

How to Connect the Kindle Fire to the Internet

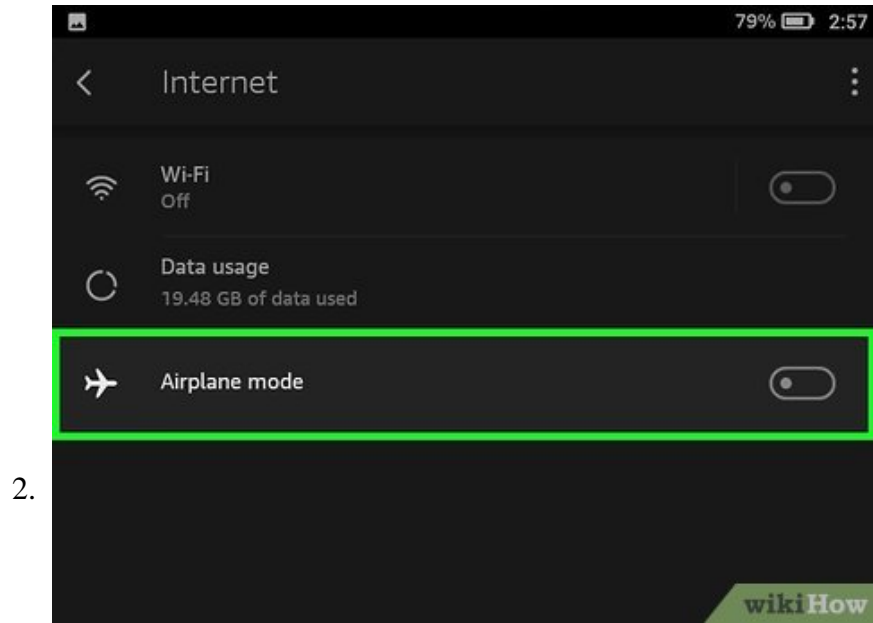

The Kindle Fire tablet can be connected to any Wi-Fi network so you can browse the Web and enjoy the full benefits the Kindle Fire has to offer. You can connect the Kindle Fire to your private at-home Wi-Fi network, or to any other public...

Method 1 of 2:

Connecting to an Existing Wi-Fi Network

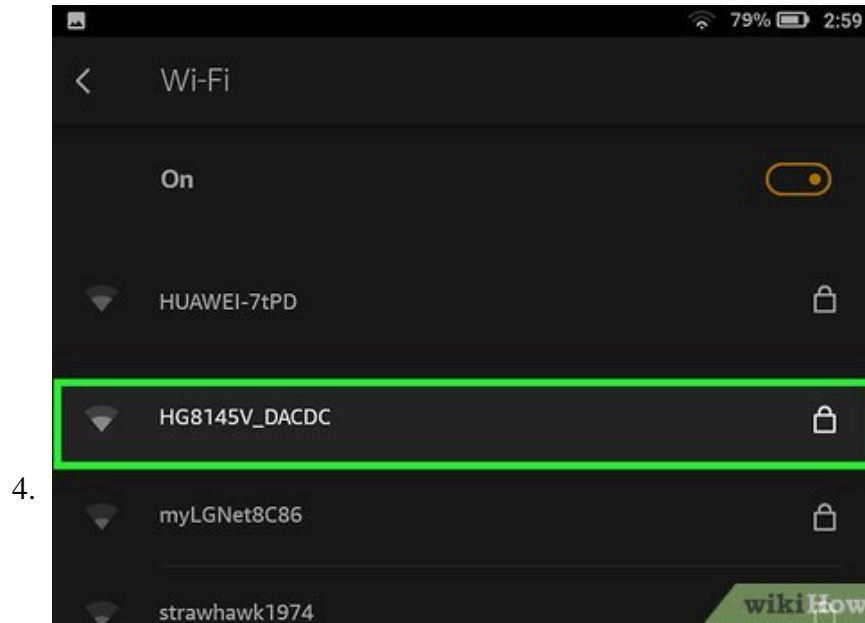

Swipe down from the top of the screen on your Kindle Fire, and select 'Wireless.'

