

How to copy videos, movies, and music to iPhone and iPad using iTunes on a computer.

Instead of going to a store, you can quickly and easily copy music to your iPhone at home thanks to the iTunes software. Not only does iTunes allow you to copy music, but it also lets you easily copy videos and images to your iPhone from your computer.

iTunes is a free application from Apple for Mac and Windows computers. Besides playing music and managing devices, iTunes can also be used to copy music to iPhones, movies, and photos from a computer to iPhones and iPads, update to new versions, or restore iPhones and iPads when they malfunction.

How to copy videos, movies, and music to iPhone and iPad using iTunes

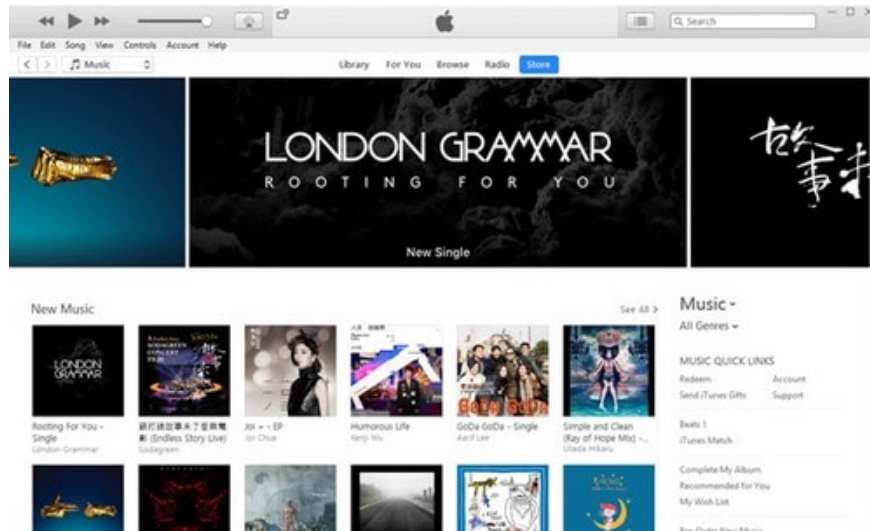

iTunes not only supports copying images, audio, and videos from a computer to an iPhone, but users can also create ringtones for their iPhones using iTunes.

Copy music, movies, and photos to your iPhone or iPad using iTunes.

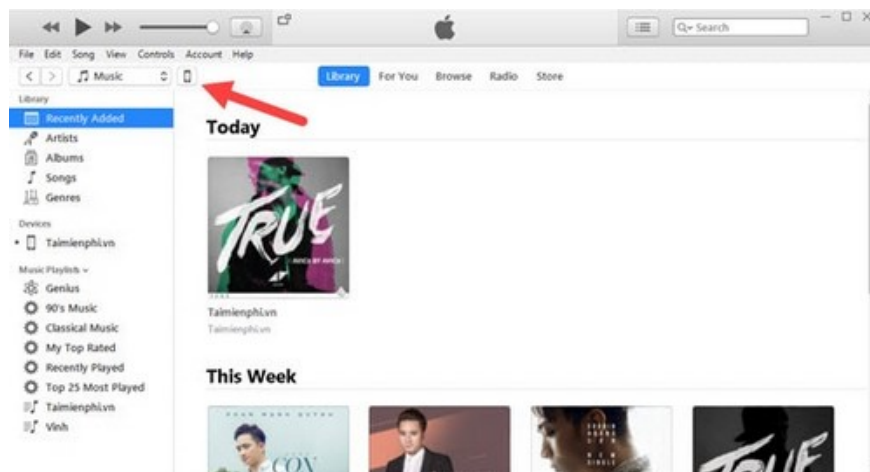

First, you need to download and install the latest version of iTunes on your computer. After installation, the software interface will look like the image below.

Instructions on how to copy music to your iPhone using iTunes

- To copy music, movies, and photos to your iPhone or iPad, you must first connect the device to your computer by:

1. Connect your iPhone or iPad to your computer, usually via the USB cable that came with the device when you purchased it.
2. Open iTunes, and you will see the interface for connecting to the device.

How to copy music to iPhone using iTunes

The device will be shown in the area highlighted in red.

1. Instructions on how to copy music to iPhone

Transferring music to your iPhone involves two basic steps: adding music to iTunes and then syncing it with your iPhone.

