

# How to convert calls from Apple Watch to iPhone

The Apple Watch is a device that can make and receive phone calls extremely useful if you want to be hands free. No matter how convenient, however, talking on the phone in person is better than talking through the Apple Watch smartwatch.

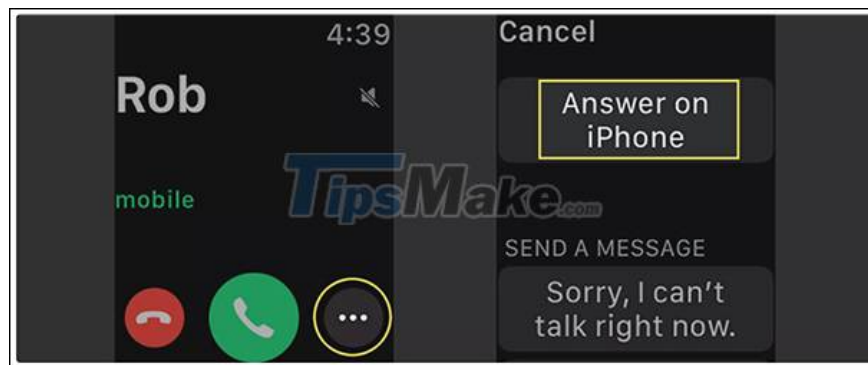

There are two ways to transfer calls from Apple Watch to iPhone, depending on whether you want to pick up the call or push it to standby. In the article below, TipsMake will guide you on how to convert calls from Apple Watch to iPhone.

## How to transfer a call from Apple Watch to iPhone before answering the phone

You can switch calls from Apple Watch to iPhone before you receive it.

Step 1. When you have the phone arrived, select the **More** icon (.) **button**.

Step 2. Select **Answer on iPhone** to put the caller on standby until you can pick up the phone on the iPhone.

Step 3. On the iPhone, receive the phone as normal calls.

## How to convert a call from Apple Watch to iPhone after receiving the phone

You can also switch from Apple Watch to iPhone once you have received the phone. This method does not require the other end of the wire to be put in standby mode. This is very useful if you want to talk while looking for your phone.

Step 1. Answer incoming phone on Apple Watch.

Step 2. On the iPhone, select the green bar in the upper corner of the screen that indicates incoming calls. The call will be transferred from Apple Watch to your iPhone.

Step 3. Continue your conversation on iPhone. You don't have to 'hang up' on the Apple Watch.
