler Fujie AC-50 coolers efficiently cool 40 - 60 m²

For outdoor space

For the space in restaurants, hotels, food shops have a large room area so you should choose a cooler with an area of up to 80m² to meet the demand.

Power consumption from 140W - 220W. This is the product line with the largest capacity and cooling capacity.

Sumika D2500 cooler provides fast cooling effect with an area of up to 80 - 100 m²

Hope with the above sharing will help you choose a suitable and most cool cooler.
