Account

Now you need to log in to your Magic Copy account on another device, such as on a computer. **Install the Magic Copy software** .

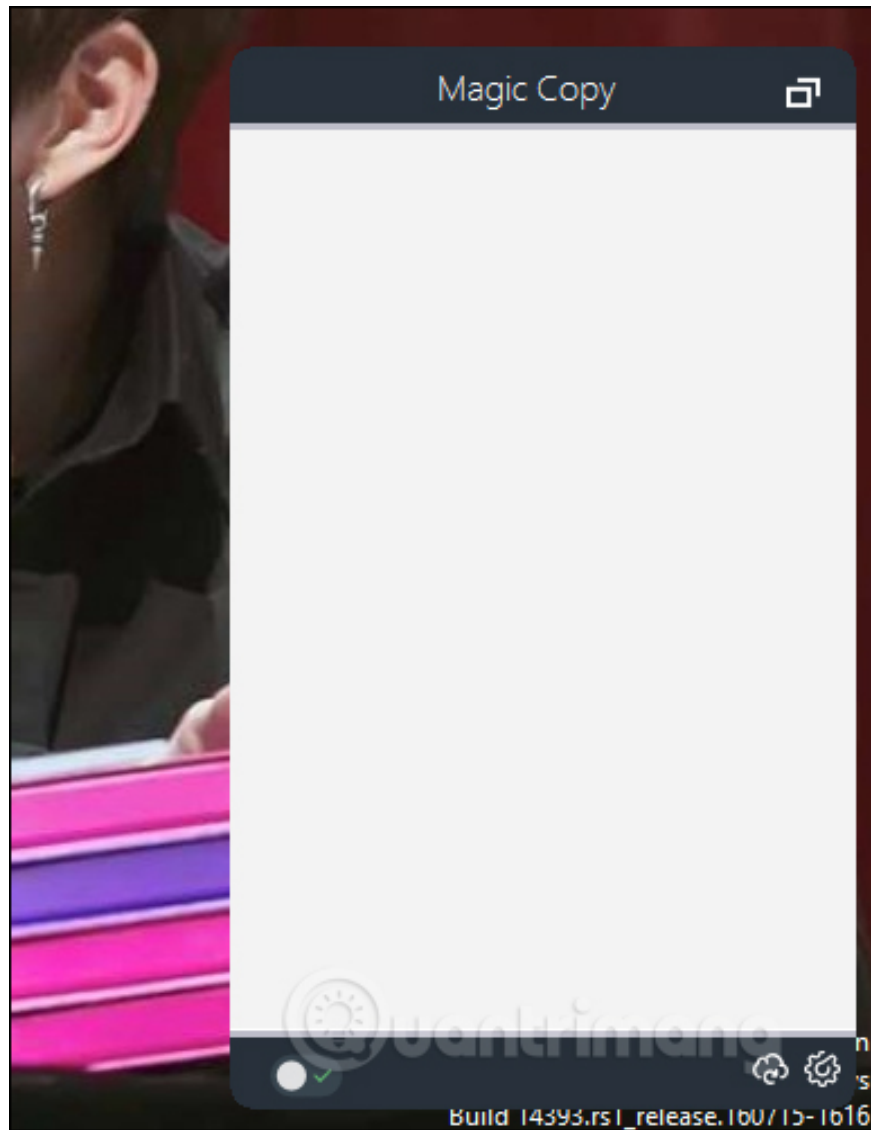

Now we are required to log in the created Magic Copy account. **Enter your account information** and click **Log in** to login.

Step 3:

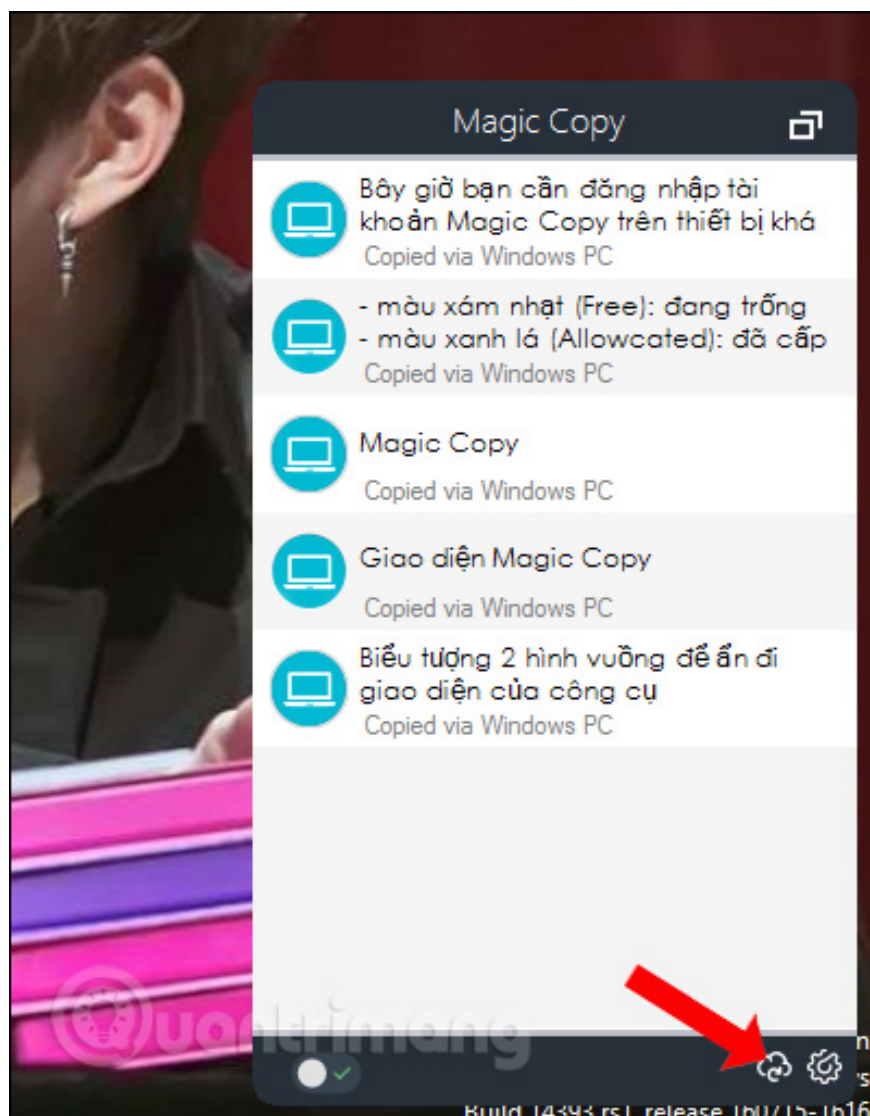

The Magic Copy interface will be displayed on the right side of the screen with the interface displaying the copied content on the computer. The round button below when swiping to the right shows the green area, which means that the content copy mode is on. If swiping to the right moves back to the red tile, it will disable the content copy mode.

2 square icons to hide the interface of the tool.