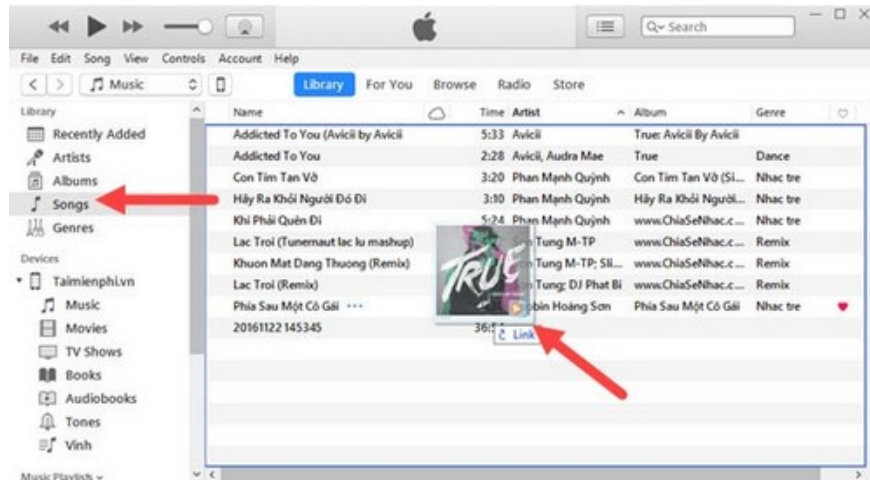

Step 1: Add music to iTunes.

On the main screen, we have the following options:

- **Go to the iTunes Store** : access the iTunes Store to download songs to iTunes.
- **Scan for Media** : search for all music files currently on your computer and add them to iTunes (however, in this step, you won't be able to select individual songs).

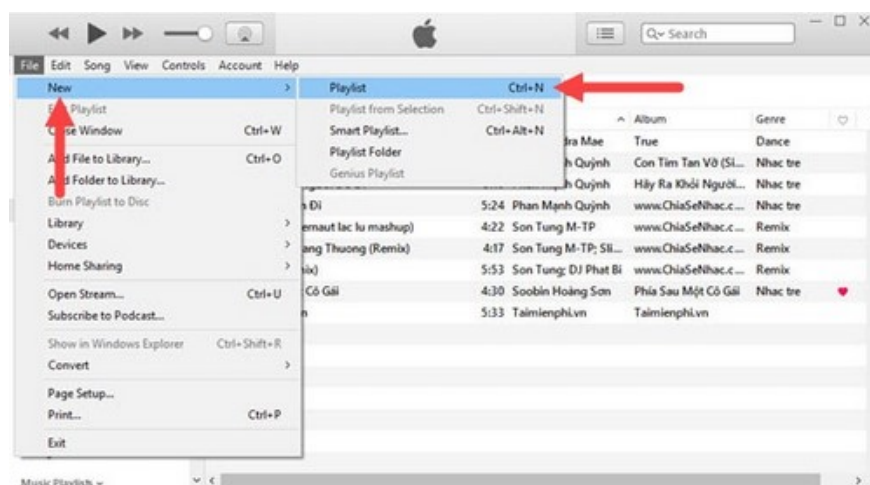

Therefore, I will guide you on how to add music to iTunes by dragging and dropping, which is also the most convenient way to copy music to your iPhone.

1. Access the folder containing your music.
2. Select your favorite songs by highlighting them.
3. Drag and drop directly into iTunes to copy music to your iPhone.

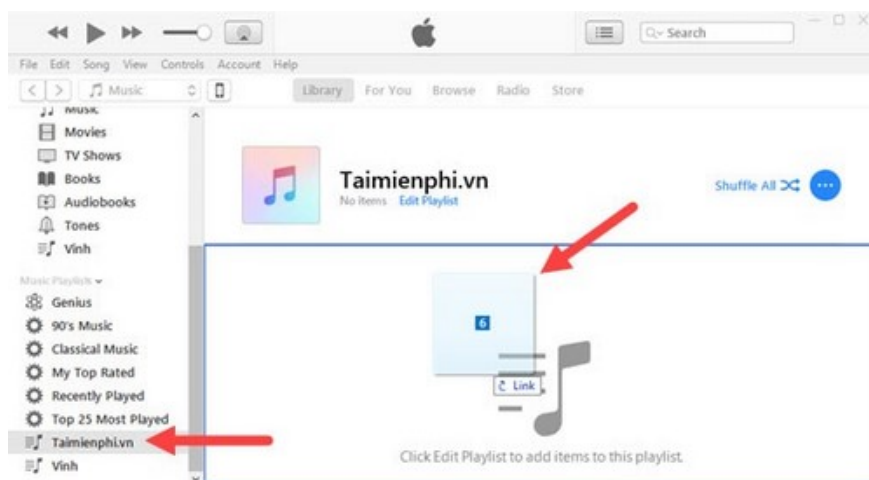

Copy music to your iPhone by dragging and dropping.

