

How to clean up junk on iPhone to help the phone operate more stably

While using iPhone, users always worry about junk files causing the device to run slowly. This article will show you how to clean up junk on your iPhone using the free junk file cleaner app.

The junk file cleaner application helps you clean hidden junk files extremely quickly on iPhone. Below are detailed steps to clean up trash on iPhone, let's do it!

Step 1: First, go to the App Store and find and download the application called junk file cleaner to your device. After that, you open the application and here you will see cleaning items for iPhone such as Clean Storage (the system will automatically clean up all trash on the device).

Step 2: When you click on Clean Storage, the system will immediately clean up to 100%. Then, the screen will show you the results, where you can select Clear Found Files to delete junk files.

In addition, you can also choose Clean Up at Photo Cleaner or Video Cleaner to clean up photos or videos.

This article has just shared with you how to clean up trash on iPhone. Hopefully the above information will help your device clean up trash more effectively.
