

How to create a Microsoft account

Recently Microsoft launched a new account creation interface, you do not have to enter too much information as before, creating a Microsoft account is also easier. For more details on how to create a Microsoft account, refer to the article below.

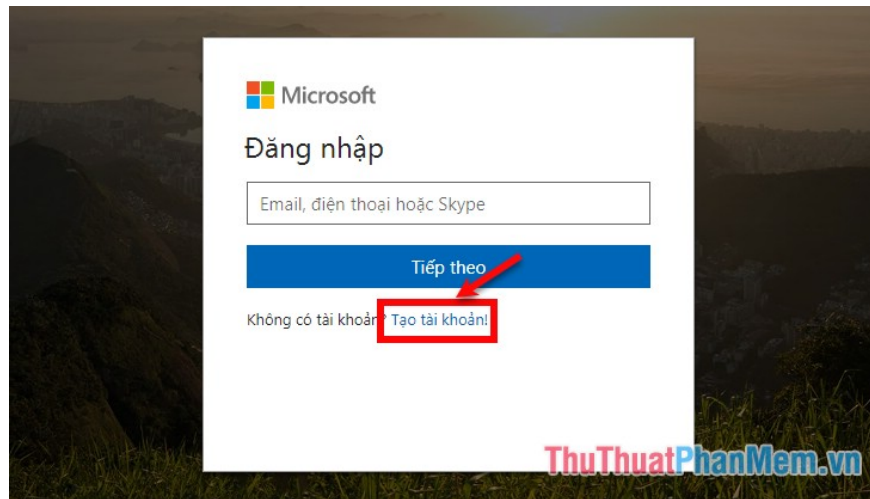

You use Microsoft applications that are required to have a Microsoft account, you do not have a Microsoft account. So you're trying to create your own Microsoft account to use Microsoft applications but don't know how to create one yet?

Recently Microsoft launched a new account creation interface, you do not have to enter too much information as before, creating a Microsoft account is also easier. For more details on how to create a Microsoft account, refer to the article below.

Below are detailed instructions on how to create the latest Microsoft account.

Step 1: First, you go to the page <https://login.live.com>, on the interface you select **Create account** to open the page to create a Microsoft account.

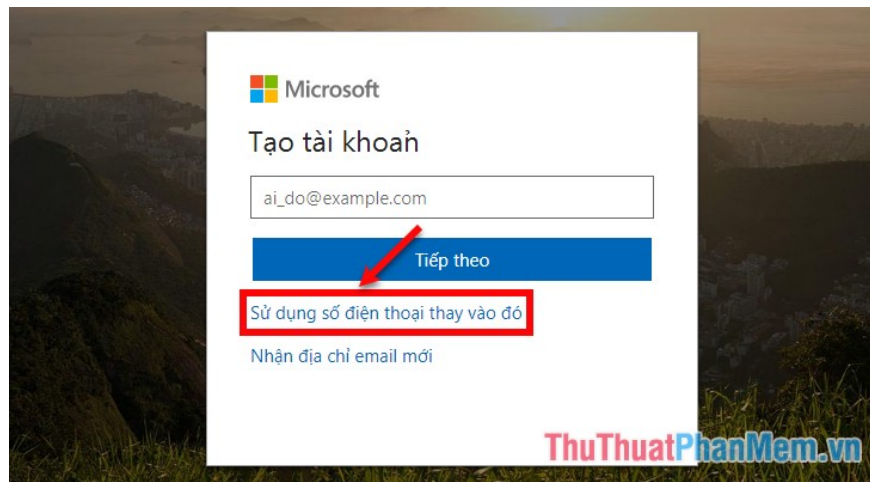

Step 2 : Here if you have another email address (not from Microsoft) then enter that email in the text box and click **Next**. If not, you can choose two options:

1. Use phone number: create Microsoft account from phone.
2. Get a new email address: create a new Microsoft email address.

