

# How to create a signature in Gmail and Yahoo mail

Currently Gmail and Yahoo mail are two email boxes that many people choose and use the most. As with other email boxes, both support users to set up signatures and send them.

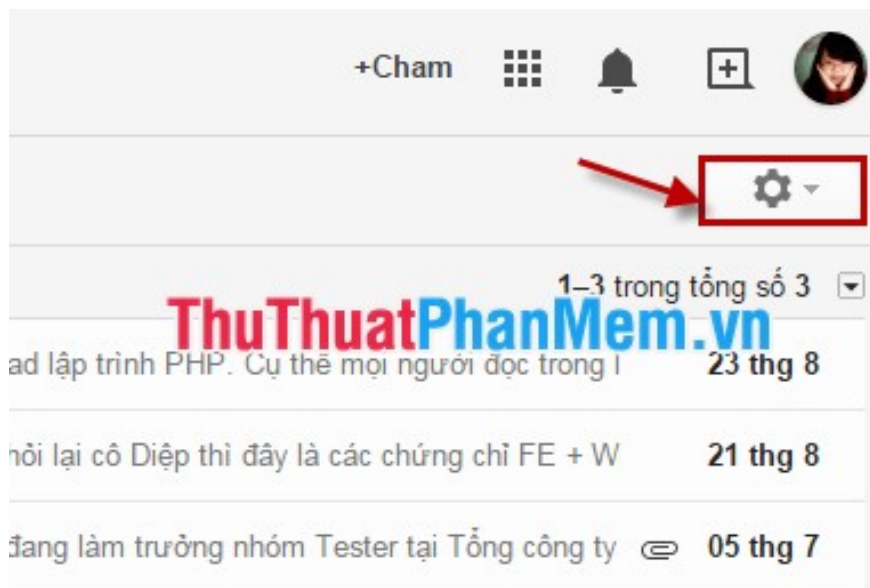

Currently Gmail and Yahoo mail are two email boxes that many people choose and use the most. As with other email boxes, both support users to set up signatures and send them. You can enter anything you want, be it your name, phone number, address or a quote that you like .

