

How to count down events on Windows 10

Special Day Countdown creates a countdown timer for important events right on Windows 10.

To remember what to do, or important events, we need to use calendar applications, calendar software, or use note-taking tools. Special Day Countdown is a special countdown application for Windows 10 that creates notifications for important events that we need to save.

The app provides users with a calendar to mark events and a countdown timer for this event with a background for each event. This is refreshing when we look at the countdown clock with many different theme backgrounds. Besides, the application also provides many other options such as selecting notification mode according to user needs. The following article will guide you how to use the Special Day Countdown application on Windows 10.

4. How to use Neon Notepad to take notes on Windows 10

How to count down events on Windows 10

Step 1:

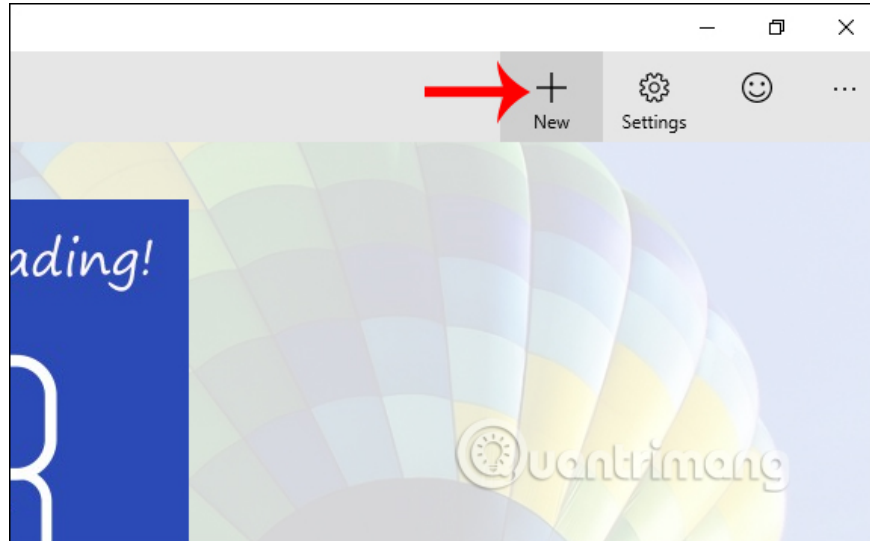

We install the Special Day Countdown application for Windows 10 according to the link below.

1. Download Special Day Countdown for Windows 10

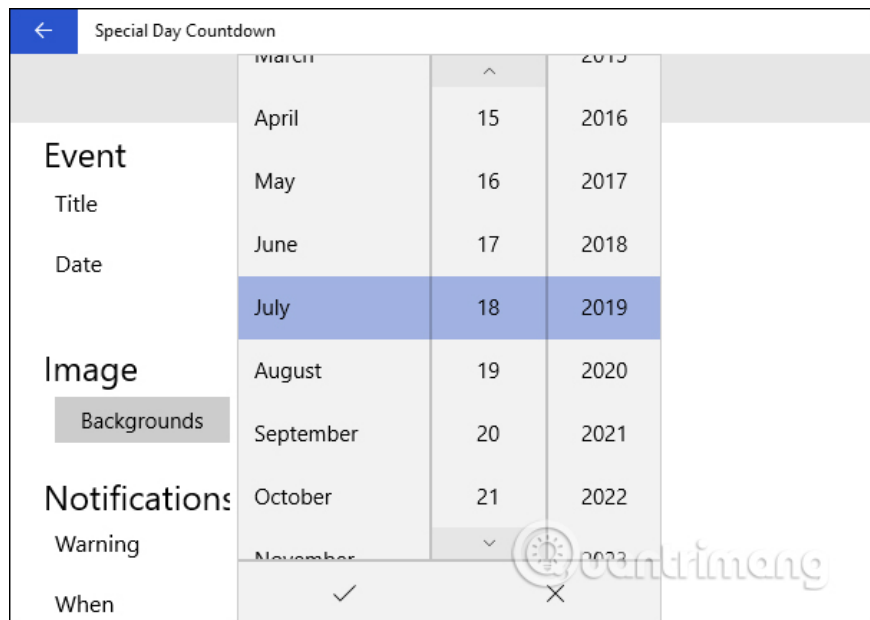

Step 2:

Display the application interface, click **the New plus icon** to add the event.

