Converting color photos to black-and-white photos is the most basic and easiest technique to do in Photoshop. In the tutorial below, TipsMake.com shared with readers the quickest and simplest way to convert color photos to black and white photos.

Converting color photos to black-and-white photos is the most basic and easiest technique to do in Photoshop. In the tutorial below, TipsMake.com shared with readers the quickest and simplest way to convert color photos to black and white photos.

1. Use the Desaturate tool

To convert color photos to black and white photos quickly, use the **Desaturate** feature by visiting the menu **Image (1) => Adjustments (2) => Desaturate (3)** . Or you can operate faster with the keyboard shortcut **Shift + Ctrl + U** .

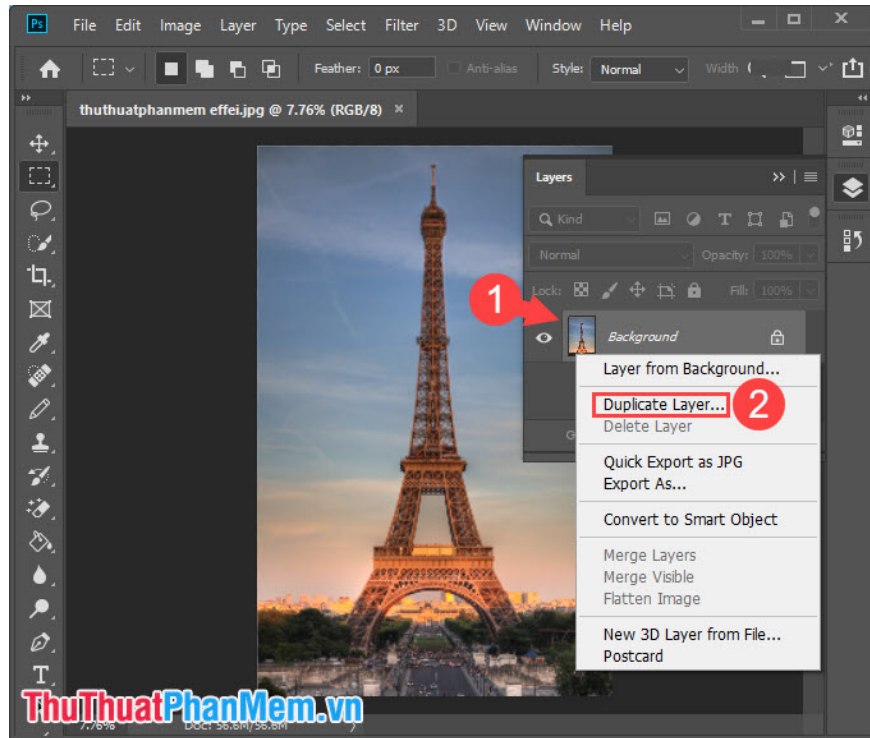

And then our photo turned to black and white quickly.

