## Instructions for creating mail signatures Yandex Mail

### Step 1:

User login to Yandex Mail account. At the main interface of the service, click on **the gear icon** next to the account name.

Show list with options for account, click on **Personal data, signature, picture** to change personal information and add signature.

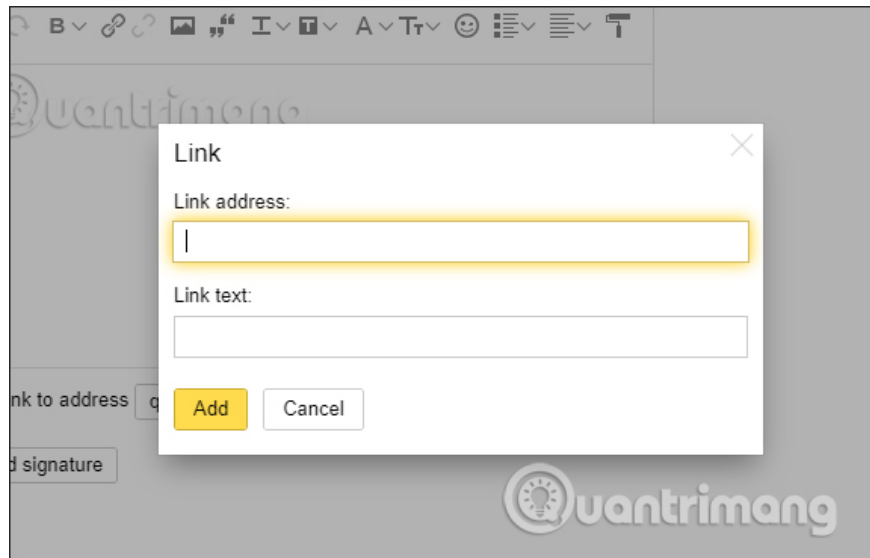

### Step 2:

Display interface to change mail sender information. Scroll down under **Your signatures** section to add **signature** content. Click **the yellow Add signature button** to add a new signature.

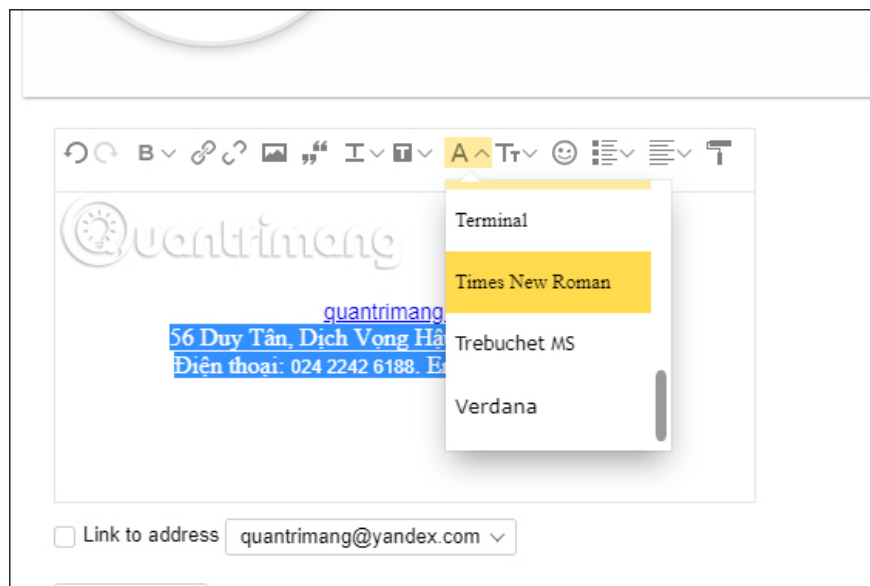

### Step 3:

In the text entry interface, we enter the personal information we want to add to the signature. We click the image icon to insert the image into the signature. If you want to add links to text, click on the link icon. Click Add to add.

Continue the user to add formatting, add color, font, font size for the information in the signature.

#### Step 4:

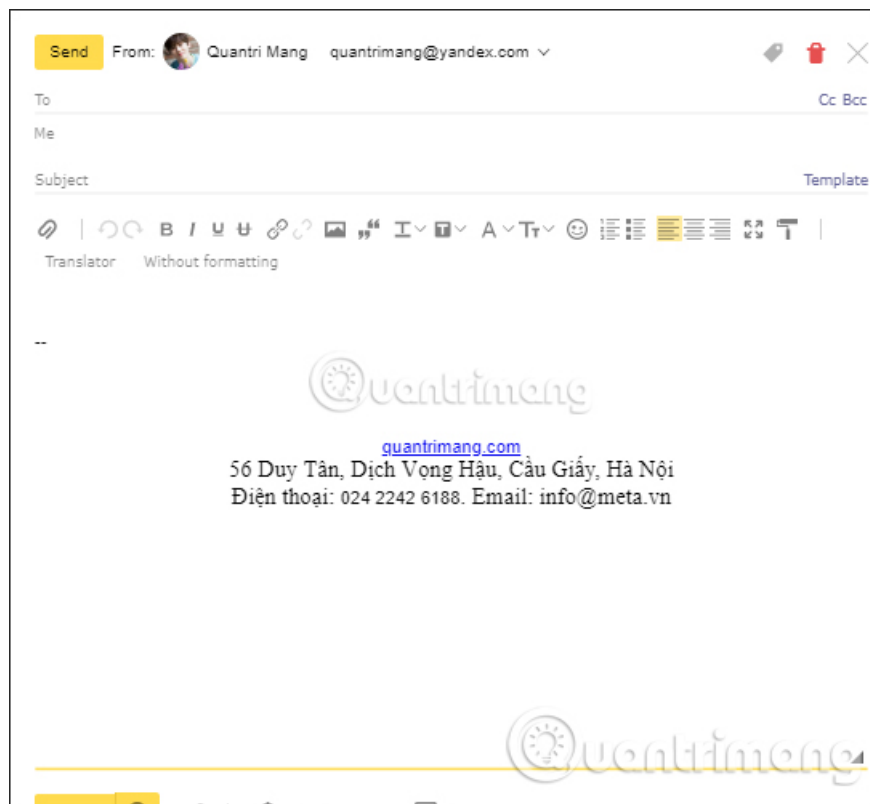

If you want to show your account Yandex Mail in the signature section when sending an email, select Link to address. When the signature is complete, click **the Add signature button** to complete.

We will see the signature displayed as if it is right next to us. If you want to edit, click the pen icon, if you want to delete the signature, click the trash can icon.

Now open the new mailing interface and see the signature displayed at the bottom of the interface.

Creating a signature on Yandex Mail is very simple, giving you more detailed information for people who receive mail so they have more contact methods when needed. Signature content can be changed whenever you need it.

I wish you all success!
