## Instructions for configuring FPT Gpon fiber optic modem

### Step 1:

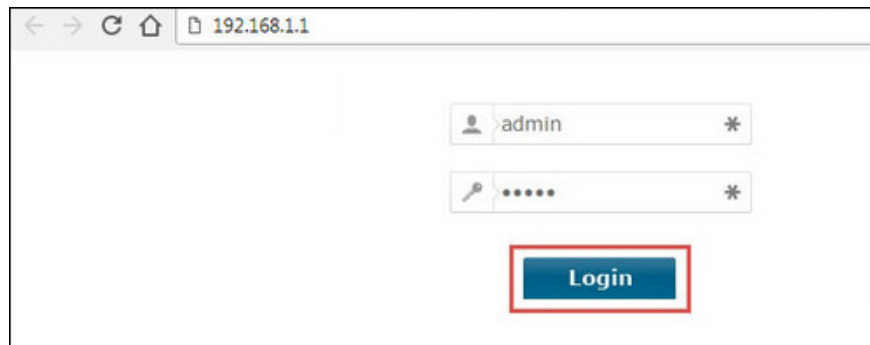

We will connect the Gpon modem to the computer over the network. We can plug in ports if there are 4 LAN ports.

### Step 2:

On the computer browser, access the address 192.168.1.1, then enter the following information.

1. User: admin.
2. Password: admin.

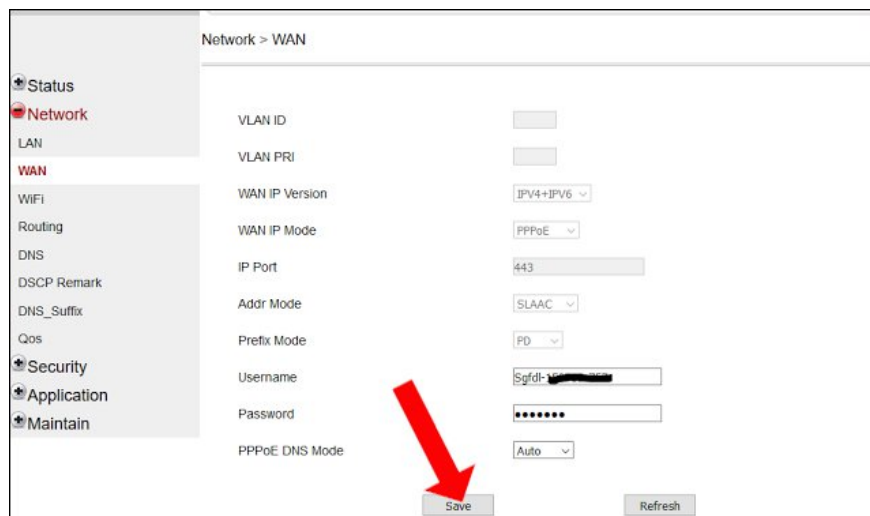

### Step 3:

The configuration page appears. We switch to the WAN tab and fill in the information as below.

1. WAN IP Mode: PPPoE.
2. Username: fpt (in the form hnfdl-123456-789).
3. Password: It looks like fd12345.

The username and password section will be provided in the contract. Then click **the Save button** to save.

So you can configure FPT Gpon fiber optic modem to access the Internet. When you buy a new modem or reset, you need to reconfigure the modem to use it, access the network.
