

How to create a Lotus account, a Vietnamese social network.

Lotus is a Vietnamese social network launched in September 2019, developed by VCCorp. It's a platform that combines traditional social networking with digital content, focusing on providing high-quality content to users. This article will guide you through creating a Lotus account, a Vietnamese social network, in detail.

The Lotus social network allows users to create and share posts, images, videos, and other multimedia content, earning points based on interaction and "flowers" for contributing quality content, thereby encouraging the creation of useful and valuable information. Therefore, many users continue to create new Lotus accounts to participate in this Vietnamese social network.

Instructions on creating a Lotus account and registering a new Lotus account.

How to sign up to receive notifications for new Lotus app downloads

Using the latest version allows you to quickly access new content and features.

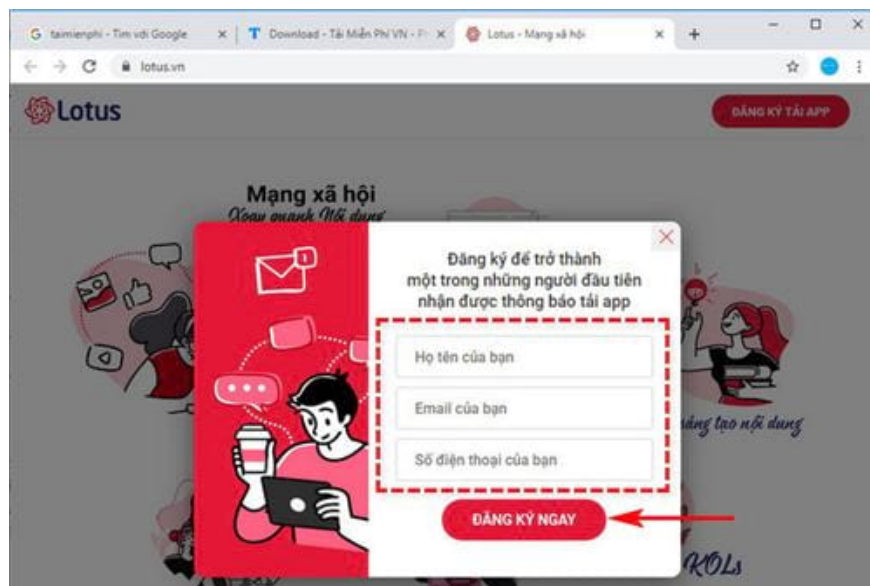

Step 1: Access the official Lotus social network website here.

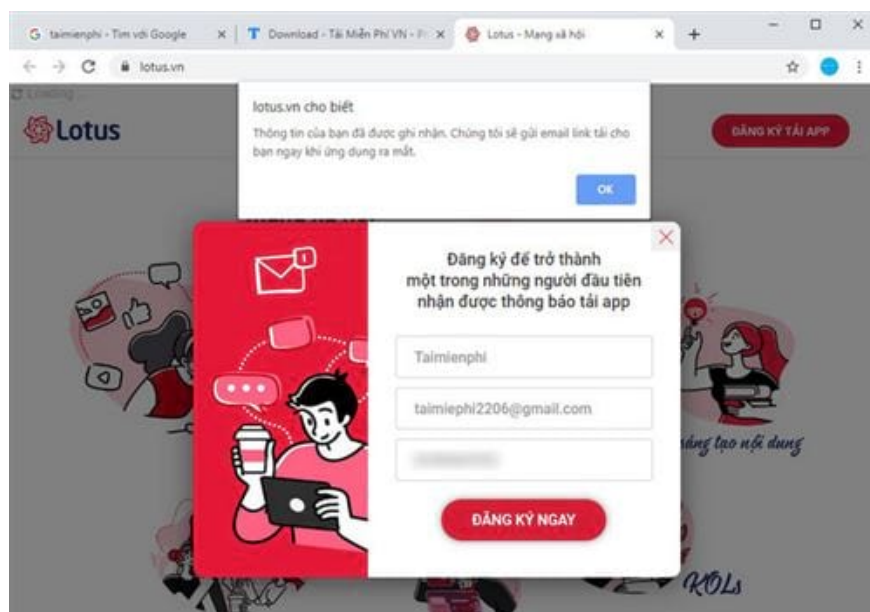

Step 2: On the Lotus social network homepage, click the "Register to download app" button in the upper right corner of the screen;

Step 3: Enter your personal information including: **Your full name**, **your email address**, and **your phone number** into the corresponding fields. Finally, select **Register Now**.

After completing the registration, the system will record your information and display a completion message as follows.

With the instructions Taimienphi has just provided, you will only need a few seconds to complete the registration to receive notifications about the new version of the Lotus social network app (if available). Users can use tokens to rate posts. The more tokens a post receives, the higher your account's credibility and the higher the quality of your content. Importantly, tokens not only have value on Lotus but also offer real economic value. This is definitely a huge plus, making users eager to learn more about it.

Also a social network released by VCCorp, Lotus Chat is another version of the Lotus social media platform. After **registering a Lotus Chat account**, you can video call directly with other users, send messages, and share important content through the latest messaging application for Vietnamese people.
