

How to create a Google Play account on your computer

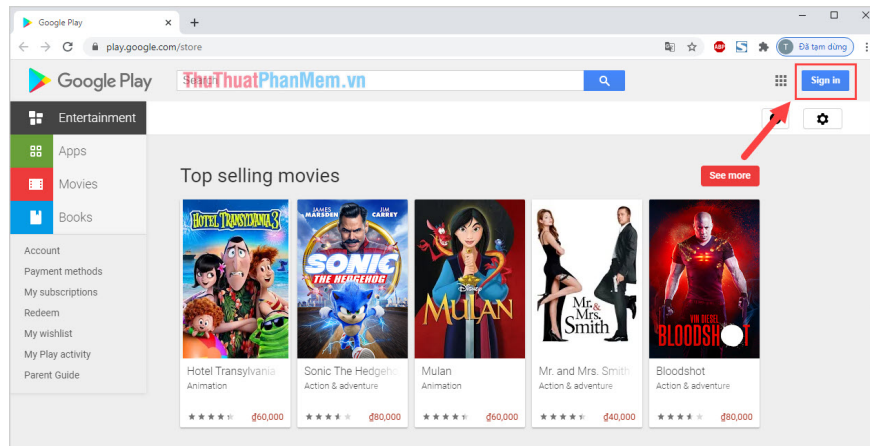

How to create a Google Play account on your computer. Devices using the Android operating system, when downloading applications on CH Play (Google Play Store), they must have a Google Play account. As we all know, all Google services can use Gmail account to login

Devices using the Android operating system, when downloading applications on CH Play (Google Play Store), they must have a Google Play account. As we all know, all Google services can use your Gmail account to login, if you want to use a separate account to log into the Google Play Store, it is still possible! In this article, Software Tips will guide you how to create a Google Play account on your computer.

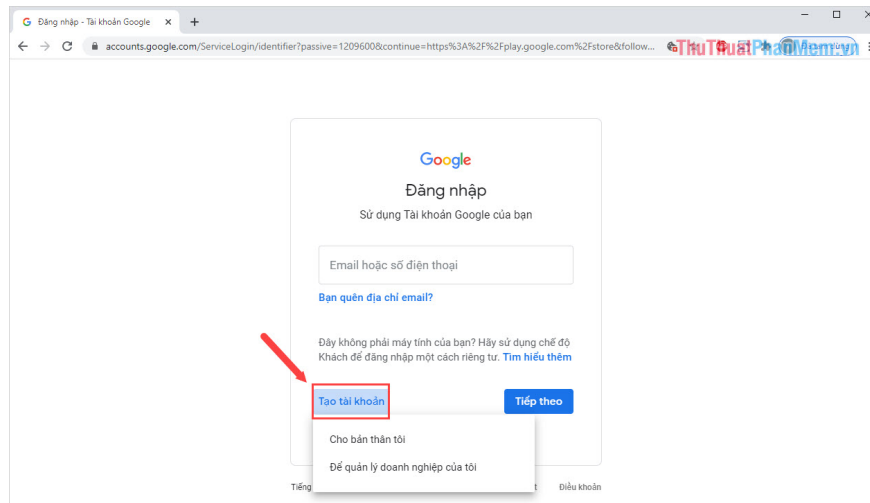

Step 1: First, you proceed to the Google Play homepage to create an account.

