How to activate the new customizer

This feature is not enabled by default on Chrome 77 but you can enable it with the hidden flag. Like other flags, the Chrome flag can be changed or removed at any time. Hopefully these flags will disappear soon when Google enables this feature by default for everyone.

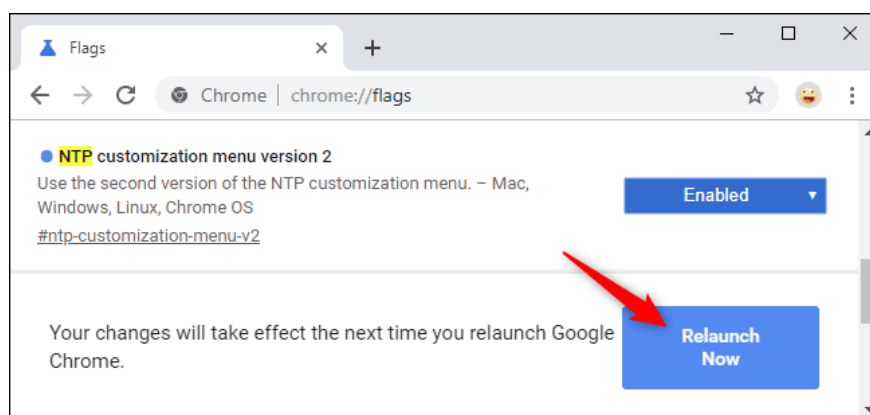

To turn on Chrome's new customizations, type **chrome://flags** in the address bar. Type **NTP** in the search bar on the Flags page.

Enable **Chrome Colors menu** and **NTP customization menu version 2** . Just click on the box to the right of each option and select **Enabled** .

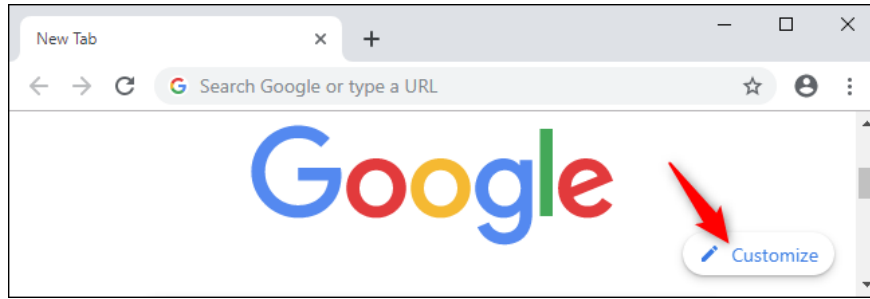

The change to make the turn does not take effect immediately, you need to restart Chrome by clicking on the button **Relaunch Now** . Make sure to save the work in progress on the Chrome tabs. Chrome will automatically reopen recent tabs on reboot, but content on tabs, such as information typed in a text field on a webpage, will be lost.