## 1. Instructions on how to create a signature in Gmail.

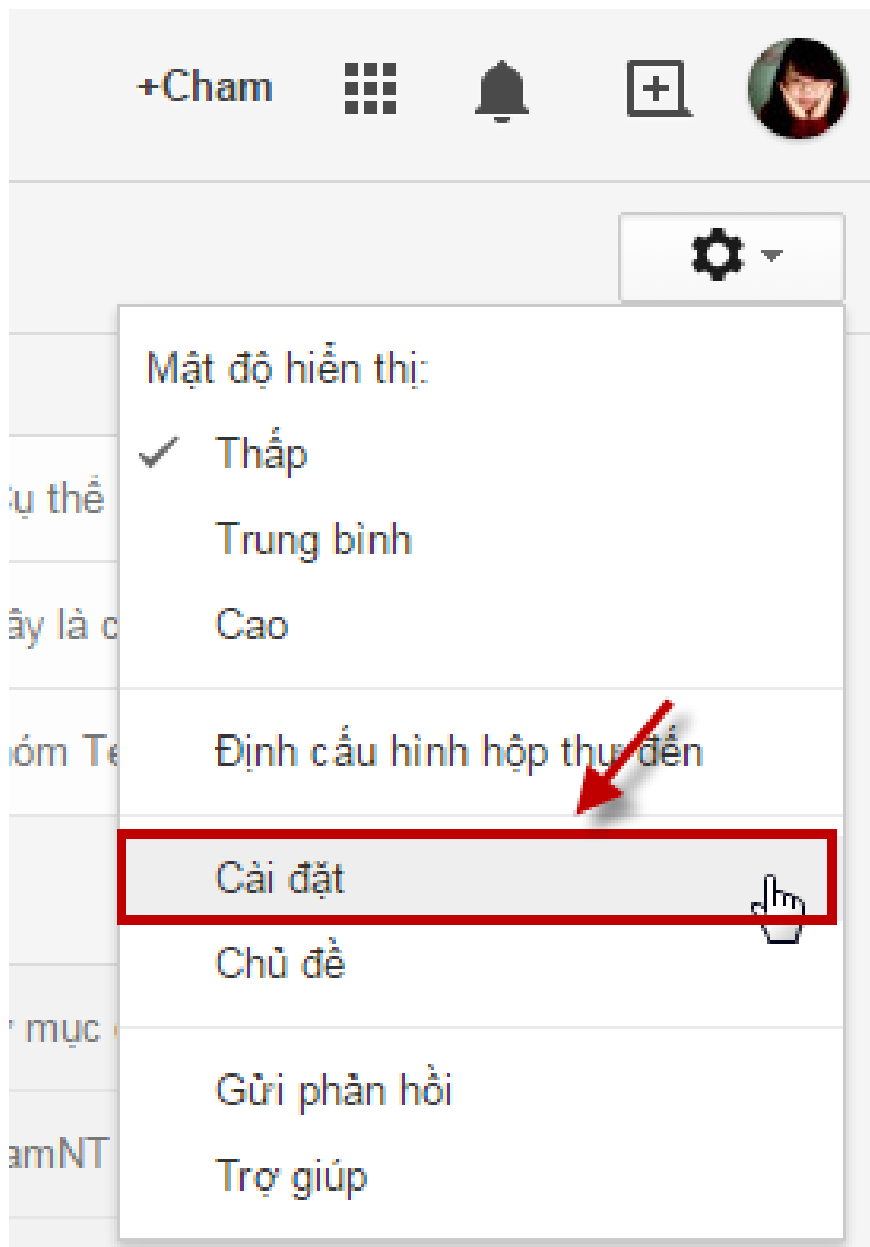

**Step 1:** Log in to your Gmail account.

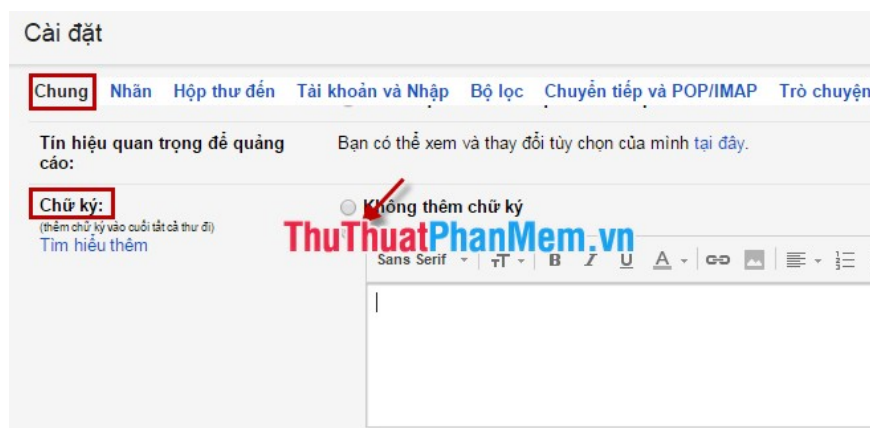

**Step 2:** Click on the settings icon under your account information.

Then you choose **Install** :

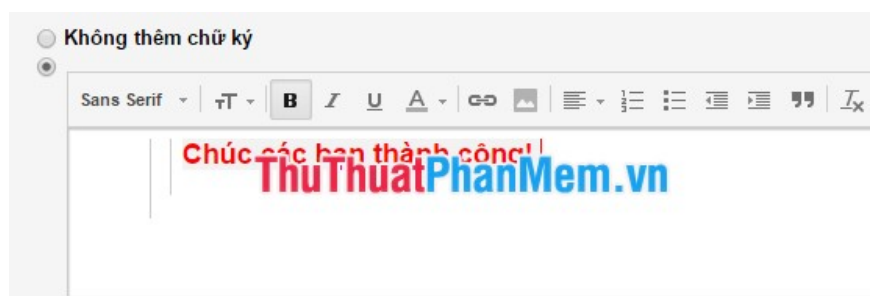

In the **General** tab , drag the mouse to the **Signature** section, select the mouse in the box below the **No signature** to start creating a signature.

