

How to convert audio to WAV using Format Factory

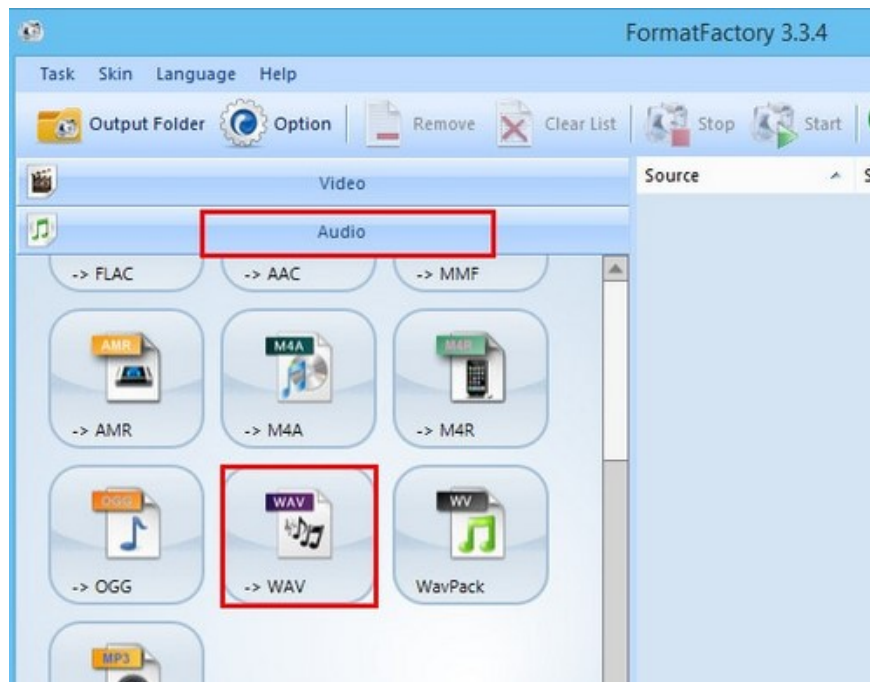

Converting audio to WAV using Format Factory improves compatibility with other formats when editing. If you don't know how to do it quickly and safely, Free Download will show you how right now.

How to quickly convert audio to WAV

Step 1: Launch the program.

If you haven't installed Format Factory yet, you can download and install it on your computer.

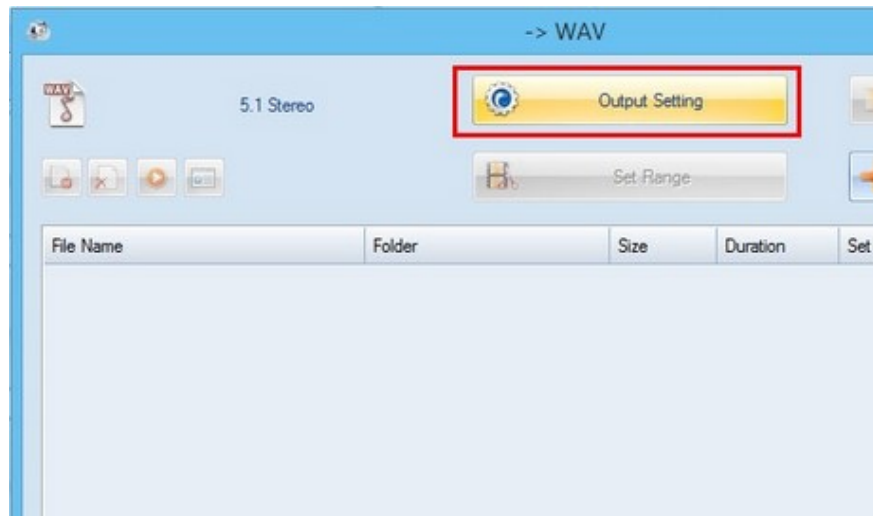

Step 2: In the Format Factory interface, click on **Audio** and select **WAV**.

Step 3: Another interface window appears

- **Output Setting** : Set the audio output parameters.

