How to convert Word files to PDF on Cloudconvert

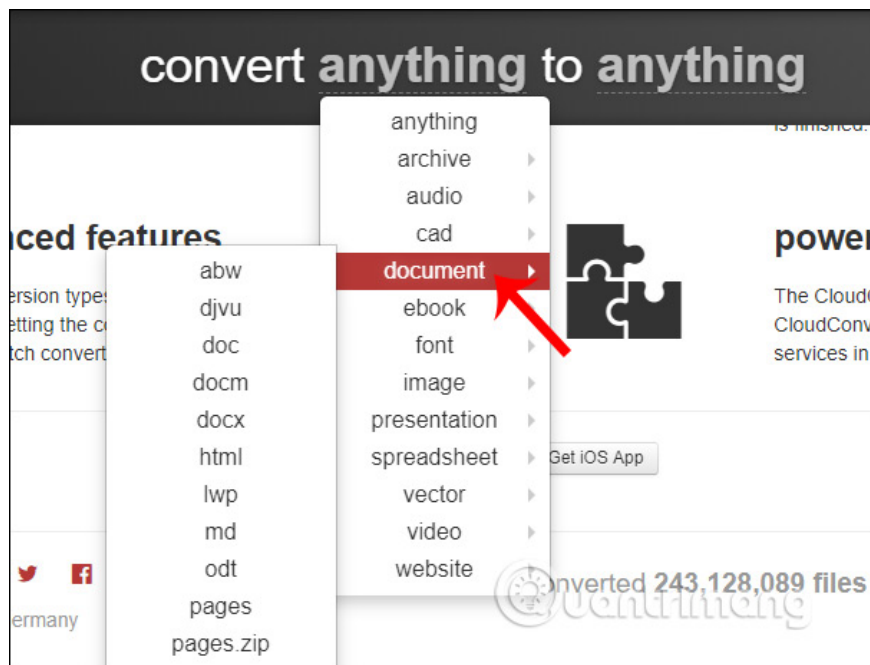

Step 1:

Users access the link below to enter the Cloudconvert homepage.

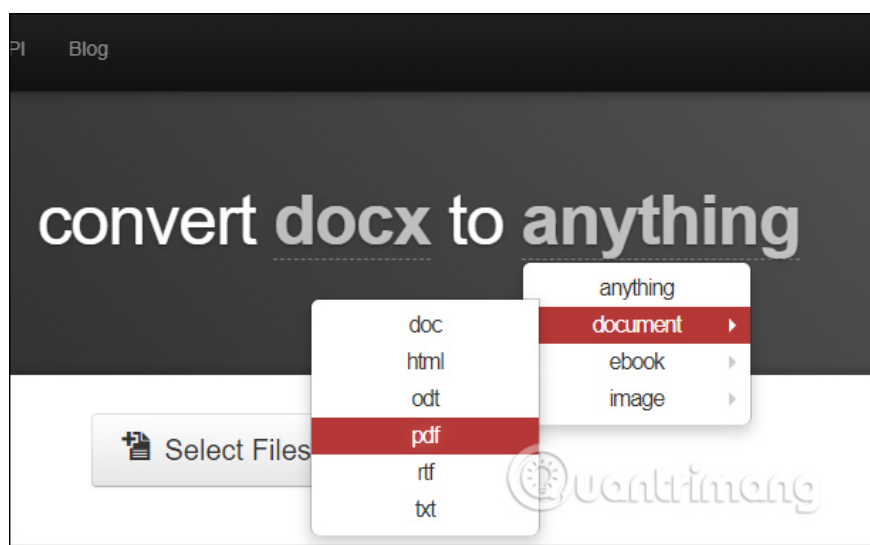

1. <https://cloudconvert.com/>

Step 2:

At the website interface we click **anything at the section convert** and then select **document**, then click on the **doc file or docx file** to convert.

