

# How to craft paintings in Minecraft

Paintings in Minecraft are useful items that players can use to decorate their base, making it more beautiful and magnificent. Below is how to craft paintings in Minecraft and a list of all the paintings.

**Paintings** have been an important feature in **Minecraft** for quite some time now. Their main purpose is decoration; players can place paintings to create a more "casual" feel for their base. In this article, we will show you how to **craft paintings in Minecraft 1.18**.

**Instructions on how to create wall art in Minecraft.**

## *1. Introduction to the paintings in Minecraft*

Currently, the paintings in Minecraft don't appear naturally anywhere in the world; players need to create them. There are currently 26 paintings in the game. For some reason, paintings facing north or south in Minecraft appear brighter than those facing east or west.

Besides their decorative purpose, paintings are most often used to conceal a passageway into a player's secret base. Players and mobs can pass through the paintings, as long as the blocks supporting the paintings allow it.

## 2. How to create artwork in Minecraft version 1.18

### Step 1: Prepare the materials

- The paintings can be created quite easily, as they don't require any rare blocks. The only things you need are **8 sticks** and **1 piece of wool** (any color). Players can obtain **sticks** by using **2 pieces of planks** or **bamboo** . **The piece of wool** , on the other hand, can only be harvested from sheep. Using shears to shear a mature sheep will yield **1-3 pieces of wool** .

### Step 2: Crafting the picture

- Open the **crafting** table , place **the piece of wool** in the center, then place **8 sticks** around it. When placed correctly, a picture will appear in the small box.

### Step 3: Place the painting

- Simply hold the painting in your hand and place it wherever you want.

When placed, a picture will appear that fits the space where it's placed (the picture appears randomly and is of that size). Players can add blocks around the picture to ensure it's the desired size. Pictures in Minecraft come in sizes 1x1, 2x1, 2x2, 4x2, 4x3, and 4x4. If you want to create all the pictures in Minecraft, place them based on the list in section 3. You can also refer to the Minecraft 1.19 update here to prepare for this new version when it's released.

### ***3. List of all pictures in Minecraft***

There are a total of 26 paintings in the Minecraft game, most of which are based on artwork by Kristoffer Zetterstrand, who also contributed to the creation of Minecraft.

#### **- 1x1 drawing in Minecraft**
