

# How to create a rounded image in Photoshop

The 4 rounded operations on the corner of Photoshop are very simple, and you can choose the level of 4 corners of the image.

Photoshop is still the most popular photo editing software, many people choose from basic photo editing, to advanced and professional photo editors. Photoshop gives users a lot of photo editing tools to create artistic images. You can create a photo frame on Photoshop, or simply round the 4 corners of the image with a very simple operation. We have chosen to scale the 4 sides of the image accordingly and achieve the aesthetics of the image. The following article will guide you how to read the 4 corners of Photohsop.

1. How to cut circular images in Photoshop
2. How to create photo effects on Photoshop
3. How to use PicPlayPost to merge, create frames for videos
4. How to cut circular images in Photoshop

## 1. Guide to round 4 photos in Photoshop

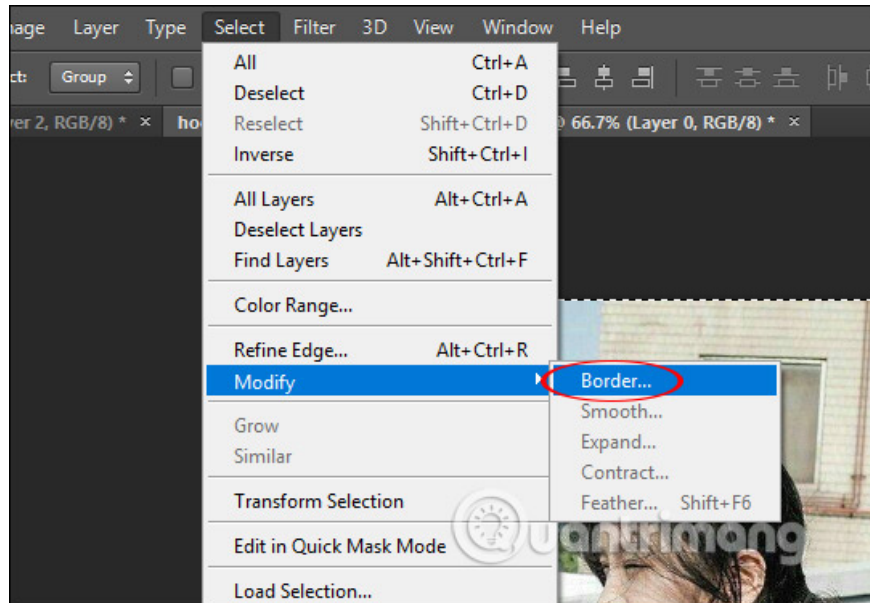

### Step 1:

First open the image in Photoshop and then double click on the layer image to unlock it, if the **lock icon is** displayed in the image.

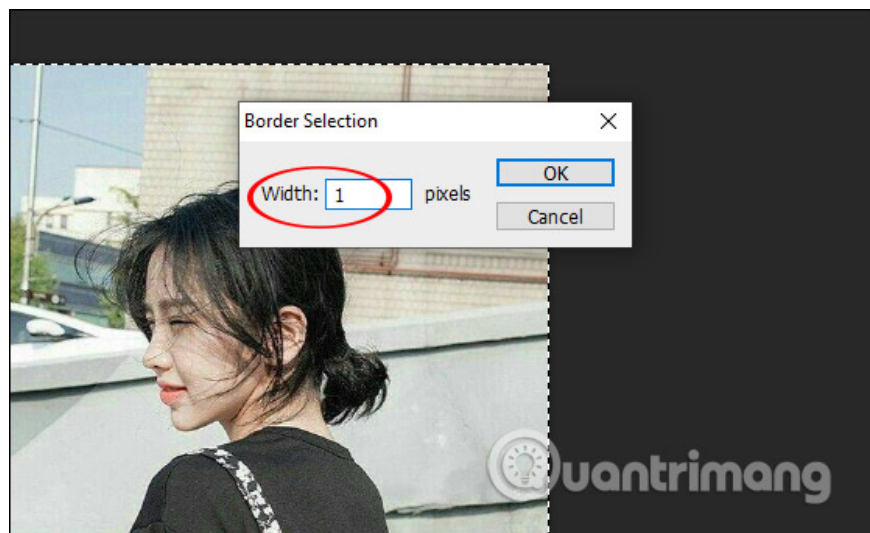

## Step 2:

Next **press Ctrl + A** to select the entire image. Then click on **Select** in the toolbar above the interface, select continue to **Border** in the list displayed.