Displays the interface for us to enter the information for the event. In the Event section, enter **the event name** in the Title box and then select **the event time** under the Date frame. Select the completed date and click the tick icon to save it.

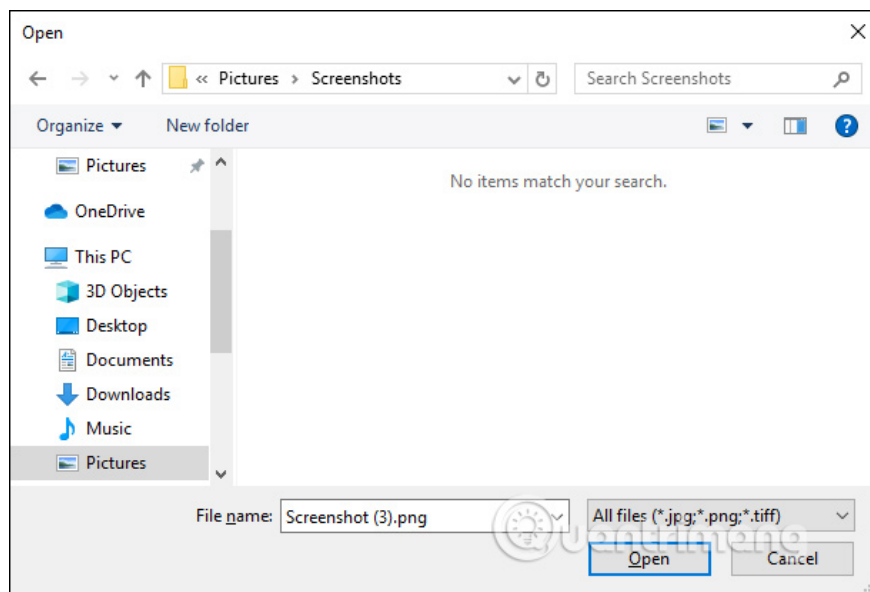

Step 3:

Next, in this view, in **the Image section**, select the wallpaper for the event. There is no limit to the format of the wallpaper and size, but the image must be over 1200 pixels in order to ensure quality when displayed, avoiding image rupture.

There are 2 options to download images as **Background** with wallpapers available in the app and **Personal archive** to use the wallpaper from the collection on your computer. The application's available wallpaper has many themes to choose from.

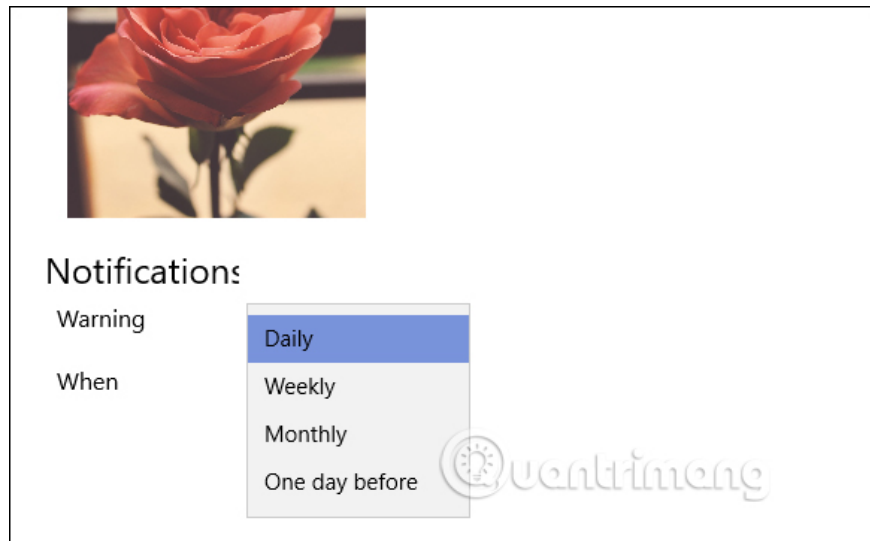

If you choose a wallpaper from your computer's album, select the image in JPG, PNG and TIFF format.