**Step 3:** Set your own signature.

At the signature creation frame, you can create your own signature. You can choose the font style, font size, bold, italic, underline, choose the font color .

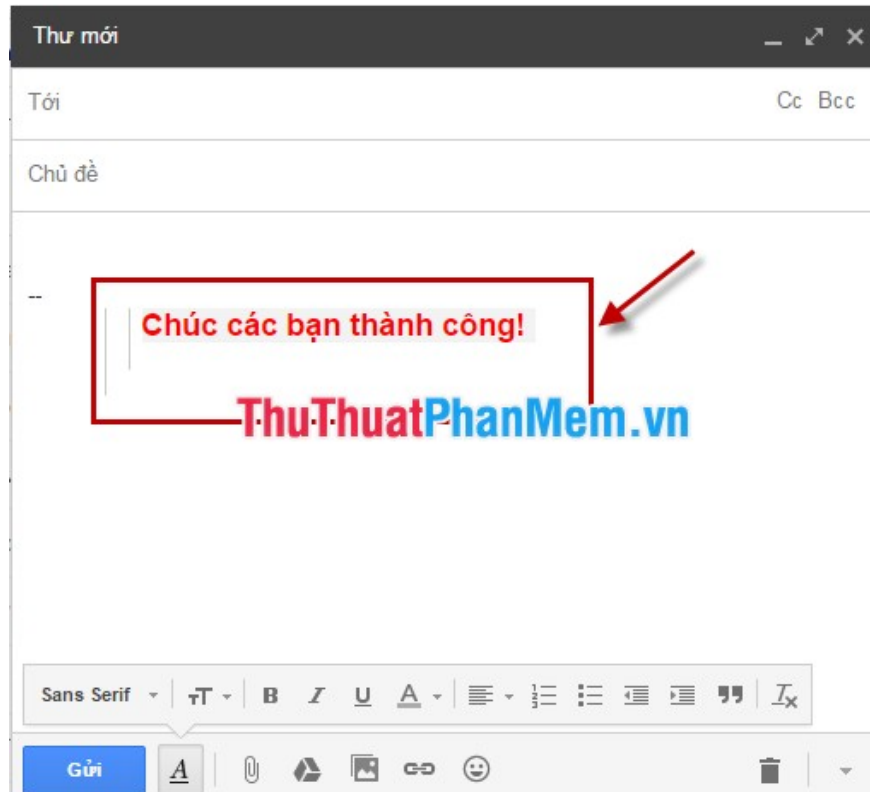

Also you can insert images, or insert links (links) into your signature.

**Step 4:** After setting up the signature, need to save changes. You choose **Save changes** to save the signature you have set.

From now on, when you compose or reply to a message, this signature will always be below the content of the message you wrote.

