

How to completely remove IDM?

Internet Download Manager (IDM) is the best download accelerator, download accelerator software available today. However, this software is only for 30 days trial, after trial period IDM automatically disables all functions that make you unable to download the file anymore.

Internet Download Manager (IDM) is the best download accelerator, download accelerator software available today. However, this software is only for 30 days trial, after trial period IDM automatically disables all functions that make you unable to download the file anymore.

1. How to limit download speed of IDM?
2. Turn off the automatic downloading of IDM music
3. Fix IDM error without downloading download link

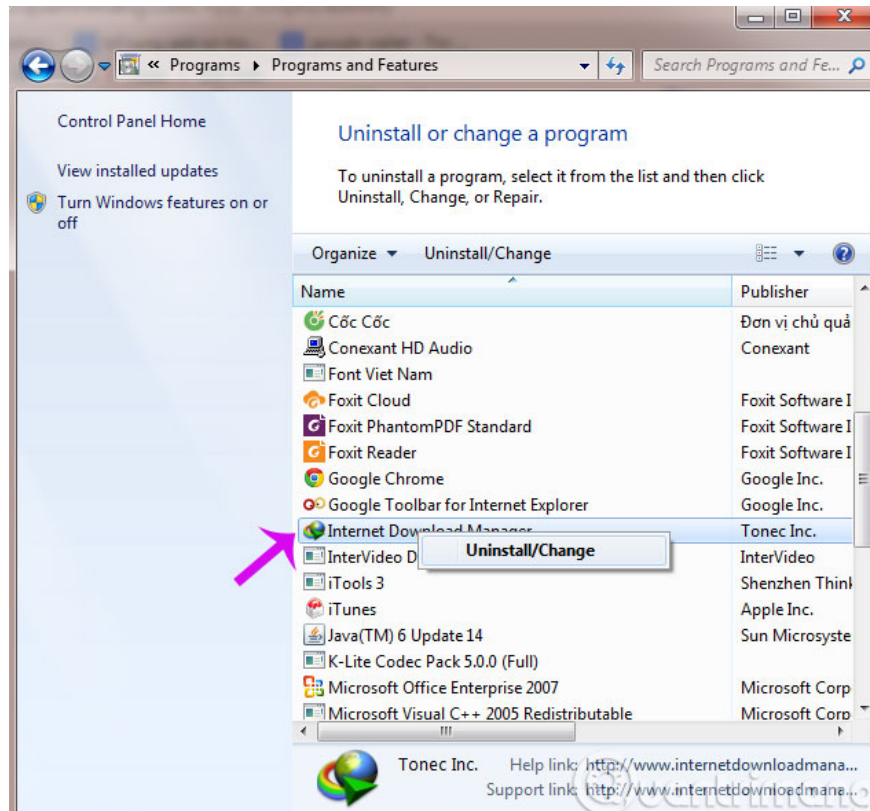

When a user removes IDM in the usual way and re-installs it still reports that the expiration date is expired, the license is required to continue using. So how to continue using IDM for 30 days for free? Please refer to the article below to know how to completely remove IDM, before installing again.

Step 1: Remove IDM in the usual way

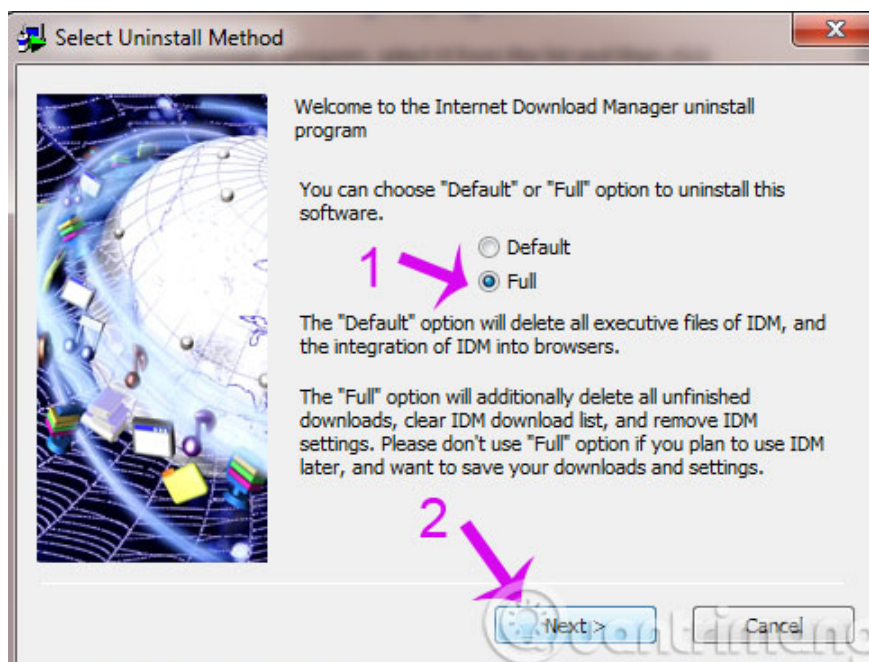

Go to **Control Panel** , navigate to **Programs** and click **Uninstall a program** to uninstall **Internet Download Manager** .

