

How to combine multiple screen shots into a single photo on iPhone and iPad

Tailor is a third-party application for iPhone, which helps users to easily combine screenshots. Follow the instructions below to combine multiple iPhone screenshots into a single image.

While using the phone you will see interesting things and want to share it with friends. You will take a screenshot then send it to a friend. However, when the story you want to share is on several screenshots, you will definitely want to combine them into a single photo. With your mobile application Tailor can do that.

Tailor is a third-party application for iPhone, which helps users to easily combine screenshots. Application developed by Foundry 63, and completely free, you can download the application on the App Store. The application works on iPhone and iPad and iPod touch and requires from iOS 9 and above. Follow the instructions below to combine multiple iPhone screenshots into a single image.

Step 1 . First of all, download and install Tailor application on iOS device.

Step 2. Take a screenshot of your iPhone phone screen.

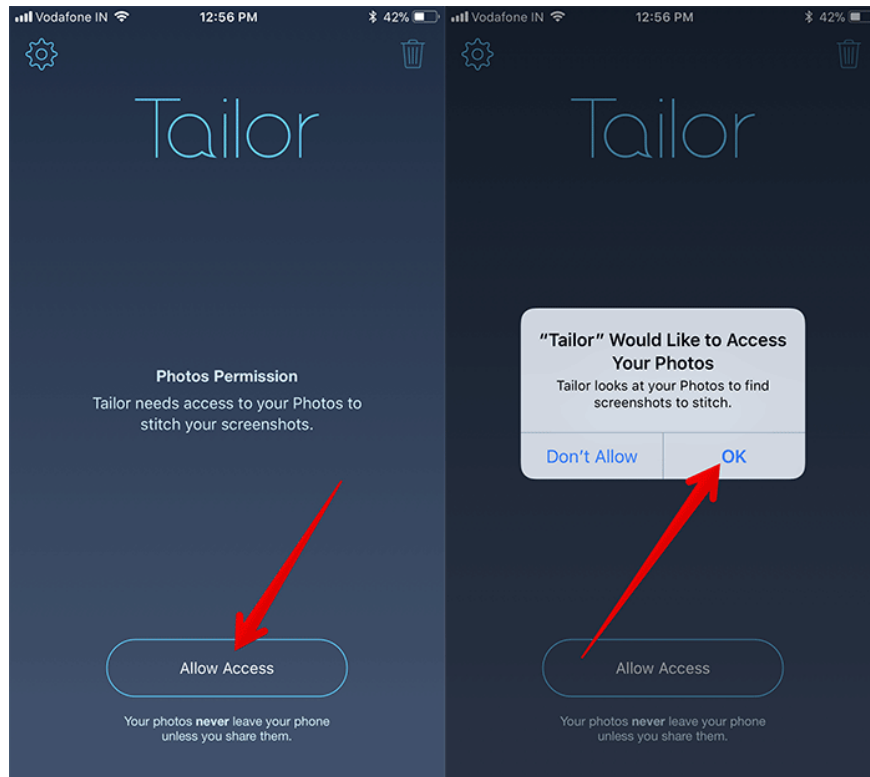

1. For other iPhones, click the Home button and the power button at the same time
2. With iPhone X, simultaneously press the power button and volume up button

Note:

1. If you cannot capture the screen with the phone keys, you can switch to take a photo using AssistiveTouch mode or use the virtual home key.
2. When taking a screenshot, you need to make sure that there are overlapping content between the pictures.

Step 3. Now, open Tailor app on iOS device.

Step 4. Next, a window will appear asking for access to your photo library. Click **Allow Access** , then click **OK** .

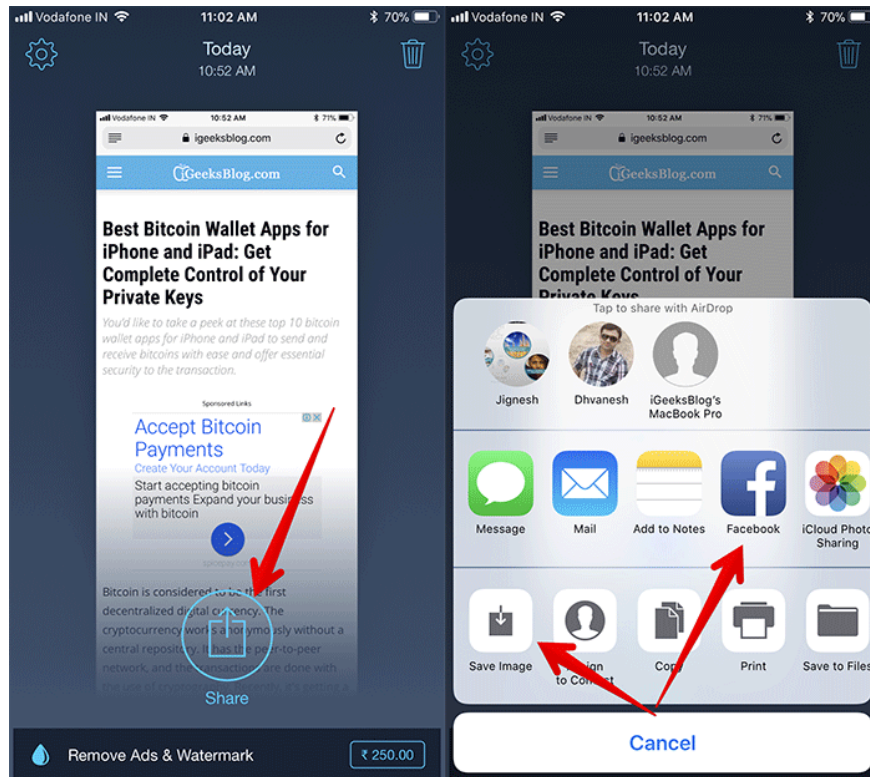

The application will immediately identify, analyze and pair your screenshots.

Note: You will see the "Not Enough Overlap - error" when the content of your photos does not overlap. In this case, you need to take a screenshot.

Step 5. When done, you need to click on the save / share button to save the image or share it with your friends.

You can take the same steps to merge other screenshots. The application is intuitive and has a simple interface that allows you to complete your work without any problems.