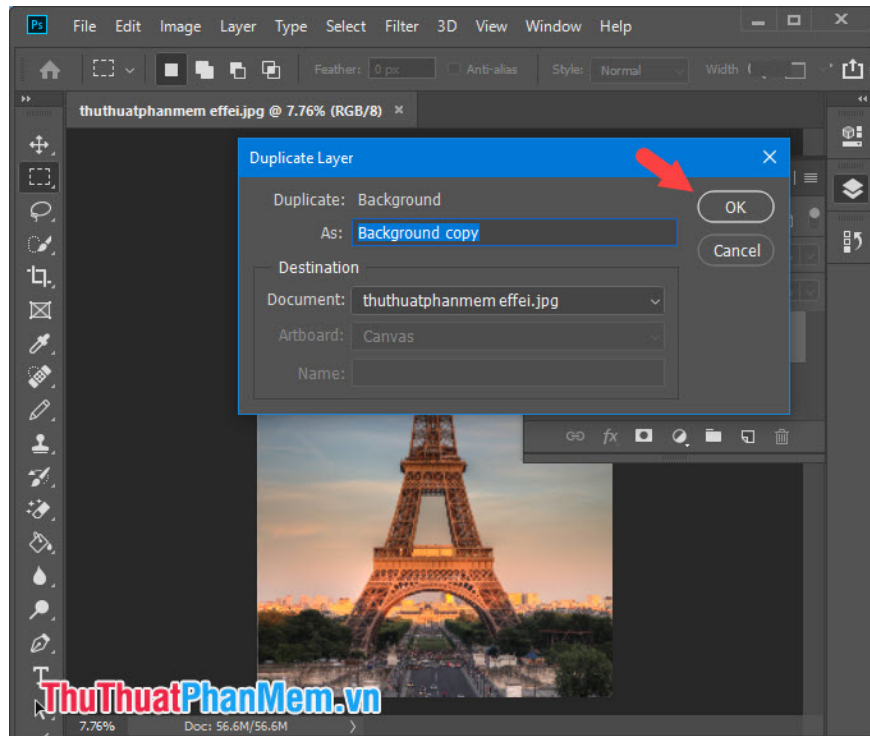

2. Use the Black & White feature

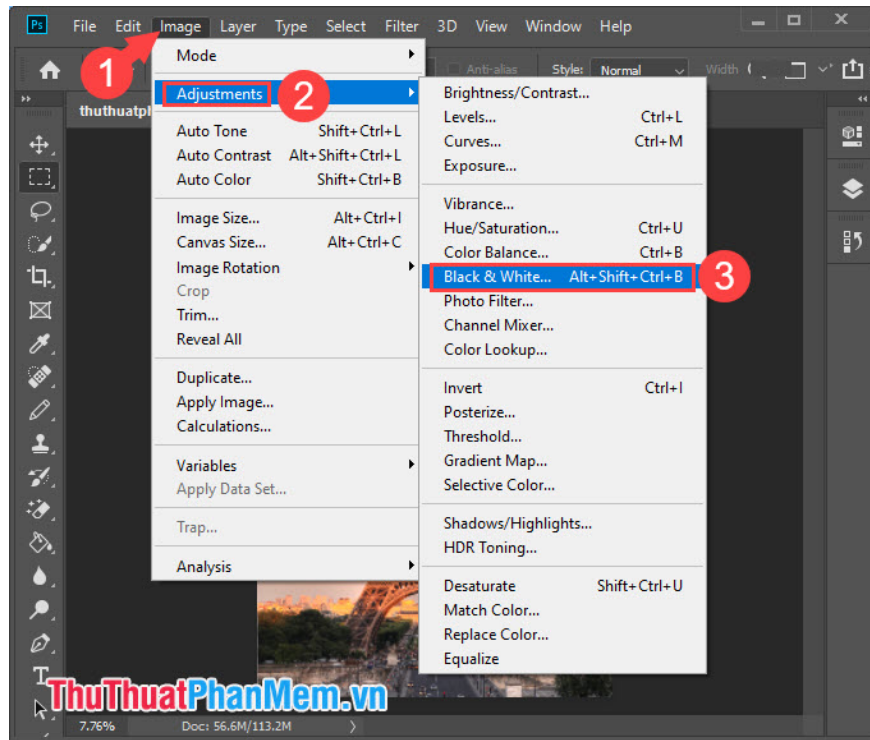

Step 1: You need to duplicate the original layer to edit again when needed. First, right-click on the **Background Layer (1)** => **Duplicate Layer . (2)** .

