

How to connect a wireless headset to any type of TV

You want to watch TV at night but don't want to bother those who are sleeping. Or when you want to enjoy your favorite shows, you are disturbed by the noises around you. Connect a wireless headset to your TV. The following article will show ways to connect a wireless headset to whatever type of TV you want.

You want to watch TV at night but don't want to bother those who are sleeping. Or when you want to enjoy your favorite shows, you are disturbed by the noises around you. Connect a wireless headset to your TV. The following article will show ways to connect a wireless headset to whatever type of TV you want.

Use regular wireless headphones

This is a convenient way for TV users who don't have Bluetooth capabilities built-in. The wireless headphones will normally come with a removable power bulb that you can plug into the TV via a 3.5mm jack and operate through the radio frequency instead of Bluetooth.

The advantage of these wireless headphones is that it can be used at a distance, with a radius of about 100m. While Bluetooth wireless headphones can only be used within a radius of 10m.

The downside is that they have to be plugged in, making it easy for the wiring in your TV area to become ugly. In addition, if you are using other plug-in audio devices such as soundbar, speakers, amply . without conversion equipment, it is quite troublesome when you have to change the plug constantly if you want. use.

These common wireless headphones range in price from 200,000 VND to about 6 million VND.

Use a Bluetooth headset

For Bluetooth-enabled TVs, using Bluetooth headsets for those TVs is more convenient. Because these Bluetooth headsets are used more frequently and massively than other wireless headsets. If your home TV does not support Bluetooth, you can still use a Bluetooth headset using a Bluetooth transmitter for only about VND50,000.

Essentially, a Bluetooth transmitter will use a 3.5mm jack or RCA port from the TV and transmit a Bluetooth signal when plugged in. After pairing with the Bluetooth headset and the device has been fully installed, you can now watch your favorite TV shows through the headset without being affected by the surrounding noises.

Although this method is quite economical and popular, it also has certain disadvantages such as shortwave radius, sound quality is not as good and also quite inconvenient in the wiring like when using headphones. Common wire.

Use some high-end TV product lines

1. **Android TV** : After pairing with your headset, go to **Settings> Bluetooth** and select the headset when they appear.
2. **Apple TV** : Pair your headphones with the TV, then go to **Settings> Remotes and Devices> Bluetooth** .Select headphones when they appear.
3. **Amazon Fire TV** : Pair up Bluetooth headsets with Amazon Fire TV or Fire TV Stick. Then go to **Settings> Controllers and Bluetooth Devices> Other Bluetooth Devices** and choose to pair the headphones.

Use wireless headphones when playing games on TV

1. **Play Station 4** : Go to **Settings> Devices> Audio Devices> Output to Headphones** .Note that only some special Bluetooth headsets integrate with Play Station 4. If you don't have the headphones, plug in the 3.5mm headphone jack into the game console's handle.
2. **Xbox One** : For the Xbox One series, it will be a bit difficult if you want to use the headset when playing with it when the Xbox One does not support Bluetooth and does not have a 3.5mm headphone jack. You

will need to buy a Stereo Handset adapter and plug in the handle, then you can plug in the headset using the 3.5mm plug to the adapter to use.
