

# How to comment with timelines on YouTube

Time-bound comments on YouTube videos will immediately jump to the location of the video in question.

Sharing YouTube on Facebook or on other social networking sites and forums is simple and easy to do. In addition, YouTube also allows users to share videos to the right time video position you want others to watch right now, instead of rewinding to the necessary paragraph. In addition, we can also comment with a timeline such as sharing videos for others to follow to the right video.

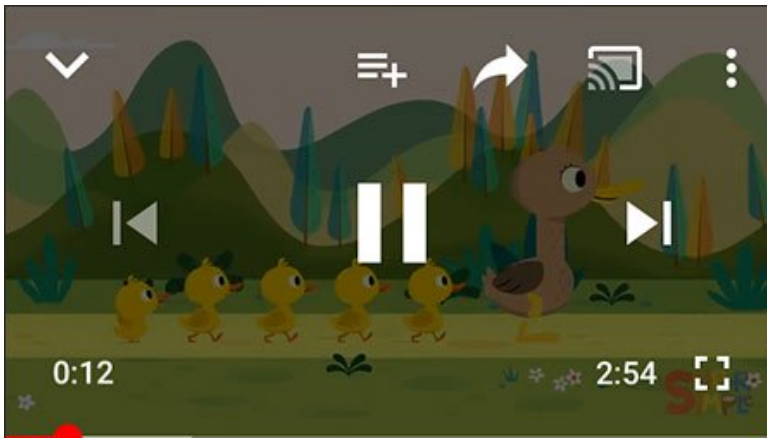

The comment feature with video time on YouTube is a feature available on both YouTube web platforms and YouTube Android, iOS, so we do not need to install any additional support utilities. The following article will guide you how to quote comments with time on YouTube.

1. How to hide YouTube video comments
2. How to post and interact with video comments on YouTube?
3. Instructions for viewing and managing video comments on Youtube
4. How to moderate comments on your YouTube channel?

## 1. How to comment with time on YouTube Android, iOS

### Step 1:

We open the YouTube app installed on the device, then open the video we want to watch. At **the time the video wants to comment** , press **the Pause button** to stop. Then scroll down to the bottom of the interface in the comment section, click **Public Comment** .

## Step 2:

In the comments you will **type the time stamp is stopped** and then enter a comment as usual. Then click **the Send icon** next to send a comment.

The results in the comments will show your comment content with **a prominent timeline** for others to see. When others want to see that video from your comment, just hit the timeline. The YouTube video will immediately move to that timeline.

## 2. How to extract comment time of YouTube PC videos

### Step 1:

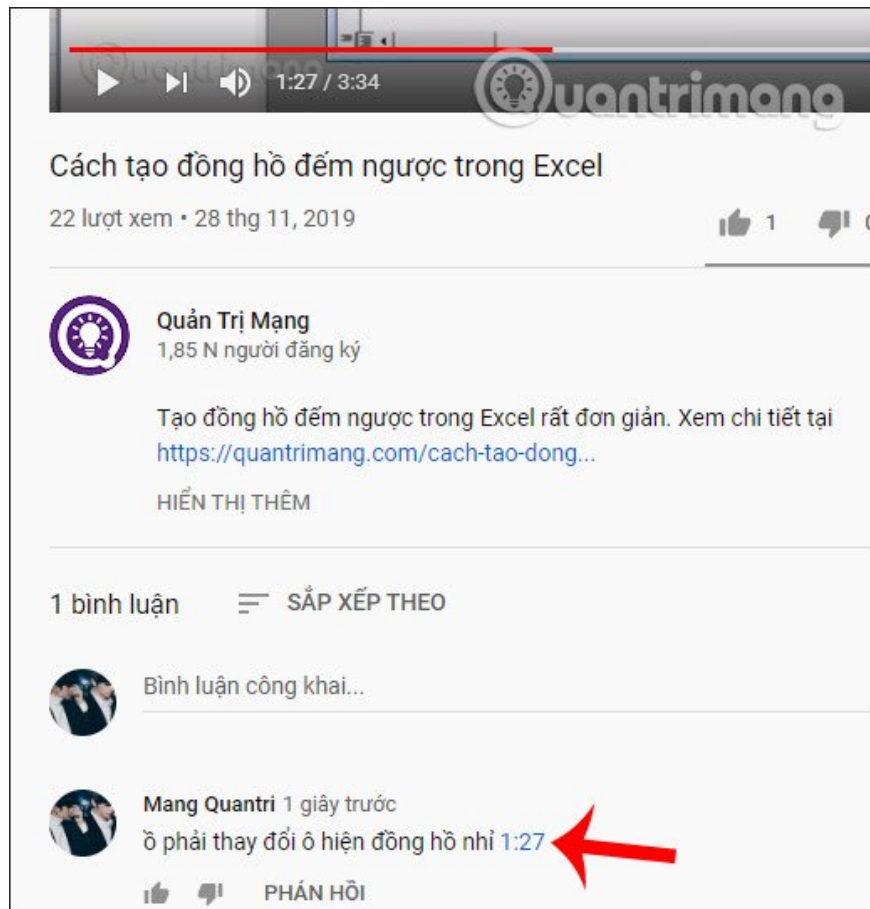

We also open the YouTube video on the computer and then in the video comment box, **enter the time the video you want to mention** and enter the comment text.

Then click **the Comment button** below to post a comment.

## Step 2:

At this time, your comment line will display the **highlighted highlighted blue time** . When you click on that timeline, the video will automatically switch back to the time you mentioned, when others see comments

Thus, the feature of inserting time into YouTube video comments saves time when others want to review the specific content that you want to mention in the video, just click on the time, the YouTube video automatically moves to the timeline. play that.
