

How to Create a Folder Named Con

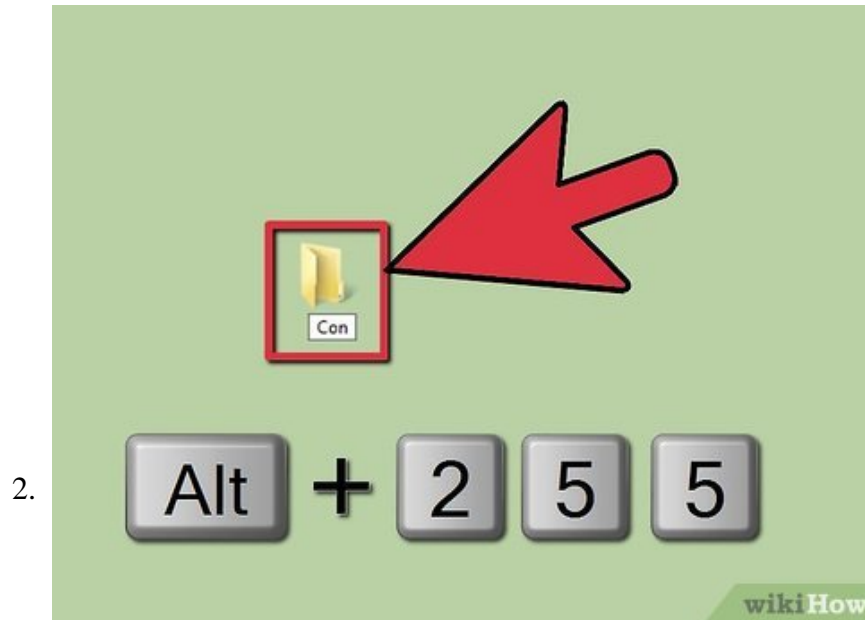

For Windows users, some phrases are reserved as 'System Action' or 'Device' references, which means that users cannot put them into file names. However, there are ways to get around this obstacle. Just follow the steps below to make a...

Method 1 of 3:

Simple

First off, use the numbers on the number pad, not the ones at the top of the keyboard.

Create a new folder. Name it "Con" but don't press enter yet. Hold down Alt and type 255 and Alt+0160 on the number pad, *then* press enter.

Method 2 of 3:

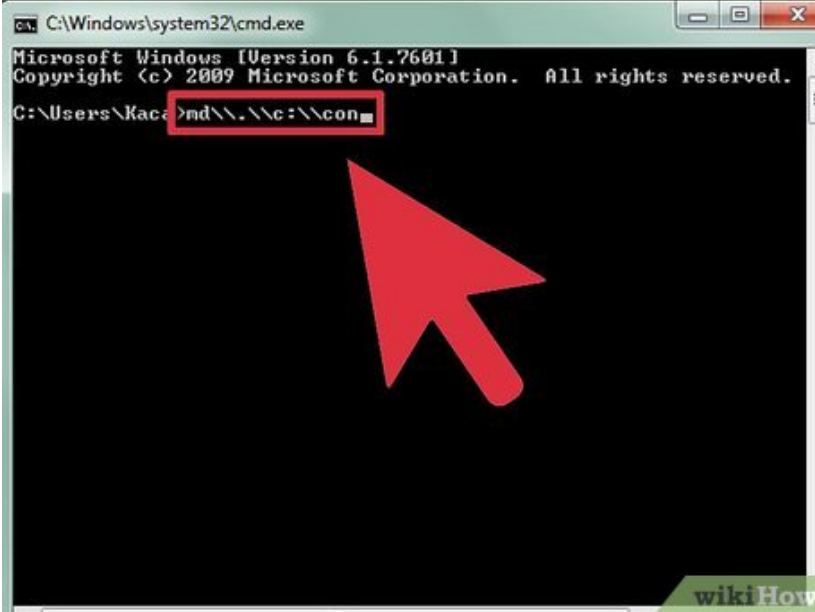

For Laptop Users

Press the fn key and press the letter keys k-i-i to make use of the number pad.

Method 3 of 3:

For Desktop Computers

```
C:\Windows\system32\cmd.exe
Microsoft Windows [Version 6.1.7601]
Copyright (c) 2009 Microsoft Corporation. All rights reserved.

C:\Users\Kac>md\\.\\.c:\\con
```

A screenshot of a Windows Command Prompt window. The title bar reads 'C:\Windows\system32\cmd.exe'. The window content shows the Microsoft Windows logo, version information (6.1.7601), and copyright notice (© 2009 Microsoft Corporation). The command prompt shows the current directory as 'C:\Users\Kac' and the command 'md\\.\\.c:\\con' being entered. A red rectangular box highlights the command, and a large red arrow points to it from the right. A 'wikiHow' logo is visible in the bottom right corner of the window.

1.

Go to command prompt in your computer and type `md.c:con` [Note: you can give whatever path you want in place of `c:`] Tada! The folder has been created. Remember, you must use the command prompt to delete it as well, by typing `rd.c:con`.