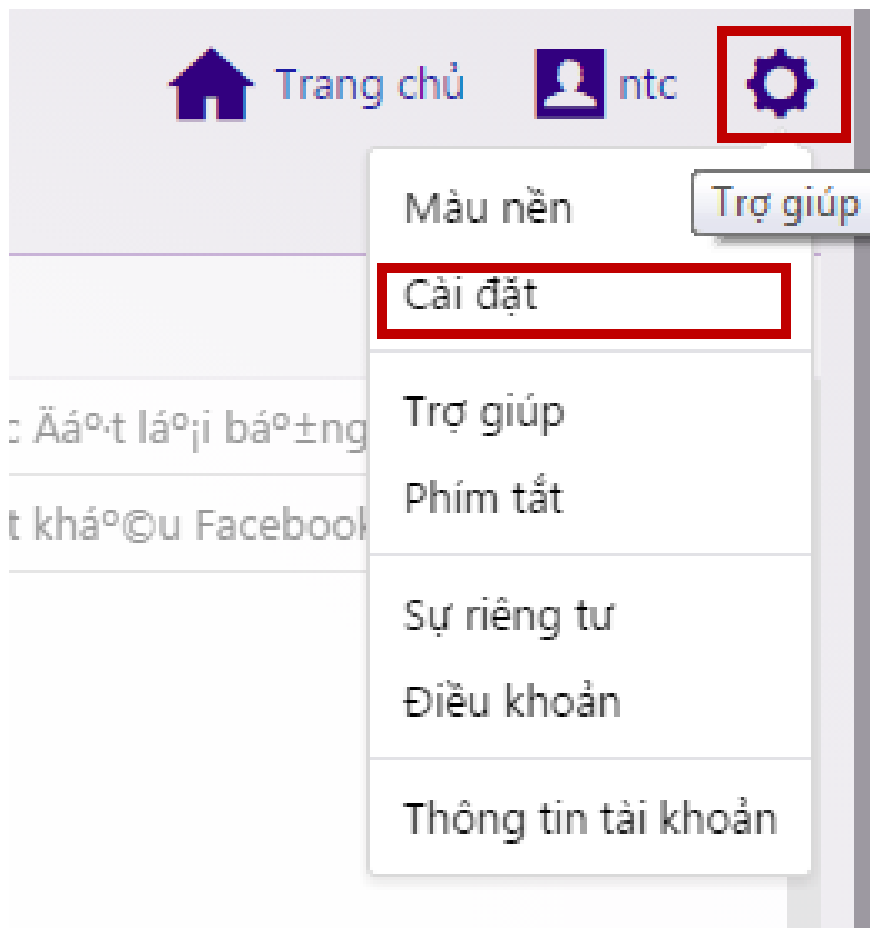

## 2. Instructions on how to create a signature in Yahoo.

**Step 1:** You log into your Yahoo Mail account. Then select **Mail** in the upper right to go to Yahoo mailbox.

**Step 2:** Select the **Help** icon , then select **Settings** .

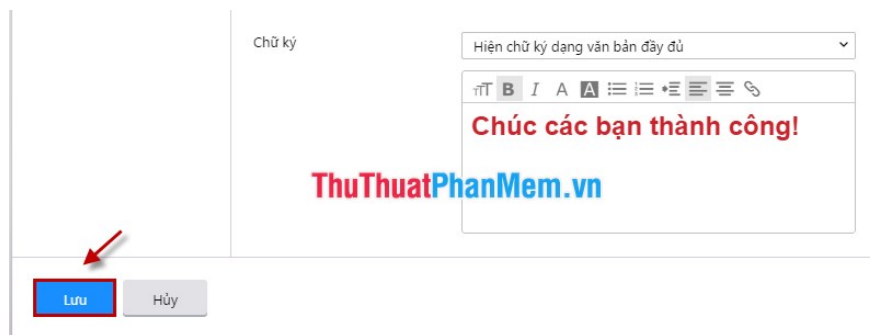

In the **Settings** section select **Write email** .

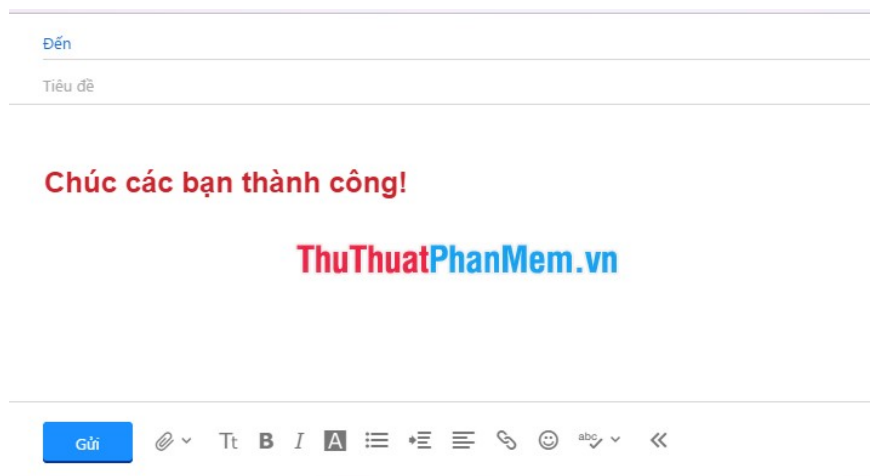

In **Write email** , in the **Signature** section , you select Show *signatures as full text* .

**Step 3:** Then you create your own signature and select the **Save** button to save.

When writing a letter your signature has been displayed below the message body.

From now on, you can create your own signature. Good luck!