Step 4:

Next to **the Notifications section** to choose to notify the event according to the time you want. First we **turn On on Warning** . Below choose the time to notify at **When with Daily** (daily notice), **Weekly** (weekly notice), **Monthly** (monthly notice), **One day before** (1 day notice of the event takes place).

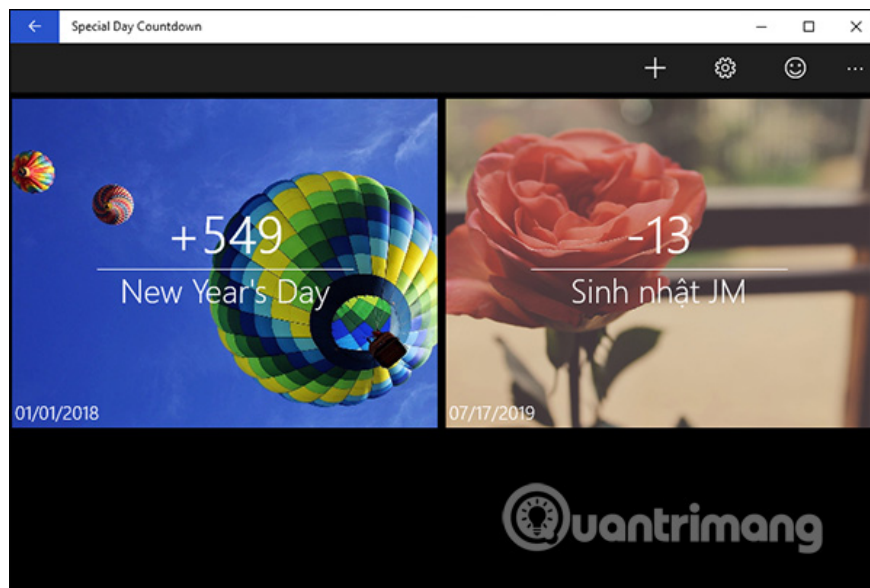

Once you've set up the content for the event, click **the Save icon** in the toolbar above.

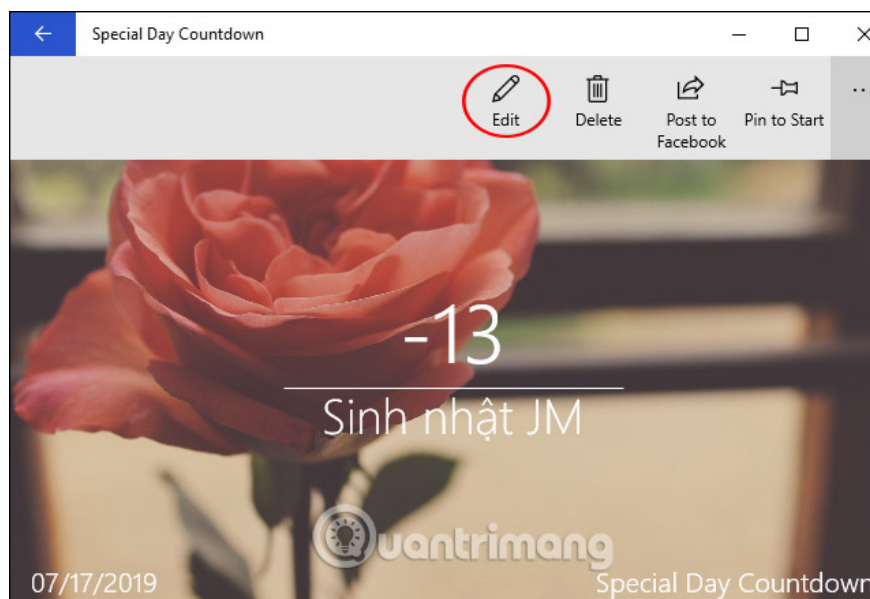

Step 5:

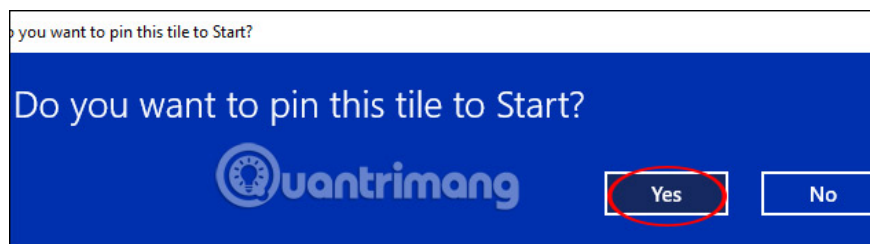

Go back to the application's Home interface and you see the event that we created.

