2. Alexa and Cortana can now talk to each other, leaving Apple's Siri and Google Home
3. How to block Windows 10 from tracking and collecting user information

On Windows 10 it is now possible to **connect your Gmail account to Cortana to manage Google Calendar** using an assistant. Typically, you'll **set up a new account** on your device with a Microsoft account, which Cortana can access to provide a more personalized experience. But to provide more value, Cortana also allows you to connect other services, not including Google accounts.

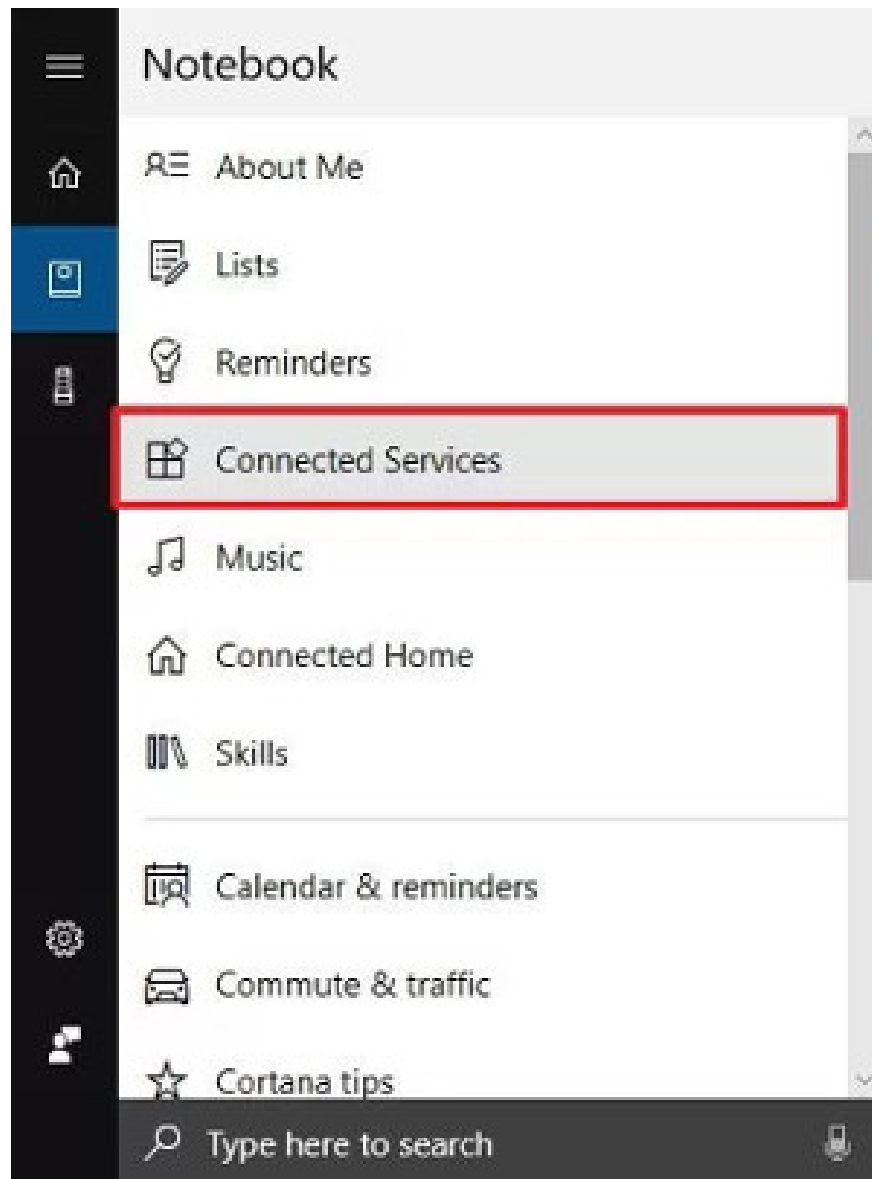

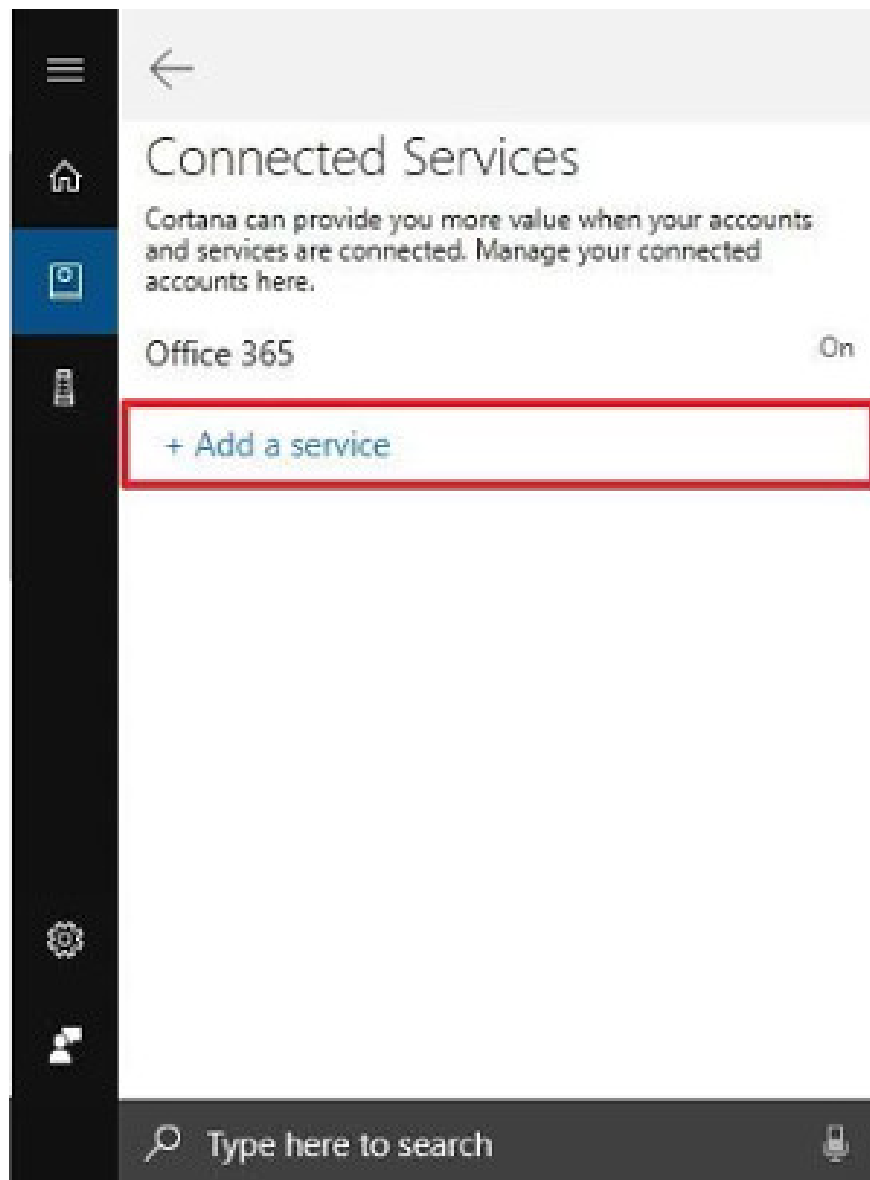

If you are using Windows 10, you can connect your Google account to manage Google Calendar with Cortana on PC, even using voice commands.

In this tutorial, you will learn the steps for connecting a Gmail account to Cortana on Windows 10.

