

How to copy a layer from one PSD file to another PSD file in Photoshop

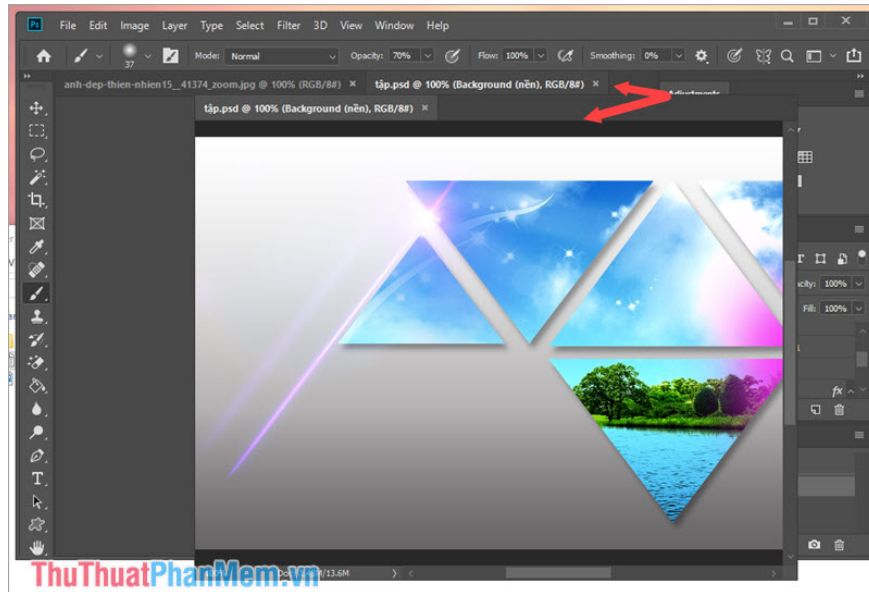

How to copy a layer from one PSD file to another PSD file in Photoshop. Whether amateur or professional photo editing, we must be familiar with and master the basic functions of the Layer. In this article, I will introduce the copy la operation

Whether amateur or professional photo editing, we must be familiar with and master the basic functions of the Layer. In this article, I will introduce the operation of copying layers from one PSD file to another PSD file in Photoshop.

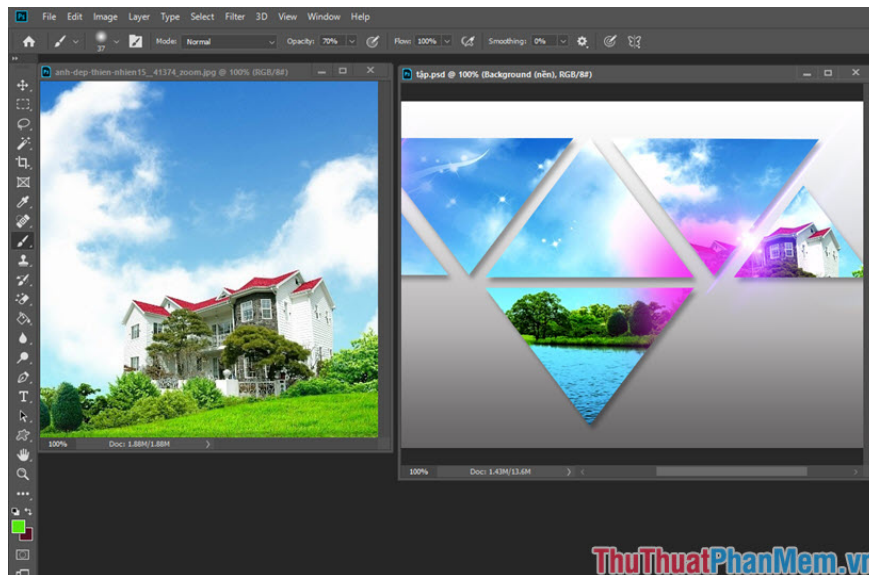

How to copy a layer from a PSD file is also quite simple, first, you open two PSD files to copy the layer and then perform the following steps:

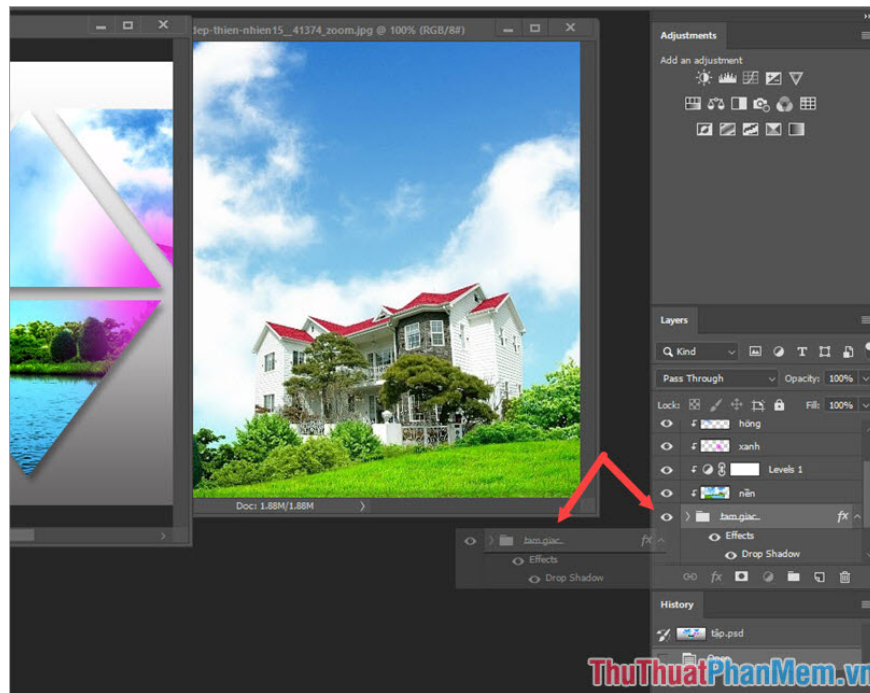

Step 1: You move the 2 PSD windows into 2 separate windows as shown below

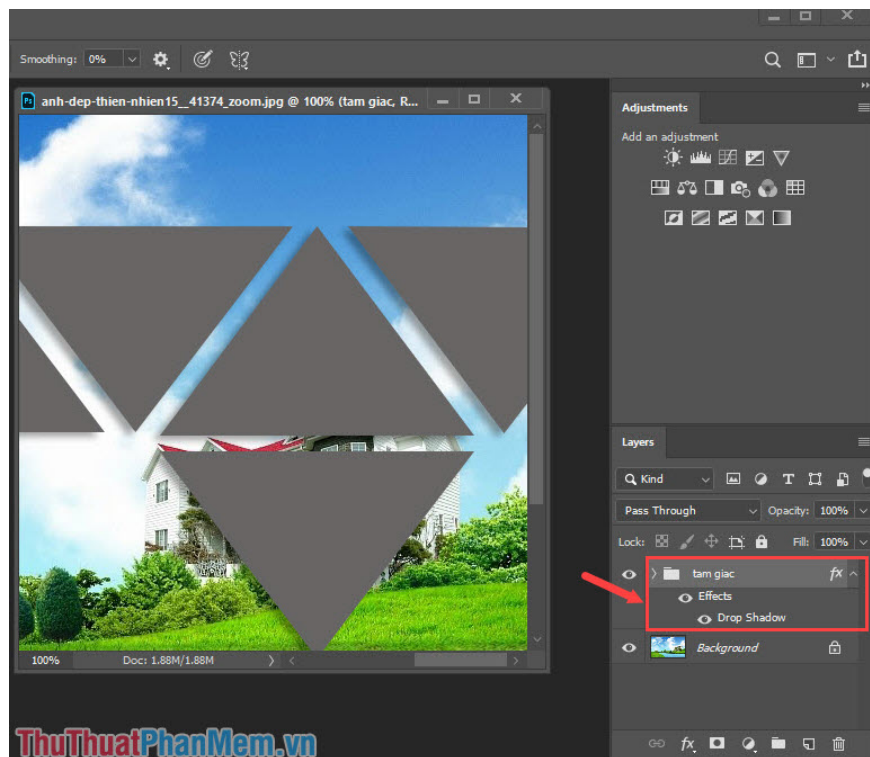

Interface 2 separate windows as shown below.

Step 2: Left click and move the Layer to a PSD file next to it as shown below.

Step 3: After moving, the Layer copy will appear as shown below. You can move, edit that layer according to your liking.

Copying layer from PSD file to another PSD file is quite simple, isn't it? If you have difficulty implementing, then please leave a comment about your problem below the article to Thuthuatphanmem.vn to guide you!
