## Instructions to counter Evelynn and the Arena of Truth Arena

### Countered Evelynn with the Dragon race

Evelynn currently does not need to fight too much because there is a Devil buff that sucks mana of the enemy team, the skill damage is quite high (will increase as the opponent's blood is lower). Ideally, the Dragon system with 83% Magic Resist buff will be a "prey" to attract Evelynn to attack instead of discharging damage to allies (usually will be the main line in the last row).

And right now, we only have 3 Dragon generals, of which Aurelion Sol has magic damage, then we only have the responsibility for the remaining 2 generals.

The first is **Shyvana**, if you have some damage / **lifesteal** equipment and Dragon buffs, you can put her at the bottom of the table to ensure that Evelynnn will rush back and "give" her a fight.

2-star Shyvana has no equipment, only needs an 83% Magic Dragon buff to withstand a single hit from Evelynnn's 3-star attack, after which she will transform into a Dragon form, recover her full health and continue fight on.

Soon after, Evelynnn might turn to another target because Shyvana had turned Dragon and "fled". So you can also temporarily put another tank or the main carry away from Shyvana.

Next is **Pantheon**, when a new star, Pantheon with dragon buff can be placed at the bottom of the map like Shyvana above to lure Evelynnn to attack and attack. You will have two main Dragon Buff cases for Pantheon here.

1. Pantheon with Guard Guard buffs: Standing close to the corner with Pentheon close to the corner, Evelynnn if she jumps backwards will face Pantheon. If it is too tight, Evelynnn will only stand outside the main line of the squad - Pantheon should now hold the Ambassador of the Spear Mace to still have mana despite being stuck in the corner of the squad.
2. Pantheon does not have a Guardian buff: Should be equipped with Angel Armor and can stand alone at the back to not die. After that, he has enough mana to use it once to deal damage, then quickly escape from

Evelynn.

## Counter Evelynn with the Hextech tribe

Evelynn is not only focused on raising stars, but also definitely stacking fully equipped with 3 grafted equipment. Therefore, the inclusion of the Technology clan in your team (even only two generals) is enough for you to disable Evelynn's equipment and her Devil squad.

You can choose any Hextech champion to pair with the Transfiguration team, Gladiator, Gunner, and Swordsman. For luck, Evelynn will be hit by Hextech bombs.

All will be based on the level and luck of the opponent. If the enemy doesn't notice, the enemy will let the champions stand close to the floor together. Meet someone with high rank and experience, they will surely spread the squad to avoid the Technology bomb.

At that time, you can push up the squad or insert 3 Assassins to tear up the Devil squad more easily and use the temporary tank to bait Evelynn away from the team as I have instructed above.

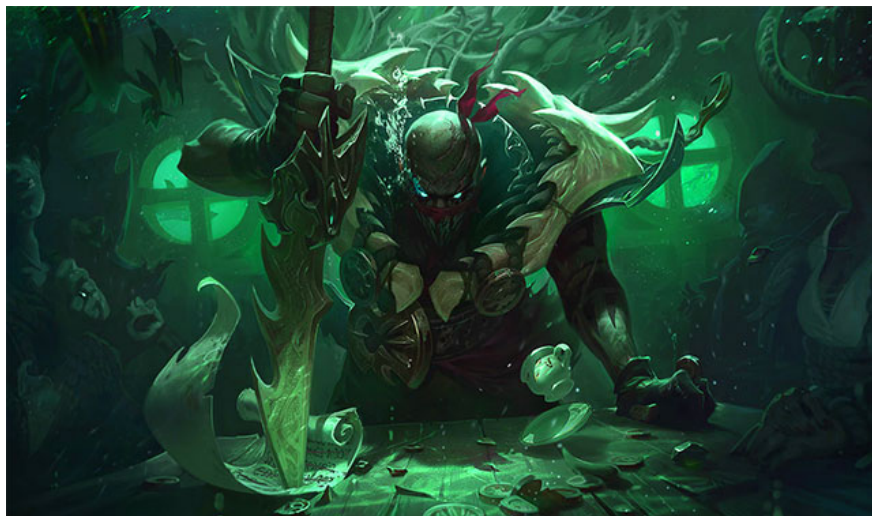

## The most effective counter against Evelynn

There is only one squad that can counter Evelynn and the Devil team the most effectively in the current Meta. It is the Transfiguration - Dragon - Technology that is temporarily able to fight against the Devil team and Evelynn when this team has enough tanks and main dame and magic resist.

Especially when the enemy team has both Evelynn and Swain will be very strong in the late game. You can refer to this lineup below.

## The hero countered Evelynn well

Some champions in the list below can temporarily counter Evelynn if you are lucky.

1. **Pyke:** Jump back to the back of the enemy at the beginning of the game, then jump back to the farthest champion. That is when Evelynn is on her team and Pyke can stun her if equipped with mana and

- launching first. That's enough time for you to add damage or send her to the island if possible.
2. **Shyvana / Pantheon:** Dragon Buffs against maximum magic damage.
  3. **Lucian:** Unless Evelynn can use him to catch him because Lucian moves quite fast
  4. **Leona:** Can stun at the farthest target, then Evelynn will be her target and Leona can stun Evelynn for a long time.
  5. **Kindred:** Not very possible, but if you have a mana cast on time, Evelynn won't be able to kill everyone in the buff.

## Evelynn countering equipment

1. **Silent Knife:** Can not be used without taking mana, although the rate is low but if Evelynn lasts a long time, she will be destroyed.
2. **Dragon Claw:** Equip the magic resist necessary for Evelynn's tanker.
3. **Stekrak's Claw (New):** Provides a **champion** with an anti-magic shield, who breaks this shield will be stun fruit for a long time, the right equipment for Evelynn.
4. **Ice Heart:** Reduces Evelynn's mana and attack speed, although it may not be very effective.

## Some ways to counter the other Devil's squad

There is a way to counter the enemy's squad quite simply and effectively. That is, you buy the main generals of the enemy squad. Especially Evelynn, if you meet her, then pick 1-2 generals depending on the remaining slot to prevent the enemy team from picking Evelynn.

This is a fairly simple tactic to prevent the enemy from completing their formation, which is used quite a lot in the Auto Chess game genre but is the least paid attention to DTCL gamers.

Although it is impossible to counter Evelynn and her Devil squad thoroughly, with the above tips. Evelynn and her Devil squad will not be able to eat your lineup easily.
