If you are in need of creating a logo for your company or organization but do not know how to do it, do not worry, the following article of Thuthuatphanmem.vn will guide you how to create a logo extremely fast and beautiful by AAA Logo software. AAA Logo is a professional logo design software, but it is not difficult to use. You absolutely can create your very nice logo with just a few simple steps. So why wait any longer without embarking on and designing only.

Step 1 : You access the following link to download the AAA Logo software on the computer and install.

Download link: <https://www.aaa-logo.com/download.php>

After downloading, double-clicking on the file to install, the installation steps are quite simple, you just need to **Install :**

Step 2 : After the installation is complete, open the application, right at the first interface is a lot of Logo Templates divided into many different topics. These are available Logo templates, you can choose a template like that and then proceed to edit.

Step 3 : After selecting a Logo you will be taken to an editing interface. Here you can edit text, shapes, colors, etc.

You want to edit what you like to double click on that section.

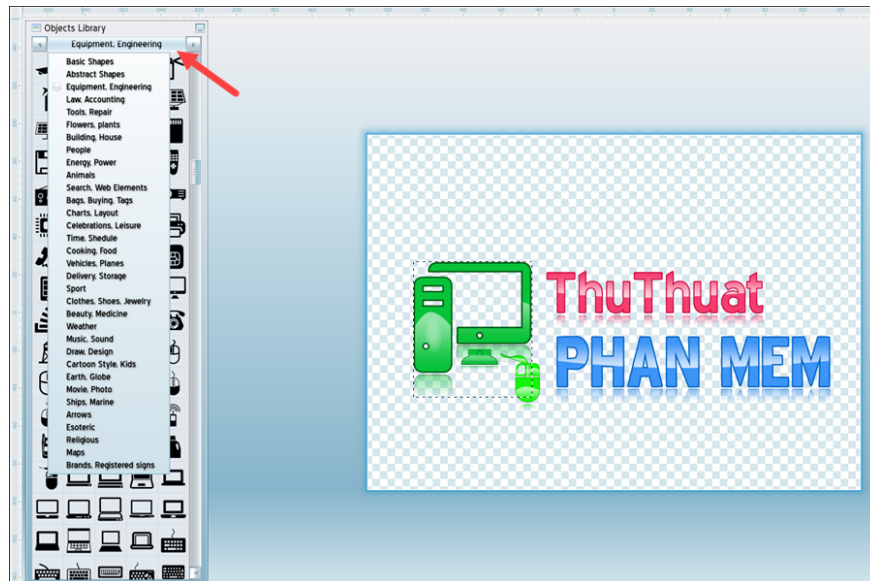

Step 4: When you double click on an object, a small window will appear so you can edit the content, size, and shape of that object. This depends on your creativity. Try each effect in Style until you like the best.

Step 5 : Now you can adjust the color of the Logo by selecting the color palette on the right hand side:

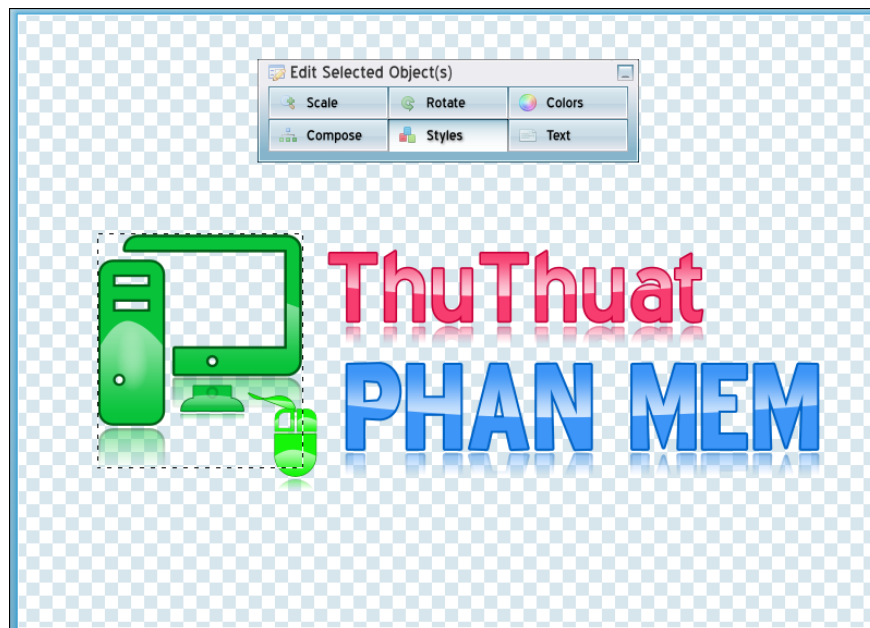

Step 6 : You can change the icon by selecting the icon panel on the left, there are many different areas to choose from. Choose the right field for your company and then choose a logo like that, or put multiple icons together.