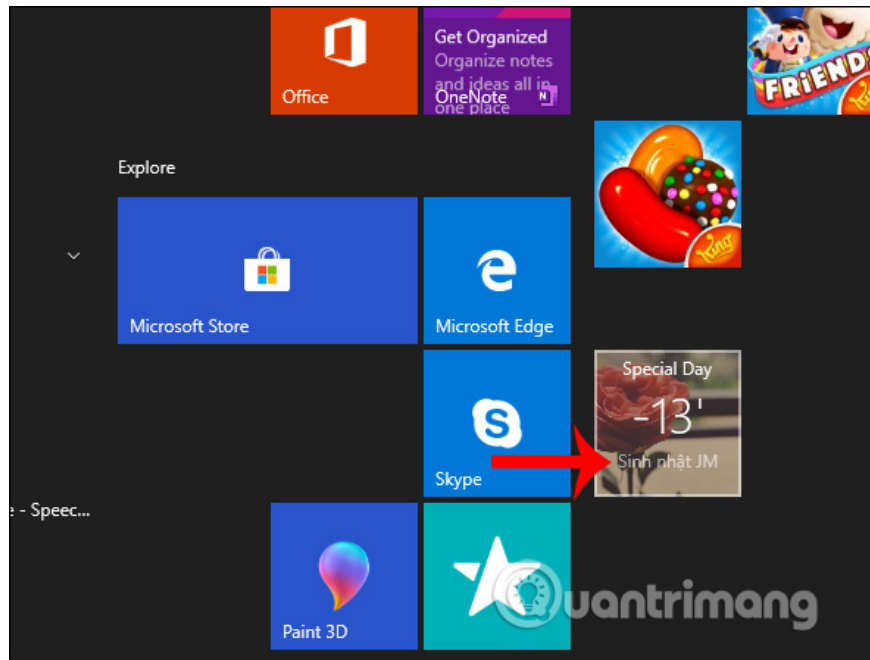

To edit you click on the event then click **the pen icon** .

To **track events from the Start menu** , click **Pin to Start** . Next **click Yes** to agree to pin to Start.

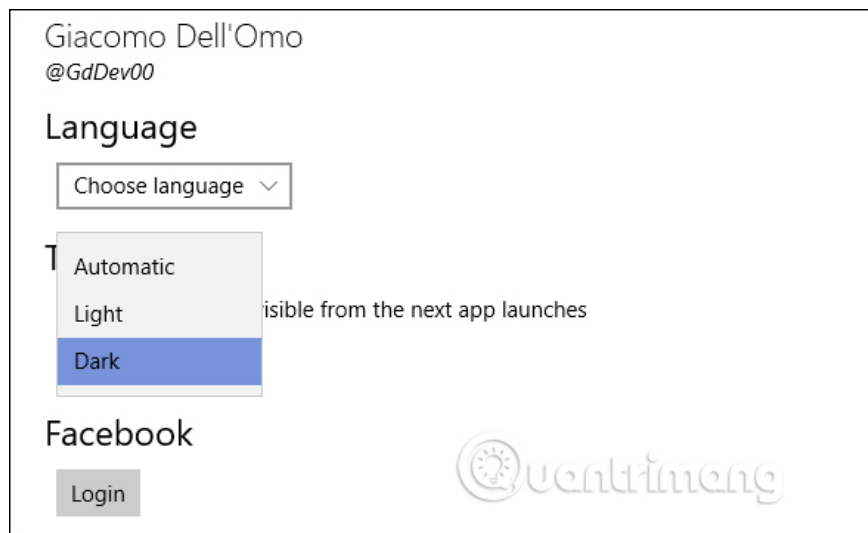

Then the countdown event will appear in the Start menu as shown below.

Step 6:

The application also has the option of using wallpaper. Click the gear icon and **select the theme for the application** , restart to apply the change.

The Special Day Countdown application creates notifications for important events, through countdown times and daily, or weekly reminders of your own choosing. The event is displayed on a beautiful wallpaper, with images available or selected by you.

I wish you all success!
