

How to configure PUBG Mobile VNG to HD on Tencent Gaming Buddy

Customizing the graphics settings in Tencent Gaming Buddy will help PUBG Mobile VNG with HD in-game configuration

If you do not play PUBG Mobile on your phone, or you can play but configure the phone to be not strong to play PUBG Mobile with the best configuration, play on Tencent Gaming Buddy. This is the emulator that supports PUBG Mobile on the best computer.

Recently PUBG Mobile was released by VNG in Vietnam, if you do not know how to install PUBG Mobile VNG on Tencent Gaming Buddy, you can refer to the article How to install PUBG Mobile VNG on Tencent Gaming Buddy. Although I have installed and played on Tencent emulator, it seems that PUBG Mobile VNG does not support PUBG Mobile graphics very well.

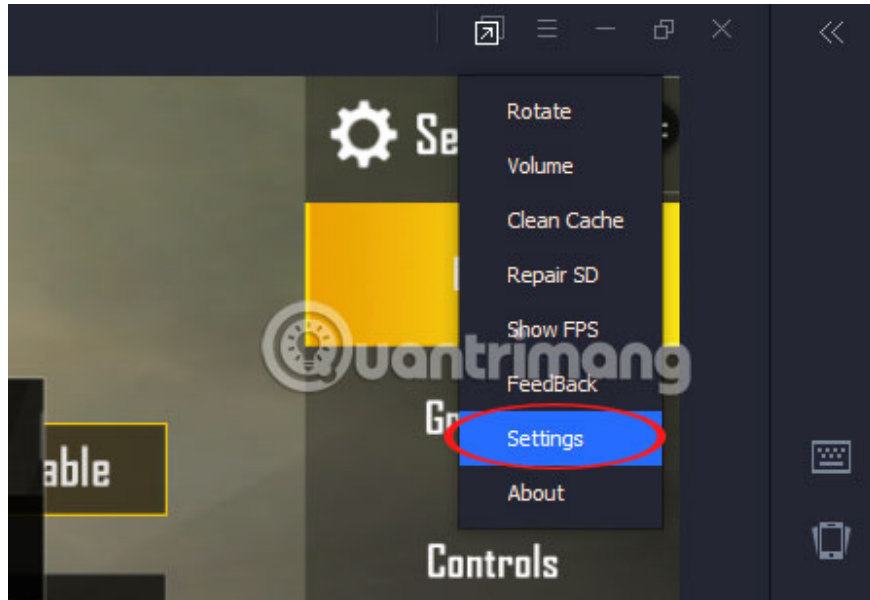

But you can use some settings of the PUBG Mobile emulator to upgrade the graphics for PUBG Mobile VNG, if you do not know what to install PUBG Mobile graphics on Tencent Gaming Buddy, please refer to the article below ok

Instructions for configuring PUBG Mobile VNG on Tencent Gaming Buddy

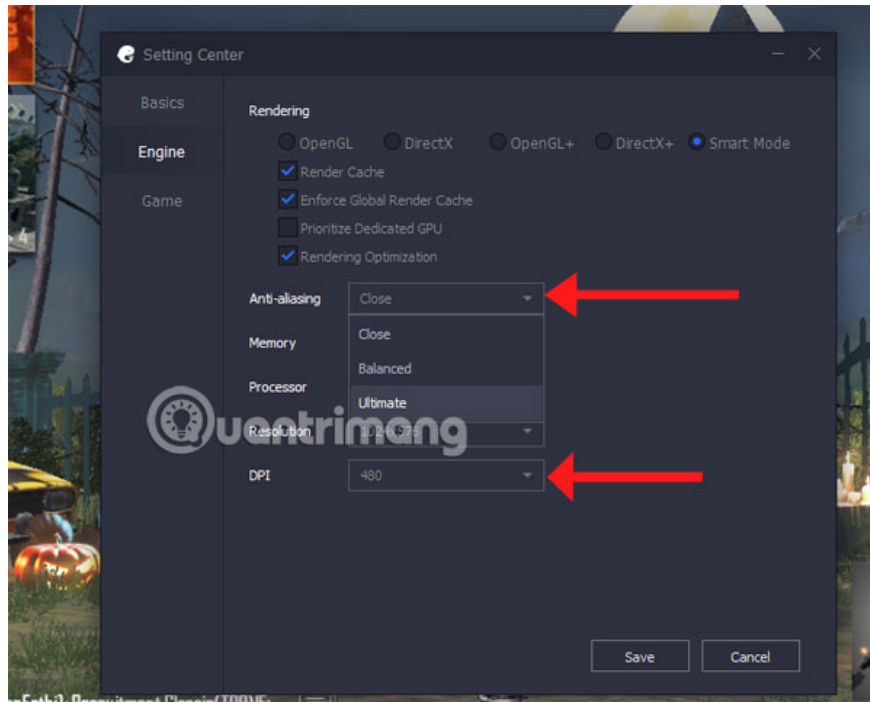

1. Download PUBG Mobile for PC
2. Download PUBG Mobile VNG for iOS
3. Download PUBG Mobile VNG for Android

Step 1: In the Tencent Gaming Buddy simulator interface, select the settings menu icon, then select **Settings** .