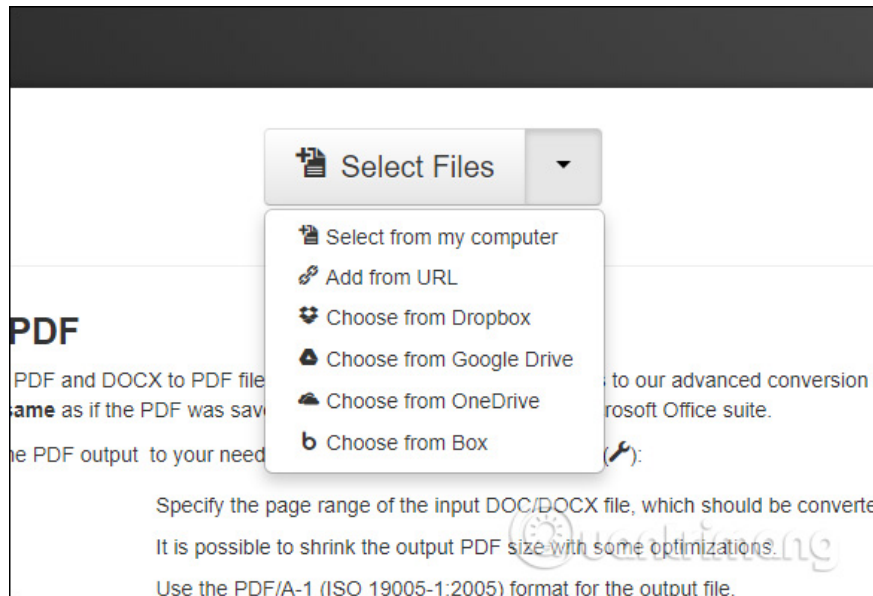

Next to the section, I also clicked on anything and then selected the document and clicked on PDF .

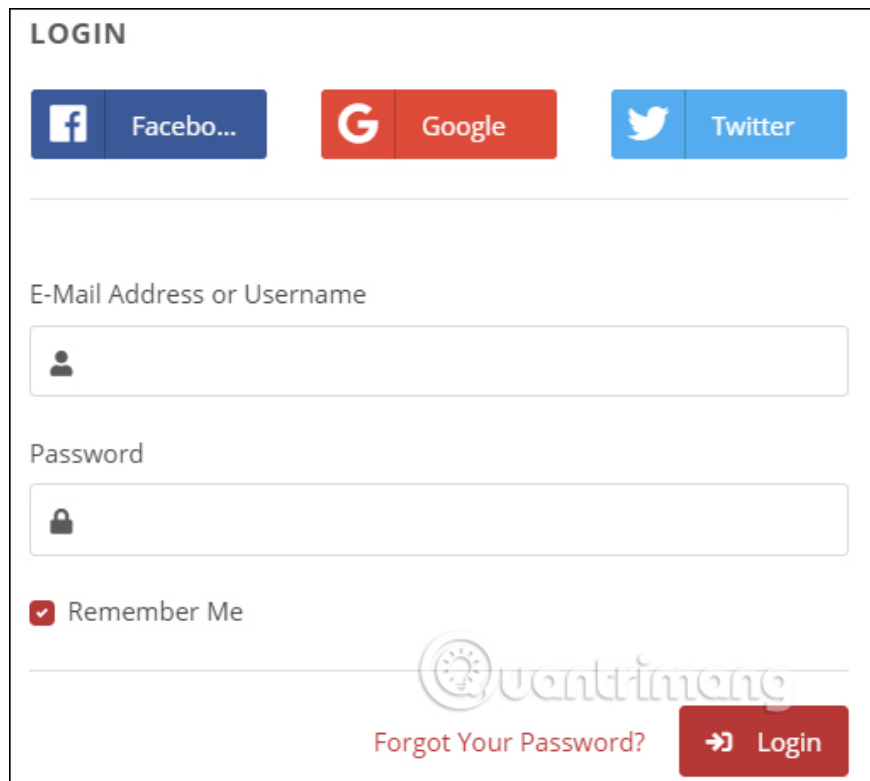

Step 2:

Then click **Select File** to download the file available on your computer, or click the triangle icon to select the file storage service to be converted or via the URL of the file. You can upload multiple files at the same time to Cloudconvert.

Note to use more sources to get other files, users need to create an account using Cloudconvert.