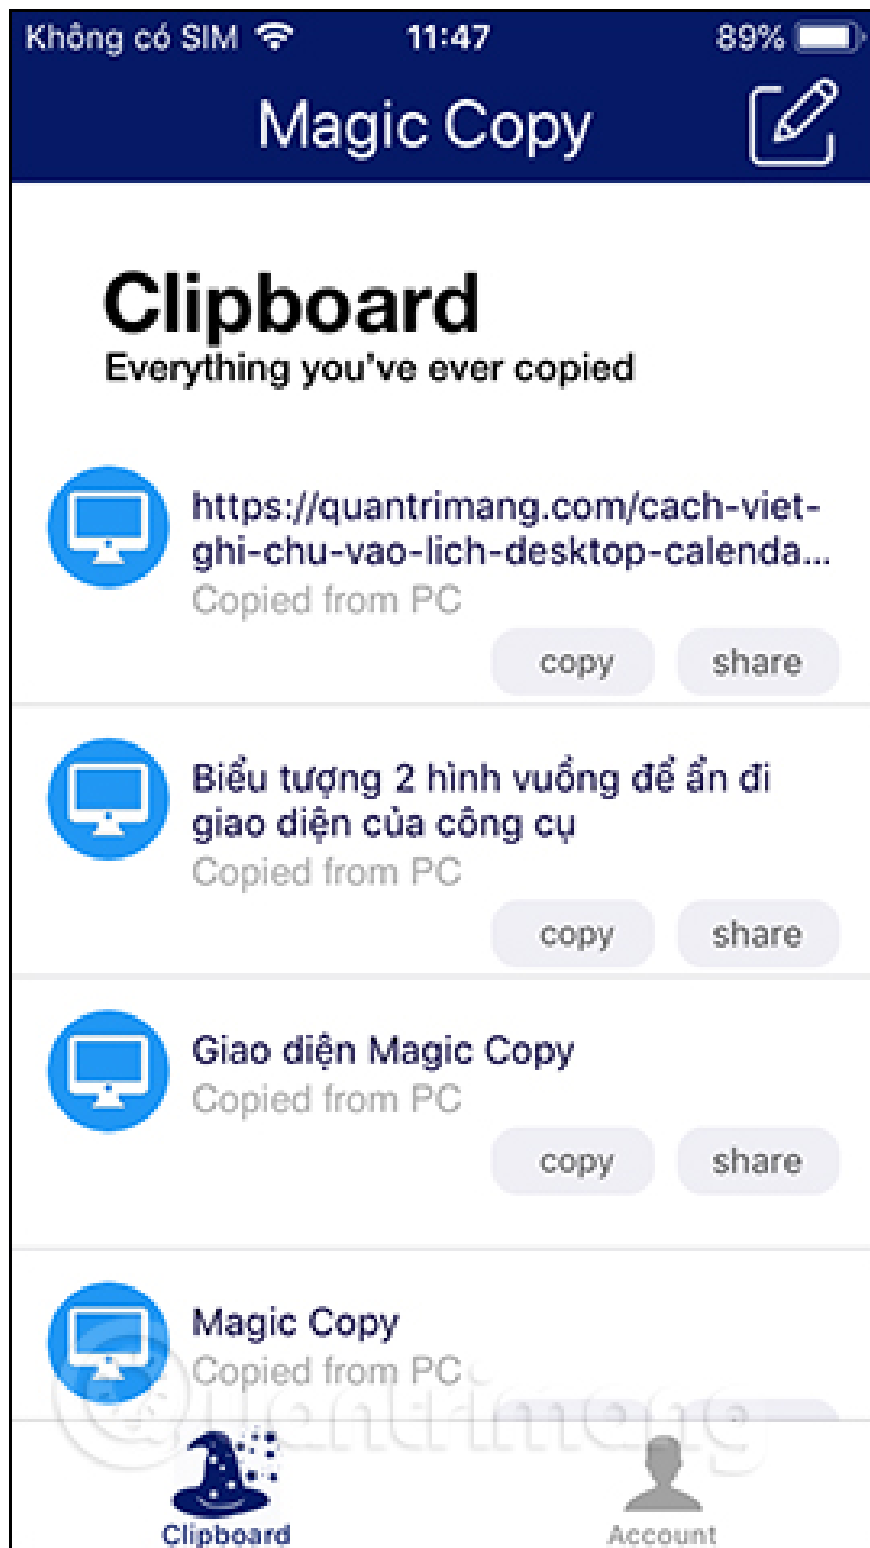

Step 4:

Once you have saved the copy content and **pressed the cloud icon** , all the copied content will be displayed.

Step 5:

Opening **the Magic Copy interface on the phone** will see all the copied content on the computer displayed. New content copied on the computer is displayed first on the application interface. Here the user also sees the content copy platform, via the icon and **information below at Copied from PC** .

Step 6:

To copy **content from iPhone to PC** , highlight the content and **press Copy** . Re-open the Magic Copy application interface and see the message content copied to Magic Copy.

