Video tutorial for converting XESC to MP4 files with VLC

How to convert xesc files to mp4 with VLC

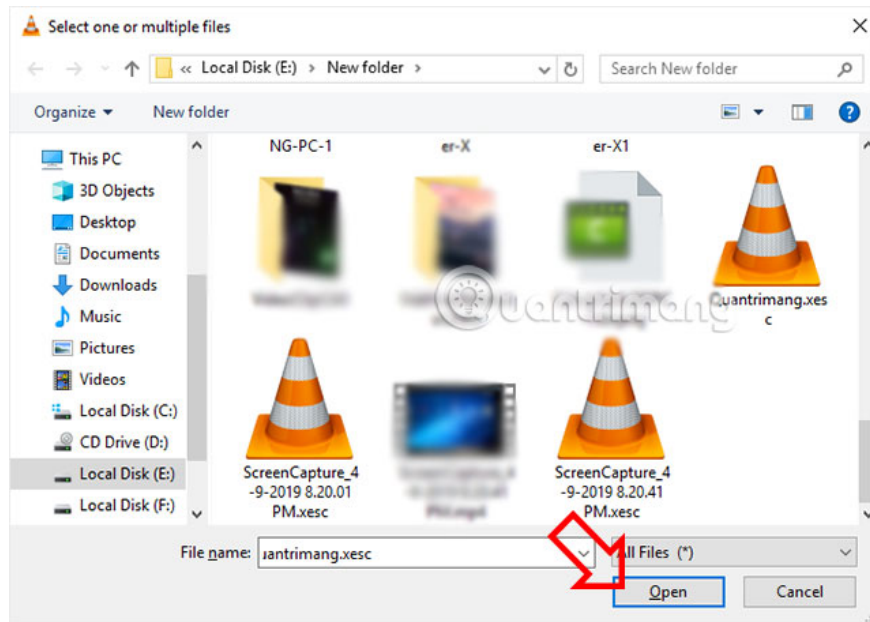

Step 1: To change the xesc file extension to mp4, you need to have VLC software. After downloading and installing VLC, please click **Media** in the main interface, continue to click **Convert / Save** .

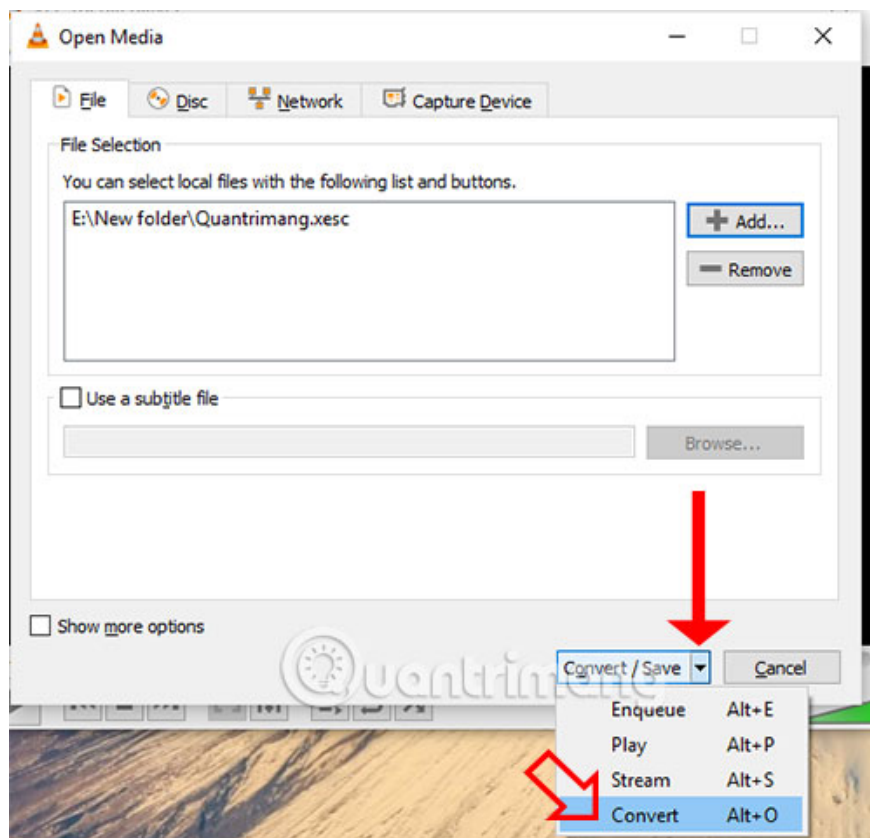

Next in the **Open Media** interface, select the File tab, then click **Add** to add the xesc tail video.