Next, create a new playlist in iTunes by clicking **New > Playlist** or using the shortcut **Ctrl+N** . Creating a new playlist is a prerequisite for copying music to your iPhone.

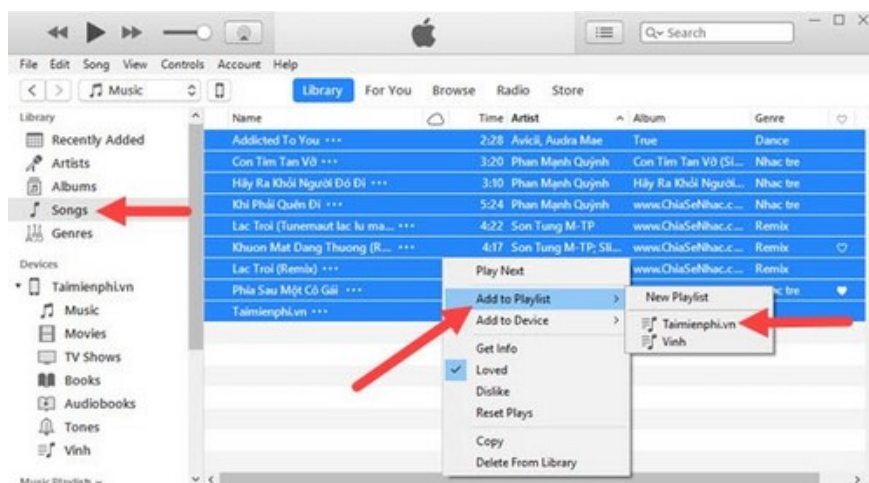

Transfer music to your iPhone by creating a new playlist.

A playlist will appear right now, named "TipsMake" in this article. You can drag and drop music directly into it to start copying music to your iPhone.

Copy iPhone music by dragging and dropping it directly into your playlist.

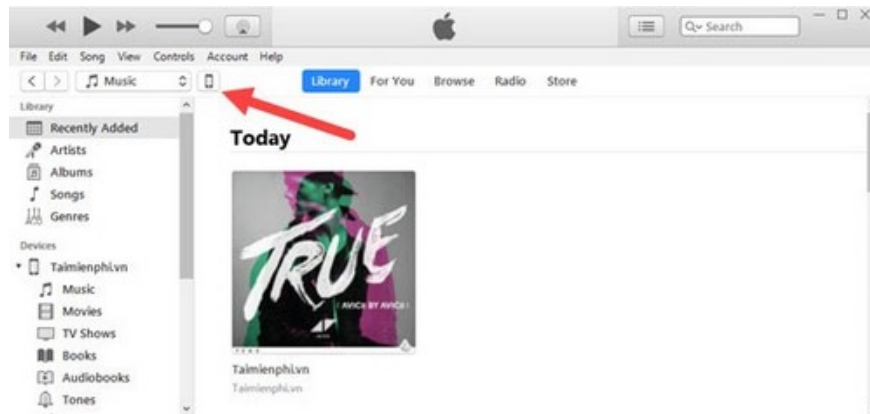

Alternatively, go back to the **Songs** section, highlight the entire song you want to copy to your iPhone, right-click and select Add to Playlist > TipsMake.

Transfer music to your iPhone by adding songs to playlists.