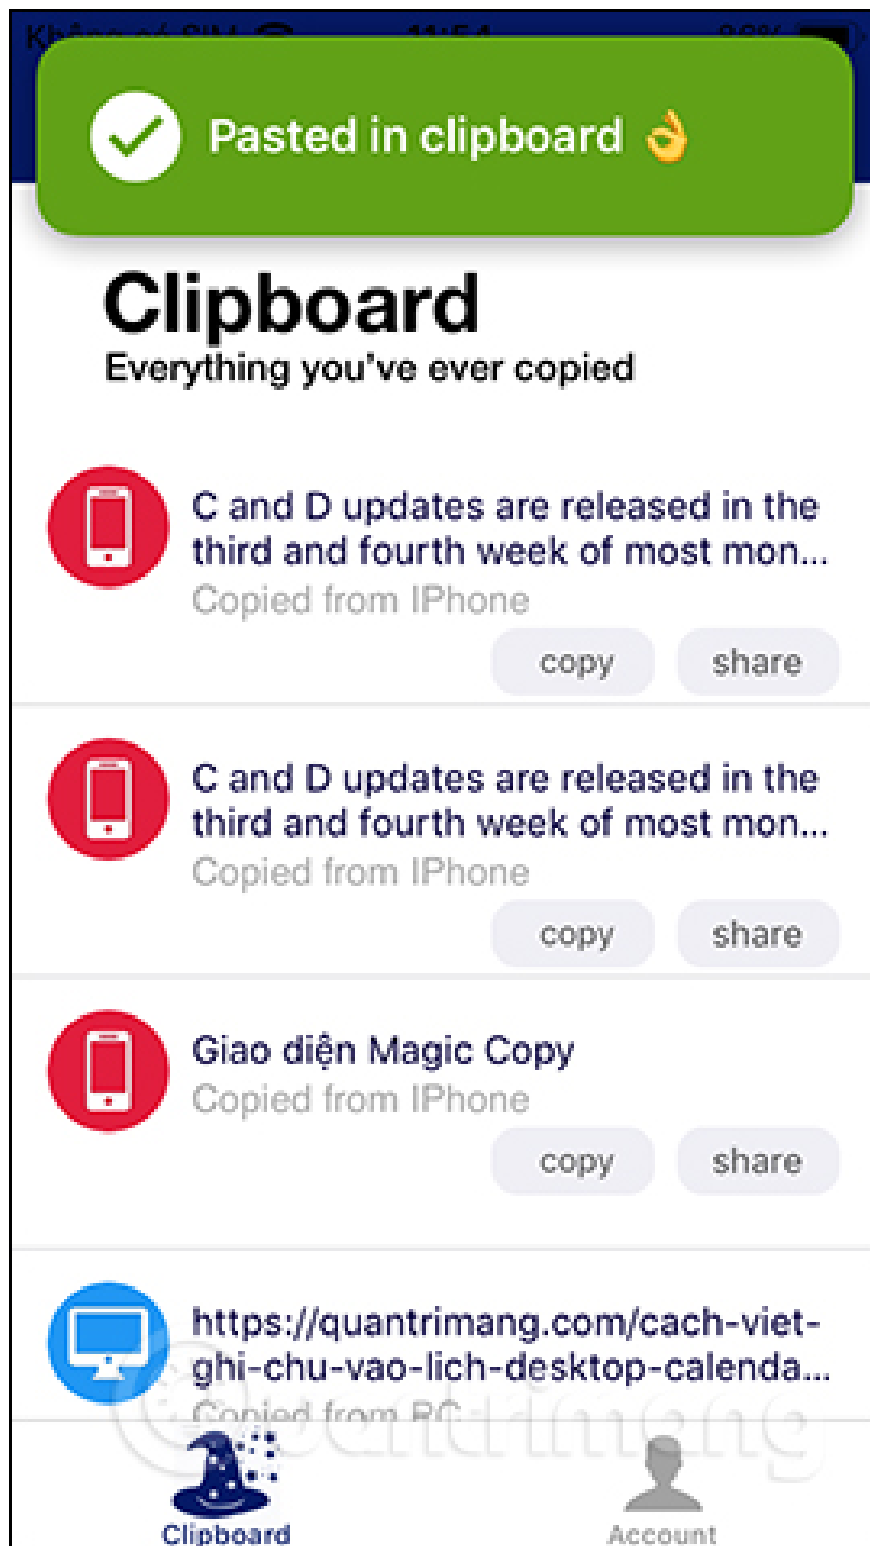

Microsoft releases ["C" and "D" updates](#) to people who click "Check for Updates" in Windows Update. Those people become unwitting beta testers. January 2019's C update has a rare distinction: Microsoft tested it

Chia sẻ...

C and D updates are released in the third and fourth week of most months. They include non-security fixes and are only installed for people who click the "Check for Updates" button in Windows Update. These people essentially beta test the updates before the fixes form part of next month's stable Patch Tuesday updates. Those Patch Tuesday updates are named "B" updates, as Patch Tuesday is in the second week of each month.