Step 3:

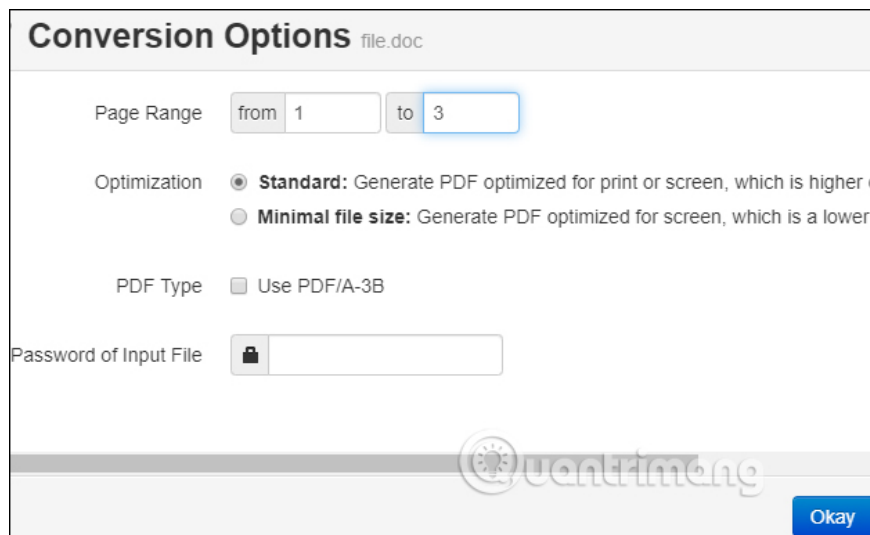

After downloading the text file to the Cloudconvert interface, we can download additional files by clicking Select Files and also selecting the output format.

Next click **the wrench icon** to customize the content of the PDF file.

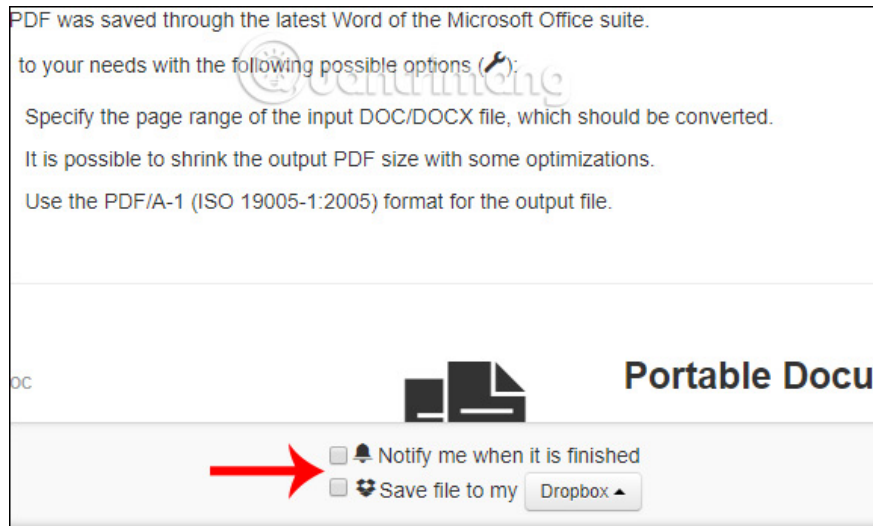

Step 4:

In **Conversion Options** interface, select the number of text pages you want to convert to PDF files. The Optimization section selects the quality of the output PDF file. Click Okay to continue.

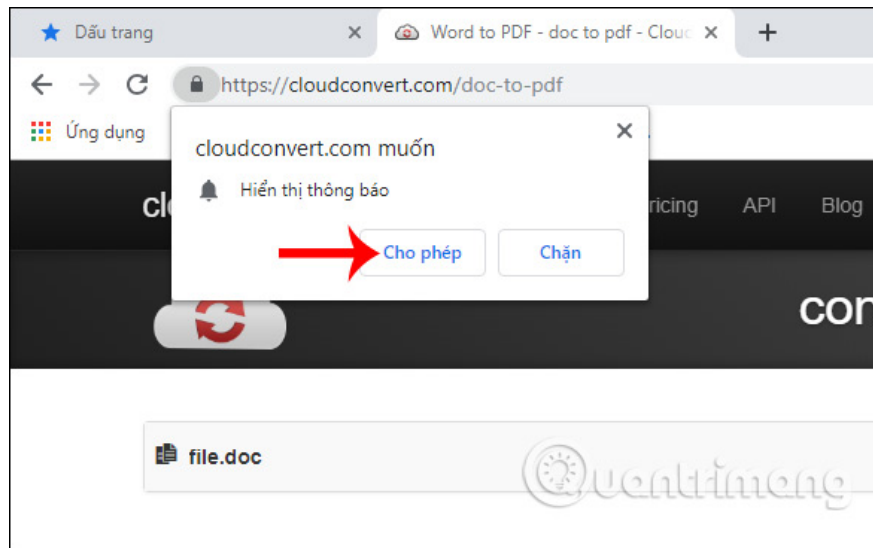

Step 5:

You can click the **Notify me** option **when it is finish** to receive a notification when Cloudconvert completes the conversion. With the Save file to my option, downloading the completed file to the hosting service, you must have an account.