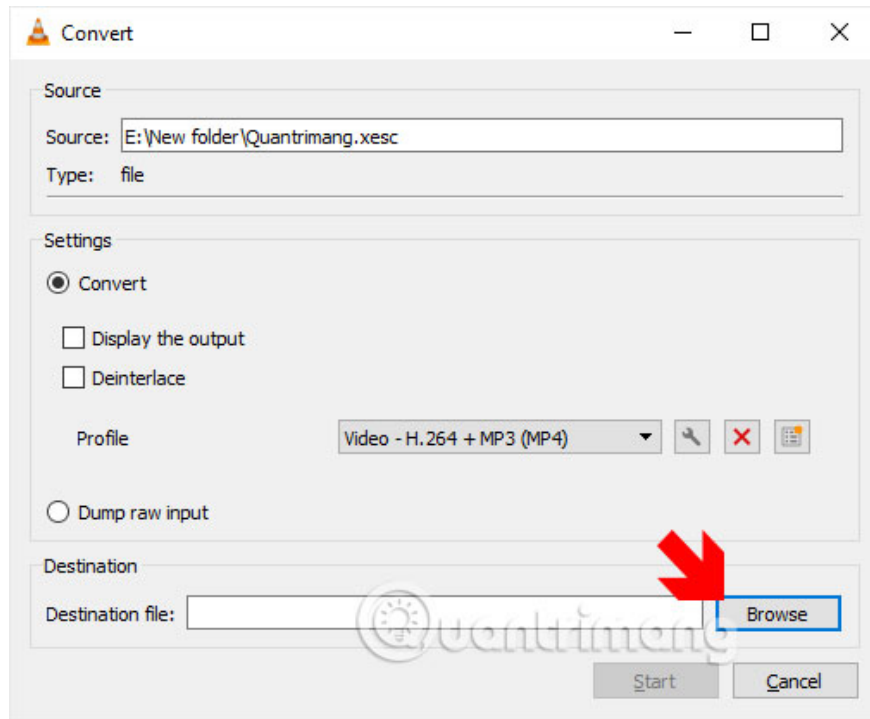

Next select the video with the .xesc extension and click **Open** .

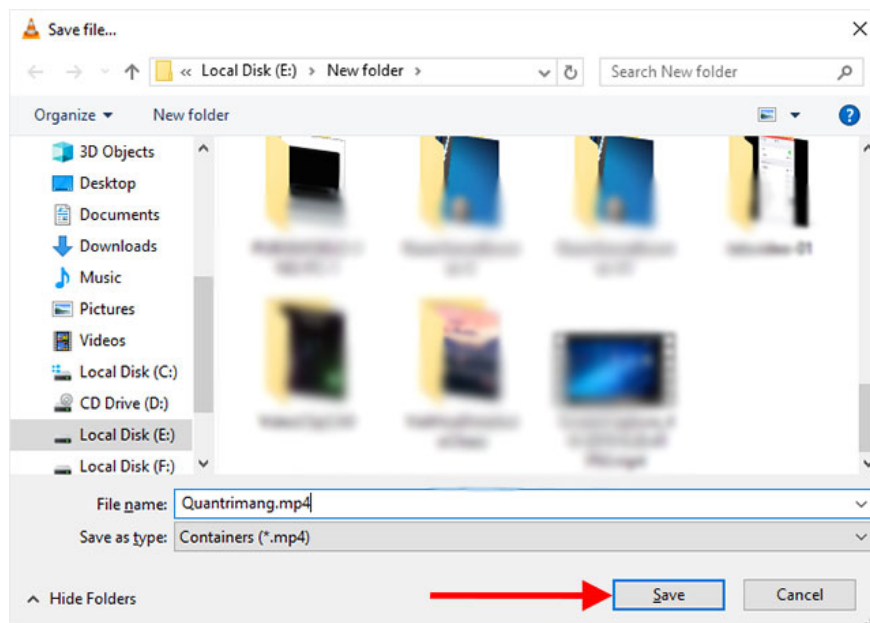

Next click **Convert / Save** and select **Convert** .

