

# How to create a contact number widget on iPhone

We can create contacts widget on iPhone so that we can call or instant message with that person without opening contacts on iPhone. So you can make calls on the iPhone screen without opening contacts.

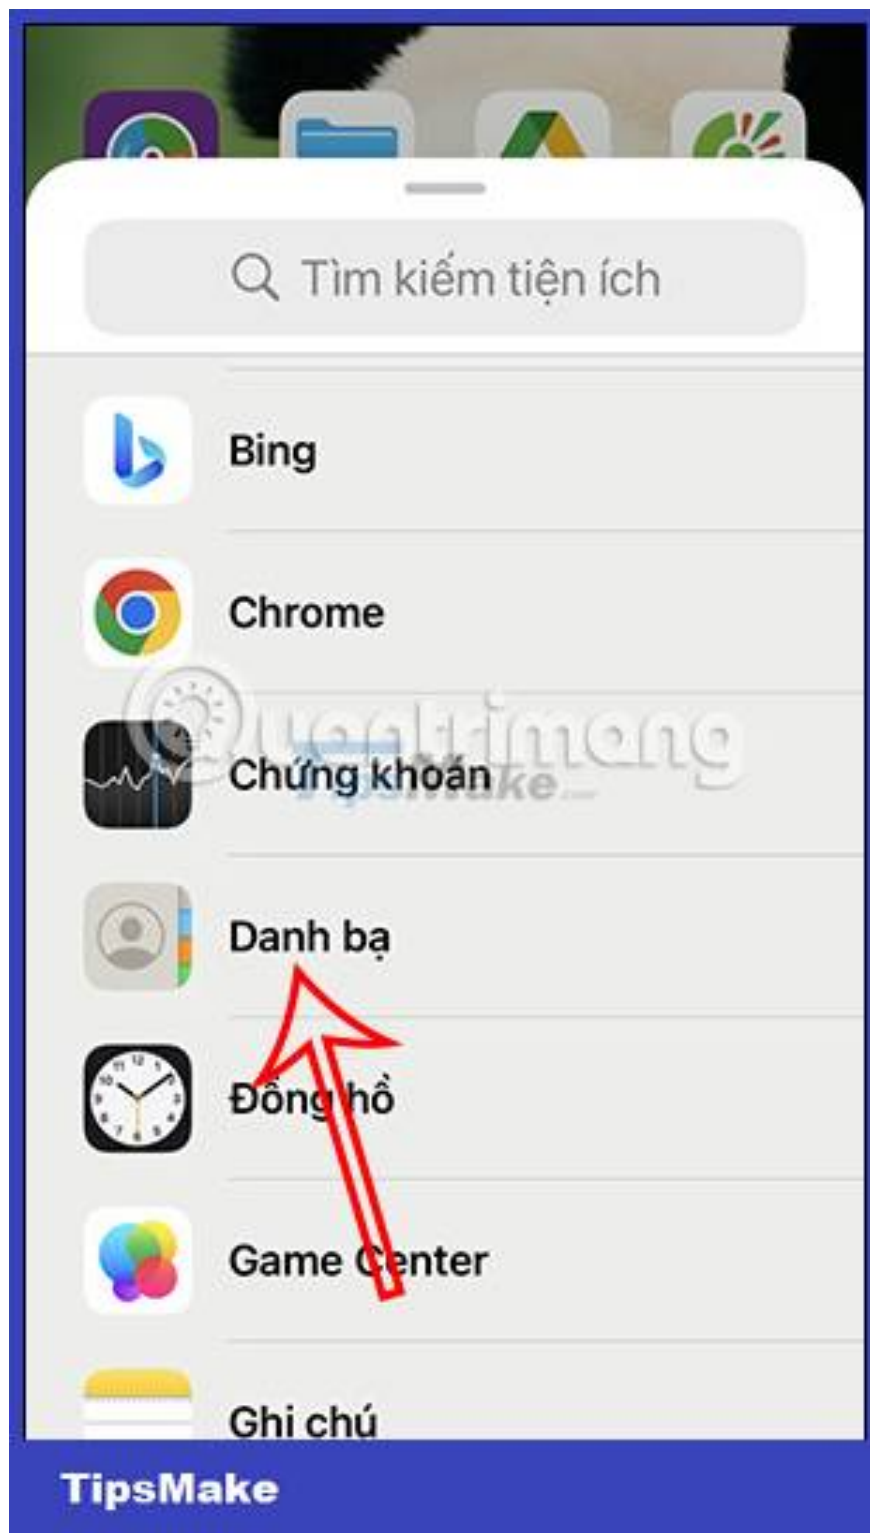

iPhone helps you create widgets with different apps that you can use right on the screen. And we can create contacts widget on iPhone so that we can call or text quickly with that person without opening contacts on iPhone. So you can make calls on the iPhone screen without opening contacts. We can add multiple phone numbers on the iPhone to contact if we want. The following article will guide you to create a phone number widget on iPhone.

## Instructions for creating a phone number widget on iPhone

### Step 1:

At the interface on your iPhone, **press and hold on the screen** . Then click on **the plus icon** on the right edge of the screen. Display applications to create widgets, you click **Contacts** to create widgets on iPhone.

### Step 2:

Now display the phone number widget options, you can choose 1 contact or multiple numbers you want. By default iPhone will choose the first contact in the contacts to display. You choose the display style and then **click Add widget** to add it to the screen on iPhone. Soon you will see this contact number displayed on the screen.