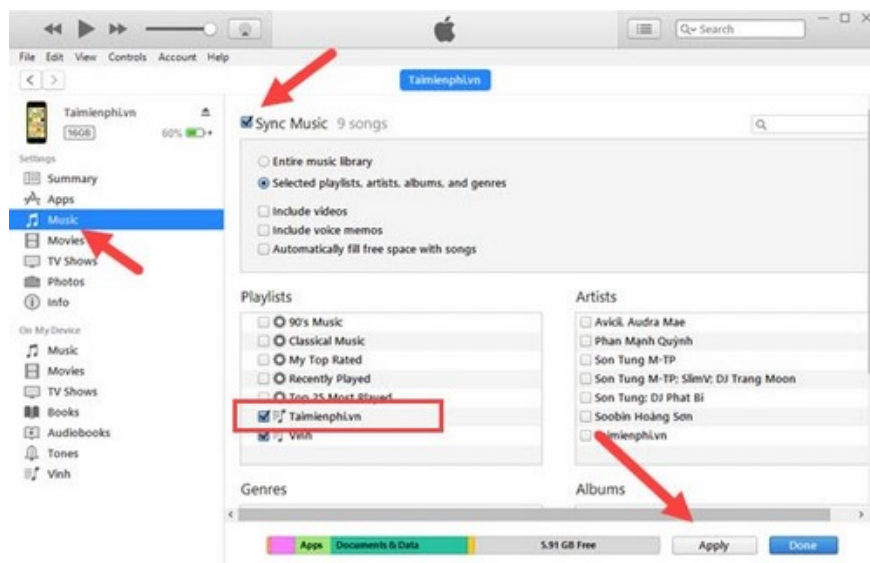

Step 2: Sync music, how to copy music to iPhone, iPad.

To copy music to your iPhone, connect your phone to your computer and select the iPhone icon as shown in the image.

Copy music from iPhone to iPhone using a computer.

Go to the Music section on your device, check the Sync option, select the TipsMake folder you created earlier, and then click Apply.

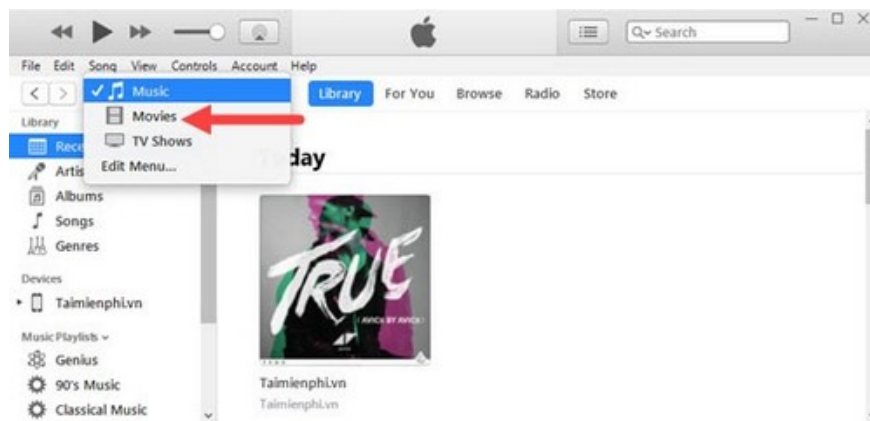

Transfer music to your iPhone by syncing songs.

2. Instructions on how to copy videos to iPhone and iPad

Similar to transferring music to an iPhone, transferring movies to an iPhone or iPad also involves two basic steps: adding the movie to iTunes and then syncing it with the iPhone or iPad.

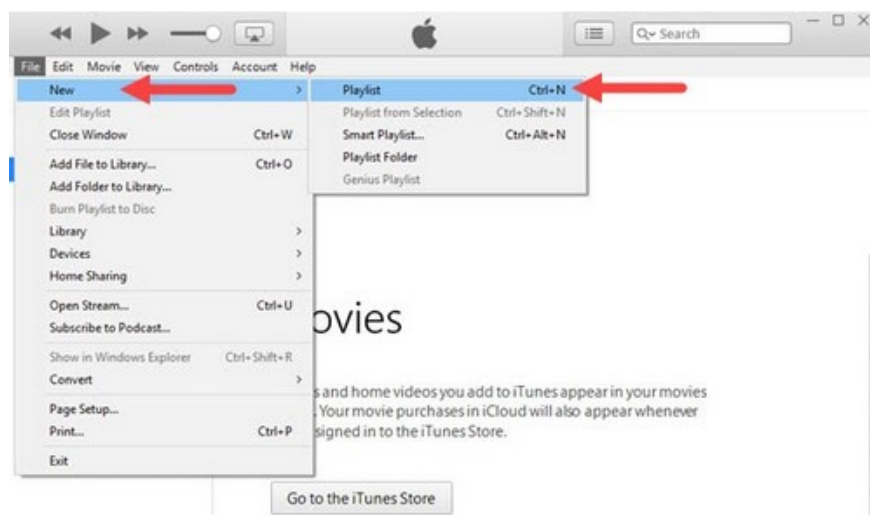

Step 1: Add the movie to iTunes.

On the home screen, select the **Library** option as shown in the image, then select **Movie** to start copying videos to your iPhone.