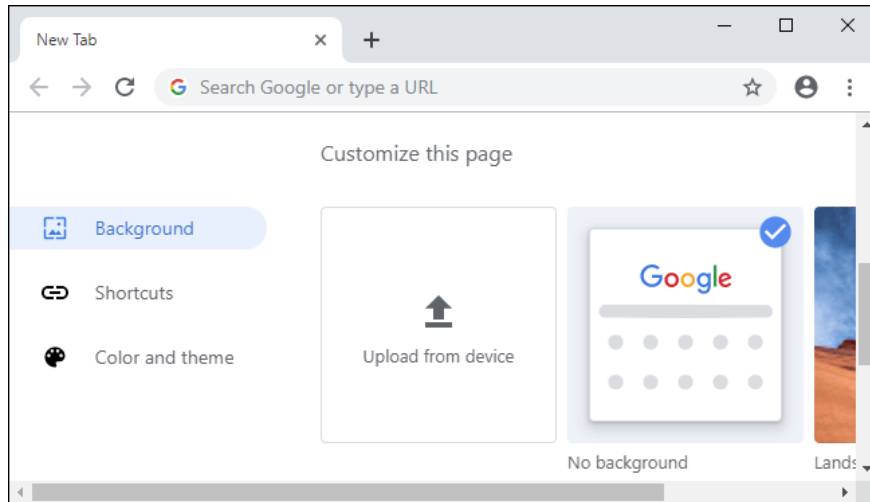

How to customize Chrome browser

You can now customize the Chrome theme right from the New Tab page. The full Chrome browser theme is still available and a bit more powerful than this theme. But now you can quickly and easily personalize your Chrome browser without having to choose the same color as others.

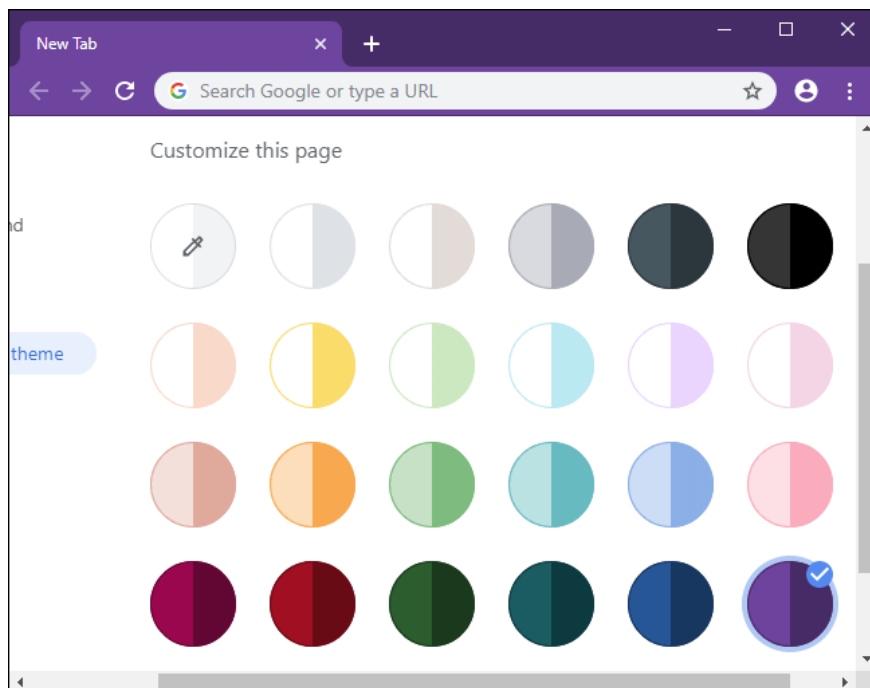

To get started, click the **Customize** button in the bottom right corner of the New Tab page.

You will see options for choosing browser colors and themes, wallpapers and website shortcuts here.

