

How to convert Windows 8 / 8.1 keyboard language

Due to the need to work you need to change the languages ??to use on Windows 8 / 8.1 computers. Language switching operations are quite simple and you can do it in many different ways.

Continuously changing the language used frequently on the computer will sometimes be necessary to meet your business needs. On Windows 8 / 8.1 computers, we can perform many different ways to change the keyboard language on the computer. If you do not know how to do so, you can follow the tutorial below of Network Administrator.

Method 1: Change the settings in Settings

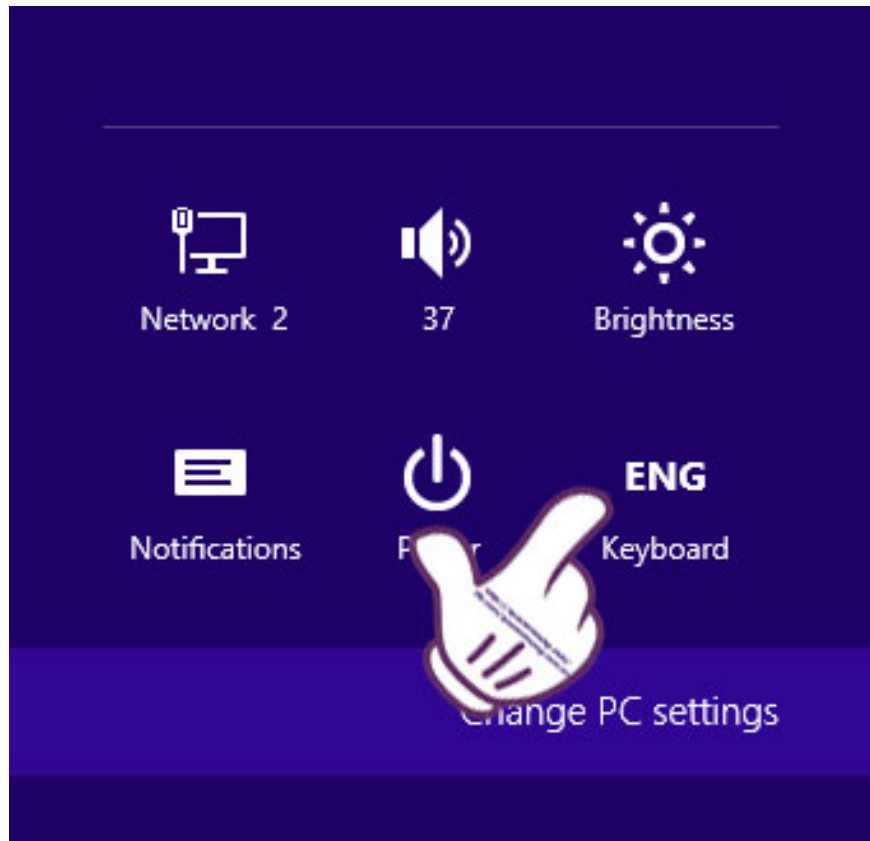

Step 1:

At the screen interface, click on **Settings** (Settings) in the Charm bar of Windows 8 / 8.1.

Step 2:

Next, we click on the **Keyboard** keyboard function.

Step 3:

Soon the computer will display a **list of languages** for you to choose. We can choose to use the language we need.

Method 2: Use the shortcut on the Taskbar

Step 1:

In the **Taskbar** , you can see **the language icon** you are using.

Step 2:

We will click on that language icon and select the language we need to use.

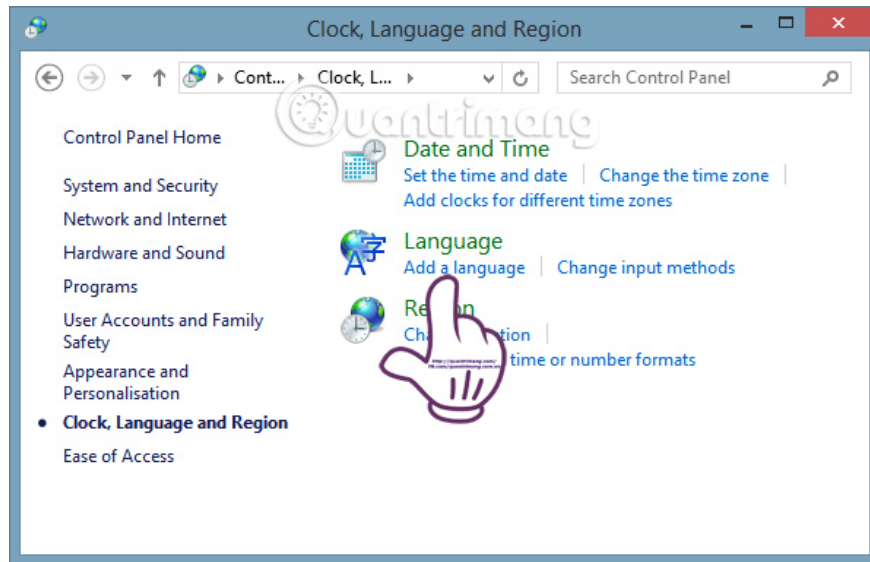

Note , readers can use **Windows + Space shortcut** to display language settings window.