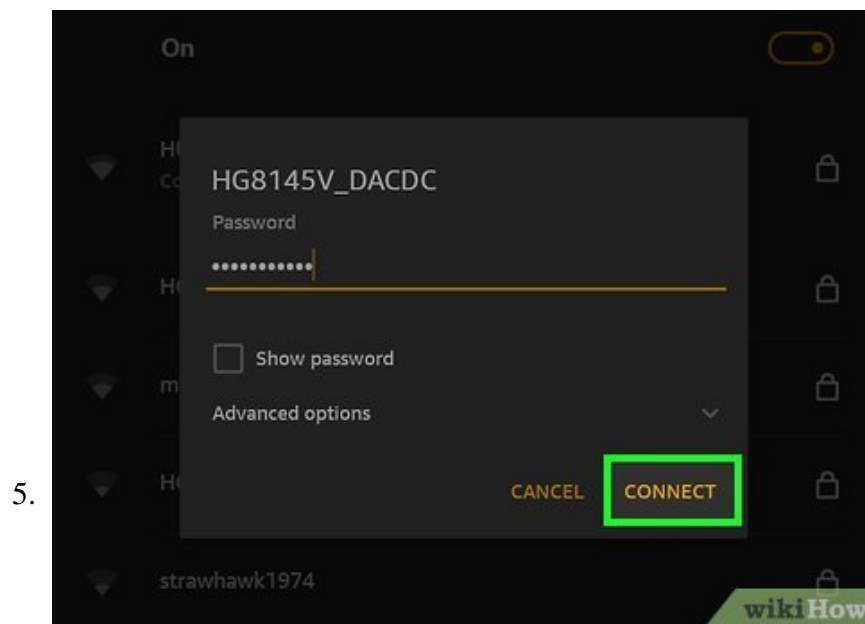

Verify that the Airplane Mode setting is switched to 'Off.'

Tap on 'Wi-Fi,' then tap the 'On' button next to Wi-Fi. A list of Wi-Fi networks within range will display on-screen.

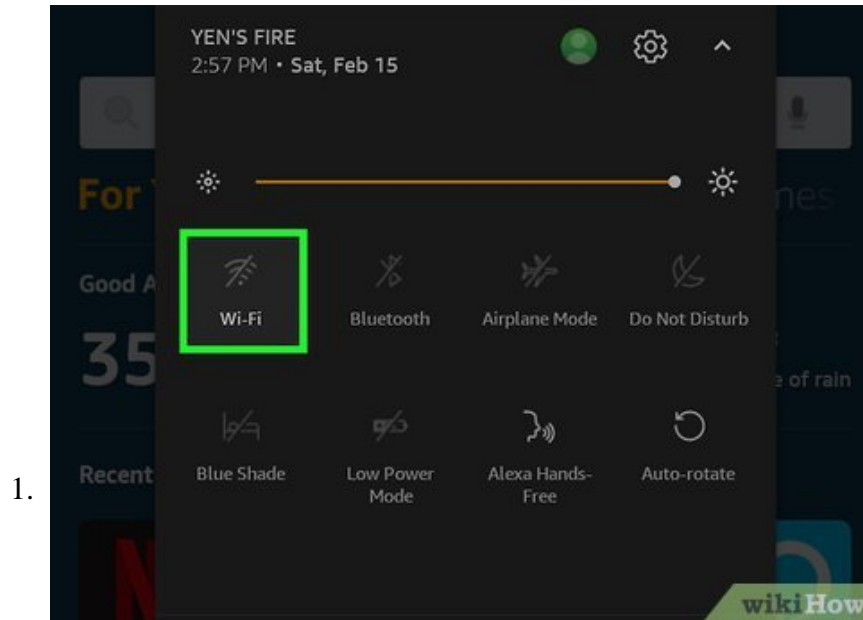

Tap on the wireless network you want to connect to. Networks labeled with a lock icon will require you to enter a password to access those particular networks.