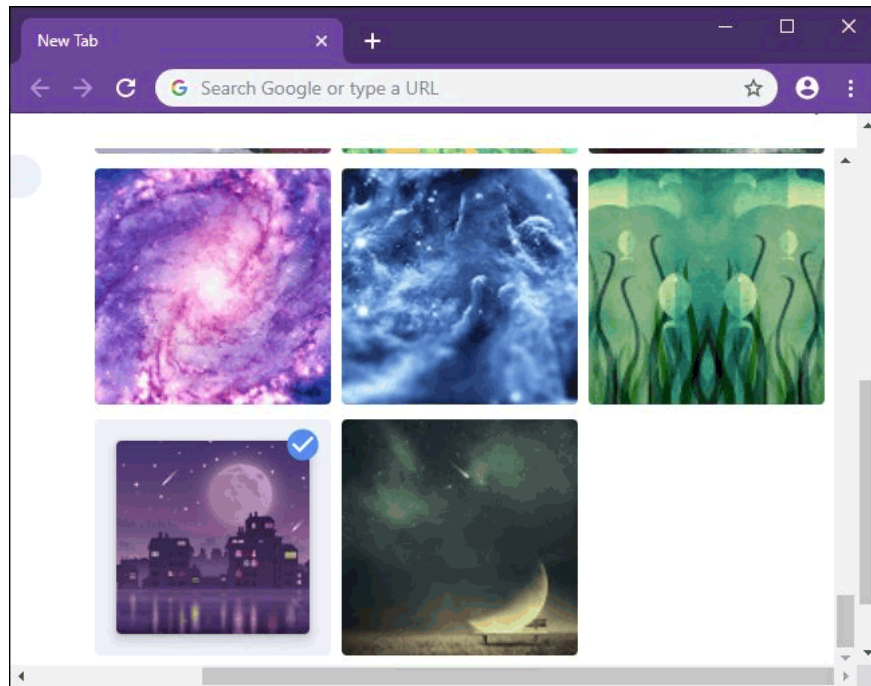

To select your favorite color, click on **Color and theme** and click on the color combination. If you don't have your favorite color combination, you can click on the eyedropper icon in the upper left corner of the color list to select another color. Chrome will automatically choose a similar but lighter shade to match the color you choose.

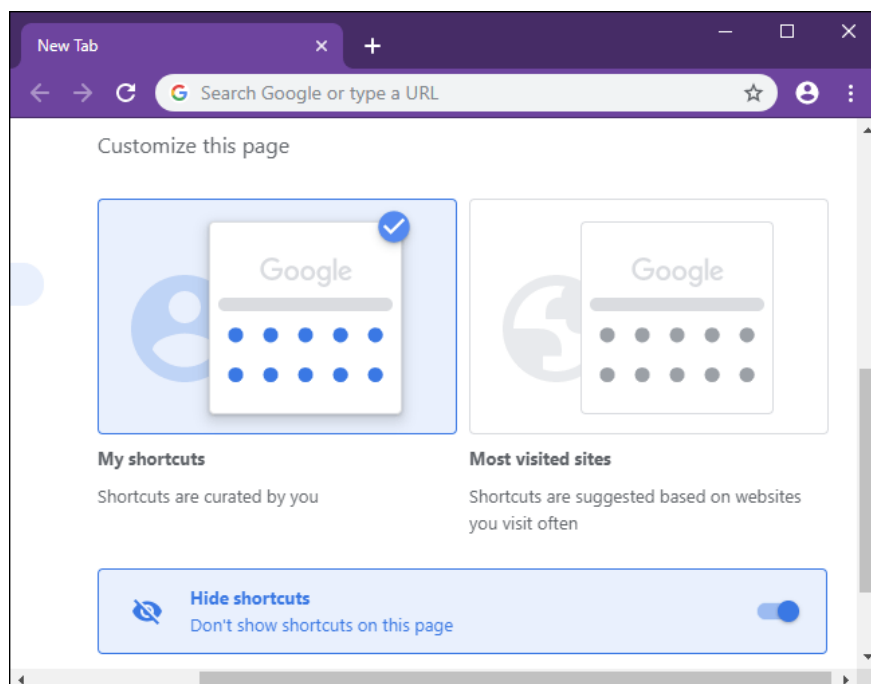

To select a background image for the New Tab page, click **Background** in the left pane and select an image. You can choose a category and images or turn on **Refresh daily** to get new wallpapers every day.

You can also choose **Upload From Device** and choose any wallpaper or choose **No Background** without wallpaper. If you select No Background, Chrome will choose a background color from your theme.

Finally, you can choose **My Shortcuts** to select the website you want to visit, **Most visited sites** to Chrome automatically set the most visited websites or **Hide shortcuts** to remove website shortcuts for a clear interface. than.

You cannot hide the search box on the New Tab page right now. There is a flag called **Remove fakebox from the NTP** hidden in the previous version of Chrome but it has been removed from Chrome 77. Therefore once activated you will have to stick with saying for a while before Google offers a solution. formal removal.

I wish you successful implementation!
