Step 3:

After selecting the image, Couple Wallpaper will display an image adjustment frame. Users can enlarge the frame or move the frame to separate the image accordingly.

Note to users , to ensure the best quality for wallpapers, we should use images with high quality and resolution. So when cutting the image there will be no image blur. In addition, you should also choose the vertical image according to the design of the device to create a beautiful pair of background images.

After cutting, we press the **Finish** button in the top right corner to save.

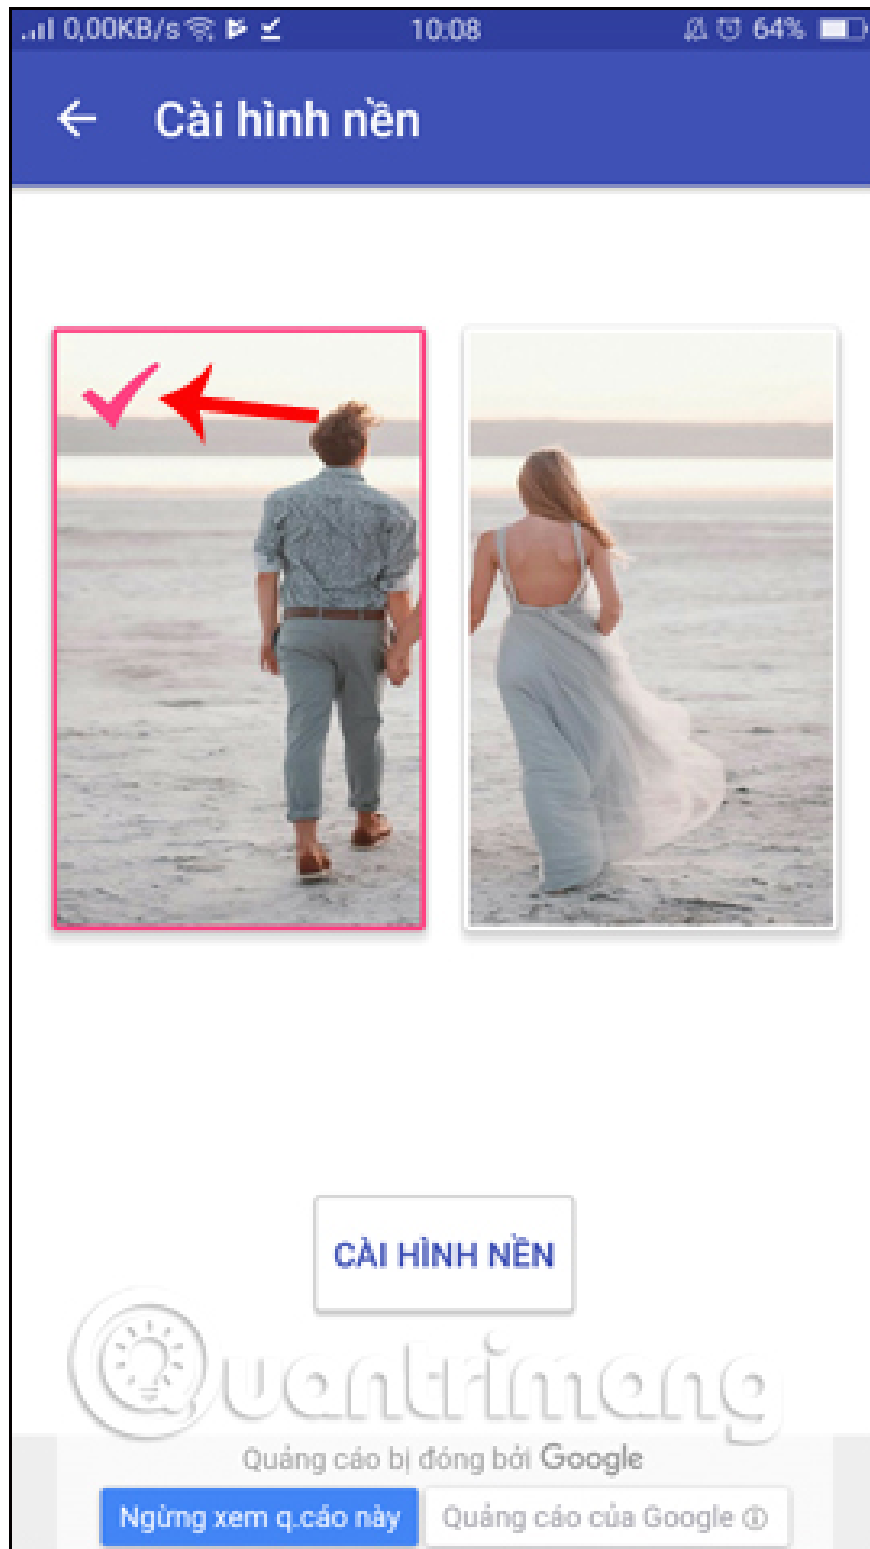

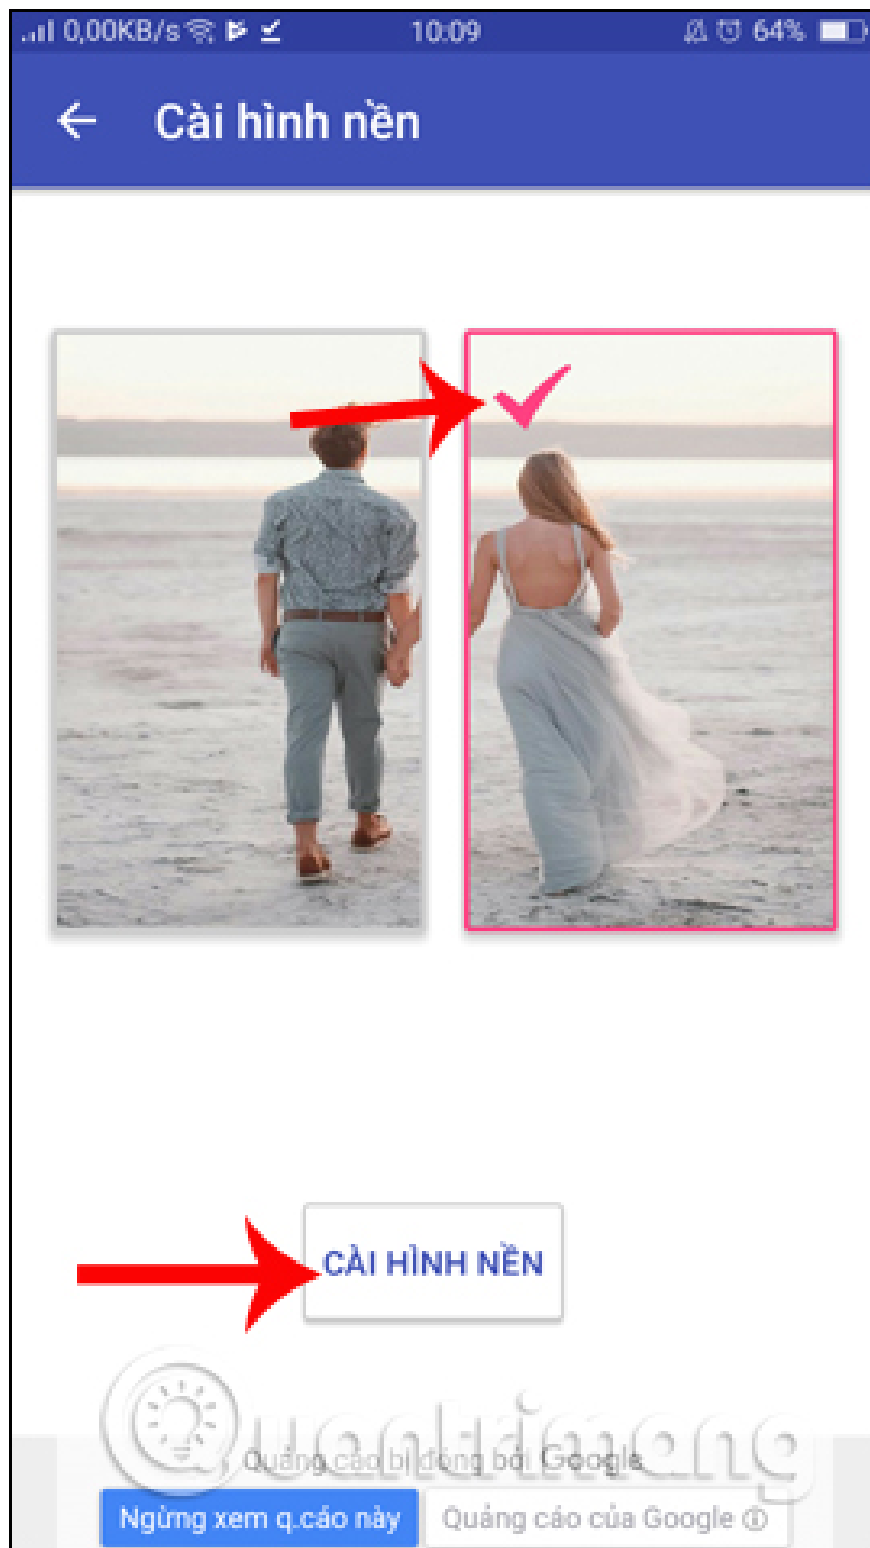

Step 4:

So the application has finished adjusting the image and split into 2 different images. Next, you can optionally select half of the cropped image to set as the device's wallpaper. When done, click **Set wallpaper** to set.

Note to readers , after clicking the image to install as a wallpaper, users cannot change to another photo. So choose the right picture you want.

Step 5:

After that, we will send the remaining wallpaper to the person, press **Send wallpaper** . Select the application installed on the device to send the remaining wallpaper to the person. The application will save the wallpapers that the user has created so that they can use them whenever they want.