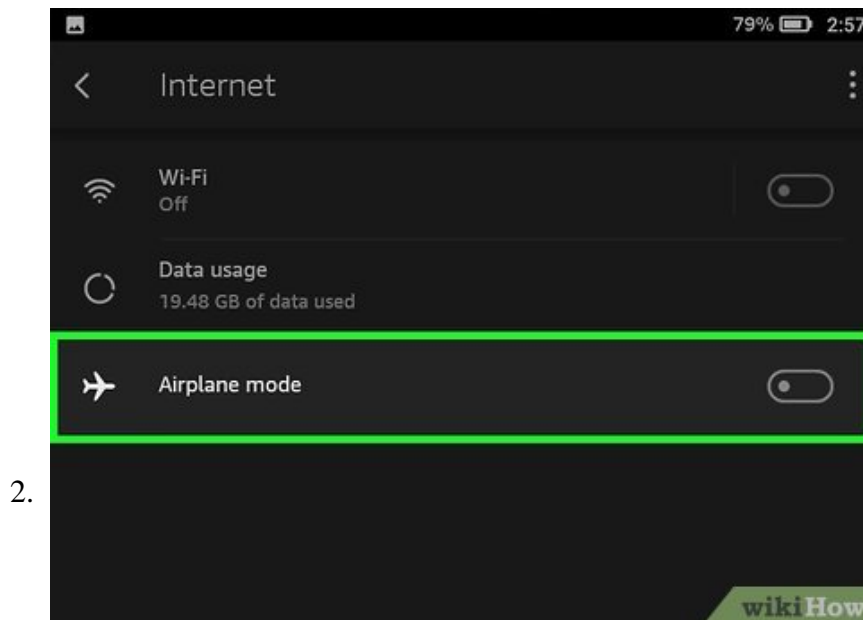

Enter the password if required, then tap on 'Connect.' Your Kindle Fire will then connect to the Internet using that particular network.^[1]

Method 2 of 2:

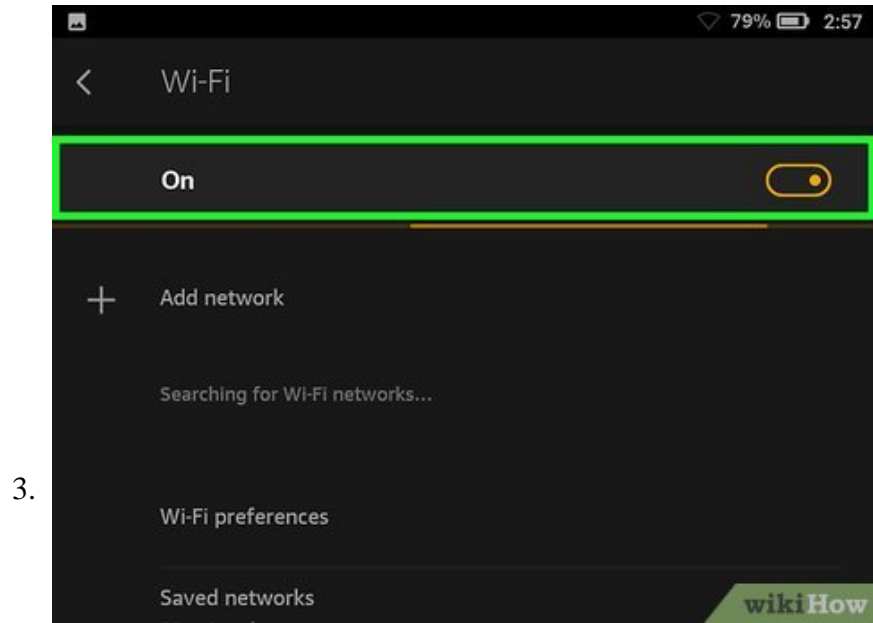

Adding a Wi-Fi Network Manually

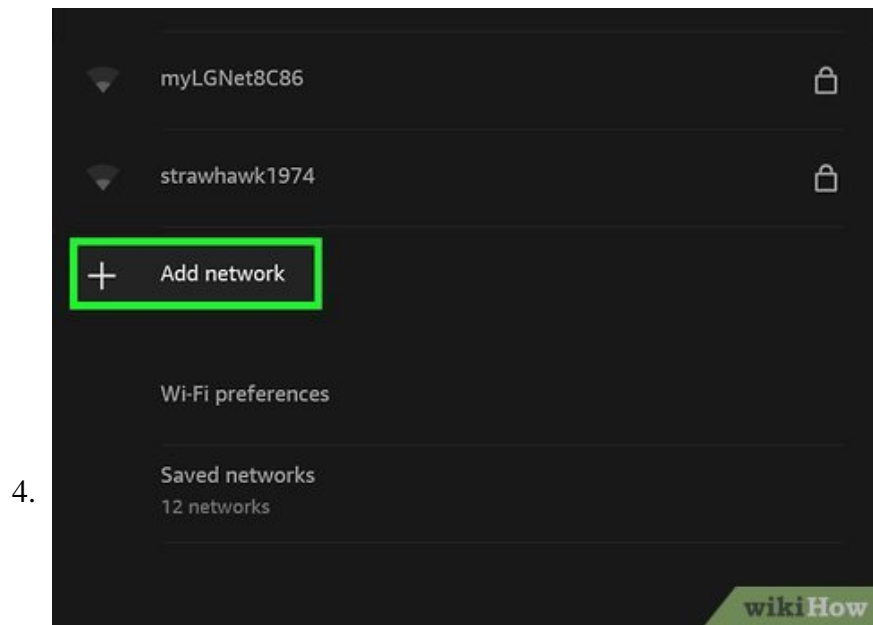

Swipe down from the top of your screen and tap on 'Wireless.'

Verify that Airplane Mode is set to 'Off.'

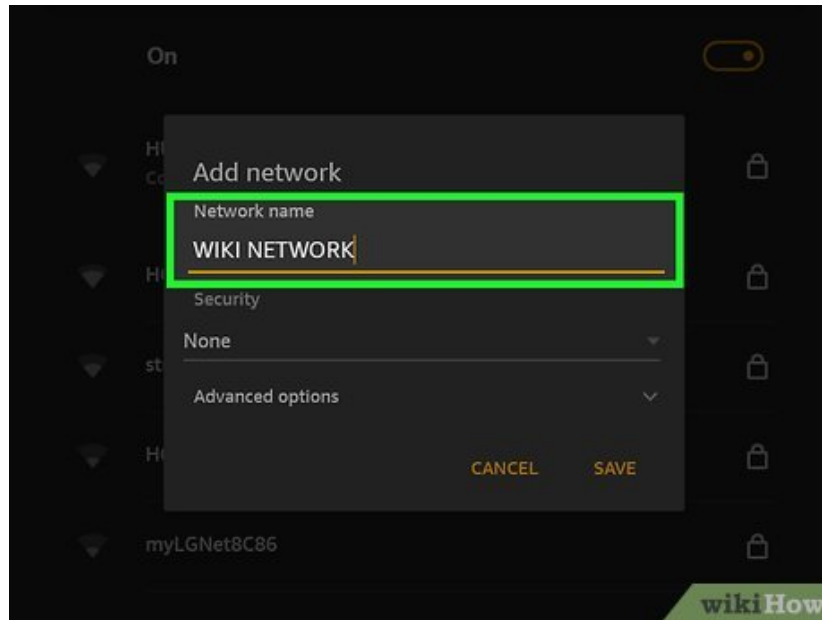

Tap on 'Wi-Fi,' then toggle Wi-Fi to 'On.'