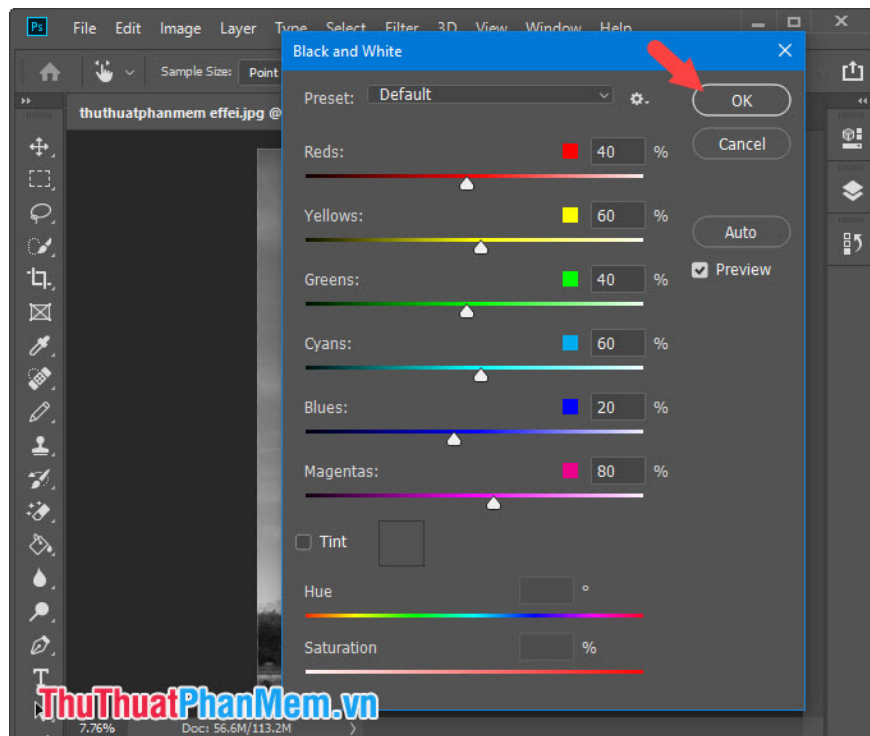

Next, click **OK** to create a new Layer copy.

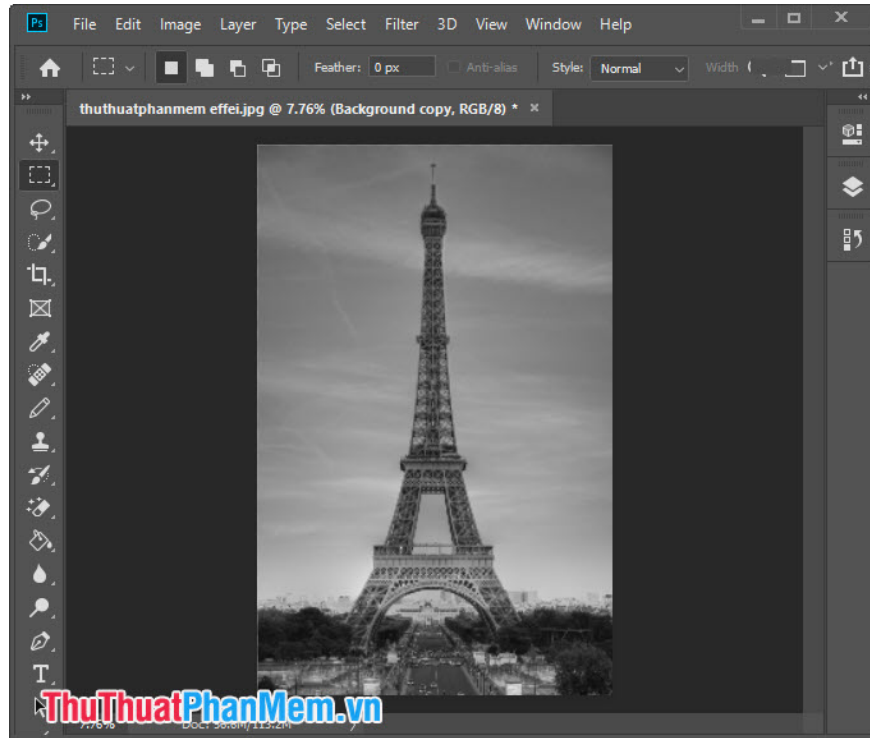

Step 2: Go to **Image** menu (1) => **Adjustments** (2) => **Black & White .** (3) . Or you can use the keyboard shortcut **Alt + Shift + Ctrl + B** to quickly open this feature.

Step 3: Click **OK** to finish. If you have color editing skills, you can customize parameters such as **Reds**, **Yellows**, **Greens**, **Cyans**, **Blues**, **Magetas** before clicking **OK** .