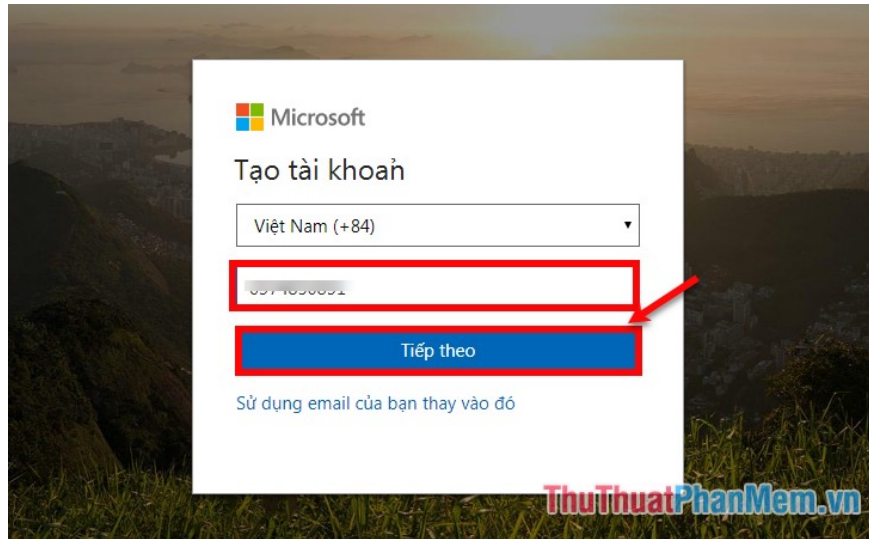

The following article will guide you to create a Microsoft account in two ways:

1. Use phone number

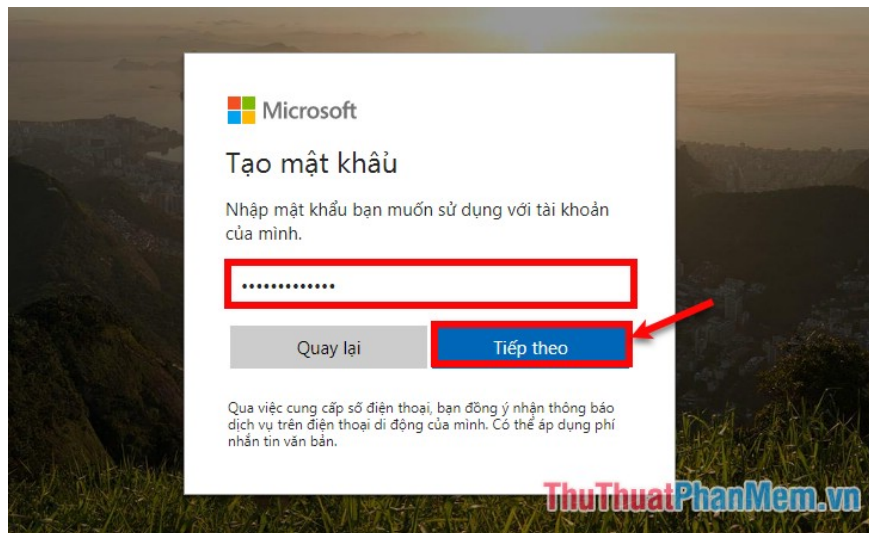

1. On the interface, select **Use phone number instead** .

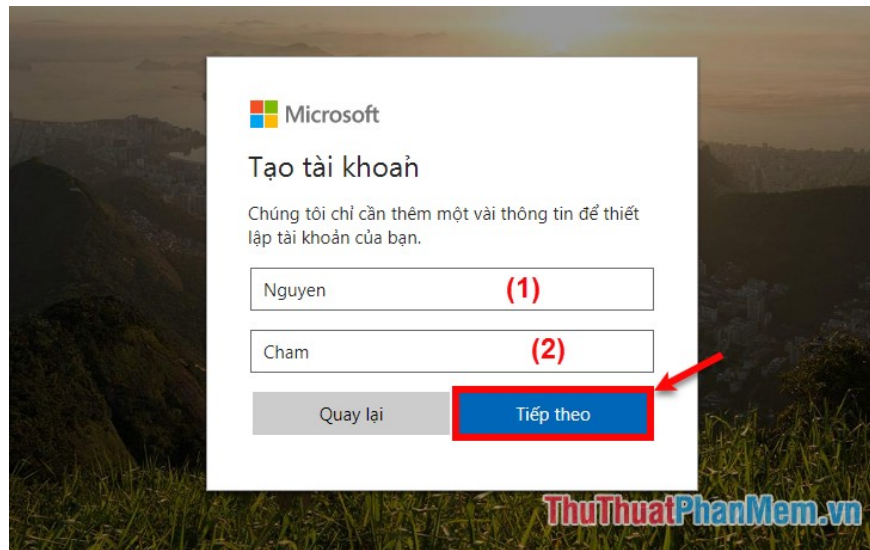

2. Enter your phone number in the Phone **number** box , you need to enter the correct phone number to verify the account, then press **Next**.

