

How to Clone Quickly in Canva

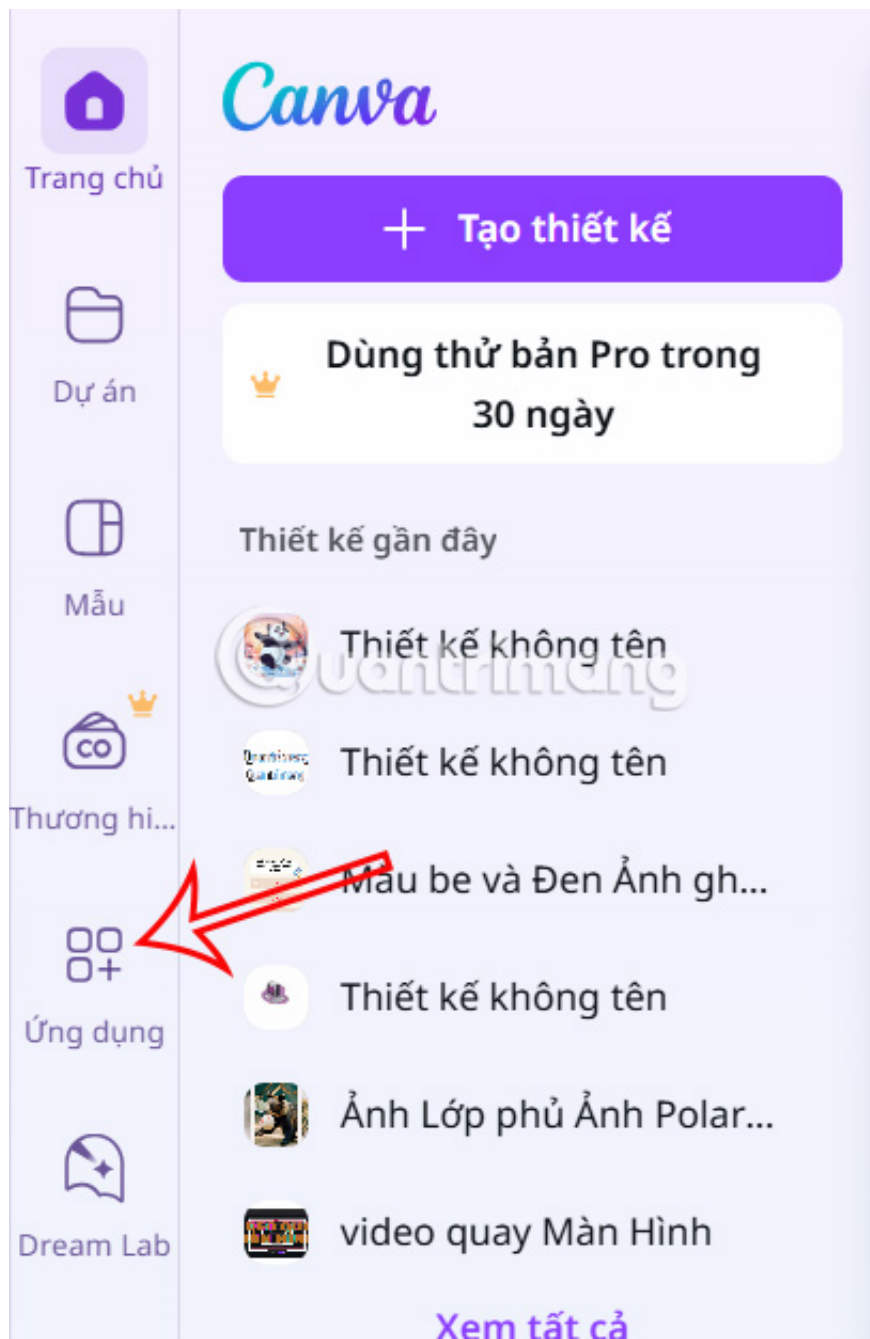

Instead of manually cloning details in your Canva design, you should use the built-in Replicator tool.

Instead of using manual operations to duplicate details in Canva designs, you should use the available Replicator tool. Then users can choose to duplicate as many copies as they want and with what display style to use for their designs. The article below will guide you to quickly duplicate in Canva.

Quick Guide to Cloning in Canva

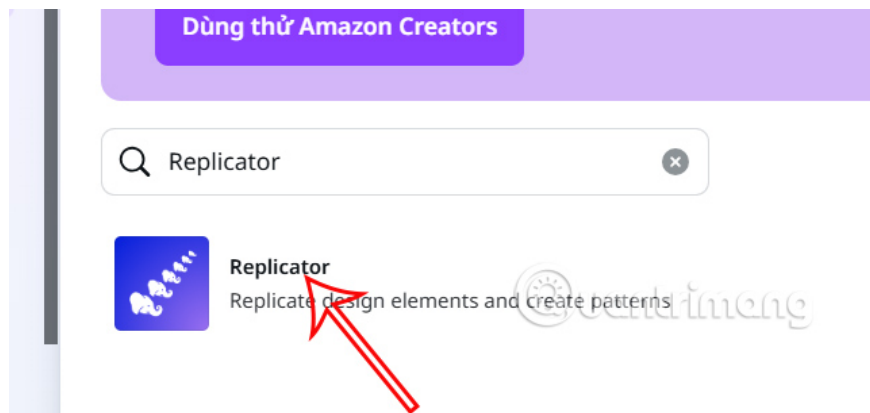

Step 1:

First, open the design on Canva, then click on **the Apps section** on the left side of the interface.