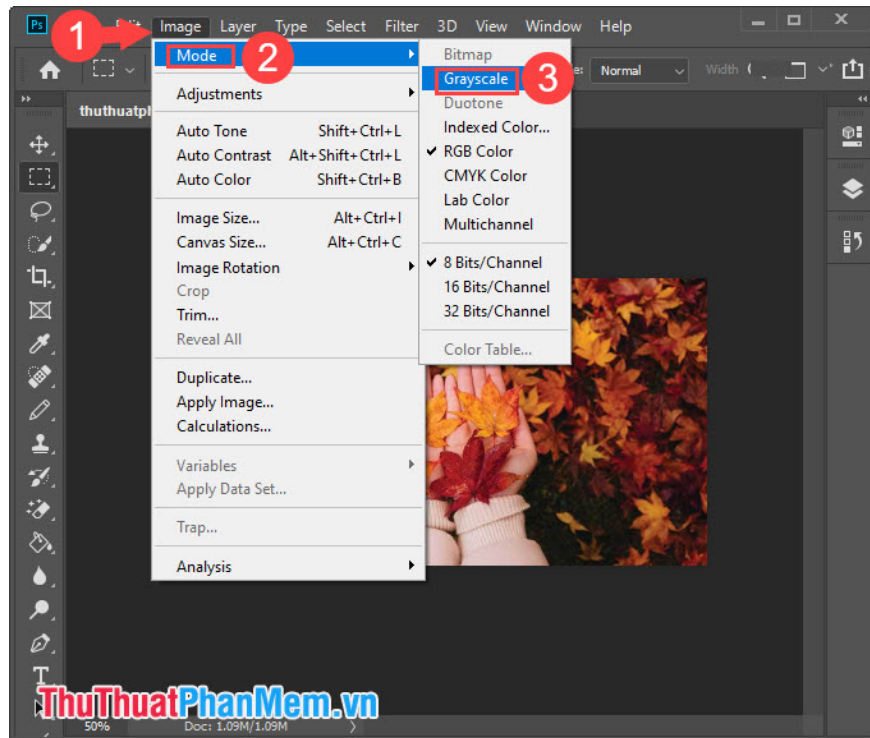

And finally we will have the photo turned black and white as shown below is successful.