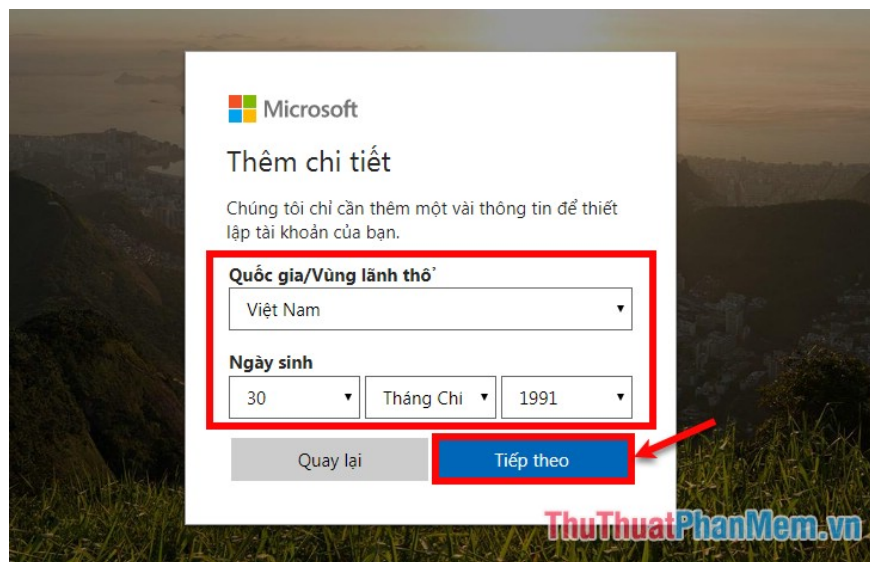

3. Next, enter the password you want to create for your account and click **Next**.

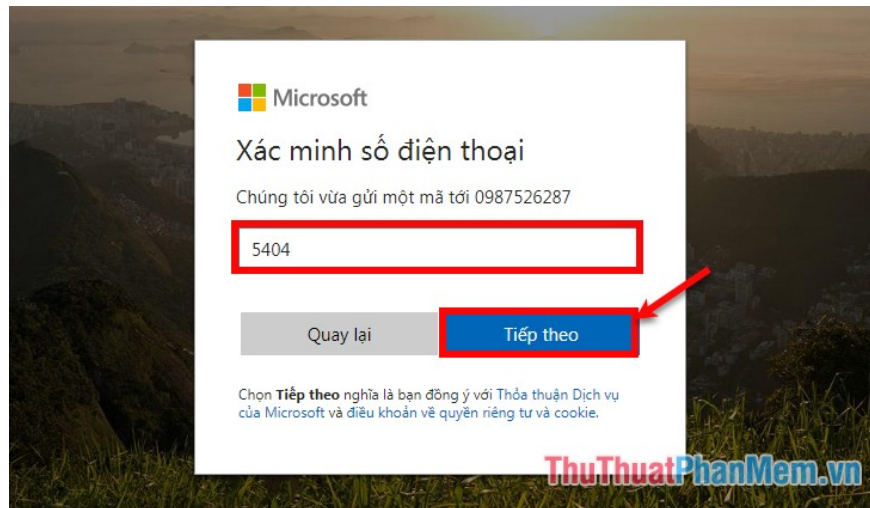

4. Here you enter **Last** (1), **First Name** (2), and click **Next**.

5. Select the country and date of birth on the interface and click **Next** to continue creating an account.

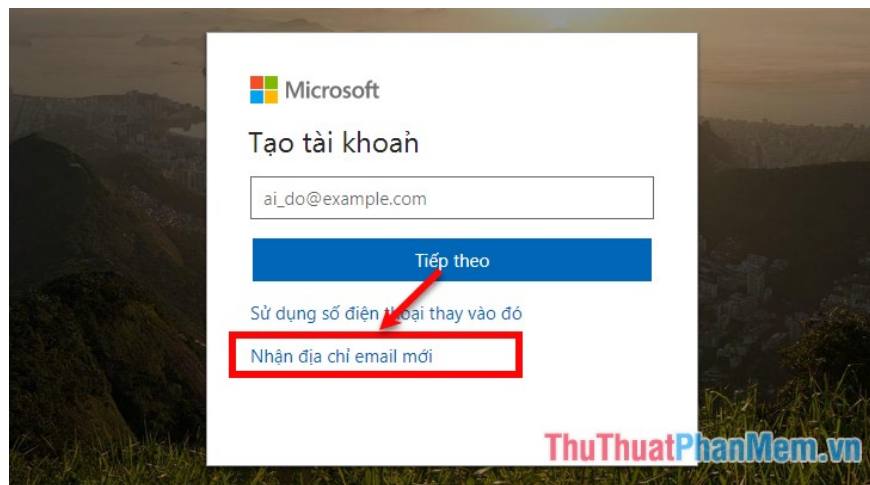

6. Get the verification code sent to the phone number you just registered and enter the text box and click **Next**.

So you have created a Microsoft account with your phone number, from now on if you need to use the