

How to convert GIF images to Videos

GIF format has been around for a long time and is often used on social networking platforms because they are lightweight. If you like those GIFs and want to convert them into Videos for personal use, what to do? In this article, Software Tips will guide you how to convert GIF images to Videos.

GIF format has been around for a long time and is often used on social networking platforms because they are lightweight. Most GIFs now follow a funny, mischievous, interesting theme for people to use them instead of emoticons. If you like those GIFs and want to convert them into Videos for personal use, what to do? In this article, Software Tips will guide you how to convert GIF images to Videos.

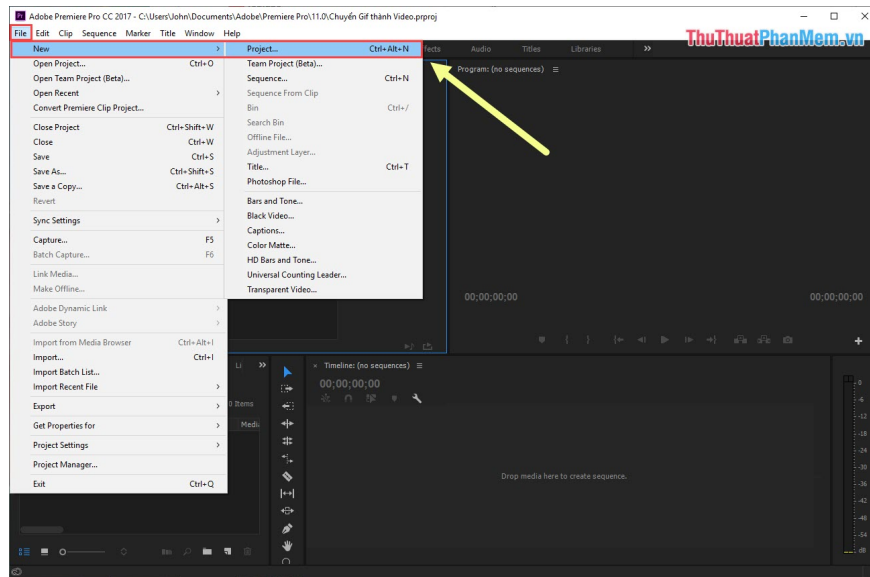

Method 1: Convert GIF into Video with Premiere Pro

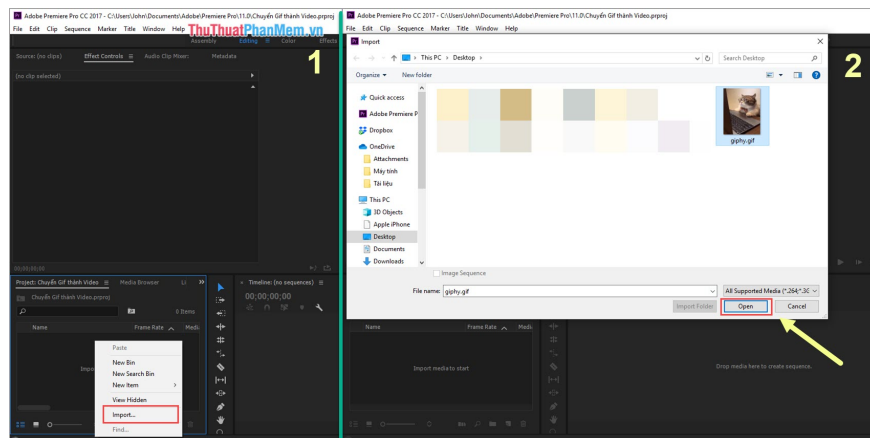

Homepage: <https://www.adobe.com/products/premiere.html>

Premiere Pro is known as the most famous Video editing tool in the world thanks to its useful features and strong, stable software system. The basic tasks like converting the format on Premiere Pro can still do well and even very quickly.