How to connect a Google account to Cortana:

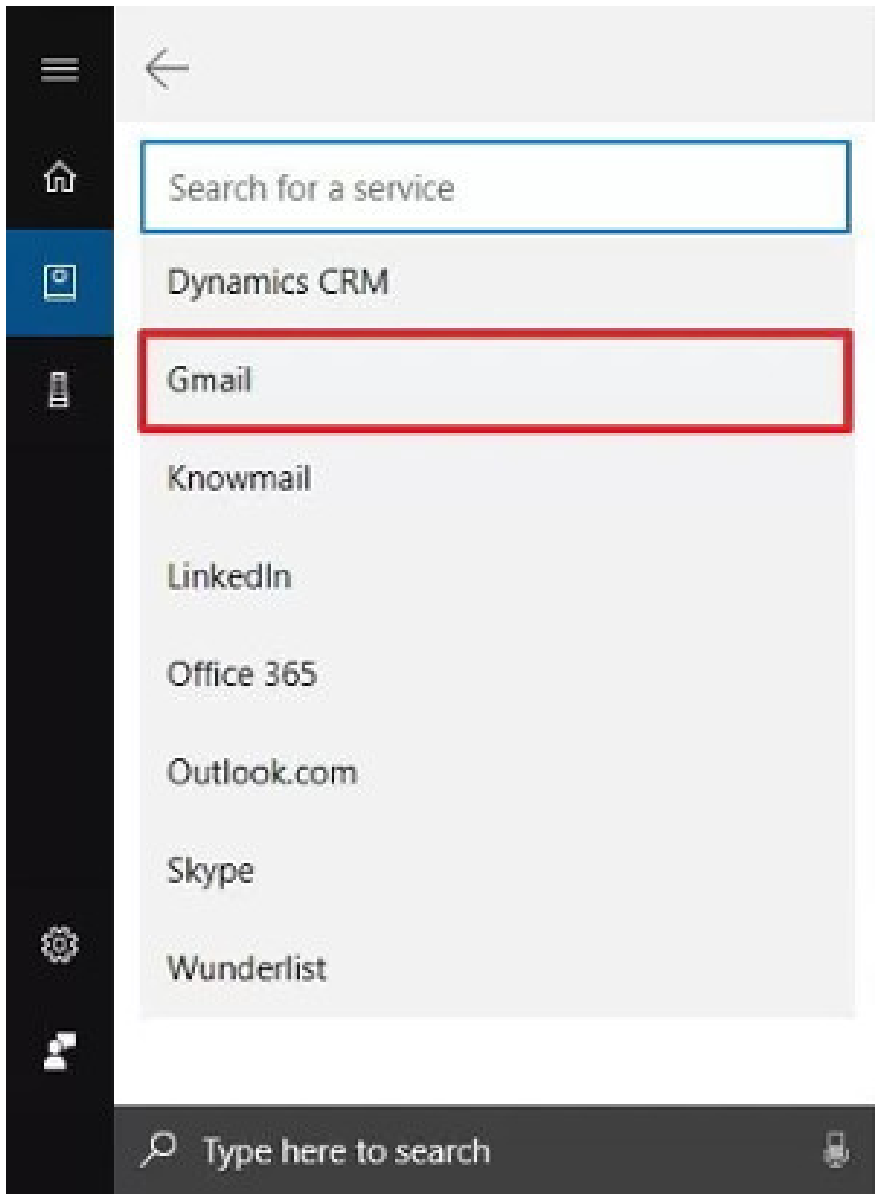

1. Open **Cortana** .
2. Click the **Notebook** button.
3. Select **Connected Services** .
4. Click the **Add a service** button.

5. Select Gmail from the list.

6. Click the **Connect** button.

7. Login with your login information.

8. Click the **Allow** button to allow Cortana to access your account.

When completing the steps, you can use Cortana to interact with your Google Calendar. **Allowing Cortana to access your Google account will allow access to Google Contacts, Google Drive, Gmail and other information .**

If you want to disconnect your account, simply access <https://myaccount.google.com/permissions> and revoke Outlook access.

Note that this feature is new and may take some time to see how it works. Also, at this time, **the ability to connect Gmail accounts with Cortana is not available for iOS or Android operating systems .**
