

How to completely remove applications from your computer using Your Uninstaller

If you're looking for software to uninstall applications from your computer, Your Uninstaller is the perfect choice thanks to its ability to quickly and completely remove applications from your computer, no matter how stubborn the program you need to uninstall is. This ensures your computer is free of leftover junk files and you won't need to use additional software to scan it again.

Most software on Windows can be removed using the built-in **Add/Remove Programs** tool, but for **stubborn applications that cannot be removed in the usual way, or that leave behind remnants on the computer, Your Uninstaller** helps to completely remove the installation and permanently delete the application from your computer, minimizing hard drive space and improving your computer's performance.

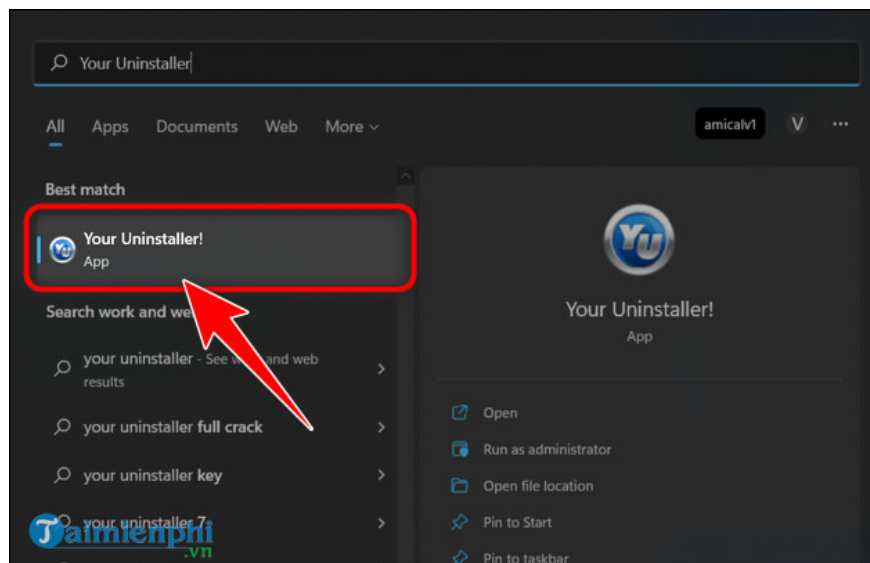

How to completely remove software from your computer

I. Instructions on how to completely uninstall applications from your PC

Step 1: Access the link below to **download and install Your Uninstaller** .

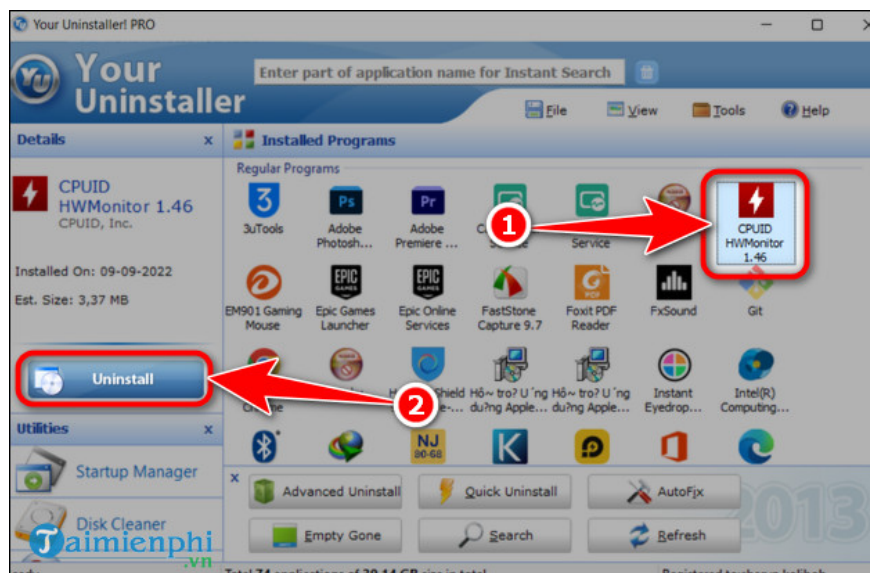

- Download **Your Uninstaller** here.
- See how to install Your Uninstaller here.

Step 2: Find and open the **Your Uninstaller** software .

Step 3: Select **the software you want to uninstall** => click **Uninstall** .

