

How to cover face in photo on phone

To cover your face in photos on your phone, you can install the familiar PicsArt application, which helps to blur the face and avoid showing other people's personal photos.

To mask your face in a photo on your phone, you can install the familiar PicsArt application, which helps to blur the face and avoid showing other people's personal photos. So in addition to hiding the face in an image in Photoshop, you now have a way to blur the face on the phone. PicsArt is a photo editing application that is very familiar and widely used, bringing many tools for photo collage as well as editing. Blurring your face in PicsArt is also very simple. The following article will guide you how to use PicsArt to blur your face.

Instructions to use PicsArt to cover your face

Step 1:

Users download the PicsArt app for Android and iOS by following the link below.

Download the PicsArt Android app

<https://play.google.com/store/apps/details?id=com.picsart.studio>

Download PicsArt for iOS

<https://itunes.apple.com/app/id587366035>

Step 2:

After downloading the application and installing, in the interface you click **the circular icon** below the screen. Then **click All photos** to access the photo album and select the photos you want to edit.