account, then enter your **username** is the phone number, the **password** is the password you have just created to log into the application. Microsoft.

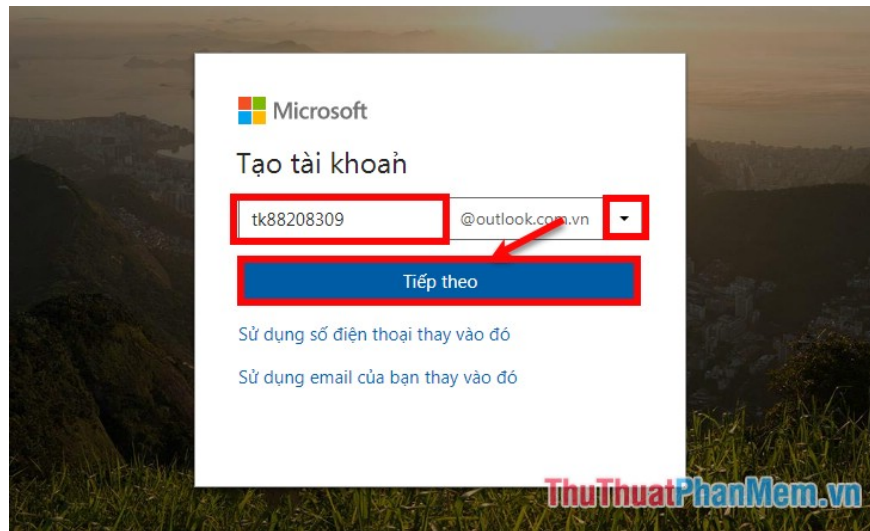

1. Get a new email address.

1. On the interface to create an account, select **Get new email address**

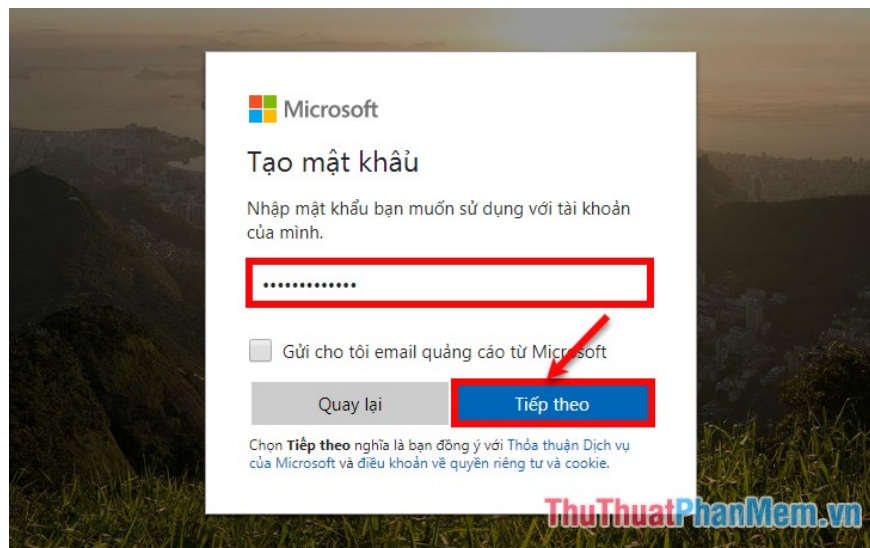

2. Here you **enter the new email name** (when you finish typing the email name you left off, microsoft will automatically check the availability of the name, if there is a red message you need to enter another name) and click on the icon Triangles to select email format.