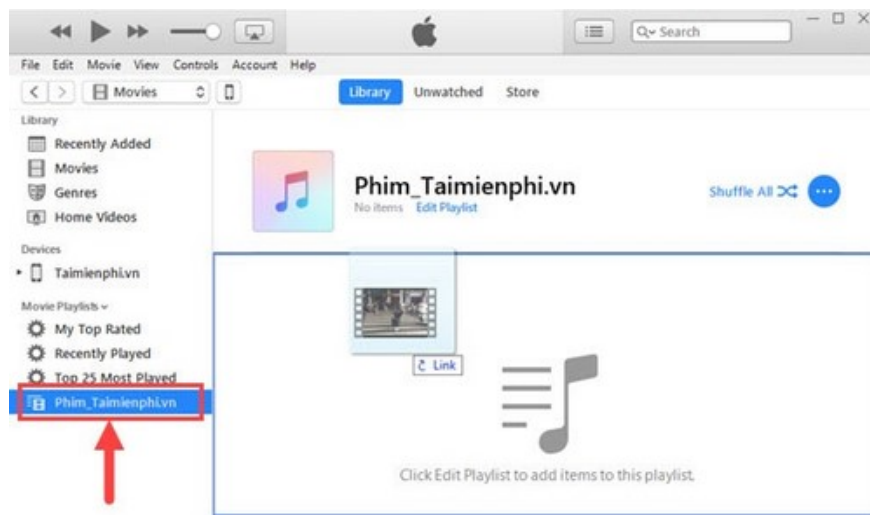

Instructions on how to copy videos to iPhone

To copy videos to your iPhone, you need to create a new playlist. Click **File > New > Playlist**, or press **Ctrl + N** to quickly create a list if you want to copy videos to your iPhone.

How to copy videos to iPhone

Copy music to iPhone, copy photos to iPhone

Then select **Apply** to complete the process of transferring photos to your iPhone or iPad.

Copy photos to iPhone, copy music to iPhone

If you see this message when copying music from iTunes, it means you are using iCloud to store your photos.

Copy photos and videos to iPhone.

It's very simple; just go to **Settings > iCloud > Photos** and turn off iCloud Photo Library.

Copy photos, copy videos to iPhone

Above, we have guided you on how to copy music, movies, and images from your computer to your iPhone or iPad using iTunes (you should use the latest version of iTunes or versions such as iTunes 11.1.3.8, iTunes 11.2.2.3, iTunes 11.3.1.2., because of the program's high stability). This helps you easily copy data to your iPhone and iPad mobile devices and use them effectively.

Besides allowing users to transfer image and audio data from a computer to an iPhone, iTunes also supports **transferring data from an old iPhone to a new one**. With this method, you won't have to manually transfer photos, videos, and contacts from your old iPhone to your newly purchased iPhone anymore.

With iTunes' iPhone ringtone creation feature, you can easily create ringtones that reflect your personal style. Currently, with the appearance of 3uTools software, users have more options for copying videos to their iPhones from their personal computers.

Besides iTunes, CopyTrans Manager is also a useful tool to help you accomplish this task. Unlike iTunes or iTools, which are more complex, CopyTrans Manager has an intuitive interface and is easy to use, even for those with minimal experience.

There are currently many apps on iTunes that help you learn English effectively, improving your results on the IOE English test – one of the best English test preparation websites available today. If you haven't participated in IOE yet, what are you waiting for? Sign up for IOE now!

Currently, there are many software programs that support copying music, videos, and images to iPhones. You can copy music to your iPhone using CopyTrans Manager. This method of copying music to iPhone using CopyTrans Manager doesn't require much learning time; however, it has more limitations compared to using iTunes.

We also can't forget the iTools software. Users can easily copy music to their iPhones using iTools. As is known, iTools is a program that supports copying music, videos, and images from a computer to an iPhone or iPad, and users **can copy music to their iPhones using iTools** at very high speeds.

In a previous article, Taimienphi guided you on how to copy photos from iPhone to computer, helping you copy photos from iPhone to computer in the most professional way. In this article, TipsMake will guide you on how to copy photos from computer to iPhone and iPad.

If you're buying a used iPhone, you should also **check the battery** information. If the battery's performance has deteriorated, you shouldn't buy that iPhone. Checking the iPhone battery information is just as important as checking the **iPhone's IMEI** ; to get the best possible iPhone, you need to spend a lot of time checking it.