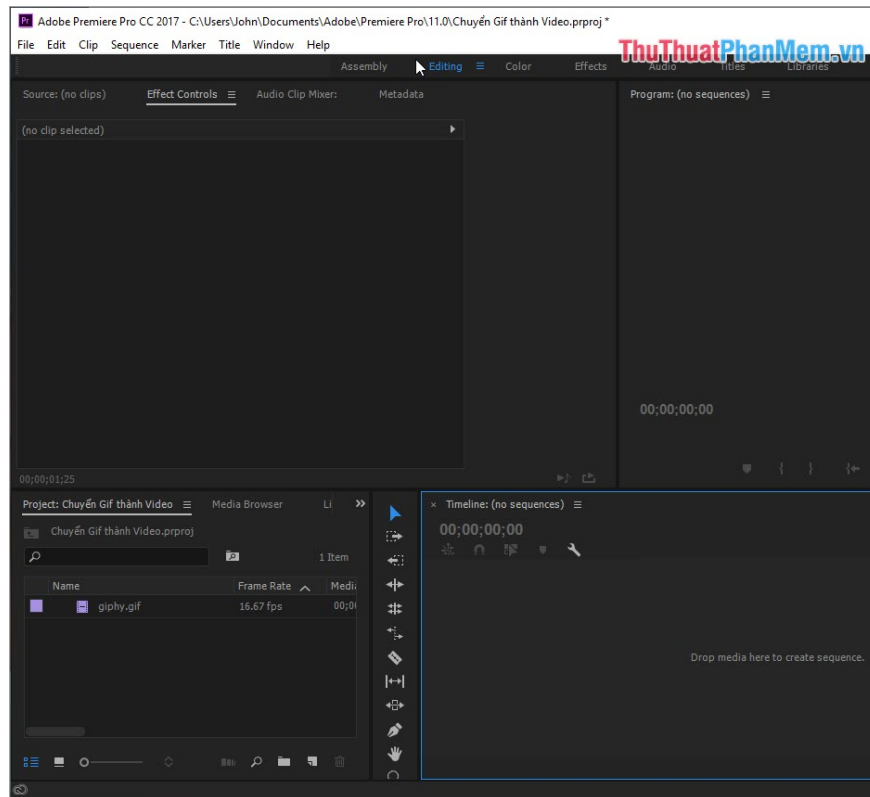

Step 1: You start the software and select **File -> New -> Project . (Ctrl + Alt + N)** to create a new working project.

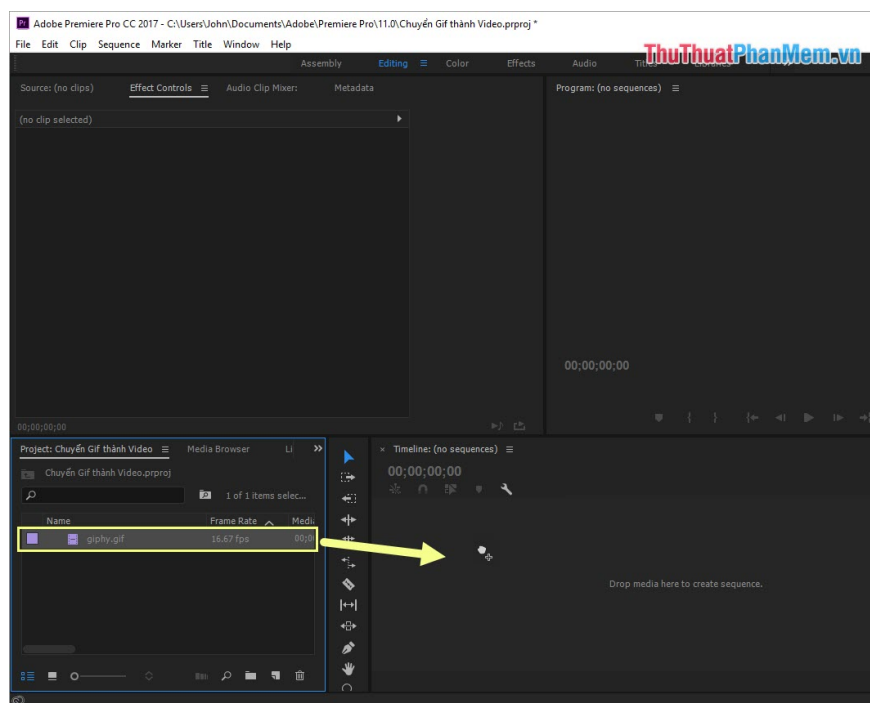

Step 2: Then, you **Right-click** on **Media Browser -> Import** to proceed to select the GIF file to convert into Video.

