

How to configure APN for Viettel, MobiFone, Vinaphone, and Vietnamobile

If you are unable to access the internet using your mobile data network, it may be because you have incorrectly configured your APN settings. In this article, TipsMake will provide instructions on how to set up APN configurations for Viettel, MobiFone, Vinaphone, and Vietnamobile.

APN stands for **Access Point Name** . After inserting a SIM card and subscribing to 3G/4G data packages, if your phone still can't access the internet, you'll need to manually configure the APN settings to regain internet access.

How to configure APN for all mobile networks

[How to configure APN for Viettel, MobiFone, Vinaphone, and Vietnamobile](#)

1. APN configuration parameters for mobile networks on your phone.

For Viettel network users:

- + Name: Viettel
- + APN: v-internet
- + Username: Leave blank
- + Password: Leave blank

For MobiFone network users:

- + Name: MobiFone
- + APN: m-wap
- + Username: mms
- + Password: mms

For Vinaphone network:

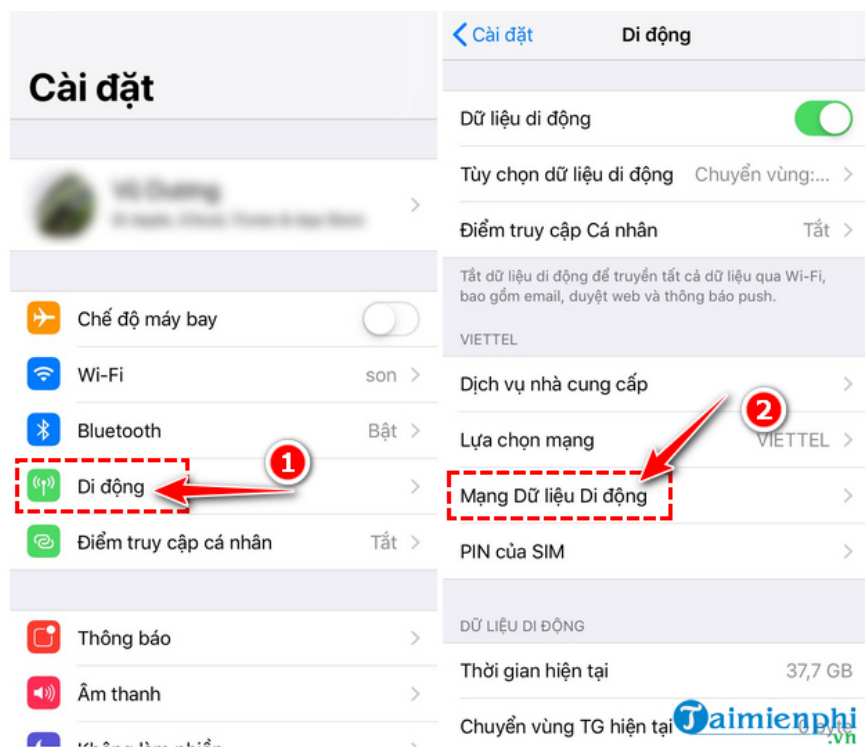

- + Name: Vinaphone
- + APN: m3-word
- + Username: mms
- + Password: mms

For Vietnamobile network:

- + Name: Vietnamobile
- + APN: v-internet
- + Username: Leave blank
- + Password: Leave blank

2. How to configure APN on iPhone

Step 1: Go to Settings -> Select **Cellular** -> Select **Mobile Data Network**.

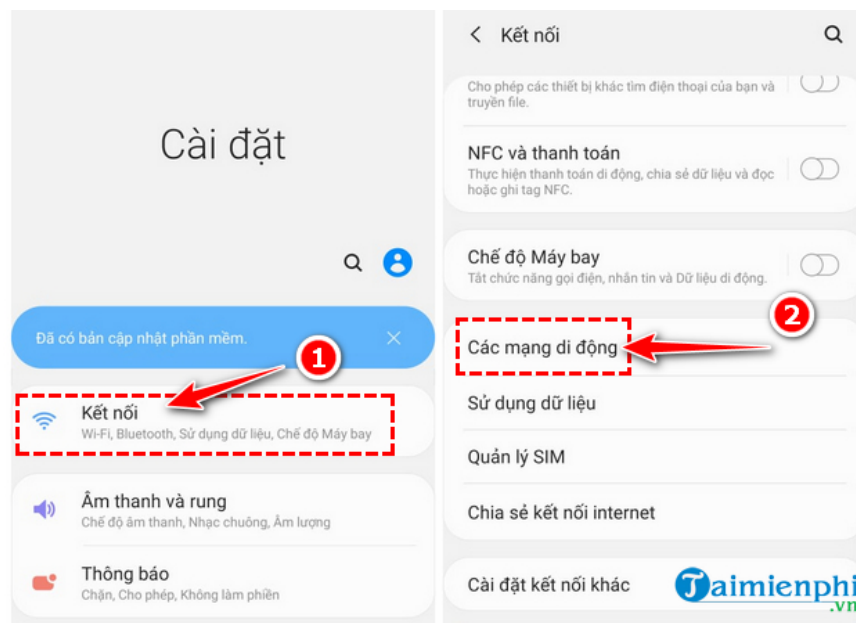

Step 2: In the next window, set **up the parameters:** APN, username, and password for your mobile network provider according to the configuration settings that TipsMake listed in **section 1**.

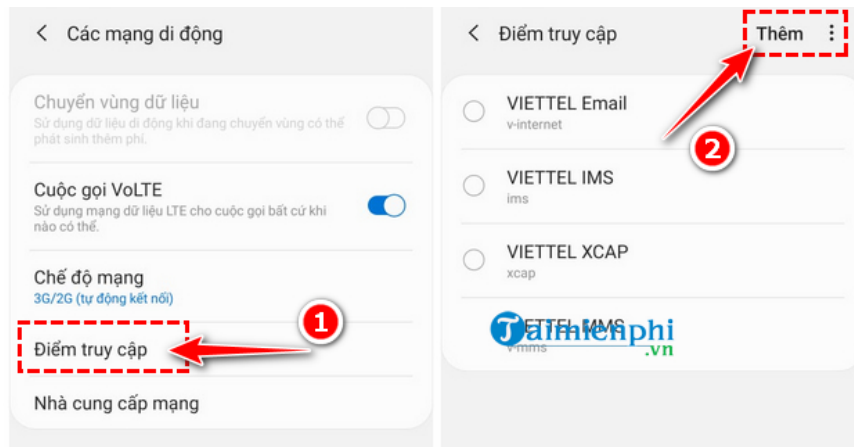

3. How to configure APN on Android

Step 1: First, go to Settings -> Select: **Mobile networks**

Step 2: Next, scroll down and select **Access Points** -> Select **Add**

Step 3: In the next window, pay attention to the following fields: Name, APN, Username, and Password. Set **these parameters** as listed in **Step 1 of TipsMake**.

Note: On some other phone models, to configure the APN, if you follow the steps above but don't see the APN option, access the following path: **Settings -> SIM Card & Mobile Networks -> Select your carrier -> Access Point Names -> APN** .

Above is how to configure APN for Viettel, MobiFone, Vinaphone, and Vietnamobile that TipsMake wants to share and guide you through. Additionally, if you cannot access the network, you can check **the coverage area of ??Viettel , Mobifone, Vinaphone, and Vietnamobile** to see if there is signal in your current location.

We wish you success in following the steps above.