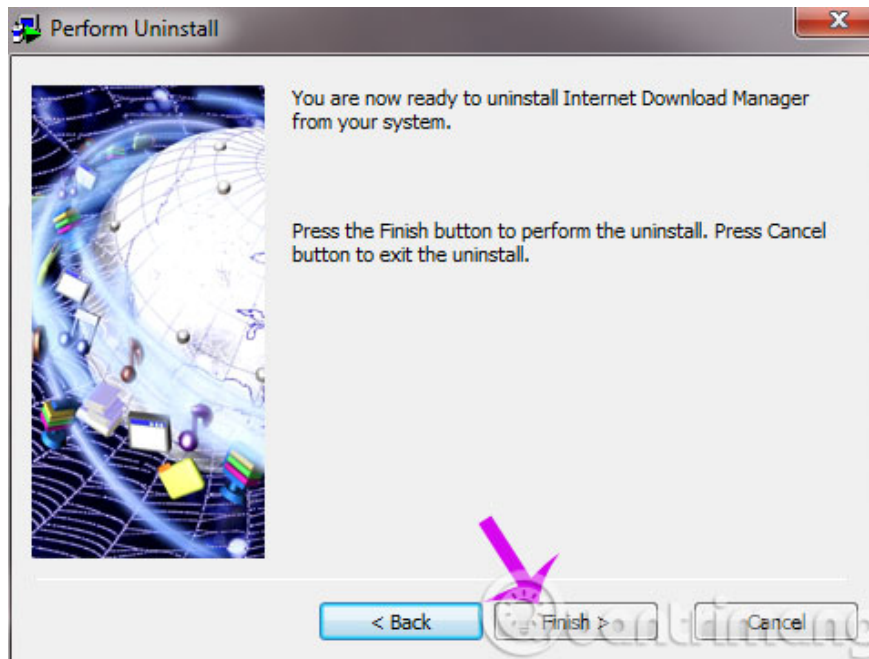

At the **Programs and Features** window, go to **Internet Download Manager** software, right-click and choose **Uninstall / Change** to remove IDM.

Immediately after the **Select Uninstall Method** window appears that allows you to select the IDM uninstallation method, click the **Full** box, then click **Next** to move to the next step.

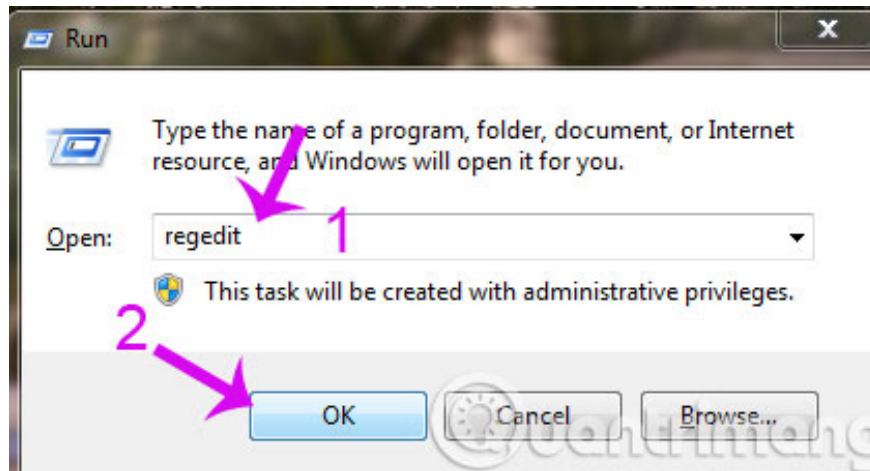

Wait a while for the IDM uninstall process to complete, click **Finish** to complete the process of uninstalling IDM from the system.