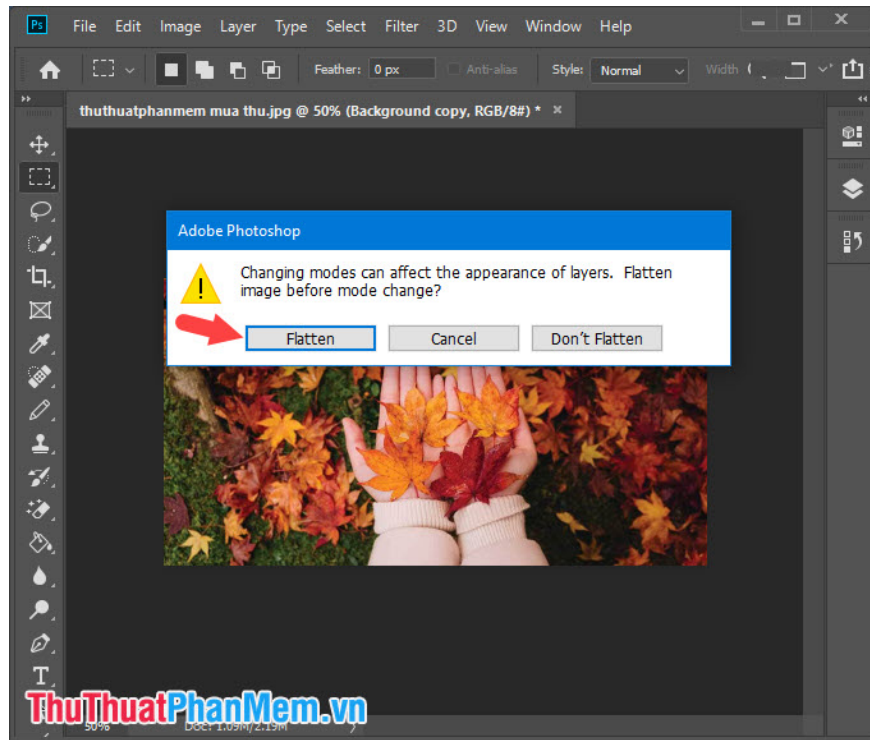

3. Use the gray system (Grayscale)

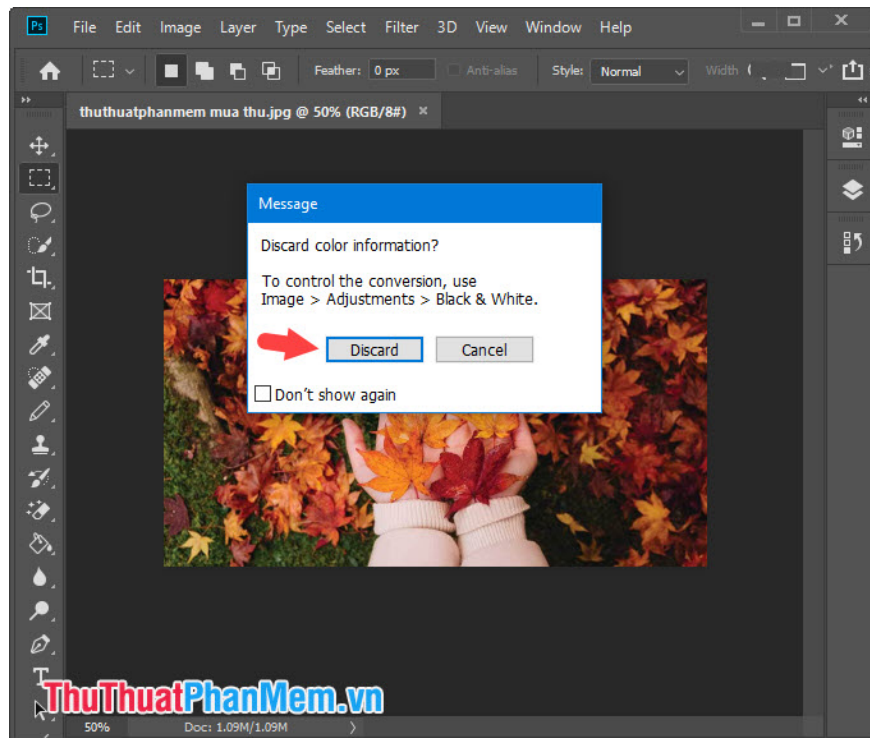

Step 1: Click menu **Image** (1) => **Mode** (2) => **Grayscale** (3) .

