

How to create a photo collage on a Facebook profile

Featured image section on Facebook profile page will be impressed by unique photo collages.

To increase the content for Facebook personal page interface, users have a lot of different options, such as creating striking images. Featured photo section includes 9 different images for you to choose any photo displayed on your personal Facebook page that you like best, like the best to introduce yourself. If you want to surprise and unique photos featured on Facebook, you can create collages from a complete image.

PhotoSplit application will help you split photos into many different pieces, with options such as 3x1, 3x2, 3x3. All images through PhotoSplit crop image retain quality and resolution, without affecting quality. The following article will guide you how to create a photo collage on Facebook.

1. How to play music on your Facebook page
2. Instructions on how to hide personal information on Facebook
3. Instructions for displaying the number of followers on Facebook by phone
4. How to create music player in Facebook profile

Instructions to create featured photos on Facebook

Step 1:

We download the PhotoSplit app for Android and iOS by following the link below.

1. Download PhotoSplit for Android
2. Download PhotoSplit for iOS

Step 2:

Start the application and you are asked if you want to see a video of how to do it. Then they click Choose Photo to select the image you want to feature on Facebook.

The image is a vertical screenshot of a mobile application interface. At the top, a status bar shows 'Không có SIM', '11:03', and '100%' battery. Below this is a grey bar with a 'START' button (a circular arrow icon) and a 'SAVE TO GALLERY' button (an image icon). A large red arrow points from the 'START' button towards the 'SAVE TO GALLERY' button. The main content area has a black background with the text 'Tap in sequence to post to instagram' in white. Below the text is a 3x3 grid of nine photo segments, each with a white number in a dark red square. The segments show a woman's face and accessories: 1. Shoulder, 2. Neckline with necklace, 3. Hands with rings, 4. Ear with earring, 5. Mouth with lipstick, 6. Hand with ring, 7. Side of head with headband, 8. Eyes, 9. Hand with ring. At the bottom, there is a black bar with the Instagram logo, the text 'FOLLOW US @PhotoSplitApp', and a watermark 'Quantrimang'.

Step 5:

Now you access your personal Facebook account and then the interface of your page. Scroll down below and click **Edit Public Details** . Switch to the new interface, scroll down to the **Highlights** section, and select **Add** to add images.

Step 6:

Display the interface to add 9 images to the featured image section. Here you will select 9 pieces that you have just separated. We will have to put 9 pieces in the right order of the image offline.

Click each square and then click **View more** to expand the photo album on the device.

Đáng chú ý

[Chỉnh sửa](#)

Instead of using 9 different images for Facebook featured photos, users can use one image, but split into 9 pieces thanks to the PhotoSplit application.

I wish you successful implementation!