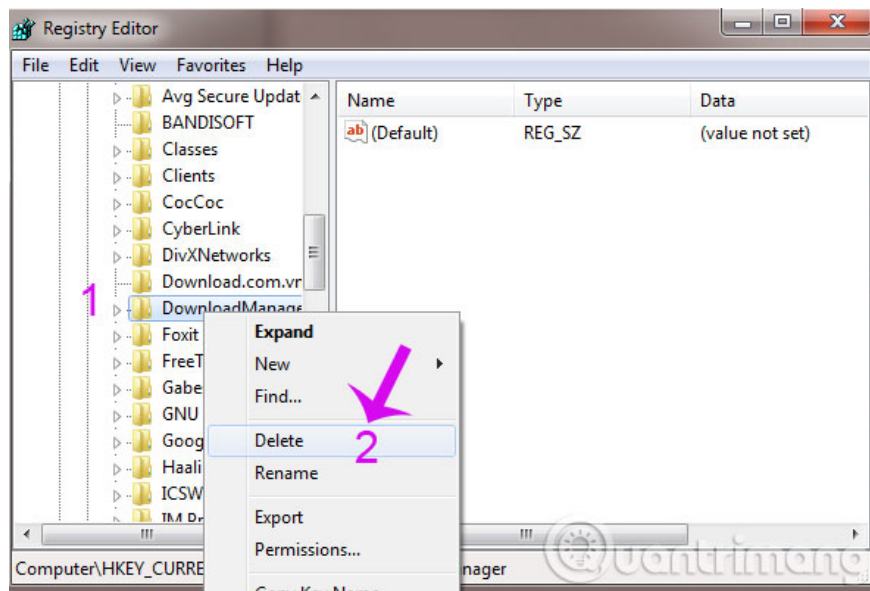

Thus, Internet Download Manager has been removed from the computer in the normal way, but not completely removed if you proceed to reinstall IDM, then after installation is still displayed the expiration notice. So please continue to follow the steps below to completely remove IDM.

Step 2: Uninstall IDM in the Registry

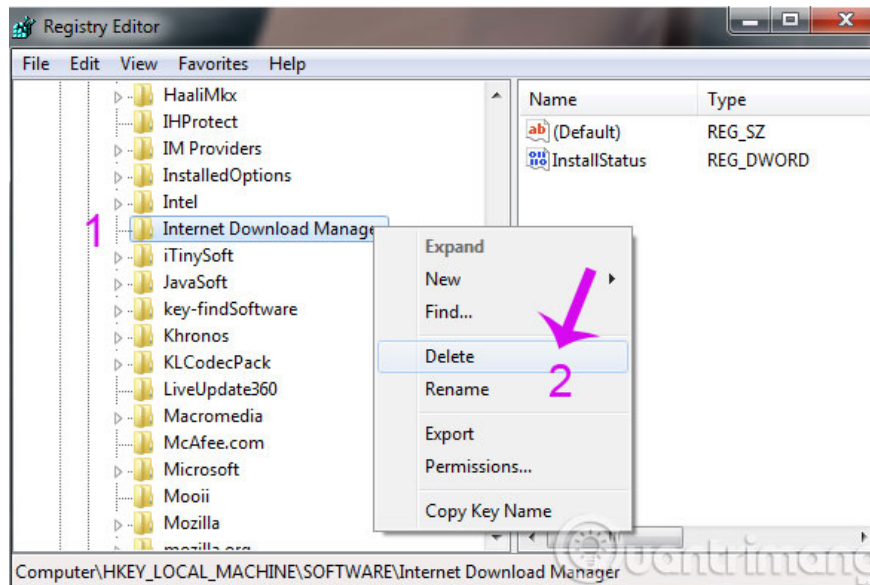

This is the most important step in the process of removing Internet Download Manager from the computer. First, press the **Windows + R** key combination to open the **Run** dialog box, then type **Regedit** in the **Open** box and click **OK** or press the **Enter** key.

Shortly after, the **Registry Editor** window appears, open the **HKEY_CURRENT_USER Software DownloadManager** link . Here, right-click and select **Delete** .

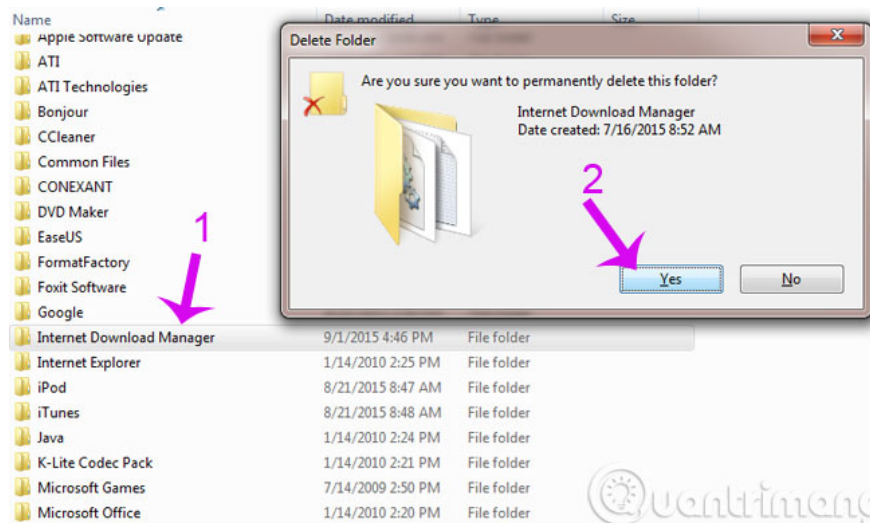

Continue to select **HKEY_LOCAL_MACHINE SOFTWARE Internet Download Manager** , right-click **Internet Download Manager** and select **Delete** .

Step 3: Delete IDM in drive C

Next go to drive **C > Program Files** . Then find the **Internet Download Manager application** and delete it. Remember to press **Shift + Del** to clear your computer.

Finally restart the computer so that Windows changes to a new state and remove all previous Internet Download Manager data. After logging back in, you can install Internet Download Manager as usual.

So with just a few simple steps, you have completely removed IDM from your computer, without installing any supporting software.

Good luck!