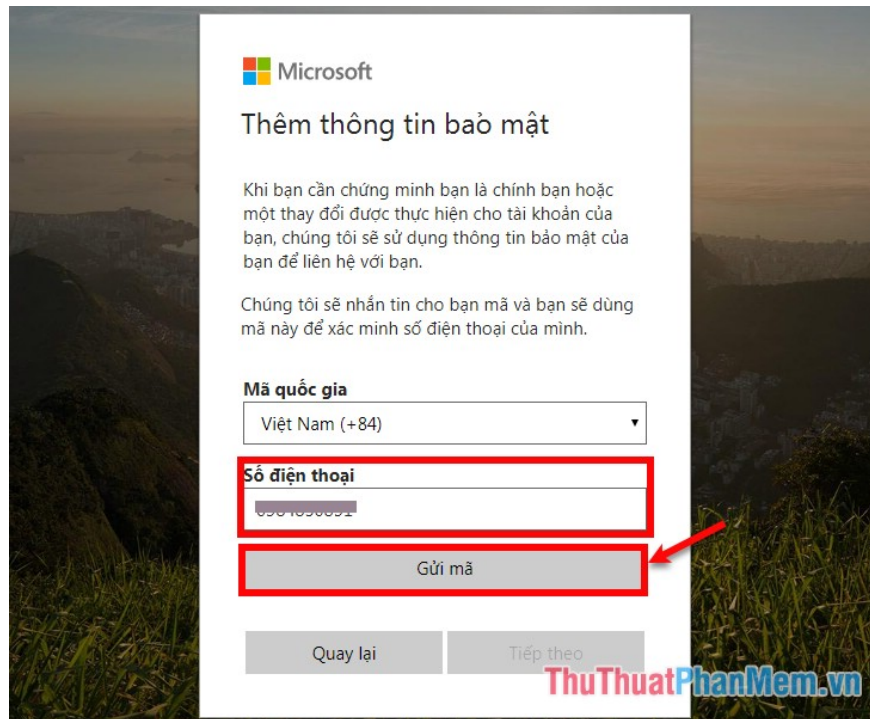

Then click **Next**.

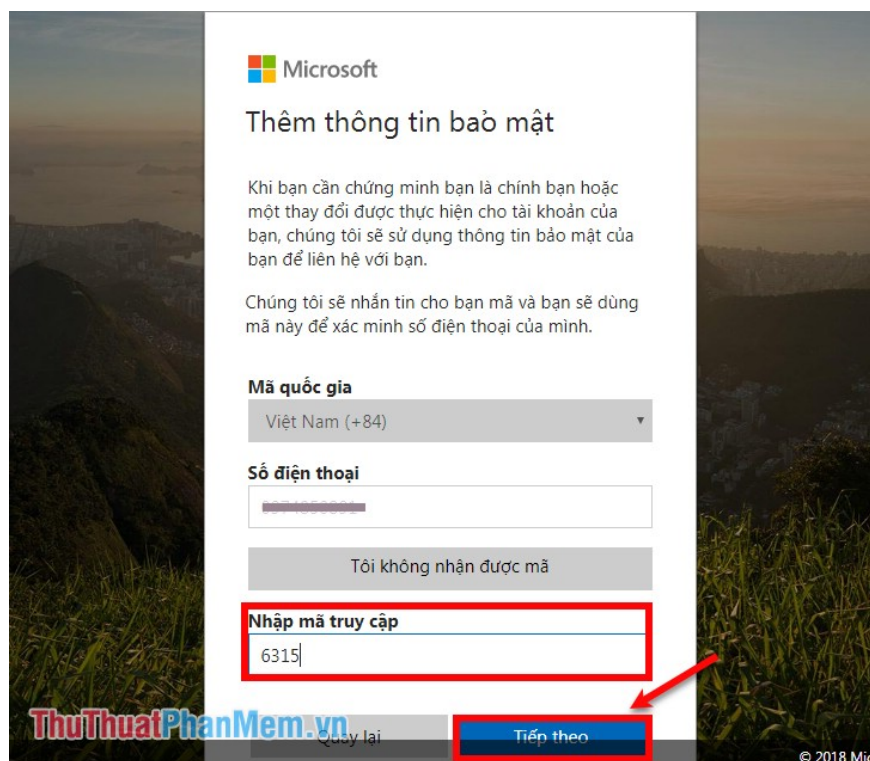

3. Here you enter the password you want to create for your Microsoft account and click **Next**.

4. At the Add security information, enter your phone number in the Phone **number** box (this phone number for you to verify when you need to change the information related to your account so you need to enter your real phone number), then click **Send code** to have Microsoft send verification codes to create an account for your phone number.