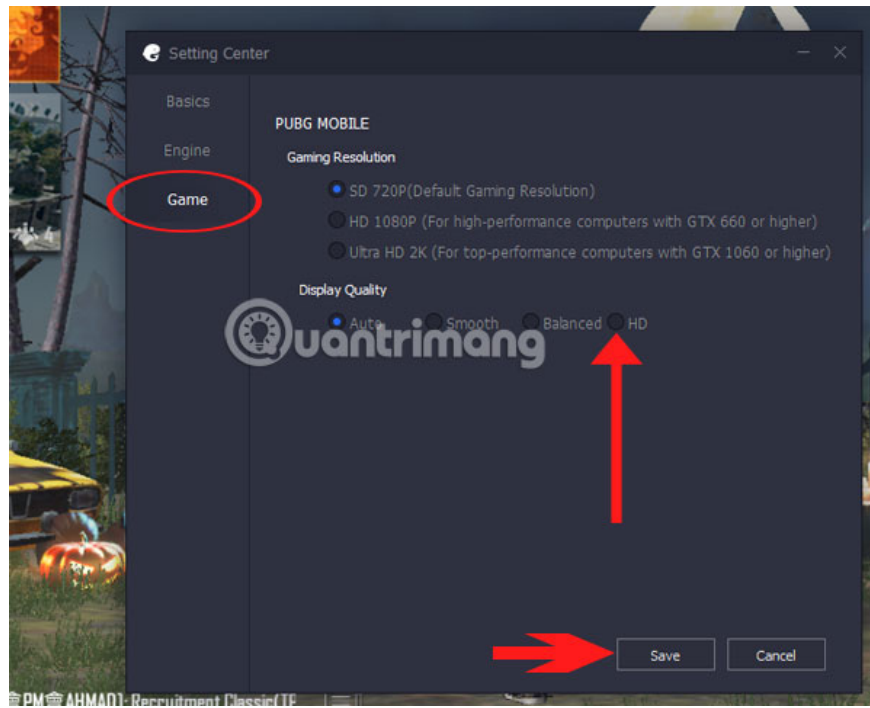

Step 2: In the Engine section, please turn on Ultimate in the Anti-aliasing section, below you can select 480 DPI entries.

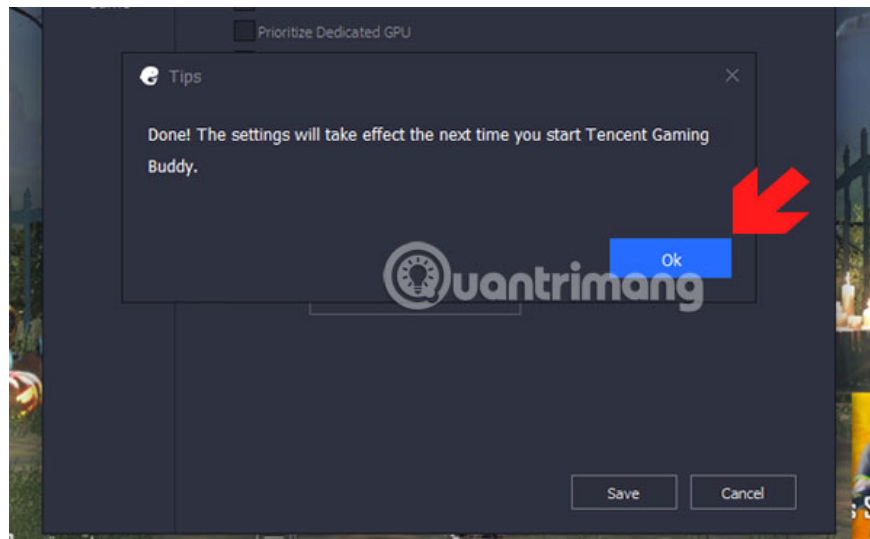

Anti-aliasing is an anti-aliasing setting in the game, it will help the lines and edges of the characters in the game much more beautiful. DPI is the sensitivity of the mouse.

Forward to the **Game** section, you can choose the HD level in the **Display Quality** section, on the upper part if your graphics card is strong, you can choose a high resolution game. Finally click **Save** to save.

Next click OK and restart PUBG Mobile on Tencent Gaming Buddy to see game changes.

And this is the configuration of PUBG Mobile when selecting a low graphics level on the Tencent Gaming Buddy emulator. You can see jagged at the shot field in Training Mode, and in this graphic everything is not shaded.

And this is the graphic when it has changed, the sawtooth section in the shot field has disappeared and everything is shaded.

For a closer comparison, you can see the edge of the beer shot 15m, the aliasing part at the back of the graphic shows clearly.

And when antialiasing has been done, the shadow effect has also been applied.

Note that the device must have **4GB RAM** or more, please install the above configuration for PUBG Mobile VNG of Tencent Gaming Buddy. In addition, your graphics card must also have **1GB VRAM capacity** to play smoothly when there is a shadow effect and anti-aliasing on PUBG Mobile VNG.