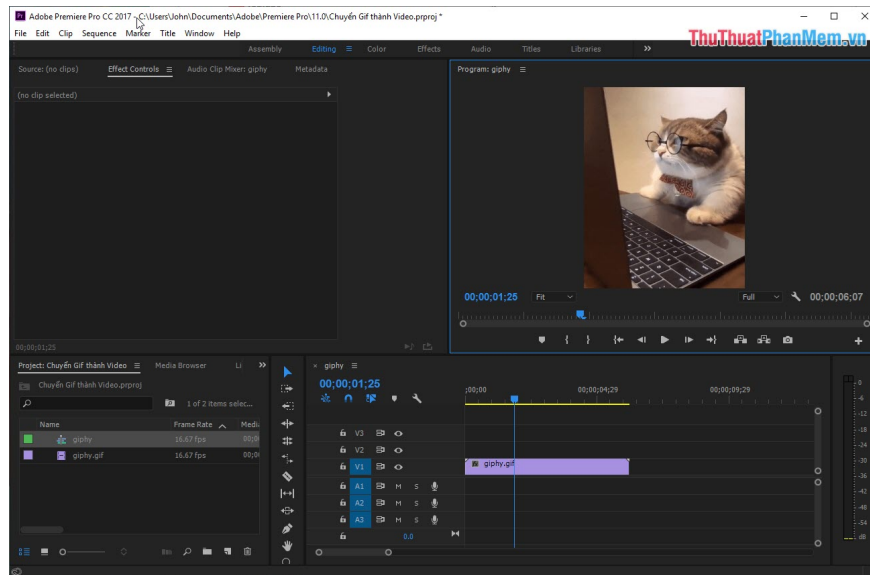

Then we have the GIF file in the system as follows:

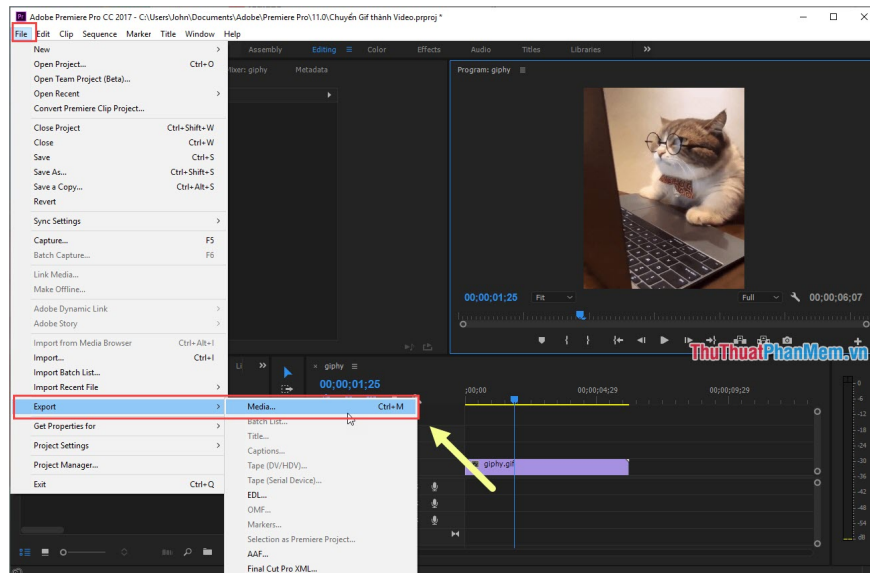

Step 4: You proceed to **hold and drag the GIF file into the Timeline bar** to use.