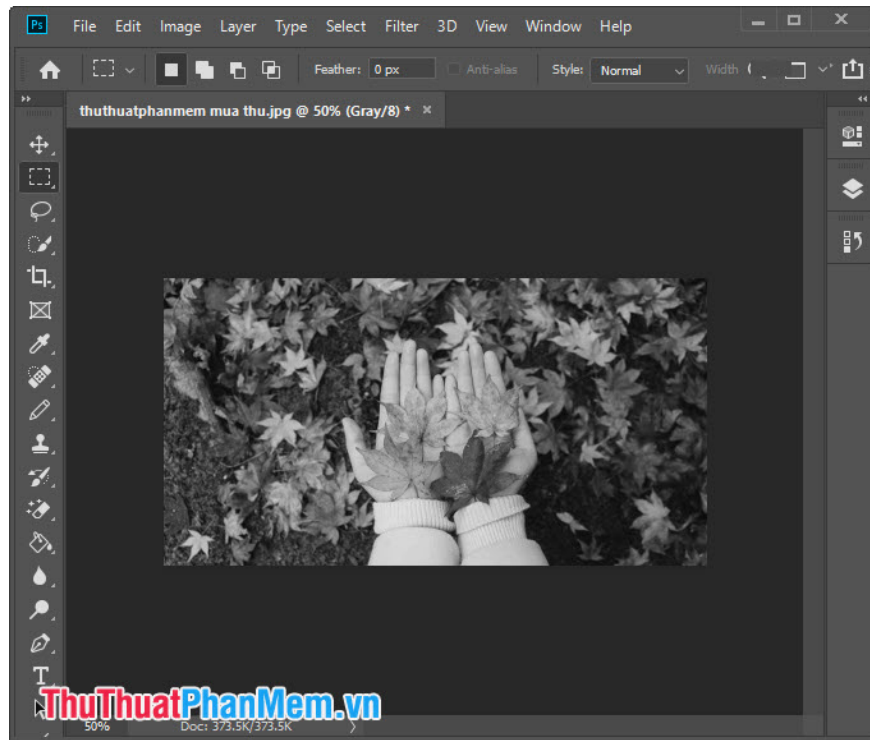

Step 2: If the following message appears, click **Flatten** .

And another message pops up, click **Discard**.

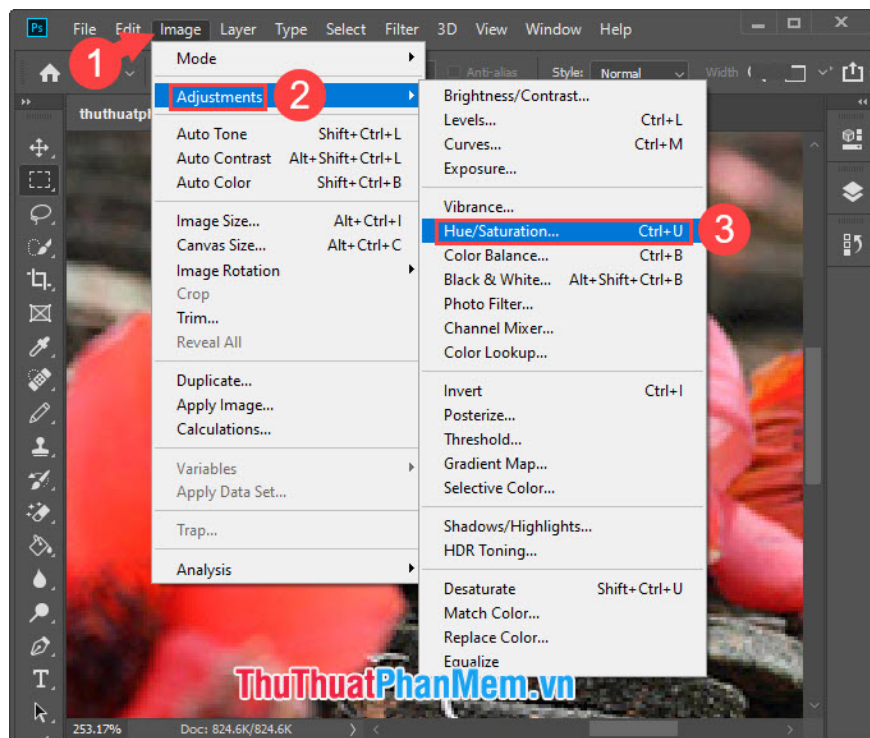

And finally we will have the image converted to black and white as shown below.