Method 3: Use keyboard shortcuts to switch languages

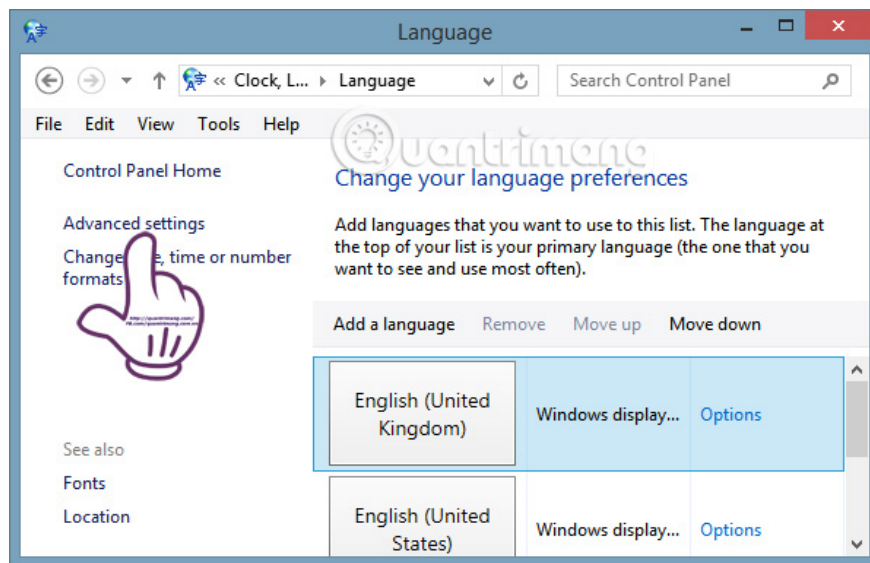

Step 1:

First, access **Control Panel** and select **Clock, Language, and Region > Language** to set the language change shortcut.

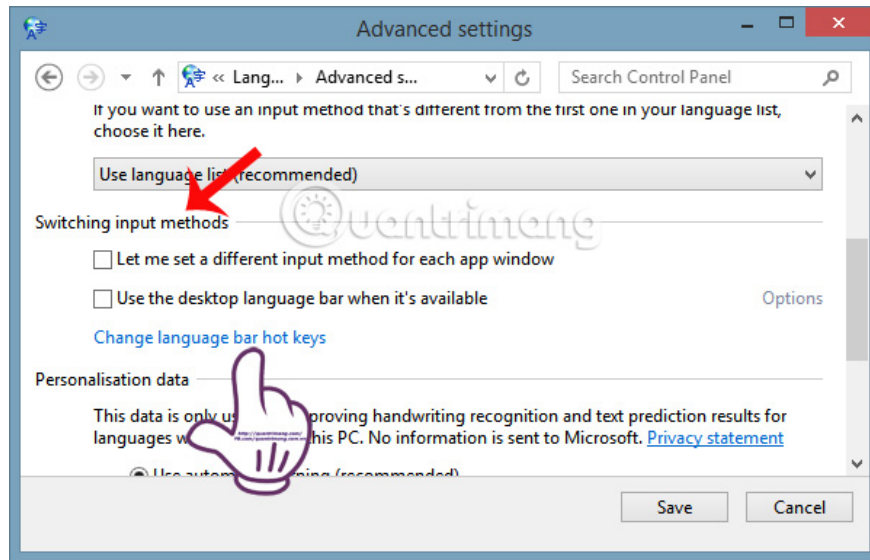

Step 2:

Here, we will see a **list of languages** used on the computer. Select **Advanced Settings** in the left corner of the screen.