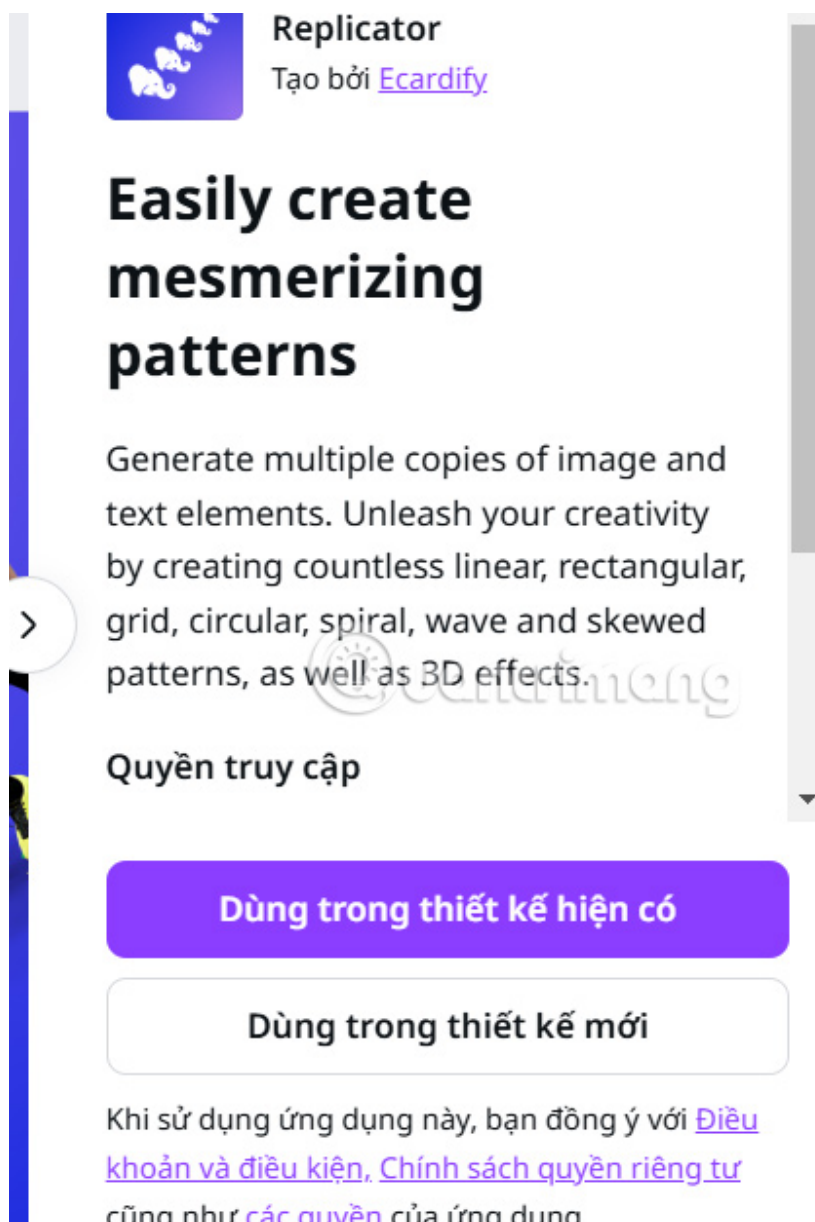

Step 2:

You enter the keyword **Replicator** into the application search bar and then click on the search result below.

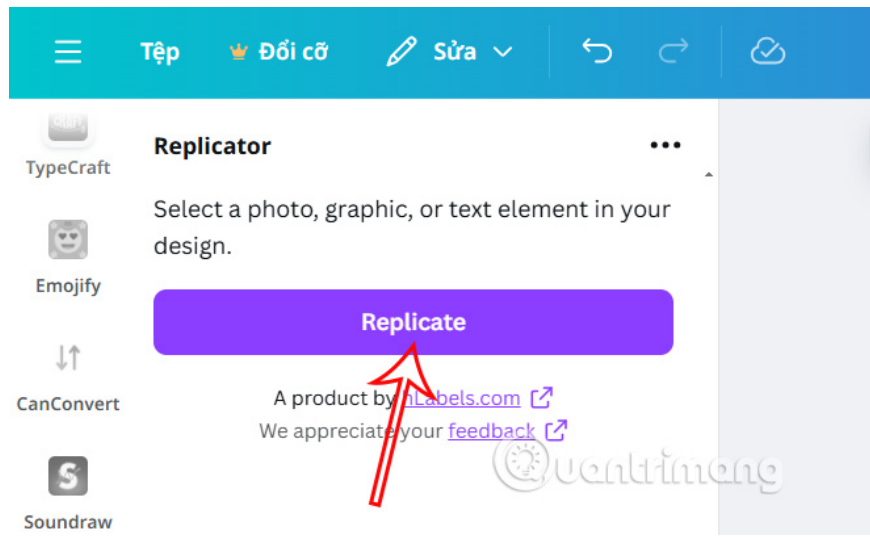

You continue to choose to use the application in a new design or an existing design.

Step 3:

Next, we **click on the detail** in the design we want to duplicate, then click **the Replicate button** to duplicate.

Step 4:

The result is that you will see the cloned content along with the customizations for the cloned content. Depending on the details you want to clone, the editing options will be different. We proceed to choose the customization types to have the clone template as we like.
