

How to connect laptop to TV via HDMI port

Connecting a laptop to a TV via HDMI allows you to project a laptop screen to the TV to watch movies, videos and images with a wider screen. How to connect a laptop to this TV will be very useful for large screen TVs but does not support network connectivity.

What you need is just one HDMI cable thread only. If you are trying to connect a computer to a TV via HDMI, please see the detailed instructions below, which is quite simple.

If you don't know, HDMI is stands for High Definition Multimedia Interface, the best quality connection between source device and transmitter. HDMI is capable of transmitting high quality audio and video between devices. HDMI technology is used with devices such as HDTV, projectors, DVD players or Blu-ray players. Thanks to HDMI, we not only transmit images but also transmit sound between devices. Please read the article on HDMI on TipsMake.com to understand more about this connection standard offline.

How to connect laptop to TV via HDMI port

Step 1: Prepare to connect the laptop to the TV: To connect a laptop to a TV you need a laptop and a TV that supports HDMI connection, HDMI cable. HDMI cables can be easily purchased in consumer electronics stores.

Step 2 : Connect one end of the HDMI cable to the HDMI port on the laptop. If you don't know where the port is, look at the ports on the laptop, and the HDMI port will have a small HDMI letter printed next to it. Remember to plug in your hand, but be sure, don't be too strong or too loose will affect the connection port and the signal transmitted between the two devices.

Step 3: Connect the other end of the HDMI cable to the HDMI port on the TV. You need to put your laptop and TV at a reasonable distance, suitable for the cable length to ensure the signal transmission between laptop and

TV takes place most smoothly.

Step 4 : Turn on the TV, use the control to press the TV's power button, you will see the Inputs panel appear. You select the HDMI command line (right now this command line will appear an input command).

Step 5 : Wait for the TV and laptop to connect. If waiting for about 15s, there is no cable reception. Click on the Windows + P key combination on your laptop, then select Duplicate in the options that appear to pair. This is the same as when you want to use multiple monitors on one computer, because you are actually turning the TV into a screen for your laptop.