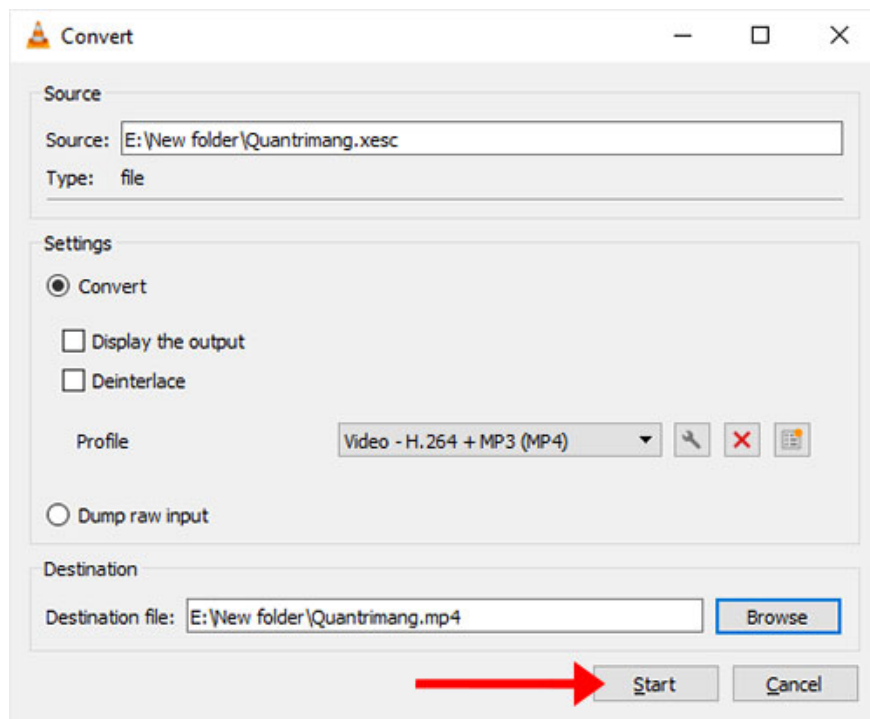

Next, click **Browse** and select the video.

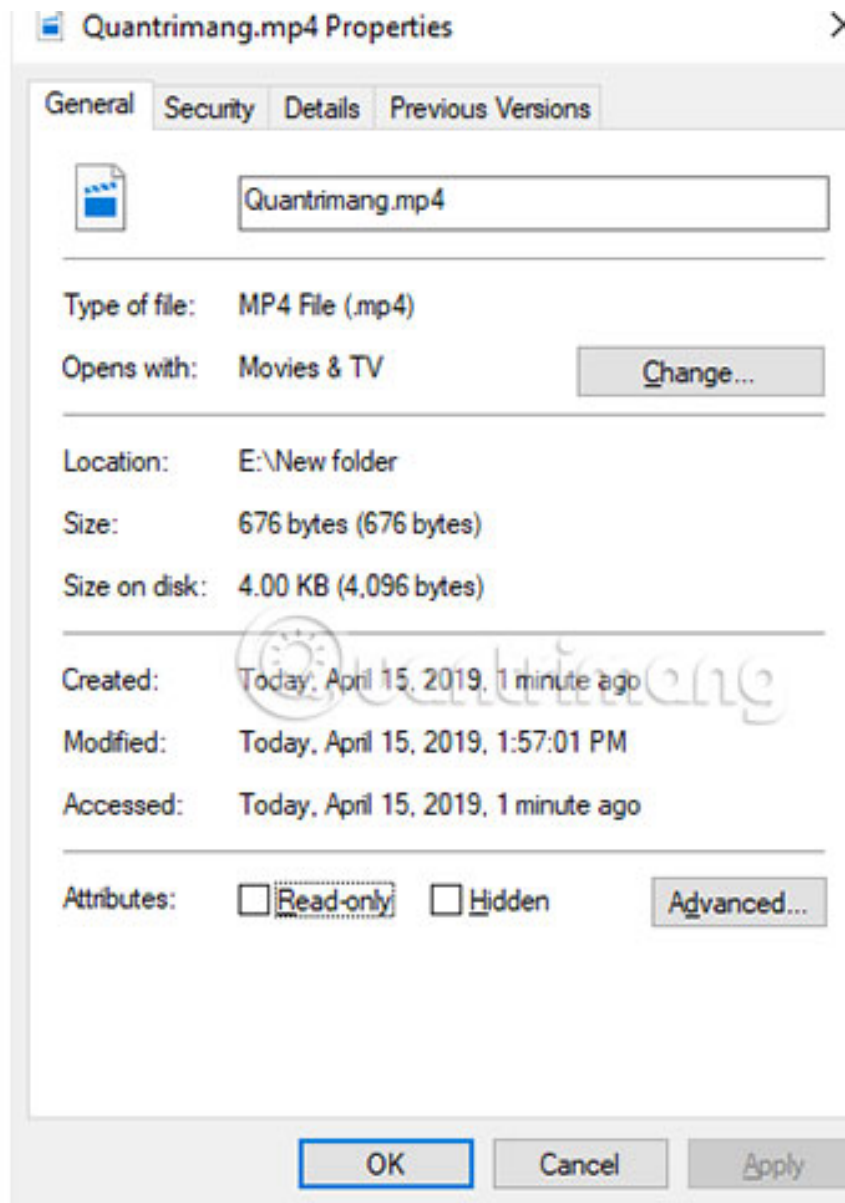

The video file xesc you choose is still the xesc extension. Change the tail to .mp4 and press **Save** .

Finally click **Start** to start changing the tail.

Then your video file will be converted into MP4 video.

Above is the guide to change the file xesc to mp4 on the computer, with mp4 files, obviously you can use more in other video editing software.