- For example, if Taimienphi wants to uninstall HWMonitor, select **HWMonitor** => **Uninstall**

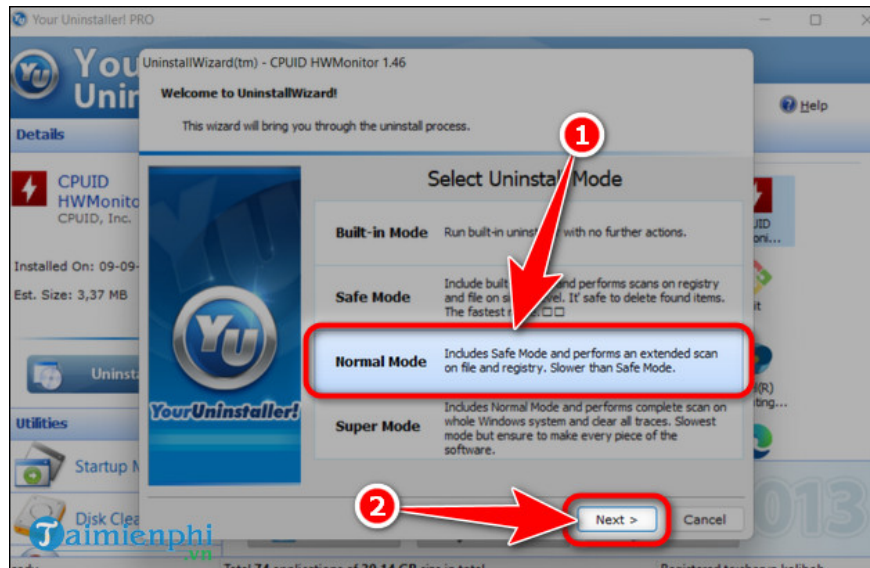

Step 4: Select **Normal Mode** and click **Next** .

- **Built-in mode** : Uses the software's built-in uninstaller; some junk files may remain.

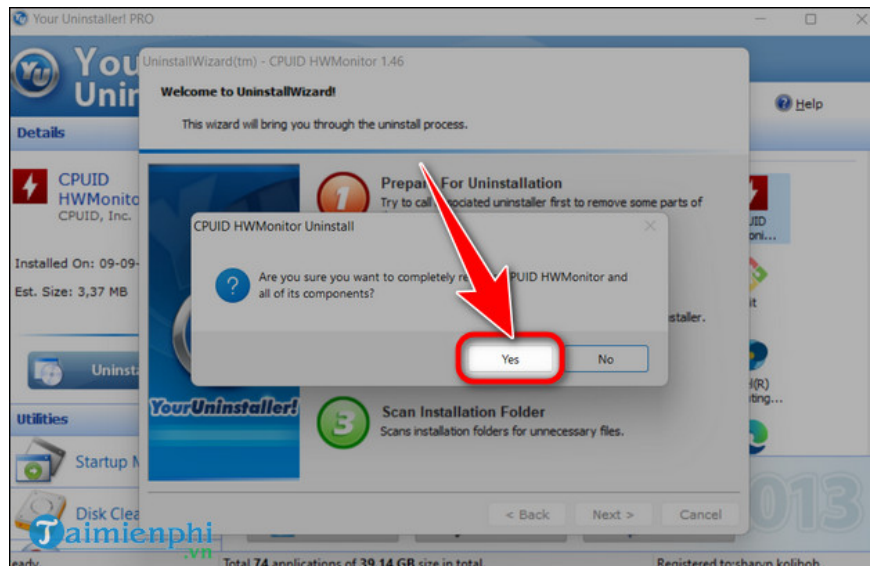

- **Safe mode** : Includes Built-in mode, but performs a quick scan of the software folder and cleans up junk files.

- **Normal mode** : Includes Safe mode but scans more thoroughly and takes longer, resulting in a cleaner cleanup.