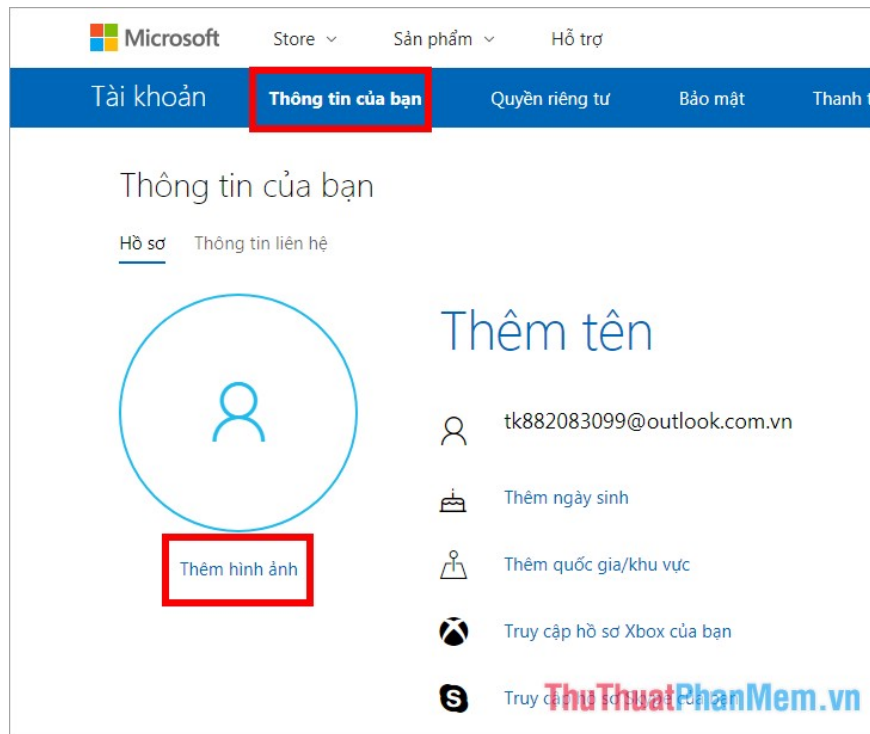

Next you enter the confirmation code in the box **Enter the access code** and click **Next**

Now that you have created your Microsoft account with the new email, you can use the email name and password you just created to log into Microsoft applications.

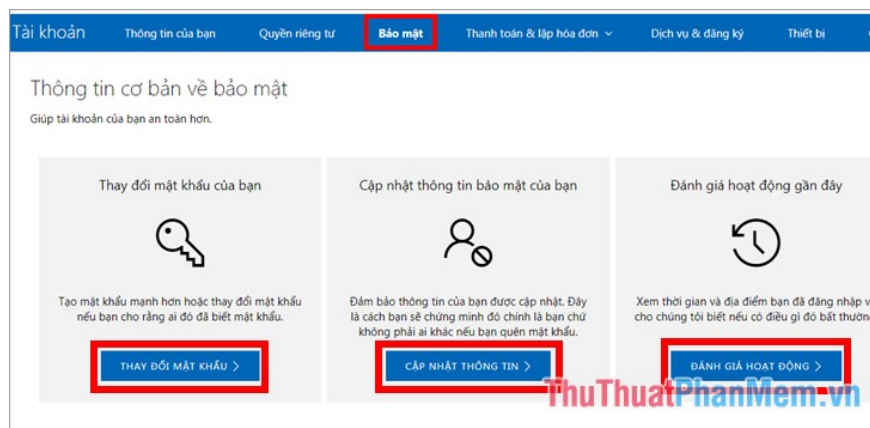

Step 3: Edit your personal information

On the login interface, select your **Information**, here you can add photos, Add birthdays, Add countries / regions.

Step 4: Edit security information

You choose the **Security** tab , where you can change your password, update information, evaluate unusual activities with your Microsoft account.

So that you know how to create a Microsoft account quickly, from now on with Microsoft applications you can use this account to log in and use.

Good luck!