Step 3:

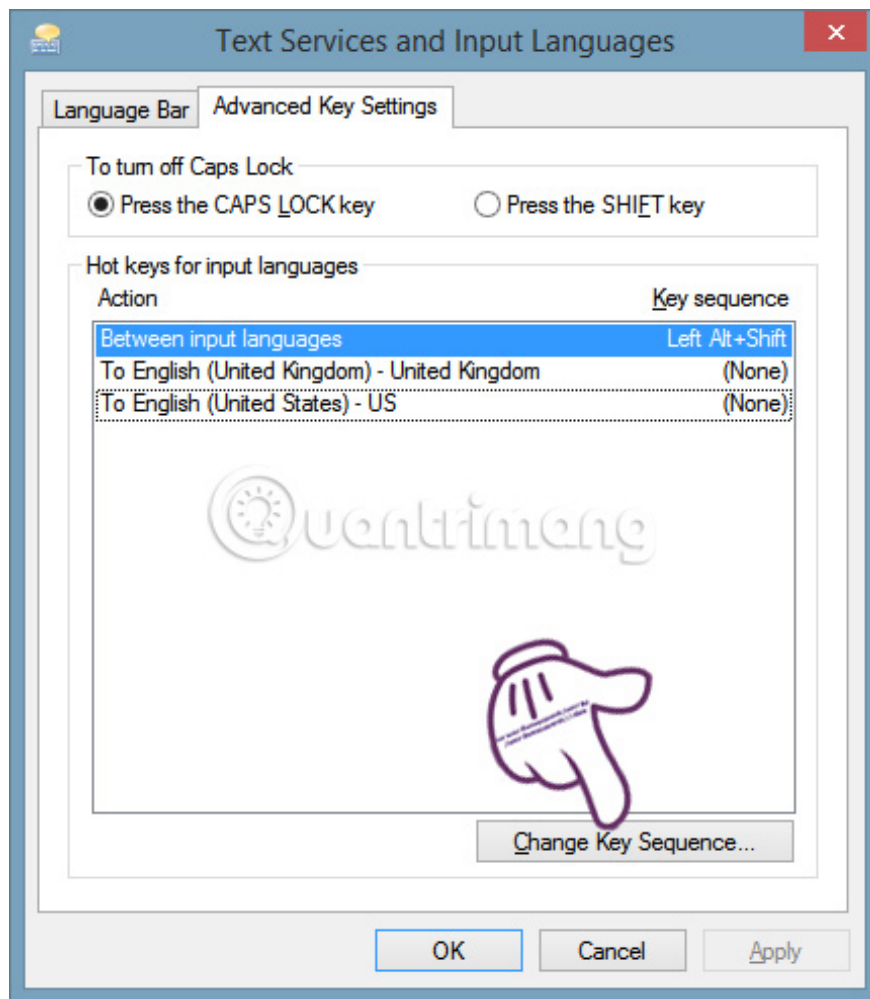

The **Language Advanced Settings** window appears. At **Switching input methods**, we will click on **Change language bar hot keys**.

Step 4:

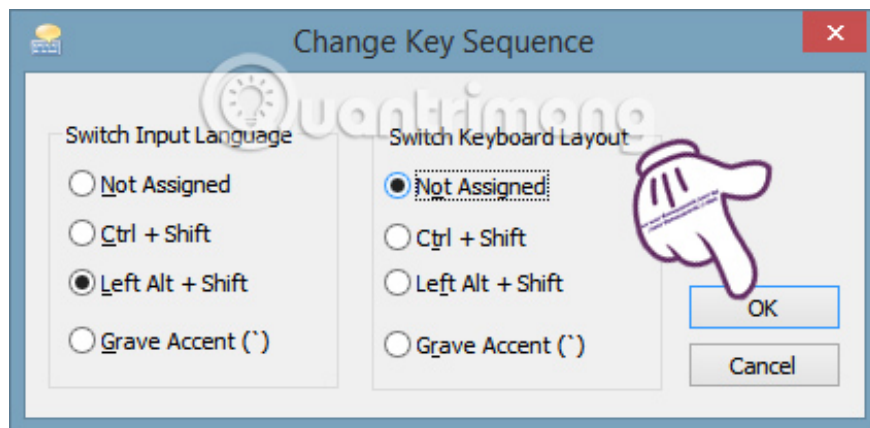

In the **Text Services and Input Languages** window that appears, readers can set shortcuts to switch between input languages ??on the keyboard.

Click the **Change Key Sequence** item to install shortcut keys.

Step 5:

Next, we will select the shortcut we want to use to quickly switch the languages ??on the keyboard, then click **OK**.

Thus, we can choose many different ways that we guide above to be able to change the language on Windows8 / 8.1 computers.

Fix the wrong typing of special characters "@lbs: and other errors

This situation occurs frequently when we reinstall Windows, because you do not click on the English (United States) - US language but leave the default or choose English (United Kingdom). Therefore, we will need to **change to the English (United States) keyboard - US** according to the above tutorial.