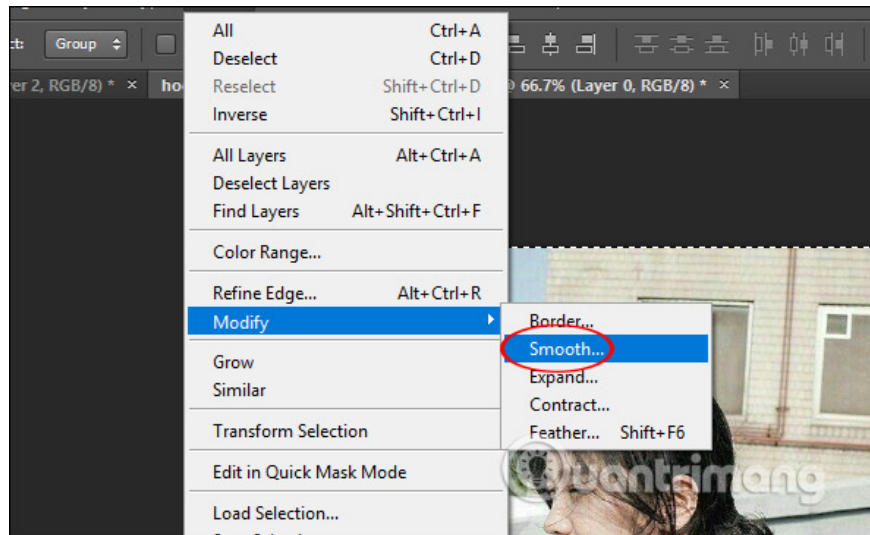

Appears the Border Selection interface, **press 1 pixels** and click OK.

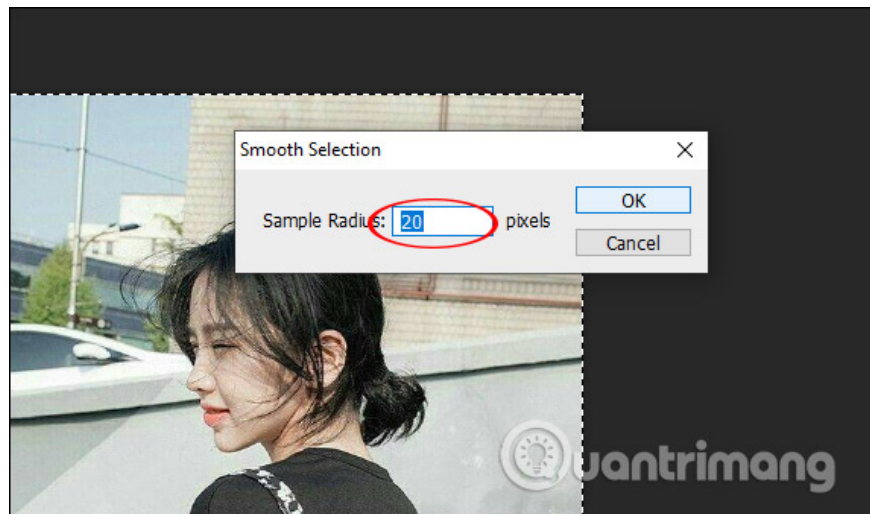

## Step 3:

The user continues to click **Select** and then select **Modify** and then select **Smooth** to adjust the curvature for the 4 corners of the image.

In the new Smooth Selection interface, **select the diameter of the lever** . The more you increase the pixel level, the bigger the angle of bo.