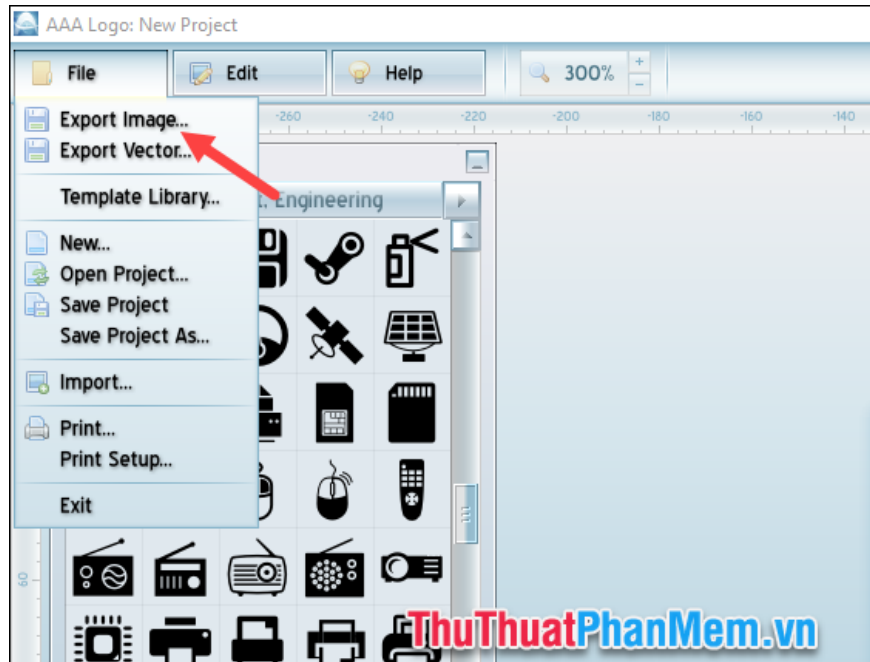

Step 7: To resize or rotate the icon or text you select the **Edit Selected Object** bar and then select the object you want to edit. The editing functions are as follows:

1. **Scale** : Zoom out the object.
2. **Rotale** : Rotate objects.
3. **Color** : Change the color.
4. **Compose** : Merge, split objects .
5. **Styles** : Add effects.
6. **Text** : Add text.

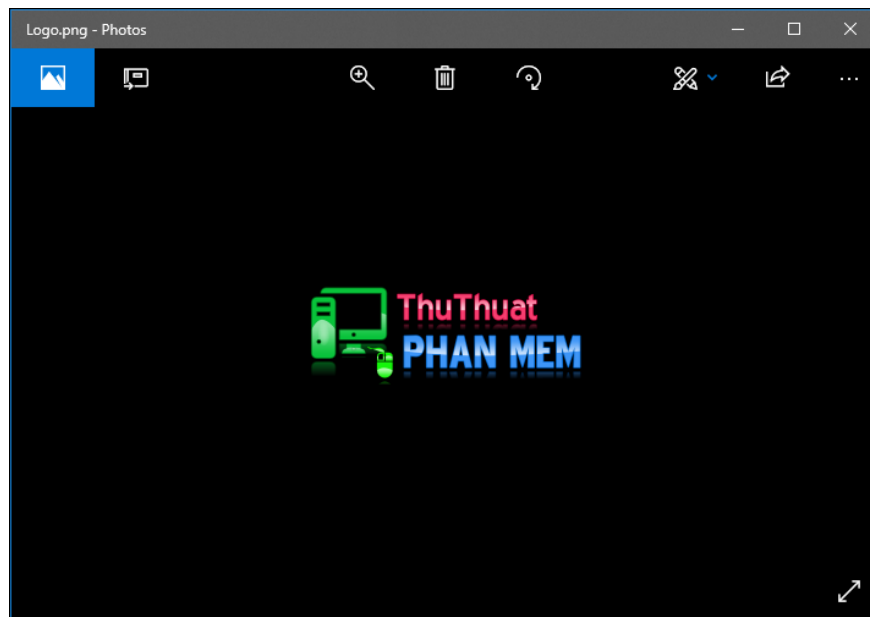

Step 8 : When you are satisfied with your work, we proceed to save the Logo to your computer.

To save the image you choose **File -> Export image** . then select the folder to save the Logo. Note that your part requires a license to save the Logo file.

So we have successfully created the Logo with AAA Logo software with just a few simple steps:

Above Thuthuatphanmem.vn has guided you how to create your own logo using AAA Logo software, hopefully through this article you can create your own a beautiful and professional Logo. Good luck!