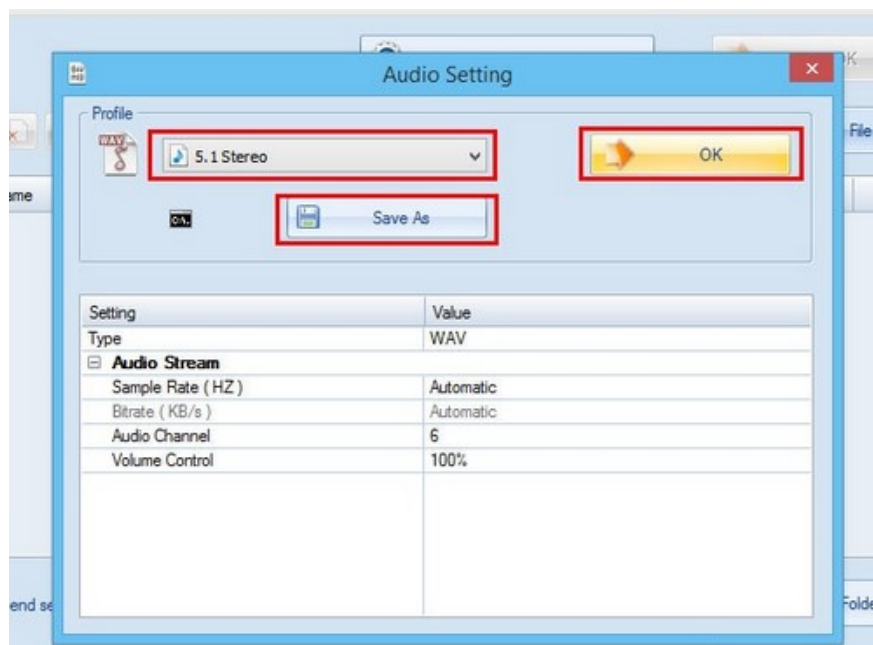

After clicking on **Output Setting** , the **audio** settings interface will appear .

+ In **Profile** : Choose the quality with options (High quality, Medium quality, etc.), select your desired quality. Then click **Save As** (Here I chose **5.1 Stereo** quality).

The **Settings** panel will display the quality parameters of the format you selected.

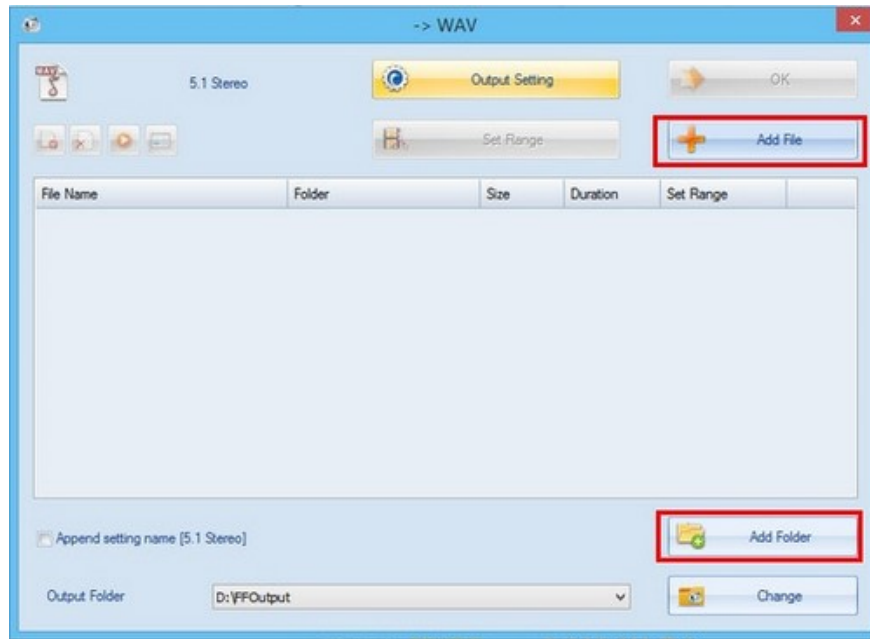

After setting the video output parameters, click OK.

- **Output Folder:** The folder containing the output file.
Here you can change this folder by clicking Change and selecting your desired save location. In this article, I will leave the default as **D:FFOutput**.

- **Add File or Add Folder:** To import audio files.
Add File: Add audio files .
Add Folder : Add the folder containing the files to be converted

(In this article, I choose **Add File**).