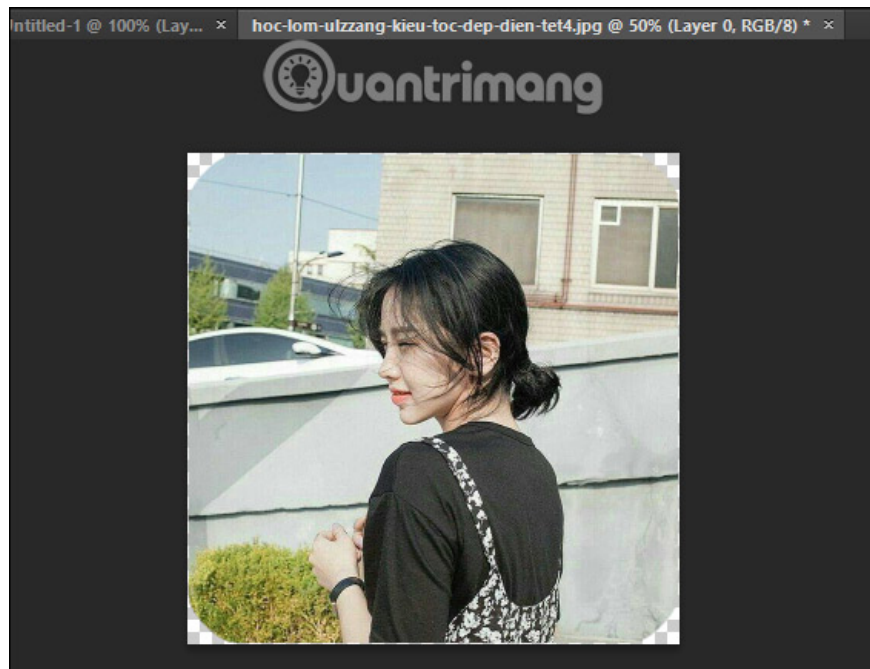

#### Step 4:

This will display the rounded line at the four sides of the image as shown below. Click **Delete** to remove the extra area outside the rounded corner.

The resulting image is rounded to 4 corners as shown below. We perform image saving as usual.

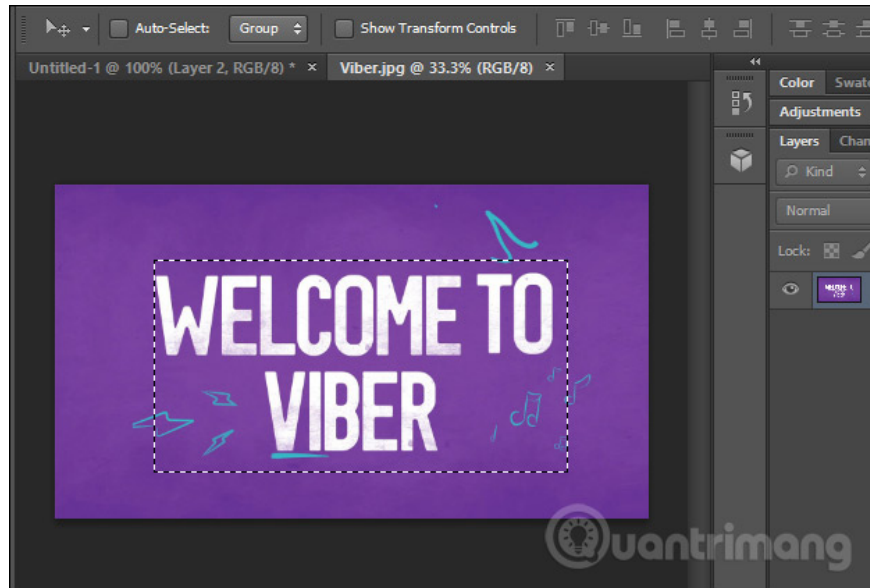

## 2. How to create a rounded image area on Photoshop

In case the user wants to create an image area that has 4 corners of the image in the same image and blur the surrounding area, it is also easy.