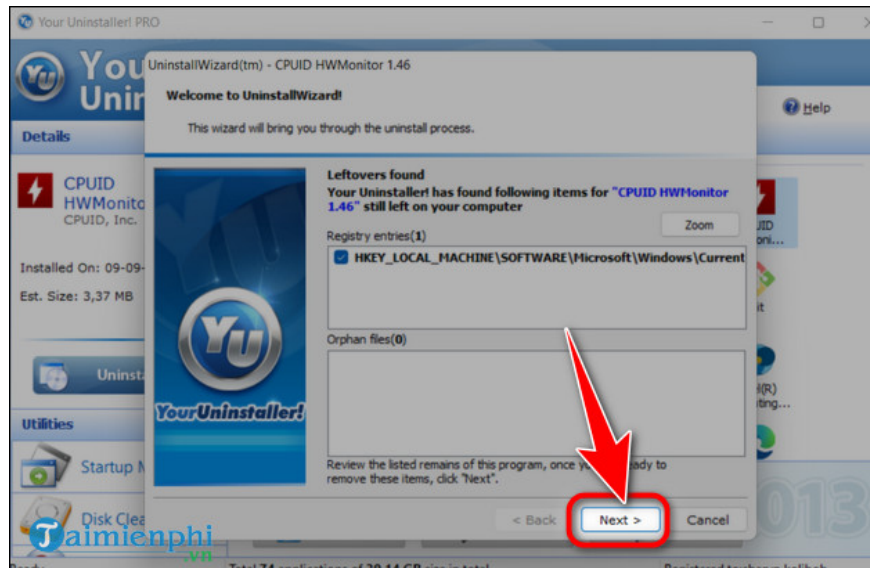

- **Super mode** : Includes Normal mode. The scan is the most thorough and takes the longest time. In return, you will get a complete cleanup of unnecessary junk files.

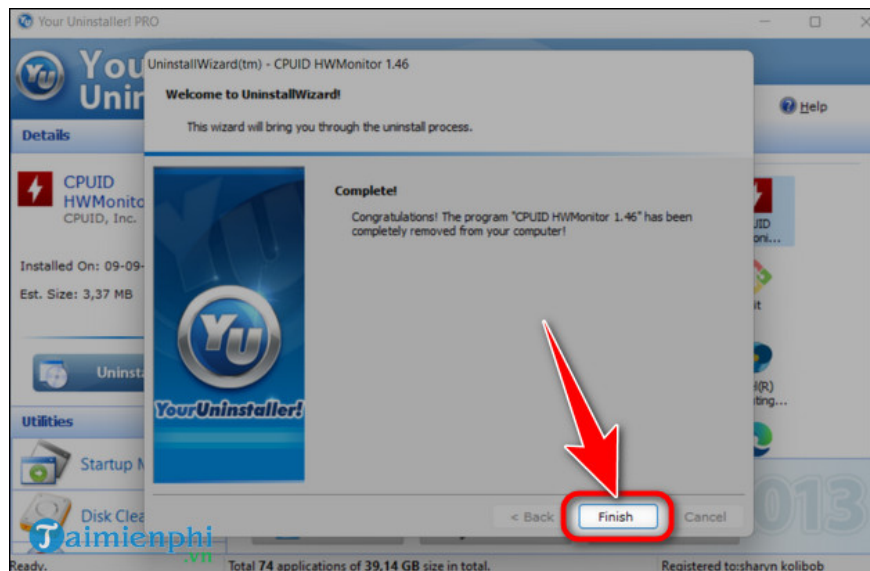

Step 5: Click **Yes** to agree to completely remove the application from your computer.

Step 6: Click **Next** on the next screen.

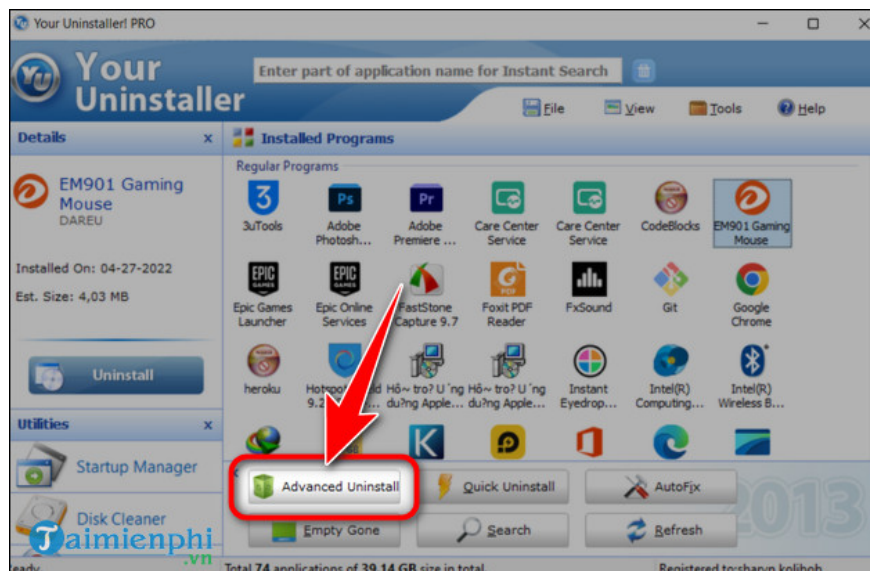

Step 7: Click **Finish** to complete the uninstallation.