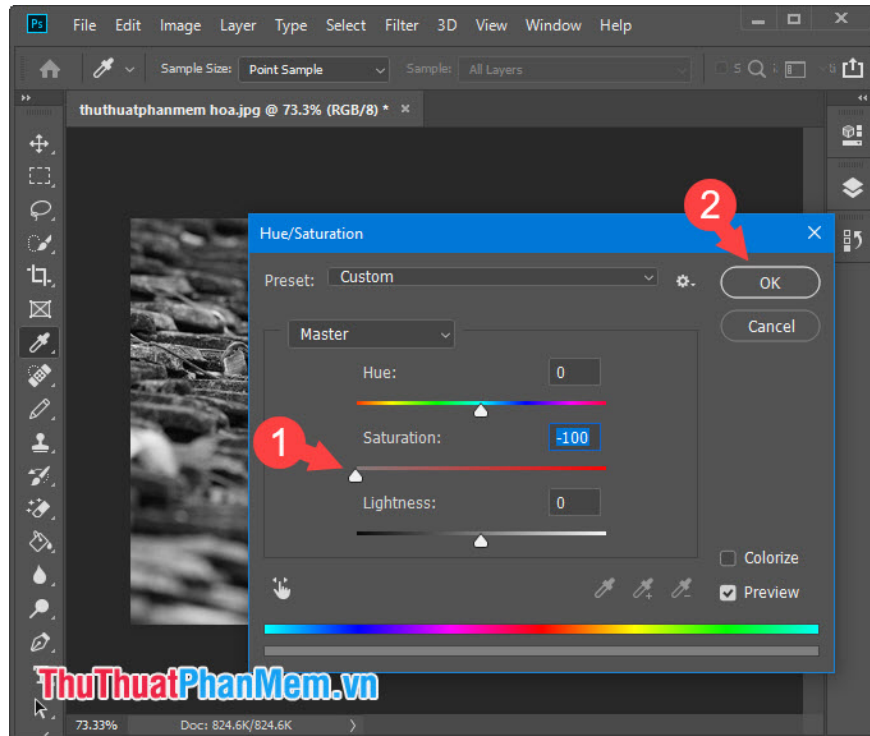

4. Use the Hue / Saturation feature

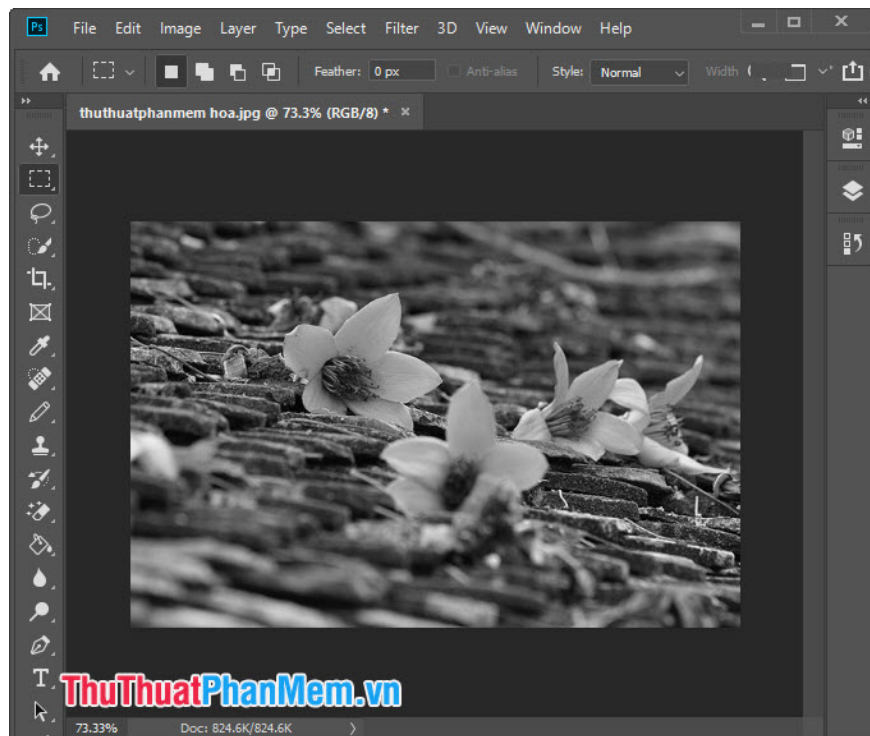

Step 1: You access the menu **Image (1)** => **Adjustments (2)** => **Hue / Saturation . (3)** . Or you can use the keyboard shortcut **Ctrl + U** to quickly open this tool.

Step 2: Drag all the **Saturation (1)** to the left to reduce the color saturation. Next, click **OK (2)** to save.

After completing the above steps, your photo will turn into a black and white photo like that.

With the way to convert color images to black and white images in the article, we can choose the easiest way and suit your editing needs. Good luck!