Homepage: <https://play.google.com/>

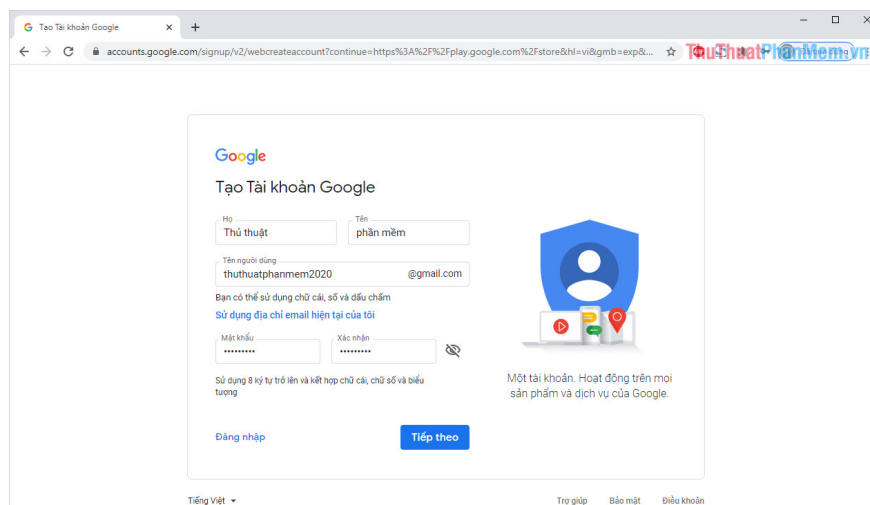

Step 2: At the home page of Google Play, select **Sign In** to login.

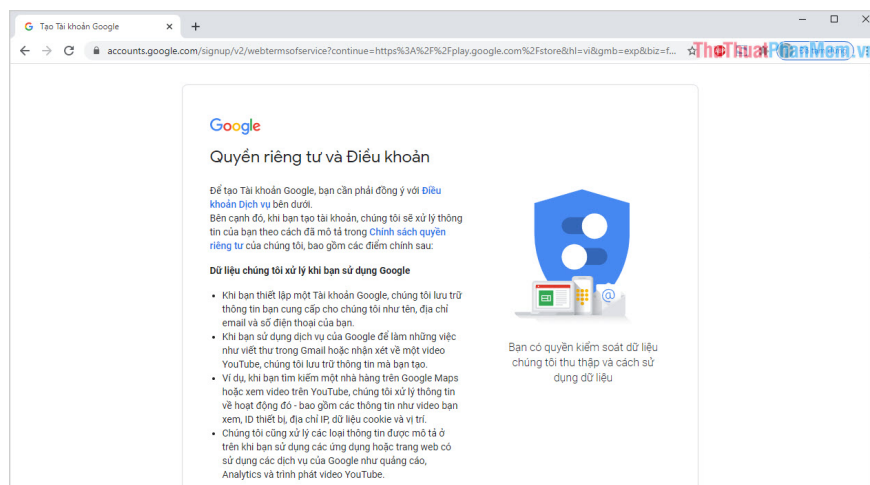

Step 3: When the window switches to the login page, you select **Create account** and choose the account type for **myself** or **To manage my business** .

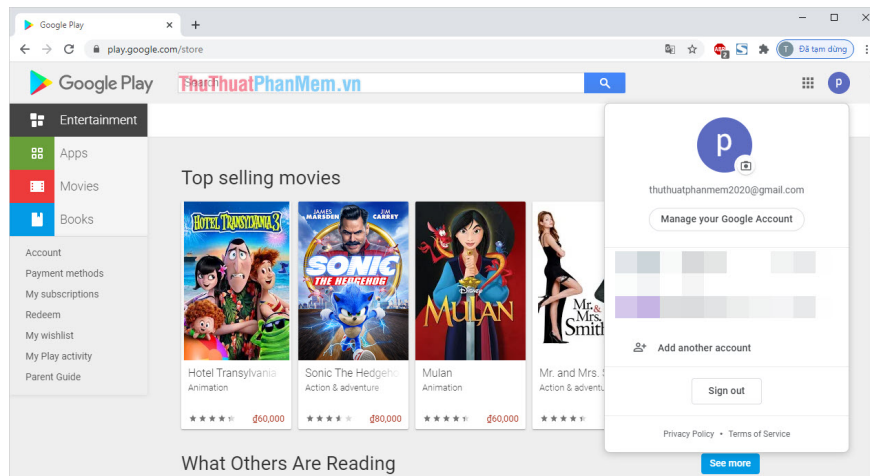

Step 4: Next, enter the personal information related to your Google Play account and click **Continue** to create.

Step 5: After creating your account, Google will ask you to accept terms related to privacy and security. You pull down the final select **Approved** to complete.

Step 6: So you have finished creating a Google Play account on your computer, after creating it, the system will automatically log in for you.

In this article, Software Tips showed you how to create a Google Play account on your computer quickly and accurately. Have a nice day!