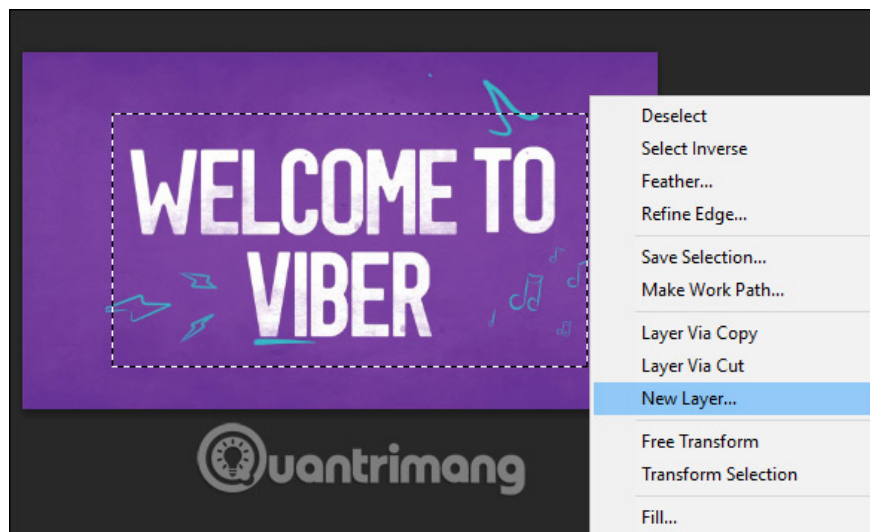

**Step 1:**

First you need to **press the Rectangular Marquee Tool (M)** or press the M key to circle the image you want to create the rounded frame.

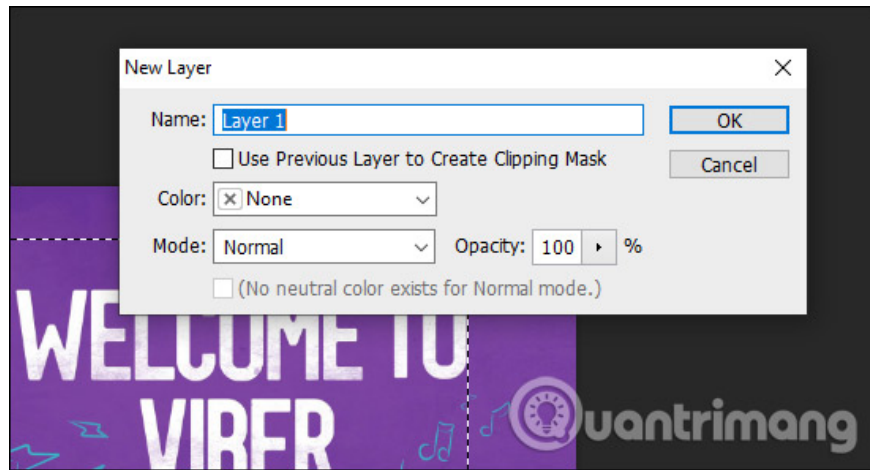

**Step 2:**

Right-click on the new highlighted area and select **New layer** in the displayed list.

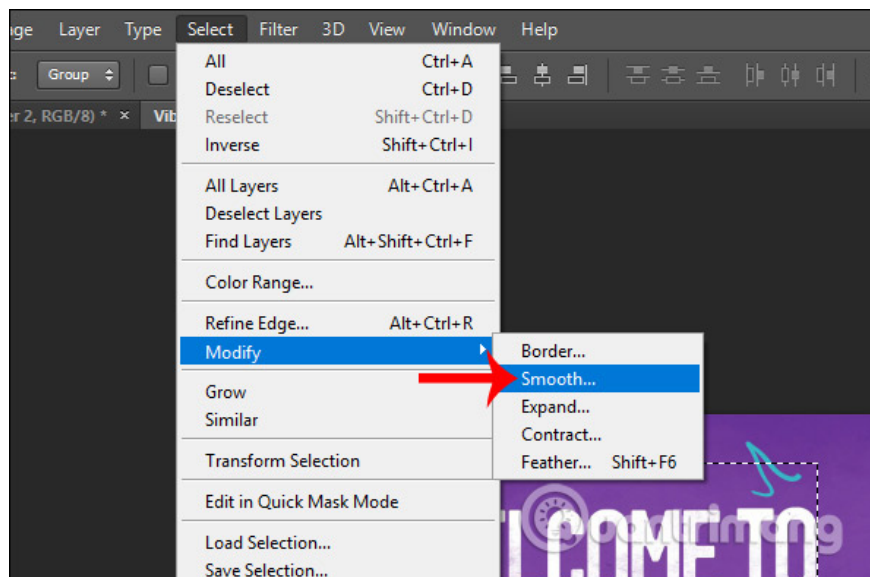

Display the **Layer 1 frame** , click OK to create a new layer for the image.