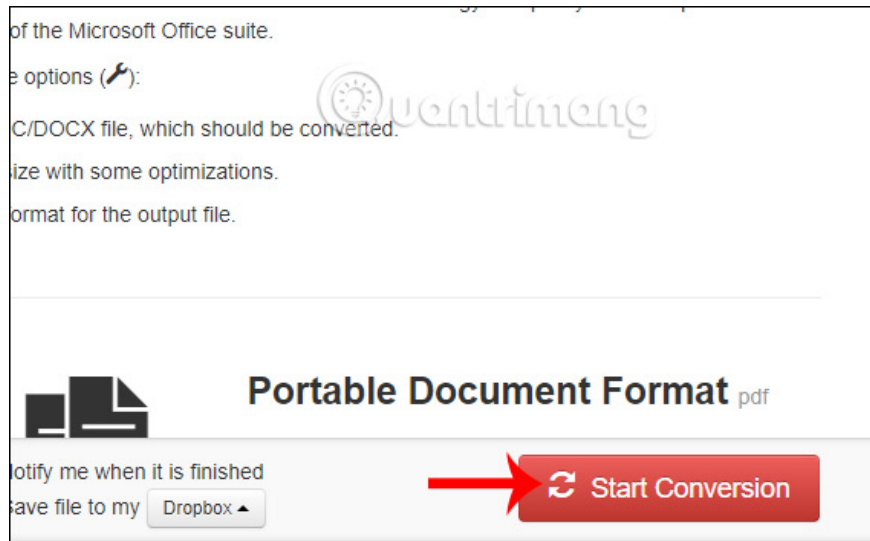

To receive notifications, **press Allow** to have Cloudconvert display a notification on the screen.

Step 6:

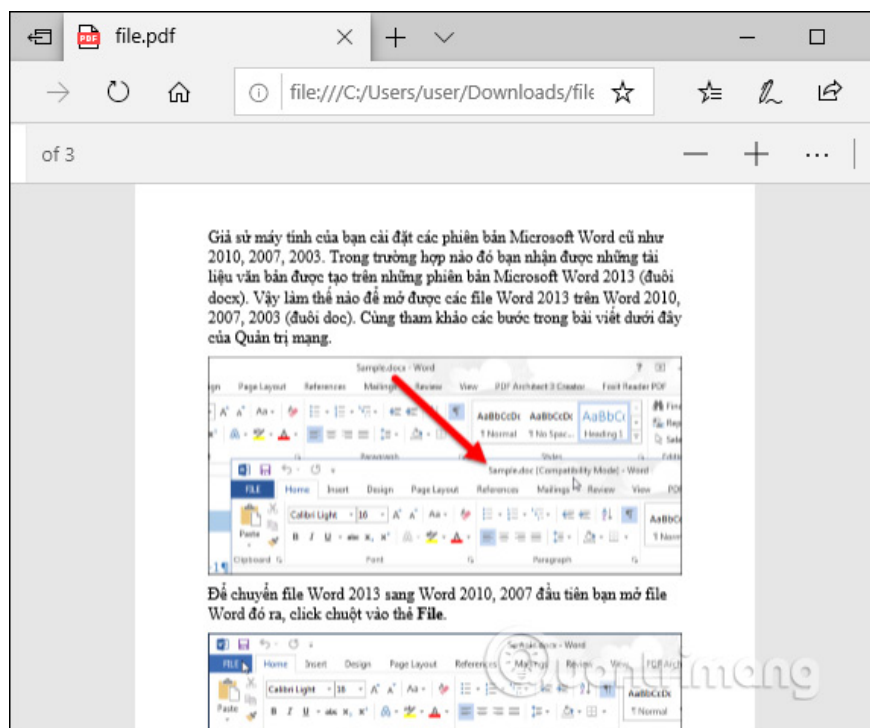

Finally press the **Start Conversion** red **button** at the bottom of the screen.

The file conversion process takes place immediately afterwards. When successful, the user receives a notification in the lower right corner of the screen.

Open the PDF file after converting to test.

Cloudconvert supports many sources of different files, helping you to download text files to the website more quickly and conveniently. In addition, we can also use Cloudconvert to convert more formats if you want.

I wish you all success!