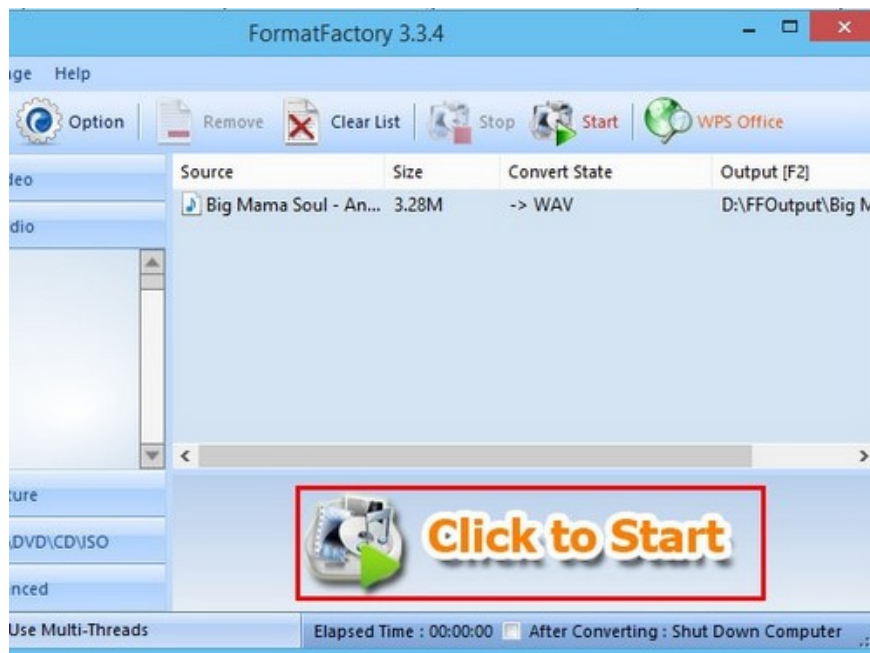

After selecting an audio file to convert, you will have additional options such as:

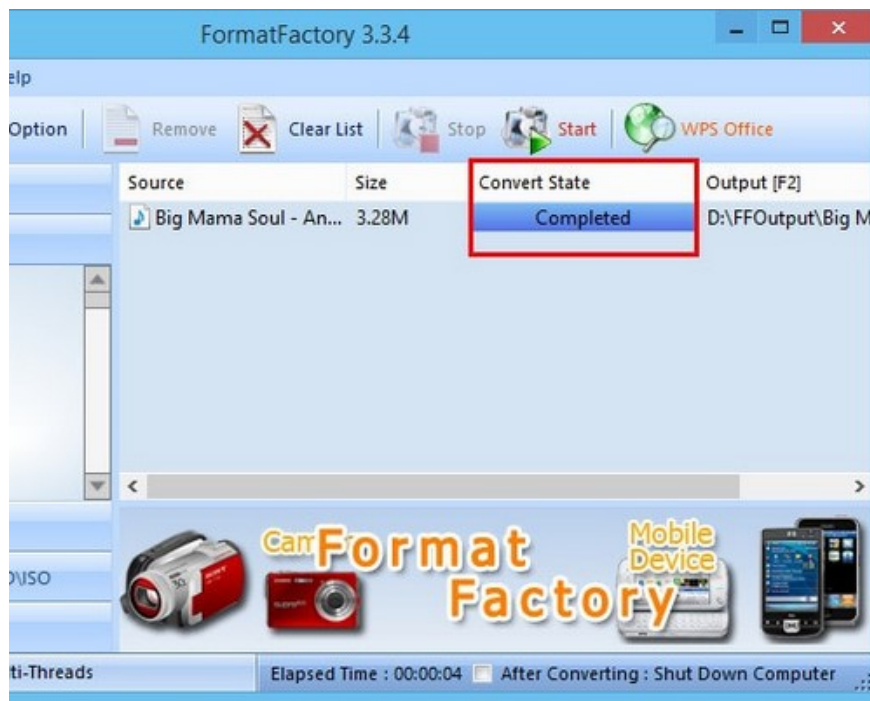

+ **Set Range:** Choose to trim the music; you can select the sections to cut.

- After selecting the file and setting the output parameters and save folder, click **OK**

. - Click on "**Click to Start**" at the bottom of the program interface.

Depending on the file format and size of the input file, the conversion process will be faster or slower. When you see the message "**Completed**" in the **Convert State** , it means the conversion is finished.

Besides converting audio to WAV format using Format Factory, you can also use other programs such as MP3 to WAV or Acoustica MP3 to Wave Converter to perform this task.