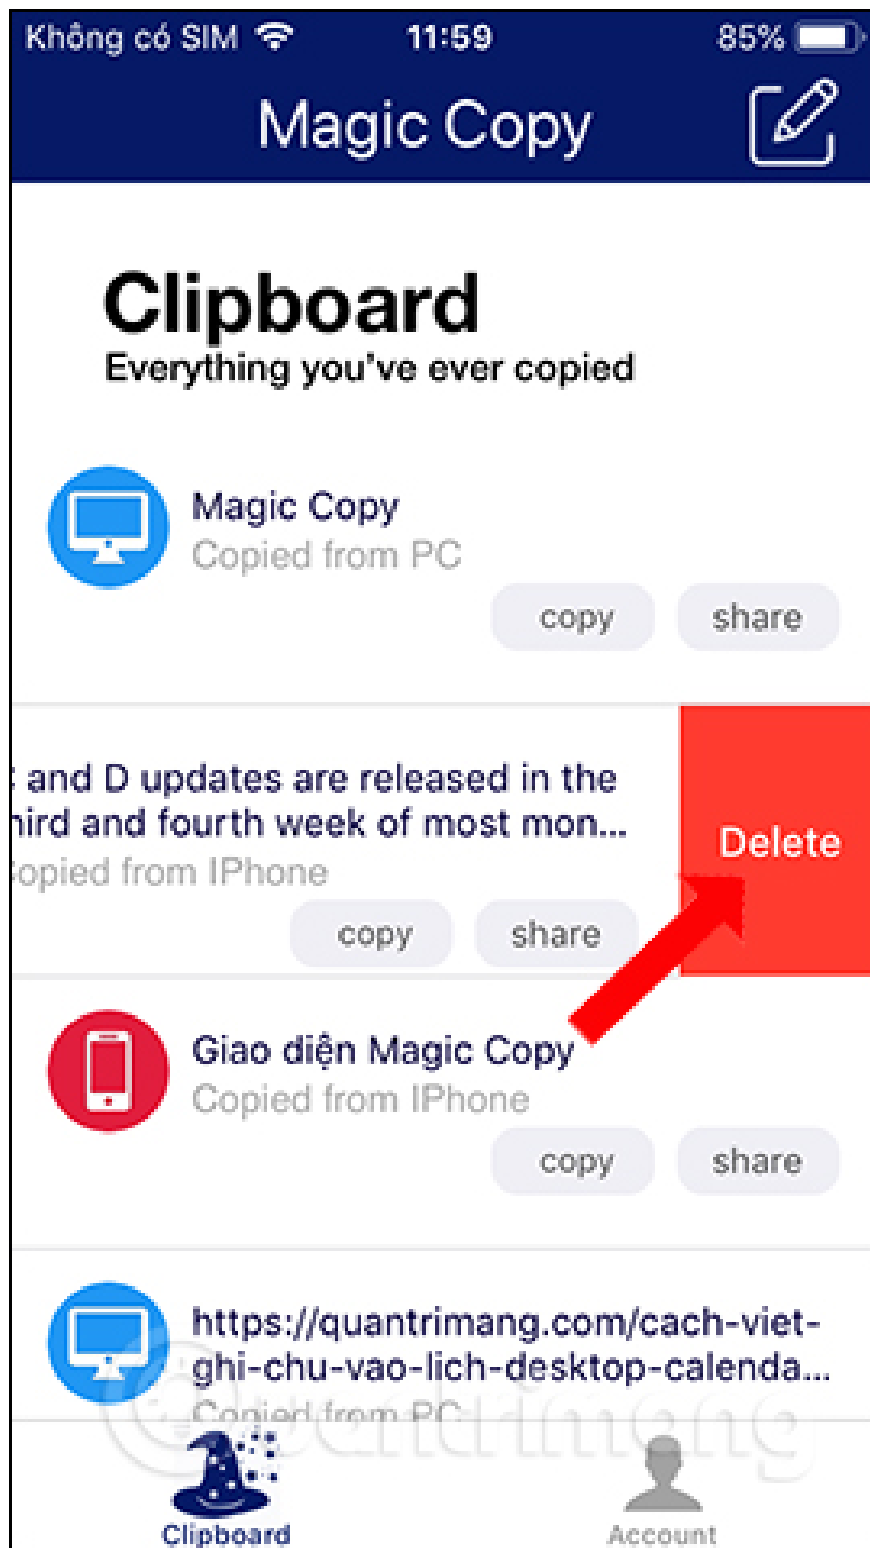

The computer also shows the copied content from iPhone with **the Copied via iOS iPhone message** .

