

# How to create a birthday notification on iPhone

To create a birthday notification on the iPhone, users can immediately use the birthday reminder maker available in the Calendar application.

On iPhone with Reminders Reminders help users to create important reminders. In case you want to create someone's birthday notification, you can use the Contacts on iPhone immediately. In Contacts other than the basic saved schools such as names, phone numbers, addresses, etc., there is also a school that stores the birthdays of your contacts. With this birthday school you can combine with the iPhone notification reminder to create a birthday notification. The following article will show you how to create a birthday notification on your iPhone.

1. How to customize notifications on iPhone
2. How to schedule sending messages on iPhone with Scheduled
3. How to create event reminder notifications on the Messenger application

## Instructions for creating iPhone birthday notification date

### Step 1:

In the **Contacts** interface, click on the contact name to create a birthday notification. Then click **the Edit button** in the top right corner of the interface.

#### Step 4:

Click on the **Birthdays** section and users will be given the option to notify their birthdays saved on the iPhone. You will have 4 different notification options.

1. No reminders.
2. Remind on the correct birthday, at 9am.

3. Remind before 1 birthday at 9am.
4. Remind 2 days at 9am.
5. Remind a week before the birthday.

Click on the prompt that you want to schedule. So when the birthday comes, you will receive a notification from the iPhone.

**Step 5:**

If you do not want to create a birthday message, you can switch to notification mode. Do not prompt, or delete the date of birth in the contact.

Along with the birthday school created in the Contacts contact and the notification feature of the Calendar app on the iPhone, we have a notification for birthdays, with different reminders.