After that, you will see the GIF file is converted into Video and you can press **Space** (spacebar) to watch Video.

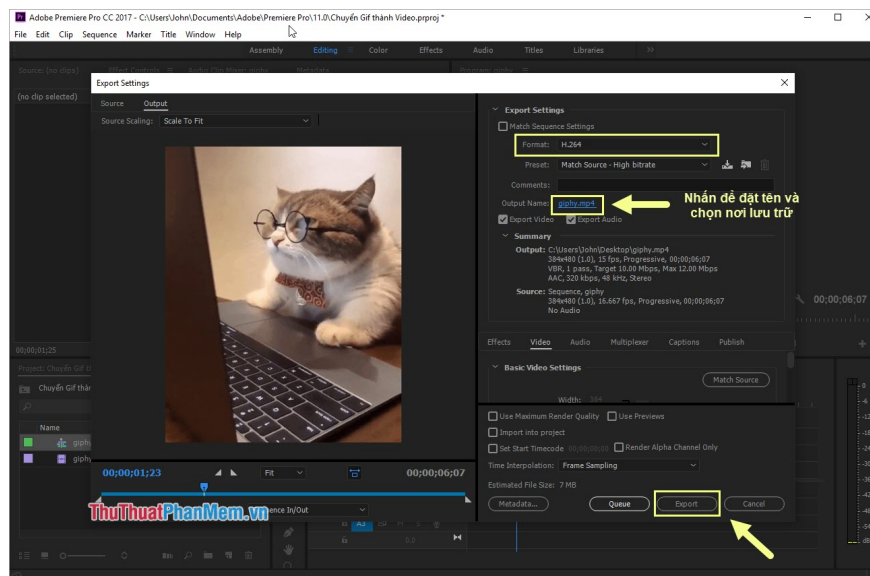

Step 5: Next, select **File -> Export -> Media . (Ctrl + M)** to export the file.

Step 6: You set up the following information:

1. **Format:** H.264
2. **Output Name:** The name and location where the video is stored

Finally, click **Export** , the system will automatically export the Video to you where you have set up the archive.

Method 2: Convert GIF into Video Online

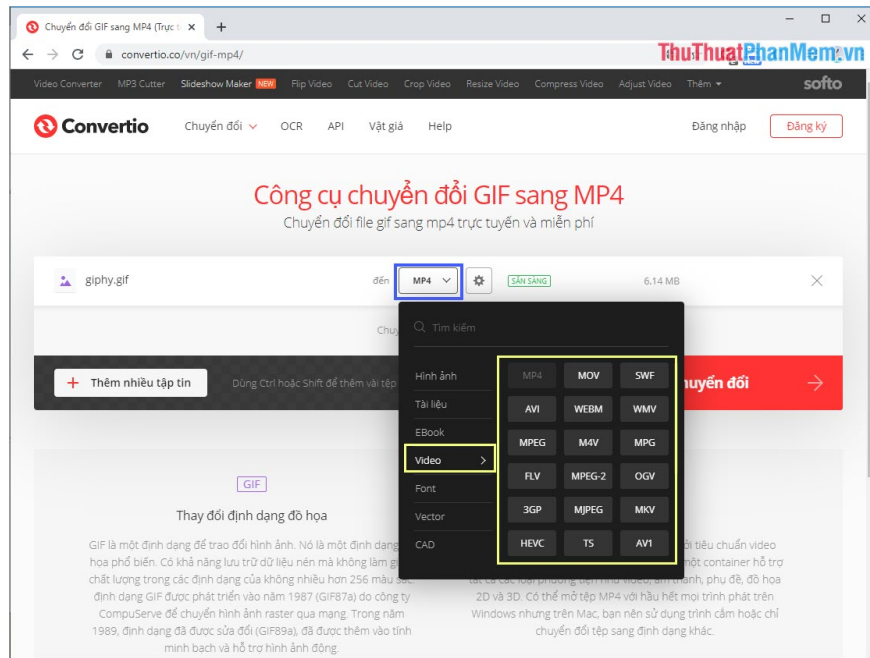

Homepage: <https://convertio.co/vn/gif-mp4/>

Step 1: You proceed to the homepage and select **Choose file** to upload GIF files on the system.

