

How to create a blue screen of death (BSOD) to 'prank' friends

The deadly blue screen error, also known as the Blue screen of death (BSOD), is one of the most common errors for Windows users. If BSOD appears, your system is having a serious error.

The deadly blue screen error, also known as the Blue screen of death (BSOD), is one of the most common errors for Windows users. If BSOD appears, your system is having a serious error.

Sometimes, in some cases, try playing pranks on your friends or relatives by creating a fake blue screen, making sure they have a 'howling'.

To create a fake blue screen (BSOD), please refer to the following article of Network Administrator.

Steps to create a blue screen of death (BSOD) to "prank" friends:

1. Open Notepad on your computer.
2. Copy the code below into Notepad file, then save the Notepad file again by pressing Ctrl + S:

```
@echo off
```

```
echo ^  
^
```