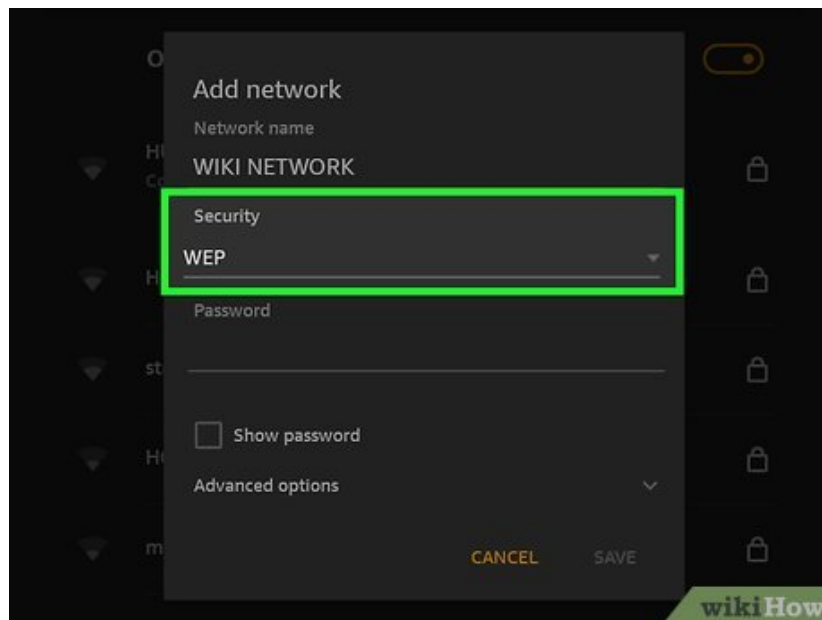

Tap on 'Join Other Network.'

5.

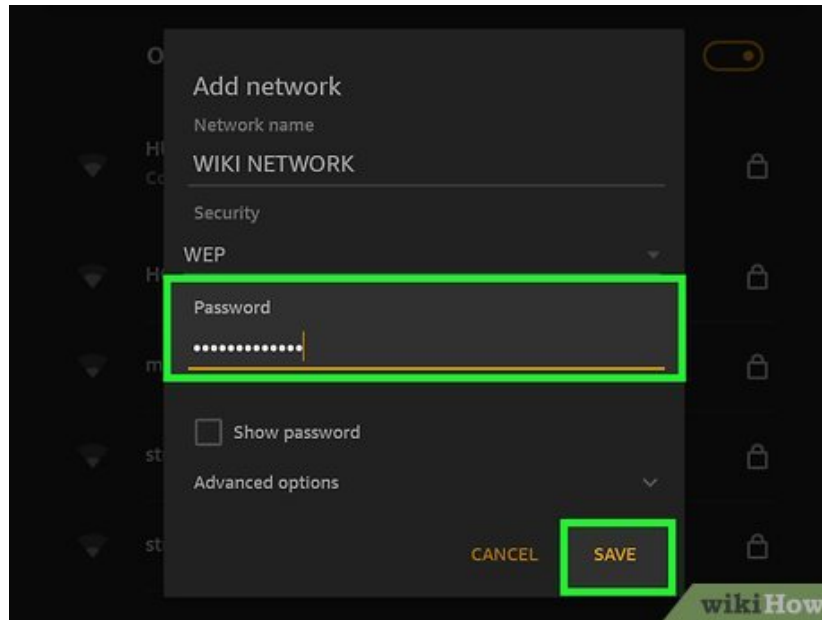

Enter the name of your network into the 'Network SSID' text field.

6.

Click on the dropdown menu next to 'Security,' and select a network security type.

7.

Enter the network password if required, then tap on 'Save.' Your Kindle Fire will then connect to the Internet.^[2]