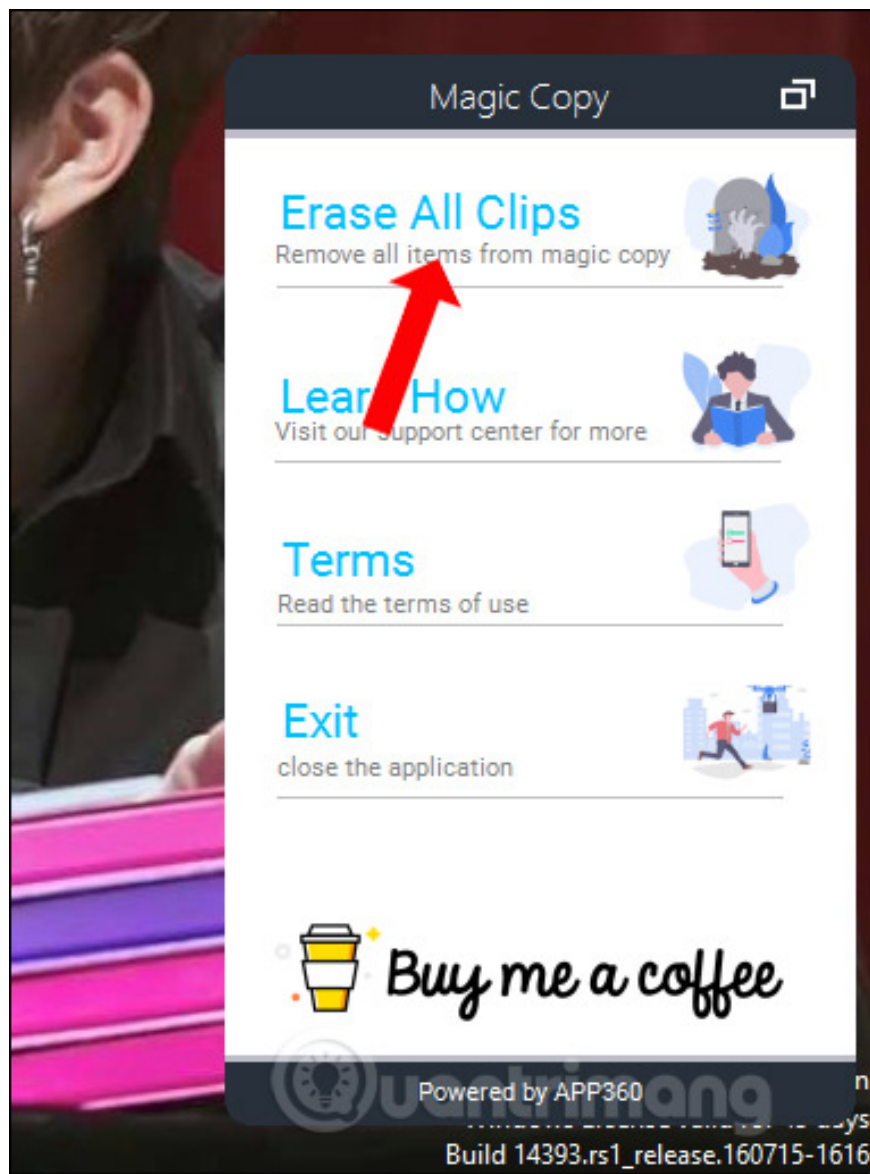

Step 7:

To delete the copied content on iPhone, drag left and click **Delete** .

With the **Magic Copy on your computer**, there is no option to delete each content, you must click **the gear icon** and select **Erase All Clips** to delete the entire content.

In addition the Magic Copy application also has the option to **write notes when clicking the pen icon** in the top right corner. There is also a sharing option as well as saving notes at the pushpin icon.