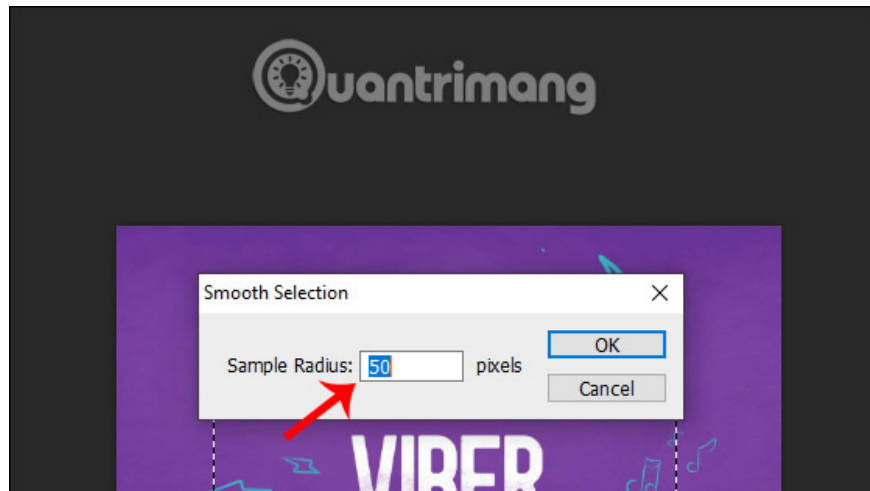

### Step 3:

Next, click on **Select** above and then select **Modify**, choose Next to **Smooth** to adjust the rounded angle.

Enter the rounding level in the display interface and also press OK.

As a result, we have selected the area of the image to round the 4 corners as shown below.

#### Step 4:

Next press **Ctrl + Shift + I** to select the entire image. Then to blur the surrounding area and highlight the rounded image area, click on the **Paint Bucket Tool** icon or press G.

Fill the image and the resulting area will be surrounded by the selected color.

### Step 5:

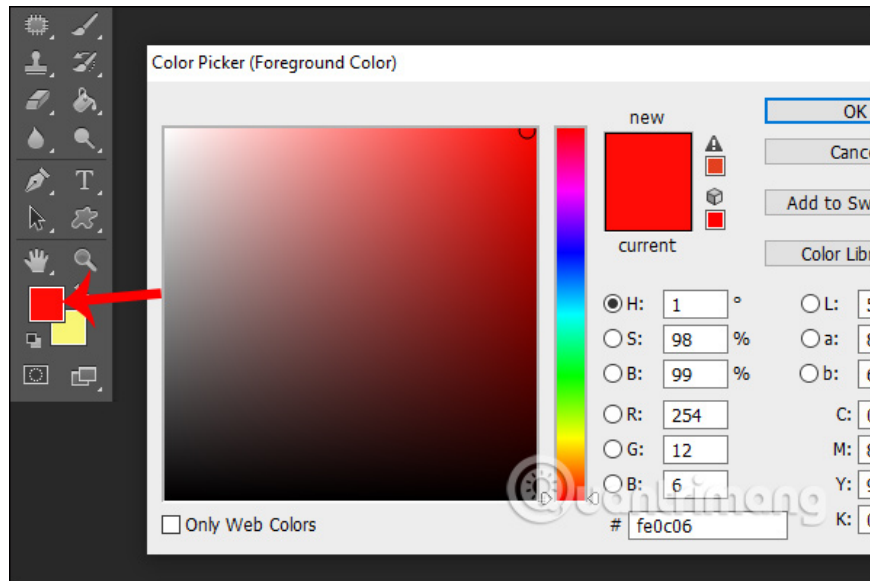

To **blur the blurred image area** , click on layer 1 and **adjust Fill** to the blurring level you want.

The resulting image is blurred with the area outside the circle as shown below.

In case the user wants to fill the surrounding area, select the color to fill.

Then fill color with layer 1 and get the color frame as shown below. We can also adjust the color level at the Fill section.

With the option to roll 4 corners of photos in Photoshop, you have many different ways of performing, rounding the whole image or just rounded 4 edges for 1 selected image area only.

I wish you all success!