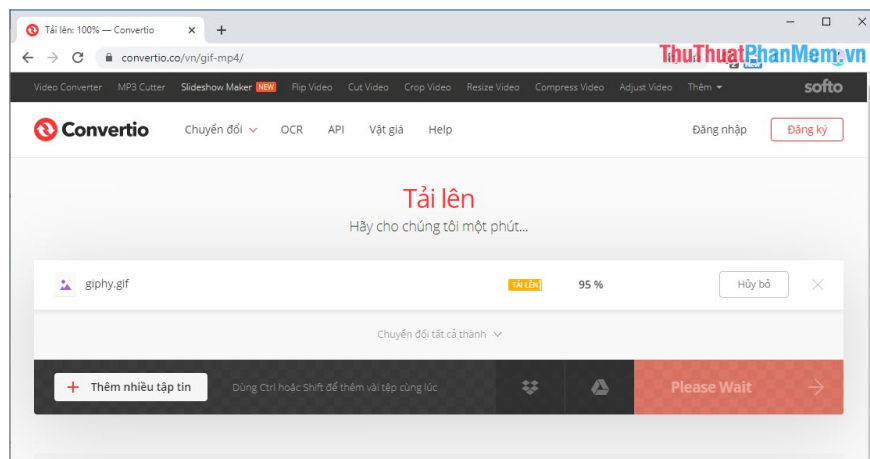

Step 2: After selecting the GIF file, the system will automatically select the Video format as Mp4. If you need to use another format, you can click to select.

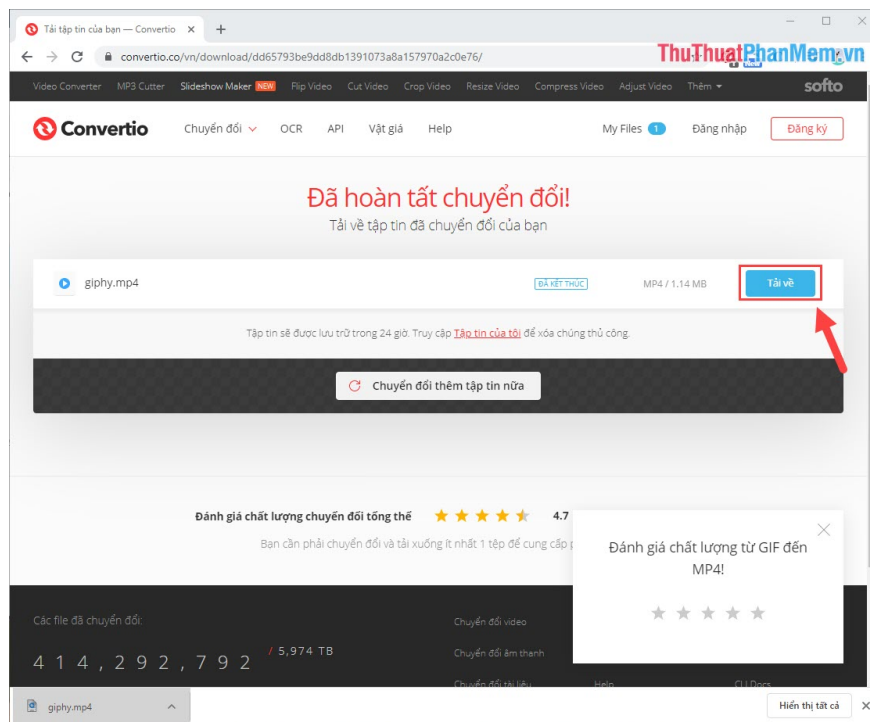

When the setup is complete, click **Convert** to begin.

The system will take time to upload GIFs and convert them.

Step 3: When the system has finished converting, select **Download** to download the converted video to your computer.
